## GRAND-DUCHÉ DE LUXEMBOURG

**REIGNING GRAND DUCHESS.** Charlotte, born 23 Jan. 1896, daughter of William, Grand Duke of Luxembourg, Duke of Nassau (died 25 Feb.

1912) and of Marie-Anne, Princess of Braganza (died 3 July 1942), succeeded 9 Jan. 1919 on the abdication of her sister Marie-Adelaide (died 24 Jan. 1924); married to Prince Felix of Bourbon-Parma on 6 Nov. 1919. *Offspring:* Prince Jean, Hereditary Grand Duke, born 5 Jan. 1921 (married to Princess Joséphine-Charlotte of Belgium, 9 April 1953; *offspring:* Princess Marie Astrid, born 17 Feb. 1954; Prince Henri, born 16 April 1955; Prince Jean and Princess Margareta, born 15 May 1957). Princess Elizabeth, born 22 Dec. 1922 (married, 9 May 1956, Prince François Ferdinand de Hohenberg); Princess Marie-Adelaide, born 21 May 1924 (married, 10 April 1958, Count Charles-Joseph Henckel de Donnersmarck); Princess Marie-Gabrielle, born 2 Aug. 1925 (married, 6 Nov. 1951, Count Knud of Holstein-Ledreborg); Prince Charles, born 7 Aug. 1927, and Princess Alix, born 24 Aug. 1929 (married, 17 Aug. 1950, Prince Antoine de Ligne).

On 4 May 1961 the Hereditary Grand Duke was sworn in as 'Lieutenant du Grand Duc' and representative of his mother as head of state.

The civil list is fixed at 300,000 gold francs per annum, to be reconsidered at the beginning of each reign.

On 28 Sept. 1919 a referendum was taken in Luxembourg to decide on the political and economic future of the country. The voting resulted as follows: For the reigning Grand Duchess, 66,811; for the continuance of the Nassau-Braganza dynasty under another Grand Duchess, 1,286; for another dynasty, 889; for a republic, 16,885; for an economic union with France, 60,133; for an economic union with Belgium, 22,242. But France refused in favour of Belgium, and on 22 Dec. 1921 the Chamber of the Grand Duchy passed a Bill for the economic union between Belgium and Luxembourg. The agreement, which is for 50 years, provides for the disappearance of the customs barrier between the two countries and the use of Belgian, in addition to Luxembourg, currency as legal tender in the Grand Duchy. It came into force on 1 May 1922.

The Grand Duchy was under German occupation from 10 May 1940 to 10 Sept. 1944. The Grand Duchess and the Government carried on an independent administration in London. Civil government was restored in Oct. 1944.

*National flag:* Red, white, blue (horizontal).

*National anthem:* Ons Hemecht (words by M. Lentz, 1859; tune by J. A. Zinnen).

**CONSTITUTION AND GOVERNMENT.** The Grand Duchy of Luxembourg is a constitutional monarchy, the hereditary sovereignty being in the Nassau family. The constitution of 17 Oct. 1868 was revised in 1919, 1948 and 1956. The revision of 1948 has abolished the 'perpetually neutral' status of the country and introduced the concepts of right to work, social security, health services, freedom of trade and industry, and recognition of trade unions. The revision of 1956 provides for the devolution of executive, legislative and judicial powers to international institutions.

The official languages are French and Luxembourgeois.

The country forms one electoral district. An elector must be a citizen (male or female) of Luxembourg and have completed 21 years of age; to be eligible for election the citizen must have completed 25 years of age.

The Chamber of Deputies consists of 21 Christian Social, 17 Socialists, 11 Democrats and 3 Communists (elections of 1 Feb. 1959). Members are elected for 5 years; they receive a salary and a travelling allowance.

The head of the state takes part in the legislative power, exercises the executive power and has a certain part in the judicial power. The constitution leaves to the sovereign the right to organize the Government, which consists of a Minister of State, who is President of the Government, and of at least 3 Ministers.

The Cabinet was, in April 1964, composed as follows:

*Minister of State, President of the Government, Finance:* Pierre Werner (Christian Social).

*Foreign Affairs, Foreign Trade, Armed Forces:* Eugène Schaus (Democrat). *Labour, Social Services, Public Health:* Dr Emile Colling (Christian Social). *Interior, Transports, Arts and Science, Public Worship:* Pierre Gregoire (Christian Social). *Education, Agriculture, Viticulture, Population and Family:* Emile Schaus (Christian Social). *Works and Physical Education:* Robert Schaffner (Democrat). *Justice, Economic Affairs and Tourism:* Paul Elvinger (Democrat).

Besides the Cabinet there is a Council of State. It deliberates on proposed laws and Bills, on amendments that might be proposed; it also gives administrative decisions and expresses its opinion regarding any other question referred to it by the Grand Duchess or the Government. The Council of State is composed of 21 members chosen for life by the sovereign, who also chooses a president from among them each year.

**AREA AND POPULATION.** Luxembourg has an area of 2,586 sq. km (999 sq. miles), and a population (31 Dec. 1962) of 323,971. On 1 Jan. 1962, the capital, Luxembourg, had 73,221 inhabitants; Esch-Alzette, the centre of the mining district, 28,135; Differdange, 17,987; Dudelange, 14,667, and Petange, 11,660.

In 1962 there were 5,137 births, 4,037 deaths and 2,152 marriages.

**RELIGION.** The population is Catholic, save (31 Dec. 1960) 2,951 Protestants, 643 Jews, 1,090 belonging to other denominations and 13,697 without religion (or having given no indication on this subject). The Protestant Church is organized on an inter-denominational basis.

**EDUCATION.** Education is compulsory for all children between the ages of 6 and 15. In 1961–62 the primary schools had 1,180 teachers (595 women) and 30,831 pupils; 26 higher elementary schools, 5 classical schools, 2 commercial and industrial colleges, 2 girls' colleges had together 4,561 pupils, 4 technical schools had 3,621 pupils, 2 teachers' training colleges (male and female) had 105 students; there are also a mining school, a college of agriculture and an academy of music.

*Cinemas* (1962). There were 51 cinemas with a seating capacity of 24,500.

*Newspapers* (1960). There were 5 daily newspapers with an aggregate circulation of 146,000.

**FINANCE.** Revenue and expenditure (including extraordinary) for years ending 31 May (in 1,000 francs):

| | *1958* | *1959* | *1960* | *1961* | *1962*[1] | *1963*[1] |
|---|---|---|---|---|---|---|
| Revenue . . . | 5,272,359 | 5,545,687 | 6,202,069 | 6,813,672 | 6,154,988 | 6,326,873 |
| Expenditure . . | 5,560,981 | 5,888,687 | 5,729,605 | 6,731,753 | 6,254,319 | 6,421,461 |

[1] Estimates.

Consolidated debt at 31 Oct. 1962 amounted to 5,876,755,000 francs (long-term), and 2,990,026,000 francs (short-term).

**DEFENCE.** The Treaty of London of 1867 imposed disarmed neutrality on Luxembourg. Luxembourg has, however, *de facto* abandoned its traditional neutral status and by decree of 30 Nov. 1944 has adopted obligatory military service. The constitutional changes necessitated by this decision were passed by parliament on 28 April 1948.

The armed forces are included in the military organizations set up under the Brussels Treaty (17 March 1948) and the North Atlantic Treaty (4 April 1949). The army consists of 2,000 men. The defence estimates for 1963 amounted to 398m. francs.

**PRODUCTION.** *Agriculture.* Agriculture is carried on by about 47,000 of the population; 135,642 hectares were under cultivation in 1963. The principal crops are oats, potatoes and wheat.

Livestock (May 1963): 3,399 horses, 160,031 cattle, 92,836 pigs, 2,000 sheep.

*Mining.* The mining and metallurgical industries are the most important. In 1962 production (in metric tons) of iron ore was 6,507,176; of pig-iron, 3,596,852; of steel, 4,009,942.

The number of blast furnaces in 1962 was 29, that of steelworks, 7; number of workers in the mining and metallurgical industries, 23,801.

*Electricity.* Power production was 1,435,244,000 kwh. in 1962.

**COMMERCE.** By treaty of 5 Sept. 1944, signed in London, and the treaty of 14 March 1947, signed in The Hague, the Grand Duchy, together with Belgium and the Netherlands, became a party to the Benelux Customs Union, which came into force on 1 Jan. 1948. For further particulars *see* pp. 818 and 1261.

Total trade between Luxembourg and UK (British Board of Trade returns), in £ sterling:

| Re-exports from UK | 21,213 | 142,737 | 41,438 | 43,287 | 62,681 |

**COMMUNICATIONS.** *Roads.* In 1963 there were 2,797 km of state roads and 2,009 km of local roads. Motor vehicles registered in Luxembourg in Dec. 1960, included 37,042 passenger cars, 8,221 trucks, 399 buses, 6,969 tractors and 10,084 motor cycles.

*Railways.* In 1960 there were 393 km of railway (normal gauge).

*Post.* In 1963 there were 2 telephone systems, with 4,440 km of telegraph and telephone line and 51,264 telephones, 97 post offices and 510 telegraph offices.

**CURRENCY.** According to a decree of 14 Oct. 1944, the Luxembourg franc was fixed at par value with the Belgian franc. Belgian bank-notes are received in payment in the Grand Duchy. Notes of the Belgian National Bank are legal tender in Luxembourg. On 31 Dec. 1960 there were 189,612 depositors in the State Savings Bank, with a total of 4,739,154,995 francs to their credit.

# MEXICO

## Estados Unidos Mexicanos

**HISTORY.** Mexico's history falls into four epochs: the era of the Indian empires (before 1521), the Spanish colonial phase (1521–1810), the period of national formation (1810–1910), which includes the war of independence (1810–21) and the long presidency of Porfirio Díaz (1876–80, 1884–1911), and the present period which began with the social revolution of 1911–21 and is regarded by Mexicans as the period of social and national consolidation.

**CONSTITUTION AND GOVERNMENT.** A new constitution, amending the constitution of 1857, was promulgated on 5 Feb. 1917, and amended frequently from 1929 to 1953. Mexico is a federative republic, divided into 29 states each of which has the right to manage its own local affairs. Citizenship, including the right of suffrage, is vested in all nationals who are 18 years old if married or 21 years old if unmarried and having 'an honourable means of livelihood'; women were given equal citizenship and suffrage with men in 1952–53. Thumb-prints are taken of registered voters.

Congress consists of a Chamber of Deputies (162 members) elected for 3 years by universal suffrage, at the rate of 1 member for 170,000 inhabitants, and a Senate of 60 members, 2 for each state and the federal district, elected for 6 years. Senators and deputies are ineligible for re-election until another term has elapsed. Congress sits from 1 Sept. to 31 Dec. During the recess there is a permanent committee consisting of 14 senators and 15 representatives appointed by the respective Houses.

The President is elected by direct popular vote in a general election, and holds office for 6 years. He can never be re-elected. If the office falls vacant during the first 2 years, a general election must be held; if after the first 2 years, then Congress elects a successor who completes the term. The administration is carried on under the direction of the President and a cabinet formed by the secretaries of 15 ministries, the Attorney-General and the heads of 3 departments.

The names of the presidents from 1920 are as follows:

Gen. Alvaro Obregón, 1 Dec. 1920–30 Nov. 1924.
Gen. Plutarco Elías Calles, 1 Dec. 1924–30 Nov. 1928.
Emilio Portes Gil (Provisional),[1] 1 Dec. 1928–4 Feb. 1930.
Pascual Ortiz Rubio, 5 Feb. 1930–3 Sept. 1932.[2]
Gen. Abelardo L. Rodríguez, 4 Sept. 1932–30 Nov. 1934.
Gen. Lázaro Cárdenas, 1 Dec. 1934–30 Nov. 1940.
Gen. Manuel Ávila Camacho, 1 Dec. 1940–30 Nov. 1946.
Miguel Alemán Valdés, 1 Dec. 1946–30 Nov. 1952.
Adolfo Ruiz Cortines, 1 Dec. 1952–30 Nov. 1958.

*President:* Adolfo López Mateos (born in 1910), formerly Minister of Labour, elected 6 July 1958 to serve for 6 years. He polled 6,796,754 votes out of the total 7,485,403 (assumed office on 1 Dec. 1958).

*Minister for Foreign Affairs:* Manuel Tello.

*National flag:* Green, white, red (vertical); the national coat of arms on white.

*National anthem:* Mexicanos, al grito de guerra (words by F. González Bocanegra; tune by Jaime Nunó, 1854).

**LOCAL GOVERNMENT.** Mexico is divided into 29 states, 1 federal district (comprising México City and 12 surrounding villages) and 2 territories, Quintana Roo and Baja California Sur. Each state has its own constitution, government, taxes and laws, and its governor, legislature and judicial officers popularly elected. Inter-state customs duties are not permitted. The President appoints the governors of the territories and the chief of the federal district.

**AREA AND POPULATION.** Mexico comprises 1,967,183 sq. km (761,530 sq. miles), excluding inland waters and uninhabited islands (5,379 sq. km) off-shore.

| 1960 | 239,527 | 1,608,174 | 402,545 | 881,685 | 800,590 |

Crude birth rate, 1960, was 45·5 per 1,000 population; crude death rate, 11·6 (26·1 in 1932); infant mortality rate, 75·5 per 1,000 live births (139·3 in 1933); crude marriage rate, 6·3 per 1,000 population; divorces, 14,964.

For the regulations governing immigration, *see* THE STATESMAN'S YEAR-BOOK, 1951, p. 1234. An Immigration Tax law came into effect 1 Jan. 1951. The net immigration in 1959 included: 1,308 USA subjects; 783 Spaniards; 165 Panamanians; 82 Italians; 51 British; 22 Japanese.

**RELIGION.** The prevailing religion is the Roman Catholic (25,329,498 members at the census of 1950 and currently still about 98% of the total population); with 10 archbishops, 38 bishops, but by the constitution of 1857, the Church was separated from the State, and the constitution of 1917 provided strict regulation of this and all other religions. No ecclesiastical body may acquire landed property, and since 1917 the property of the Church has been held to belong to the State. In the 1920s the Government suppressed the political influence of the priesthood and temporarily (1929–31) closed the churches. An understanding between State and Church was, however, reached, and all churches eschewing public affairs flourish freely. Protestant churches had about 600,000 members in 1962. At the 1960 census 100,750 Jews and 137,208 members of other religions were also numbered.

**EDUCATION.** Primary education is free and compulsory (up to 15 years of age), and secular. Clergy are forbidden to set up primary schools. All private schools must conform to government standards. Military drill is compulsory for boys of 18 years. In the federal district and in the territories education is controlled by the national government; elsewhere by the state authorities.

In 1961 there were 1,644 kindergarten schools, with 5,208 teachers, 218,619 pupils; 33,233 primary schools, 96,955 teachers, 5,247,282 pupils; 1,065 secondary schools, 16,109 teachers, 193,314 pupils; 11 pre-vocational schools, 770 teachers, 5,825 pupils; 35 vocational schools, 1,669 teachers, 13,760 pupils; 99 preparatory schools, 2,682 teachers, 17,429 pupils; 326 commercial schools, 2,942 teachers, 30,111 pupils; 118 teachers' training schools, 4,330 teachers, 35,145 pupils; 154 professional schools, 5,812 teachers, 27,401 pupils; 264 special schools (agricultural, technical, arts and crafts), 3,198 teachers, 42,343 pupils.

In 1958, of the 7,394,699 children between 6 and 14 years of age, 4,573,800 were at school, 74,576 being at post-primary institutions.

There are 21 autonomous universities (10,000 teachers, 65,000 students) and 4 incorporated to the National University at México City (UNAM) having 2,800 students; as well as 8 autonomous university institutes (928 teachers, 3,200 students), plus 9 (7 nurses' and 2 social workers') schools incorporated in UNAM; in all there are 83 faculties enjoying considerable autonomy, and the Free School of Law and the Free School of Homeopathy in México City are granted full registration; there are some others without full registration. The universities include 3 in the Federal District, 2 in Jalisco (one being founded in 1792), 2 in Nuevo León (1933) and one each in Campeche, Coahuila, Chihuahua, Durango, Guanajuato, México State, Michoacán, Morelos, Oaxaca, Puebla, Querétaro, San Luis Potosí, Sinaloa, Sonora, Tamaulipas, Veracruz and Yucatán (1922). They all grant professional degrees, as do certain Institutes in Aguascalientes, Chiapas, Guerrero, Hidalgo, Nayarit, Nuevo León, Tabasco and Zacatecas. Of these the most important is the National University at México City, founded 1552 and reorganized in 1910, and with full autonomy granted in 1920; in 1957 it had 5,116 teachers and 40,140 students. The first university exclusively for women was opened 1 March 1943.

*Cinemas* (1960). Cinemas numbered 1,470 with annual attendance of 217·5m.; more than 50% of the films shown are of Mexican production.

*Newspapers* (1960). There were 197 dailies with an aggregate circulation of nearly 3m.; 31 in México City have about half of the total circulation.

Kneller, G. F., *The Education of the Mexican Nation.* New York, 1951

**HEALTH.** In 1959 Mexico had 21,293 physicians (1 to 1,519 population); 288 state and 162 private internship hospitals and 979 state and 281 private externship hospitals, with together about 72,000 beds.

**JUSTICE.** Magistrates are appointed by Congress for 6 years; but the judges of the Supreme Court can be removed only on impeachment. The courts include the Supreme Court with 21 magistrates, 6 circuit courts with 3 judges each, 6 unitary and 47 district courts with one judge each. The penal code of 1 Jan. 1930 abolished the death penalty, except for the Army, and set up a commission of alienists and other specialists, in place of the courts, to deal with criminal cases (for federal offences); each state appoints its own local magistrates also.

Mexican civil law has the legal remedy known as *amparo*, which gives any injured person whose constitutional rights have, in his opinion, been infringed, right to immediate access to the courts and full remedy, combining the swiftness of the Anglo-Saxon writ of *habeas corpus* and the breadth of remedy available through the injunction.

**FINANCE.** Ordinary receipts and expenditure in 1m. pesos (the peso equals 8 US cents) for calendar years:

| | *1959* | *1960* | *1961* | *1962* | *1963* | *1964* |
|---|---|---|---|---|---|---|
| Revenue . . | 14,163·4 | 10,252·0 | 11,042·0 | 12,320·0 | 13,801 | 15,954 |
| Expenditure . . | 15,326·6 | 10,251·3 | 11.041·5 | 12,319·8 | 13.801 | 15.954 |

In 1964 income tax is to furnish 6,004m. pesos; import duties, 1.736m.; export duties, 759m.; of the expenditure, 6,357m. is to be spent on economic development, 972m. on the public debt service, 1,624m. on defence.

The powers of federal, state and municipal authorities to contract debt are circumscribed by the constitution.

On 1 July 1960 the government set aside a fund of 452·5m. pesos to redeem all outstanding bonds plus interest; by Dec. 1960, 437·3m. pesos of the capital had been paid. Therefore the national debt on 31 Dec. 1962 was (in 1m. pesos): Funded domestic debt, 11,783·2; debts of the states, 48·5; external debt, 257·7, of which railways debt, 234·2.

In 1959 and 1960 the total foreign direct investments in leading concerns were estimated at $1,250·7m. and $1,359·6m. In 1963 the USA gave direct assistance amounting to $160·8m., of which $90·1m. came from the Export-Import Bank. In addition, the International Bank advanced $245·5m. and the Inter-American Development Bank $77·2m.

**DEFENCE.** Supreme command is vested in the President, exercised through the Ministries of Defence (for Army and Air Force) and Marine.

*Army.* The country is divided into 32 zones in which both the regular army and volunteer corps are trained. The Army, in 1963, had 50 battalions of infantry, with 2 infantry fixed companies and 2 infantry brigades, 21 regiments of cavalry, 1 mechanized cavalry regiment, 3 regiments of artillery and 2 coastal batteries. Peace-time strength is 51,000. Military education is provided for officers, at the National Military School, the Application Centre for Army Officers and the War Superior School, as well as in other specialized schools. To combat illiteracy in the Army, schools have been established in every regular and volunteer group.

*Navy.* The Navy consists of 8 frigates, 25 escort vessels, a training ship, 10 patrol vessels, 2 patrol boats, 1 transport, 6 landing craft, 2 tugs and the presidential yacht. In 1962, 20 fleet minesweepers were acquired from the USA. There are 4 naval districts on the Atlantic and 4 on the Pacific coast. Naval personnel in 1963 totalled 6,200 officers and men, including marines. There are also 7 companies of marines on active duty, with 1 regiment (3 companies) in reserve, formed by military service conscripts.

*Air Force.* The Air Force comprises 5 air groups and 10 air squadrons, with a strength of about 3,550 officers and men, and 200 aircraft. These include 15 Vampire jet fighter-bombers, 15 T-33A dual-purpose jet-trainer fighter-bombers, C-47 transports and 30 T-28A piston-engined trainers.

**PRODUCTION.** *Agriculture.* Mexico is well suited for agriculture, but is obliged to import food. Grains occupy 68% of the cultivated land, with about 53% given to maize and about 9% to wheat. Irrigation is needed, 43% of the land having less than 500 mm. of rain a year. In 1960 about 74,132,000 acres of arable land were actively farmed. In 1962, 50,000 tractors were said to be in use.

In 1963 the area irrigated was 5,930,400 acres. Not until there are 17m. acres under irrigation, it is estimated, will Mexico be self-supporting; about 20·3m. acres in all might eventually be brought under cultivation. Soil-conservation work has been started; it includes teaching contour ploughing, terracing, crop rotation, transplanting of the maguey and reafforestation (2·06m. trees planted in 1947–48).

Livestock (1962): Cattle, 24m.; sheep, 6m.; hogs, 10·5m.; horses, 5·9m.; goats, 11·5m.; mules, 3·3m.; donkeys, 3·5m.; poultry, 166·1m.

Meat supply tends to be short, but no restraint is placed upon the export of cattle. Production of hides (2·8m. in 1958) is regarded as disappointing. In 1958 production of meat was 1,193·4m. lb.

Mexico's basic food crop is maize, but output, owing to antiquated methods, has always been low (11·5 US bu. per acre, 1952–56, compared with the US average of 35·7 bu.). Expansion of this crop is the chief aim of Mexican agriculture, balanced by the demand for 'cash crops' for export, such as cotton, sugar, garbanzos (chick peas), bananas, winter vegetables and coffee. Beans and maize must still (1962) be imported.

Principal products in metric tons for 1962 were: Maize, 5·4m.; rice, 429,000; sugar, 1·5m.; wheat, 1·5m.; coffee, 141,000; for 1961: barley, 184,500; beans, 620,000; tomatoes, 363,660; oranges, 666,549; bananas, 280,000 (1960); honey, 25,000. Nine-tenths of the coffee is available for export. Sugar output (1960: 21·7m. metric tons of cane) since 1946 has left surpluses for export. 238,861 metric tons of vegetable oils were produced in 1959.

The Yucatán peninsula produces about 50% of the world's supply of sisal (known locally as henequén); plantations are almost wholly Mexican-owned and the crop was handled exclusively by the state of Yucatán until 20 June

1955, when it was handed over to private enterprise. The 1960 sisal crop amounted to 155,761 metric tons of fibre. Tobacco, 1960, 72,000 metric tons. Banana production started in 1895 in the state of Tabasco, reaching a peak in 1937, when 14,752,424 stems were exported; exports, 1960, 0·6m. stems. The cotton production 1962, was 470,000 metric tons. Wool output, 1959, was 6·6 m. metric tons.

*Forestry.* Timber lands are estimated to extend over 95m. acres (about 60m. of commercial importance), containing pine, spruce, cedar, mahogany, logwood and rosewood. Reckless lumbering has destroyed the timber stands on many watersheds, resulting in spring floods and lowered water supplies in summer. In 1951 federal edicts had halted all timber-cutting in 22 states, regardless of concessions; but they have been resumed under strict supervision. There are 14 forest reserves (nearly 800,000 hectares) and 47 national park forests of 750,000 hectares. In 1960 wood products amounted to 2,397,598 cu. metres; others in metric tons: Chicle, 1,559; pitch, 3,959; resins, 45,795; turpentine, 1,095; barbasco, 8,784; vegetable waxes, 4,320; tan-barks, 831; charcoal, 96,450.

*Fishery.* Coastal fishing is important. The catch in 1959 was 206,370 metric tons, of which 185,210 was edible, the remainder for industry.

*Mining.* Mining is the principal industry in Mexico, but practically 97% of the 31,000 mining properties are foreign-owned. Of the annual output (from 189 active mines and 127 metallurgical plants), measured in pesos, probably less than 10% is Mexican-owned. The discovery of uranium and similar deposits in the states of Chihuahua, Durango, Sonora and Querétaro was announced in Jan. 1959.

Output of silver in 1960 was 21·2% of world production. Silver output (in troy oz.) was 44,526,463 in 1960, 40,342,397 in 1961, 41,249,402 in 1962. Exports, 1960, of bar and refined silver, 1,051 metric tons. About half the production is minted, included a 'token' coin (1949) weighing 1 troy oz. Gold output in 1960, 300,256; 1961, 268,684; 1962, 236,758 fine oz.

Mexico has large coal resources, including high-grade coking coal at Sabinas in Coahuila; output fluctuates, but reached 1·8m. metric tons in 1961. 9,665m. cu. metres of natural gas were produced in 1960. There are large undeveloped reserves of iron ore; the new Peña Colorada field in Colima State seems to be promising. Output, 1962 (in metric tons) of iron ore, 1·15m., containing 60% iron; pig-iron, 850,860; steel ingots, 1·68m. tons.

[1] Exports. [2] Estimate.

Mine production of minerals, 1961 (gold, silver and iron included) was valued at 2,595·4m. pesos. Exports by taxable values, 1961, were 2,502·8m. pesos, of which 65·3% went to USA.

*Oil.* The chief Mexican oilfields (with proved reserves in 1962 of 2,764m. bbls and 353·8m. cu. metres of natural gas) are grouped in 3 widely separated regions. The international companies which discovered and developed them were expropriated by government decree, 18 March 1938. The only foreign concession left—Mexican Gulf Oil—was purchased by the Government in Dec. 1950. The industry is now controlled by Pemex (Petróleos Mexicanos). Pemex is exploiting mainly the rich Poza Rica field (discovered in 1938) and the nearby fields in Escolín and Mecatepec. In 1961, 7 new oil areas were announced. Crude petroleum output (30m. cu. metres in the peak year, 1921) was 16·7m. in 1959; 17m. in 1960; 18·9m. in 1961. The petroleum fields have 20 plants and 14 refineries, employing 44,429 men; refining capacity (1957), 322,000 bbls a day; Mexican refineries handled 115·8m. bbls in 1960, a new high. Oilwells drilled, 1961, were 758, of which 578 were productive. Mexico is obliged to export crude oil and fuel oil (for which prices are relatively low) and import kerosene and petrol at higher prices; imports, 1960, were 1,020,456 metric tons and exports, 2,255,614. Output of crude in 1961 was 116·8m. bbls.

*Industry.* The industrial census of 1956 showed 73,379 manufacturing establishments with invested capital of 30·5m. pesos; 1,742,548 production workers were employed; they earned 3,900m. pesos. In 1960 the economically active population of 11,772,800 was divided into: Agriculture, 58%; industry, 15%: commerce, 8%; transportation, 2·51%.

In 1961 the 2,754 electric generating plants had installed capacity of 3·28m. kw.; consumption, including imports, in 1962 was 12,507m. kwh.

Mexico's national income in 1960 was 120,100m. or 3,441 pesos *per capita*, compared with 1,464 in 1950; 101,800m. in 1958, and 122,000m. in 1959 (respectively 3,147 and 3,663 pesos *per capita*).

**Labour.** In Dec. 1961 the conciliation and arbitration tribunal fixed the minimum wage at 17·5 pesos a day in the Federal District and 17 pesos elsewhere. This applies to non-union workers and those not covered by collective agreements.

**COMMERCE.** Trade for calendar years in 1m. pesos:

| | *1957* | *1958* | *1959* | *1960* | *1961* | *1962* |
|---|---|---|---|---|---|---|
| Imports . . . | 14,439 | 14,108 | 12,583 | 14,831 | 14,233 | 14,288 |
| Exports . . . | 9,312 | 9,524 | 9,451 | 9,786 | 10,026 | 11,262 |

Mexico has ratified the Montevideo treaty establishing the Latin American Free Trade Association.

Export figures for metals and for certain foreign-owned agricultural products are heavily undervalued to reduce export taxes; the Bank of Mexico calculated the undervaluation for 1954 at nearly 20% of the export total.

Of total imports (1m. pesos) in 1962, 9,750 (80%) came from USA, 1,160 from West Germany, 541 from UK, 457 from Canada, 405 from France and 322 from Italy. Leading imports were oil, motor vehicles and parts, maize, machinery and parts, fertilizers and paper.

Of total exports (1m. pesos) in 1962, 6,906 went to USA, 855·4 to Japan, 225.1 to West Germany, 134 to France, 107 to Netherlands and 97 to UK. The main visible exports in 1961 were cotton, coffee, sugar, lead, copper, zinc, fuel oil, cattle, meat, shrimps, sulphur and tomatoes (all above 250m. pesos).

Tourism is Mexico's largest single source of dollar income, amounting to 9,862·5m. pesos in 1961.

Total trade between UK and Mexico, in £ sterling (according to British Board of Trade returns):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK . . | 7,163,979 | 5,654,202 | 6,105,189 | 7,132,648 | 7,477,545 |
| Exports from UK . . | 13,574,555 | 20,514,620 | 16,114,572 | 15,080,764 | 14,545,958 |
| Re-exports from UK . | 145,127 | 160,640 | 135,666 | 118,038 | 308,343 |

**COMMUNICATIONS.** *Shipping.* Mexico has 49 ocean ports, of which the most important are Veracruz and Tampico, both on the Gulf of Mexico. Shipping under Mexican flag on 31 Dec. 1960 including 21 steamships and motor-boats over 5 tons of about 198,899 GRT, and numerous small craft; the oil fleet included 19 tankers and 200 vessels aggregating 230,000 deadweight tons. On 18 Aug. 1960 the first of a fleet of 7 units started a regular service between Gulf ports and USA.

*Roads.* Total length, 31 Dec. 1961, 49,309 km, of which 41,957 km are hard-surfaced highroads and 7,352 km local roads.

Motor vehicles registered at 31 Dec. 1960 included 483,101 passenger cars, 26,126 buses, 293,423 trucks and 24,367 motor cycles.

*Railways.* In 1937 the main railway lines were nationalized. In June 1946 the Government purchased the British-owned Mexican Railway Company for US$8·6m. 32,586,885 passengers and 32·15m. metric tons of freight were carried in 1960. Total railway tracks, 23,487 km. The line Chihuahua–Topolobampo was opened in Nov. 1961, providing a new link from the south-western USA to the Pacific.

*Post.* On 31 Dec. 1961 the federal, state and private telegraph and telephone systems had about 2,700 offices and 188,327 km of telegraph line and 2·86m. km of telephone line. Telephones in use, 31 Dec. 1962, 613,909; private companies operated all except 1,179 instruments; 83·8% were automatic; the Federal District had some 327,600 instruments. The General Bureau of Posts and Telegraphs, 1960, had 4,699 regular offices and 3,446 auxiliary offices.

In 1961 there were 350 broadcasting stations; receiving sets were 6m. Television stations numbered 23; there were about 650,000 receiving sets.

*Aviation.* Mexico has an excellent air service. Each of the larger states has a local airline which links them with main airports, which in turn, furnish service to US, Central and South America and Europe. Forty companies in 1961 maintained services; of these, 9 companies operated irregularly. In 1960 commercial aircraft carried 1·8m. passengers. There are 38 main airports and 819 others.

**MONEY.** The monetary unit is the *peso* divided into 100 *centavos.* On 17 April 1954 the peso was devalued from 11·56 to 8 US cents. The sterling rate, 1960, was at 34¾ buying rate and 35¼ selling rate. There are silver–copper coins for 5 and 1 peso and silver–copper–nickel coins for 50, 25, 20, 10, 5 and 1 centavo; and notes for 10,000, 1,000, 500, 100, 50, 20, 10, 5 and 1 peso.

**BANKING.** The Bank of Mexico, established 1 Sept. 1925, is the central bank; it is modelled on the Federal Reserve system, with large powers to 'manage' the currency. The Government holds 51% of the capital stock.

On 31 Dec. 1959 metallic monetary reserves (gold, silver and foreign exchange forming the required 25% reserve against notes and other demand liabilities) were 2,565m. pesos; 'authorized' holdings of securities, 5,095·3m. pesos; note circulation (outside the Bank of Mexico) was 7,312·4m. pesos. The gold stock has fluctuated from as little as US$28m. in Feb. 1942, to as high as $294m. on 31 Dec. 1945, falling to $42m. in Dec. 1948; sales of commodities to the US stockpiles restored it to $304m. in March 1951; but on 30 June 1954 it was down to $57m.; on 30 Sept. 1963 gold and dollar reserves totalled $523m. Total supply of money, 30 Sept. 1963, was 20,220m. pesos, divided between currency (8,580m.) and bank deposits (11,640m.). Bank deposits are normally smaller than the currency supply.

Owing to the alien ownership of many chief earning assets, money is in short supply and very 'tight'; the discount rate for first-class commercial paper, 1953, ranged between 9·9 and 10·7%, while loans secured on real estate (up to 50% of the value of the property) have cost up to 18% per annum.

**WEIGHTS AND MEASURES.** The metric system was introduced in 1884, and its use is enjoined by law of 14 Dec. 1928, though the old Spanish measures are still in use.

# MONACO

**HISTORY.** Monaco is a small Principality on the Mediterranean, surrounded by the French Department of Alpes Maritimes except on the side towards the sea. From 1297 it belonged to the house of Grimaldi. In 1731 it passed into the female line, Louise Hippolyte, daughter of Antoine I, heiress of Monaco, marrying Jacques de Goyon Matignon, Count of Torigni, who took the name and arms of Grimaldi. The Principality was placed under the protection of the Kingdom of Sardinia by the Treaty of Vienna, 1815, and under that of France in 1861. Prince Albert I (reigned 1889–1922) acquired fame as an oceanographer; and his son Louis II (1922–49) was instrumental in establishing the International Hydrographic Bureau.

*National flag:* Red and white (horizontal).

**REIGNING PRINCE.** Rainier III, born 31 May 1923, son of Princess Charlotte, Duchess of Valentinois, daughter of Prince Louis II, born 30 Sept. 1898 (married 19 March 1920 to Prince Pierre, Comte de Polignac, who had taken the name Grimaldi, from whom she was divorced 18 Feb. 1933). Prince Rainier succeeded his grandfather Louis II, who died on 9 May 1949. He married on 19 April 1956 Miss Grace Kelly, a citizen of the USA. *Issue:* Princess Caroline Louise Marguerite, born 23 Jan. 1957; Prince Albert Alexander Louis Peter, born 14 March 1958. The Prince has a sister, Princess Antoinette, born 28 Dec. 1920.

**CONSTITUTION AND GOVERNMENT.** Prince Rainier III on 28 Jan. 1959 suspended the Constitution of 5 Jan. 1911, thereby dissolving the National Council and the Communal Council. On 28 March 1962 the National Council (18 members) and the Communal Council (16 members) were re-established as elected bodies. Elections took place on 24 Feb. 1963.

On 17 Dec. 1962 a new constitution was promulgated. It maintains the hereditary monarchy, though Prince Rainier renounces the principle of divine right. The supreme tribunal becomes the custodian of fundamental liberties, and guarantees are given for the right of association, trade union freedom and the right to strike. It provides for votes for women and the abolition of the death penalty. The constitution can be modified only with the approval of the elected National Council.

The territory of the Principality is divided into three sections—Monaco-Ville, La Condamine and Monte Carlo—which are administered by a municipal body, elected by vote. Women were given the vote in 1945.

Monegasque relations with France were based on a convention of neighbourhood and administrative assistance of 1951. This was terminated by France on 11 Oct. 1962, but has been replaced by several new conventions signed on 18 May 1963.

**AREA AND POPULATION.** The area is 149 hectares or 368 acres. Population (census 1961), 20,441. The official language is French.

**RELIGION.** There has been since 1887 a Roman Catholic bishop, directly dependent on the Holy See.

**JUSTICE.** The Code Louis, adopted in 1919, is based upon the French codes. There is a Court of First Instance as well as a Juge de Paix's Court. A semi-military police force has taken the place of the 'guard of honour' and troops formerly maintained.

**FINANCE.** The budget (in francs) was as follows:

| | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|
| Revenue | 58,918,510 | 74,821,770 | 80,950,570 | 80,041,620 |
| Expenditure | 56,366,696 | 74,058,271 | 80,850,815 | 87,805,125 |

**TRADE AND COMMUNICATIONS.** The harbour has an area of 47 acres, depth at the entrance 90 ft, and alongside the quay 24 ft at least.

Telephones numbered 10,597 in 1963. Monaco issues its own postage-stamps.

*British Consul-General* (in Marseilles)*:* A. H. B. Hermann; *Consul* (in Nice): G. E. Stockley, CBE.

*Consul-General for Monaco in London:* The Hon. Henry Cubitt (21 Charles St., W.1).

*USA Consul* (in Nice)*:* Paul F. Duvivier.

# MONGOLIAN PEOPLE'S REPUBLIC

## BUGHUT NAIRAMDAKH MONGOL ARAT ULUS

**HISTORY.** The Mongolian People's Republic was, under the name of Outer Mongolia, a Chinese province from 1686 to 1911, an autonomous state under Russian protection from 1912 to 1919 and again a Chinese province from 1919 to 1921. On 31 March 1921 a Provisional People's Government was established which declared the independence of Mongolia and on 5 Nov. 1921 signed a treaty with Soviet Russia annulling all previous unequal treaties and establishing friendly relations. On 26 Nov. 1924 the Government proclaimed the country as the Mongolian People's Republic.

In the treaty between China and the USSR of 14 Aug. 1945 China declared her willingness to recognize the independence of the Mongolian People's Republic (Outer Mongolia) if a plebiscite of the inhabitants indicated their wish for independence. The plebiscite, held on 20 Oct. 1945, showed an almost unanimous vote in favour of independence, and on 5 Jan. 1946 China formally recognized Outer Mongolia as an independent republic. The Sino-Soviet treaty of 14 Feb. 1950 guaranteed the independence of the Mongolian People's Republic.

Relations with the USSR are based on treaties of friendship and mutual aid (27 Feb. 1946), trade (17 Dec. 1957), economic and technical assistance (9 Sept. 1960).

Relations with China are based on treaties of economic and cultural co-operation (4 Oct. 1952), friendship and mutual aid (31 May 1960), commerce (26 April 1961 and 18 March 1963) and a border agreement (26 Dec. 1962).

On 28 Oct. 1961 Mongolia was admitted to the United Nations; the Taiwan representative did not use the veto, 'considering Mongolia an integral part of China'.

**CONSTITUTION AND GOVERNMENT.** According to the fourth constitution adopted on 6 July 1960 power is vested in the *Great People's Khural*, which is elected for a 3-year term by universal suffrage, male and female, over 18 years of age, on the basis of 1 deputy for every 3,500 of the population. It elects from its number 7 members to the Presidium, which carries on current state affairs.

The fifth general elections took place on 19 July 1963; 290 members of the People's Revolutionary Party and 'non-party' candidates were elected on a single list. 42% of the deputies are government officials and intelligentsia, 35% members of state and co-operative farms, 23% workers.

The People's Revolutionary Party had, on 1 April 1961, 43,902 members (including 2,077 candidates); the youth organization, in May 1963, 70,000; the trade unions, in 1960, 87,000.

*National flag:* Red–sky-blue–red (vertical), with a golden 5-pointed star and under it the golden *soyombo* emblem on the red stripe nearest to the flag-pole.

Titular head of the State is the *Chairman of the Presidium of the Great People's Khural and Second Secretary of the Party:* Zhamsarangin Sambu. *Prime Minister and First Secretary of the Party:* Yumzhagin Tsedenbal. *Speaker of the Khural:* Batochiryn Altangerel. The Politburo consists of 7 full and 2 alternate members. *First Deputy Prime Minister and Foreign Minister:* T. Dugersurun; *First Deputy Prime Minister:* Sonomyn Luvsan. *Deputy Prime Minister and Chairman, State Planning Commission:* T. Ragchaa; *Minister of the Army:* Col.-Gen. Z. Lhagvasuren; *Minister of Public Security:* Col.-Gen. B. Dorzh.

**AREA AND POPULATION.** Area, 1,565,000 sq. km (604,095 sq. miles); population (Jan. 1963) 1,018,000. Natural increase, 1959, 2·97%; 1960, 3·27%. Khalka Mongols comprise 76% and Kazakhs 4·5% of the population.

The Republic is administratively divided into a city (Ulan Bator, the capital; population, 218,000) and 18 provinces (*aimak*). The provinces are subdivided into 359 counties (*somon*) and 39 urban districts (*khoron*); the 'household groups' (*bag*) were abolished in Aug. 1959.

**RELIGION.** Buddhist Lamaism is the prevalent form of religion. Two monasteries (in Erdeni Tsu and Ulan Bator) with together 110 resident lamas still exist.

**EDUCATION.** The National Choibalsan University at Ulan Bator had, in 1961, 2,500 students (700 of whom studied medicine) and 40 Russian and 160 Mongolian teachers. An agricultural institute has 700 students; a teachers' college, 500. An Academy of Sciences, founded in 1953, was reorganized and expanded on 22 May 1961.

In 1961 there were 429 elementary and 15 secondary and vocational schools and 5 higher educational institutions. During 1958–60 compulsory elementary education was extended to the rural area; a 7-year curriculum is to be applied to the whole country by 1965 when the number of pupils is to reach 163,200 (124,200 in 1961, including 5,600 academic students and 8,900 secondary technical students).

In 1946 the Mongolian alphabet was replaced by one based on Russian.

*Newspapers* (1964). There were 30 newspapers and 20 magazines, with an alleged total circulation of 600,000. The Party daily paper *Unian* ('Truth') had a circulation of 82,000.

**HEALTH AND WELFARE.** There were, in July 1961, 870 doctors and 8,500 hospital beds in the country. Old-age and disablement pensions vary from 125 to 800 *tughriks* per month.

**PRODUCTION.** The Mongols are mainly herdsmen, and in 1958 were estimated to have 2·4m. horses, 864,000 camels, 2m. cattle, 12·6m. sheep and 5·6m. goats. Pastures occupy 84% of the total area, forests 10·5%. In July 1963 there were 354 agricultural and livestock-raising co-operatives, 29 state farms and 37 machine and breeding stations. The average farm has 180 hectares of arable land and 50,000 head of livestock.

The first 5-year plan (1948–52) did not involve collectivization but stressed formation of producer's stockbreeding associations. The second 5-year plan (1953–57) and the 3-year plan (1958–60) continued this emphasis. The third 5-year plan (1961–65) envisages total investments of 4,460m. *tughrik*, of which the USSR will provide one-third.

The sown acreage in 1961 was stated to have been 448,000 hectares; the crop was 330,000 tons of wheat; targets for 1965: 753,000 hectares sown, 500,000 tons of wheat. In Feb. 1963 about 6,000 tractors and 2,000 combine-harvesters were in use.

*Forestry.* Forests, chiefly larch, cedar, fir and birch, occupy about 160,000 sq. km. Their exploitation is being prepared.

*Mining.* There are some goldmines and other mineral deposits of unascertained value. Tungsten and uranium are said to be exported to the USSR. Coalpits at Nalaikha, Bain Bulak, Undur Khan, Yugodsyr and Dzun Bulak are being developed. Coal production in 1954 was 300,000 tons; 1961, 665,000 tons; 1962, 771,000 tons; target for 1965, 1·3m. tons. Oil is produced in the eastern Gobi desert near Sain Shanda; production, 1960, 28,600 metric tons.

*Industry.* In 1960 industry accounted for one-third of the total production value.

Ulan Bator power station produced 106·4m. kwh. in 1960; target for 1965, 438·4m. Other power stations are at Tozhgoitod, Sukhe Bator and Dharhan.

**FINANCE.** The State budget has developed as follows (in 1m. *tughrik*):

| | *1957* | *1958* | *1959* | *1960* | *1961* | *1962*[1] |
|---|---|---|---|---|---|---|
| Revenue . . | 643·2 | 770·3 | 815·3 | 1,053·8 | 1,222·9 | 1,356·9 |
| Expenditure . . | 600·3 | 712·3 | 809·9 | 980·5 | 1,217·1 | 1,351·9 |

[1] Estimates.

Soviet loans to Mongolia over the years 1947–60 amounted to some 2,000m. old roubles; Chinese credits total nearly two-thirds of this sum. On 13 April 1961 the USSR granted new credits for the implementation of the third 5-year plan, totalling 122m. new roubles (= 543m. old roubles); further credits have been given by Poland (US$10m.), China (US$50m.) and Czechoslovakia.

**TRADE.** Foreign trade has been a state monopoly since Dec. 1930. A ministry of foreign trade was set up in 1958. The main exports are cattle, horses, wool, hides, meat and butter; value, 1960, about £25m. Imports (about 60% consumer goods), 1960, about £34·6m. Over 80% of the exports went to the USSR, which supplied about 60% of the imports. Imports from China amounted to about 20%, exports to China to about 4%.

**COMMUNICATIONS.** Railways (total track, 1,400 km in Dec. 1963) connect Ulan Bator with Ulan Ude (Transiberian railway), Peking (Ehrlien-Chining line), Nalaikha and Altan Bulak; and Choibalsan (formerly Bayan Tumen) with Borzya on the Trans-Siberian railway. In 1960 the railways carried 56·4m. passenger-km and 3,036m. ton-km of freight.

Motorable roads had a length of 8,600 km in mid-1960.

There are steamer services on the Selenga and Orkhon rivers.

The air service between Ulan Ude and Ulan Bator is a link of the Moscow–Irkutsk–Peking service. A Mongolian airline is operating on the flights Ulan Bator–Peking and Ulan Bator–Irkutsk.

Length of telegraph and telephone lines in 1958 was 13,640 km. There were 186 post offices, 25 telegraph offices and 31 telephone exchanges in the country. Number of telephones (1962), 10,525.

There is a wireless station at Ulan Bator; receiving sets in 1961 numbered 25,000.

**MONEY.** The currency, introduced in 1925, is based on the *tughrik*, divided into 100 *mongo*. The *tughrik* was at parity with the pre-1961 rouble; its parity is now 22·5 *kopeks*.

*Ambassador in London:* Delegjunain Balzhinnyam (resident in Warsaw).

# MOROCCO

## AL-MAMLAKA AL-MAGHREBIA

**HISTORY.** From 1912 to 1956 Morocco was divided into a French protectorate (established by the treaty of Fez concluded between France and the Sultan on 30 March 1912), a Spanish protectorate (established by the Franco-Spanish convention of 27 Nov. 1912) and the international zone of Tangier (set up by France, Spain and Great Britain on 18 Dec. 1923).

On 2 March 1956 France and the Sultan terminated the treaty of Fez; on 7 April 1956 Spain relinquished her protectorate, and on 29 Oct. 1956 France, Spain, Great Britain, Italy, USA, Belgium, the Netherlands, Sweden and Portugal abolished the international status of the Tangier Zone.

**REIGNING KING.** **Hassan II**, succeeded on 3 March 1961, on the death of his father Mohammed V, who reigned 1927–61. The royal style was changed from 'His Sherifian Majesty the Sultan' to 'His Majesty the King' on 18 Aug. 1957.

The King holds supreme civil and religious authority: the latter in his capacity of Emir-el-Muminin or Commander of the Faithful. He resides usually at Rabat, but occasionally in one of the other traditional capitals, Fez (founded in 808), Marrakesh (founded in 1062), Meknès and Tangier (which has become his summer capital).

**GOVERNMENT AND CONSTITUTION.** The constitution was approved by referendum on 7 Dec. 1962 (3,919,737 for, 113,199 against, 72,722 void) and was promulgated on 14 Dec. 1962. The Kingdom of Morocco is a constitutional monarchy with a legislature of two Houses. The House of Representatives is elected directly by the people, and the House of Counsellors is elected by members of local authorities and by bodies such as trade unions, chambers of commerce and industry, etc. The King, as sovereign head of State, appoints the Prime Minister and other Ministers, has the right to dissolve Parliament and approves legislation.

*National flag:* Red, with a green 5-pointed star in the centre.

On 13 Nov. 1963 the following Cabinet was appointed:

*Prime Minister:* Hadj Ahmed Bahnini.

*Minister of State for Mauritania and the Sahara:* Fal Ould Omeir. *Foreign Affairs:* Ahmed Réda Guédira. *Minister-Delegate to the Prime Minister:* Abdelhadi Boutaleb. *Justice:* Abdelkader Benjelloun. *Defence:* Mahjoubi Aherdan. *Interior:* Abderrahman Khatib. *Education:* Dr Youssef Ben Abbes. *Public Works:* Dr Mohamed Benhima. *Posts:* Mohamed El Fassi Halfaoui. *Tourism and Fine Arts:* Moulay Ahmed Alaoui. *Labour:* Thami Ouazzani. *Health:* Dr Larbi Chraibi. *Wakfs and Islamic Affairs:* Hadj Ahmed Bargach. *Economy, Finance and Agriculture:* Driss Slaoui.

*Personal Representative of the King:* Ahmed Balafrej. *Minister of the Crown:* Mokhtar Soussi. *Minister for the Royal Household:* Mohamed Mammeri.

The country is administratively divided into 16 provinces and 2 urban prefectures. The provinces are: Rabat, Meknès, Fez, Taza, Oujda, Al-Homina, Nador, Ouarzazate, Marrakesh, Agadir, Casablanca, Ksar-es-Souk, Beni-Mellal, Tangier, Tetuan, Tarfaya. The prefectures are: Casablanca and Rabat-Salé.

**AREA AND POPULATION.** As the eastern and southern boundaries of Morocco have not been delimitated, no exact figure can be given, but the total area is officially given as 443,680 sq. km (171,305 sq. miles).

The population at the census of June 1961 totalled 11,598,070, of whom 3·4m. were urban and 8·2m. rural; foreigners numbered 400,000. Estimate, June 1963, 12·5m. (50·1% male, 49·9% female), including 300,000 foreigners.

The principal towns are Casablanca (961,000 inhabitants), Marrakesh (242,000), Fez (216,000), Tangier (142,000), Rabat (225,000), Meknès (177,000), Oujda (129,000) and Tetuan (101,000). Agadir was devastated by an earthquake on 1 March 1960.

The official language is Arabic; French and Spanish are considered subsidiary languages.

**RELIGION.** Islam is the established state religion. The majority of the Moroccans are Sunni Moslems of the Malekite school. The French and Spanish settlers are Roman Catholics under the Archbishop of Rabat. The once large Jewish population is diminishing (180,000 in 1961).

**EDUCATION.** In 1959 a standardization of the various school systems (French, Spanish, Israeli, Moslem, etc.) was begun. By the end of 1960 about half of the schools maintained by the Alliance Israélite had been taken over by the Ministry of Education. Education has been made compulsory from the age of 7 to 13.

In 1956 the ethnic composition of the schoolchildren was as follows: Moroccan Moslems, 214,616 boys and 92,372 girls; Moroccan Jews, 18,339 boys and 18,619 girls; French, 37,558 boys and 32,173 girls; foreigners, 5,759 boys and 5,292 girls. In 1961 over 1m. children attended school.

In 1961 there were about 18,000 primary school teachers (3,000 of them being French) and 1,500 students were attending teachers' training colleges.

The University at Rabat had 4,933 students in 1961. A new university was opened in Fez in Nov. 1961.

*Cinemas* (1962). There are about 160 cinemas with a seating capacity of 90,000.

**JUSTICE.** A uniform legal system is being organized, based mainly on French and Islamic law codes and French legal procedure. The judiciary consists of a Supreme Court, courts of appeal, regional tribunals and magistrates' courts.

**FINANCE.** The ordinary budget (in 1m. dirhams) balanced at 1,616 in 1961, 1,822 in 1962 and 2,040 in 1963. The investment budget provided for 451m. in 1961, 505m. in 1962 and 720m. in 1963. The main items of revenue in 1961 were (in 1m. dirhams): Direct taxation, 248·4; customs, 329·55; indirect taxation, 383·7; monopolies, 102·75. The public debt in 1962 amounted to 160m. dirhams; in 1961 to 169m. dirhams.

**DEFENCE.** *Army.* The Army consists of volunteers, numbering 40,000 officers and men. Its equipment is of French, American and (since 1962) Soviet origin. The motorized *Groupe léger de sécurité*, created in 1959, is the first completely modernized unit.

*Navy.* The Navy includes 1 corvette, 2 patrol vessels, 1 seaward patrol craft and 1 landing craft acquired from France.

*Air Force.* The Air Force, formed in Nov. 1956, received from the USSR 12 MiG-17 fighter-bombers and 2 MiG-15 UTI jet-trainers in 1961, followed by 2 Il-28 light jet-bombers. Earlier equipment includes a Heron light transport and various light observation, liaison and training aircraft and helicopters.

The last 2 American air bases, at Nouasseur and Kenitra, were relinquished at the end of Dec. 1963.

**PRODUCTION.** A 5-year plan (1960–64) aims at the intensification of technical development, a modernization of agriculture and a strengthening of the home market of manufactured goods. An agreement with France, signed on 7 July 1962, promises French aid to the value of 300m. new francs.

*Agriculture.* Agriculture is by far the most important industry, on which 70% of the population exists. The principal crops are cereals, especially wheat and barley; beans, chickpeas, fenugreek and other legumens; canary seed; cumin and coriander; linseed; olives; almonds and other fruits, especially citrus. The almost universal wild palmetto is put to various uses, including the manufacture of *crin végétal.* The trees include cork (covering 310,000 hectares: production in 1957–58, 26,500 tons), cedar, arar, argon, oak and various conifers. Wine production, 1961, 2m. hectolitres.

Tizra wood is exported for tanning purposes. Production of esparto grass, 1957–58, was 159,000 tons. Stock-raising is an important industry.

In 1957–58, out of a total area of 41,649,000 hectares, 24,019,000 hectares were under cultivation, including 4,898,000 hectares of arable land, 542,900 hectares of vine and olive plantations, 2,763,100 hectares of fallow land and 5,325,000 hectares of forests. Effective irrigation affects 59,000 hectares.

Production (in 1,000 metric tons) in 1962 (and 1961): Winter wheat, 962 (445); summer wheat, 325 (162); barley, 1,185 (476); maize, 329 (106); rice, 23 (13); citrus fruit and vegetables, 630.

Livestock (1957–58): Camels, 212,792; horses, 88,592; mules and asses, 1,126,759; cattle, 2,051,291; pigs, 45,719; sheep, 10,423,906; goats, 5,404,360.

*Mining.* The principal mineral exploited is phosphate, the output of which (under a state monopoly) was 8·16m. metric tons in 1962. Other important minerals (in 1,000 metric tons) are (1962): Coal (410), iron ore (1,149), manganese (566·6), lead (99), cobalt (14·2), crude petrol (80), zinc (38); barite, 99; silver, 858,469 troy oz.

*Fishing.* The coasts abound in fish. The chief fishing centres are Agadir, Safi and Casablanca. In 1961 there were 2,708 fishing vessels of 15,820 tons. Exports of tinned fish in 1961: 32,359 tons of sardines (9·93m. dirhams), 6,235 tons of mackerel (7·86m. dirhams), 3,565 tons of tunny (1·21m. dirhams).

*Power.* The existing power-plants produced 1,350m. kwh. in 1961, of which 92% were hydro-electric.

**COMMERCE.** Imports and exports were (in 1m. dirhams):

| | *1957* | *1958* | *1959* | *1960* | *1961* |
|---|---|---|---|---|---|
| Imports | 1,490 | 1,684 | 1,456 | 2,088 | 2,088 |

| Imports | 2,152 | 2,117 | 2,149 | 2,074 | 2,502 |
| Exports | 8,452 | 8,074 | 9,991 | 10,318 | 11,216 |

[1] Southern zone only.

Main imports, 1960: Sugar, 358,000 metric tons; petrol products, 724,000 metric tons; agricultural tractors, 1,443; passenger cars, 13,688; industrial vehicles, 2,500. Main exports, 1960 (in 1,000 metric tons): Phosphates, 7,583; barley, 29; manganese, 387; citrus 331; lead, 116; dry vegetables, 146.

A royal proclamation of 30 Aug. 1959 abrogated the former economic status of Tangier and integrated the zone in the kingdom. However, Tangier was declared a free port from 1 Jan. 1962.

Total trade between Morocco and UK in £ sterling (British Board of Trade returns):

| | *1961* | *1962* | *1963* |
|---|---|---|---|
| Imports to UK | 12,759,102 | 12,109,494 | 10,170,235 |
| Exports from UK | 5,047,040 | 4,649,941 | 5,178,353 |
| Re-exports from UK | 100,736 | 132,142 | 141,539 |

**COMMUNICATIONS.** *Shipping.* In 1960, 19,015 vessels of 26,613,000 net tons entered and cleared the ports of Morocco. The merchant navy had 37 ocean-going vessels of 75,230 tons on 1 Jan. 1961.

*Railways.* In 1962 there were about 1,810 km of railways, of which 760 km were electrified. The principal standard-gauge lines are from Casablanca eastward to the Algerian border, forming part of the continuous rail line to Tunis; Casablanca to Marrakesh with 2 important branches, one eastward from a point slightly north of Settat (Sidi el Aïdi) to Oued Zem tapping the Khouribga phosphate mines, the other westward from Ben Guerir to the port of Safi passing about midway through the phosphate district of Youssoufia (formerly Louis Gentil); the line Oujda–Bou Arfa, serving the manganese mines of Bou Arfa and the coalmines of Jerada.

In 1960 Moroccan railways handled 476·9m. passenger-km and 1,756·9m. ton-km.

*Roads.* In 1962 there were about 6,800 km of bitumenized and metalled main and 6,400 km of secondary roads and 37,600 km of tracks.

At the end of 1960 there were in use 124,863 private cars, 46,804 commercial vehicles and 12,968 motor cycles.

*Post.* A Sherifian service under French management existed in the Southern Zone. European letters and small parcels are conveyed by air, without surcharge; overland through Spain, and by daily steamers between Algeciras and Tangier and increasingly by air.

The total length of telegraph lines open to the public in the Southern Zone on 31 Dec. 1952 was 26,039 km. All important centres in the Northern Zone are connected by land lines. Communication between Morocco and Europe is maintained by cables between Casablanca and Brest, Tangier–Casablanca–Le Havre, Tangier–Gibraltar, Tangier–Cádiz, Larache–Cádiz *via* Algeciras.

Telephone systems exist in all towns of the Southern Zone, and there is a complete urban and inter-urban connexion of 270,914 km total length. Urban services exist in the principal towns of the Northern Zone (5,231 km line) and at Tangier. There is telephone communication between Tangier and Madrid and between Tangier and Lisbon.

Telephone subscribers totalled 132,879 at the end of 1962; of these, 53,167 were in Casablanca, 19,481 in Rabat and 9,847 in Tangier.

*Aviation.* There are 19 airfields, of which Casablanca–Arfa and Casablanca–Nouaceur are the most important. The Royal Air Maroc line in 1960 carried 164,706 passengers on international and interior flights. Total international air services in 1960 comprised 104,713 arrivals and 123,143 departures.

**CURRENCY.** In Oct. 1959, a national currency was introduced. Its unit is the *dirham* (abbreviated DH), equalling 100 French Moroccan francs (1 new French franc = 1·025 dirham; 1 dirham = 0·9756 new French franc, 20 US cents, 1*s.* 6*d.*). Notes: 5, 10, 50, 100 dirhams; coins: 0·02, 0·05, 0·10, 0·20, 0·50, 1 dirham. At the end of 1960 the total circulation of money was 950m. dirhams.

**BANKING.** The bank of issue is the Banque du Maroc in Rabat. Other important institutions are the Banque Marocaine du Commerce Extérieur (Casablanca), the Banque Nationale pour le Développement Economique (Rabat) and the Caisse de prêts immobiliers (Casablanca). There are 23 other banks in Casablanca, 3 in Tangier and 1 each in Tetouan, Fez, Kenitra, Meknès, Oujda and Rabat.

**WEIGHTS AND MEASURES.** The metric system of weights and measures is the sole legal system.

# MUSCAT AND OMAN

## SULTANAT MASQAT WA OMAN

THE independent Sultanate of Muscat and Oman is situated at the easterly corner of Arabia. Its seaboard is nearly 1,000 miles long and extends from the Ras al Khaimah Shaikhdom near Tibat on the east side of the Musandum Peninsula to Ras Dharbat Ali, which marks the boundary between Muscat and Oman and the territory of the Sultan of Kishen and Socotra, which is within the Eastern Aden Protectorate. A small strip of the coast on the east side of the Musandum Peninsula from Dibah to Khor Kalba is administered by 2 shaikhs of Trucial Oman, independent of the Sultan. The sultanate extends inland to the borders of the Rub' al Khali ('Empty Quarter' of the Great Desert). Physically Muscat and Oman consists of three divisions—a coastal plain, a range of hills and a plateau. The coastal plain varies in width from 10 miles near Suwaiq to practically nothing in the vicinity of Matrah and Muscat towns, where the hills descend abruptly into the sea. The mountain range runs generally from north-west to south-east. It reaches its greatest height in the Jebel Akhdhar region, where heights of over 9,000 ft occur. The hills are for the most part barren but in the high area round Jebel Akdhar they are green and there is considerable cultivation. The plateau has an average height of 1,000 ft. With the exception of oases there is little or no cultivation. North-west of Muscat the coastal plain, known as the Batinah, is fertile and prosperous. The date gardens extend for over 150 miles. The Batinah dates are famous for their flavour; they ripen in the first half of July, well before the Basra dates. The coastline between Muscat and the province of Dhofar is barren. The fertile province of Dhofar lies on the south-eastern coast of Arabia. Sugar-cane is grown and cattle can be raised. Its principal town is Salalah on the coast, while Murbat is the port.

In the valleys of the interior, as well as on the Batinah, date cultivation has reached a high level, and there are possibilities of agricultural development were the water supply more certain. The 1962 crop of dates amounted to 7,000 tons, most of which was exported to India. Camels are bred in large numbers by the inland tribes. There are no industries of any importance.

*Area and population.* The area has been estimated at about 82,000 sq. miles (212,000 sq. km) and the population at 550,000, chiefly Arabs, but there is a strong infusion of negro blood, especially along the coast. The town of Muscat is the capital (population, 6,208). Formerly of some commercial importance, it has now lost most of its trade to the adjacent town of Matrah (population, 14,119), which is the starting point for the trade routes into the interior. The population of both towns consists mostly of Indians, Baluchis and Negroes, with few pure Arabs resident there. The merchant community consists chiefly of Khojas (from Sind and Kutch) and Hindus (mostly from Gujerat and Bombay). Other ports are Sohar, Khaburah and Sur; none, however, affords shelter from bad weather.

The port of Gwadur and a small tract of country on the Balúchistán coast of the Gulf of Oman were handed over to Pakistan on 8 Sept. 1958.

*Ruler:* The present Sultan is Said bin Taimur (born 13 Aug. 1910), who succeeded his father Taimur bin Feisal, on 10 Feb. 1932, as the 13th of his dynasty. The Sultan has one son, Qabus, born in Dec. 1940.

*National flag:* Red.

The treaty of friendship, commerce and navigation between Britain and the Sultan, signed on 20 Dec. 1951, reaffirmed the close ties which have existed between the British Government and the Sultanate of Muscat and Oman for over a century and a half.

*Finance.* Annual revenue is about Rs 110 lakhs, derived mostly from customs duties.

*Defence.* The air force, formed in 1959, has 5 armed Provost piston-engined trainers, 2 Pioneer liaison aircraft and 4 Beaver light transports for internal security duties.

*Commerce.* Trade is mainly with India, Pakistan and the Persian Gulf States. In the fiscal year ending 31 March 1962 imports amounted to £3,703,000 (1961: £3,378,830). Chief imports in 1960–61 were: Rice, Rs 8,705,300; wheat and wheat flour, Rs 2,196,300; sugar, Rs 1,441,100; cement, Rs 718,900; vehicles and accessories, Rs 940,800; cigarettes and tobacco, Rs 578,500; coffee, Rs 2,474,300. Importation of alcoholic liquor is forbidden by law. Principal exports in 1960–61 were: Dates, Rs 4,687,500; fish and fish products, Rs 661,700; limes and fruits, Rs 1,766,500; re-exports of cotton piece-goods, Rs 10,900; firewood, Rs 53,300; vegetables, Rs 20,200; hides, Rs 7,600; goat hair and wool, Rs 4,000. The export of fish has declined considerably over the last few years.

In 1961 the main importing countries were: India (Rs 79,98,100), Burma (Rs 72,38,000), UK (Rs 71,42,900) and Thailand (Rs 12,70,700). The UK imports should be about 40% more as duty-free imports, *e.g.*, for Muscat government departments, are not included.

Trade with UK (British Board of Trade returns, in £ sterling):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK | 10,028 | 15,250 | 14,684 | 79,652 | 2,235 |
| Exports from UK | 1,462,217 | 709,878 | 1,110,401 | 1,134,417 | 1,240,172 |
| Re-exports from UK | 17,471 | 7,102 | 12,916 | 11,020 | 15,534 |

*Shipping.* The port of call on the main route Bombay–Basra is Muscat, where, in 1962, 208 ocean-going ships entered and cleared. The mail service is weekly in either direction.

*Roads.* Inland transport is by pack animals. The road connecting Muscat with Matrah continues as a motorable track up the coast to Khor Fakkan *via* Kalba at the far end of the Batinah, a distance of about 260 miles. Hajar, Boshar and Qariyat are also connected by motorable tracks with Matrah. Cars run frequently between Muscat and the towns in the Batinah, *via* Shinas and the Wadi al Khor to Sharjah, and up various *wadis* to the interior. None of these routes should be used by foreigners without previous permission.

*Post.* A post office operates in Muscat under the supervision of the General Post Office in London. Cable and Wireless, Ltd maintain a telegraph office at Muscat and an automatic telephone system which includes Matrah (160 telephones); telephone connexion with Bahrain now serves to establish communication with other parts of the world.

*Aviation.* Gulf Aviation run a twice-weekly service from Muscat to Bahrain *via* Sharjah and Doha. The airport at Baital Falaj is 5 miles from Muscat.

*Currency.* The common medium of exchange is the Maria Theresa dollar; the province of Dhofar also has a half-dollar. On the coast, the Persian Gulf Indian rupee circulates and is the official currency of the sultanate, although it is not much used in the interior. There is an Omani copper coin called a *baiza*, and several nickel coins of different denominations of baizas.

*Weights and Measures.* The weights in use are 1 *kiyas* = the weight of 6 dollars or 5·9375 oz.; 24 kiyas = 1 Muscat *maund*; 10 maunds = 1 *farásala*; 200 maunds = 1 *bahár*. Rice is sold by the bag; other cereals by the following measures: 40 *palis* = 1 *ferrah*; 20 ferrah = 1 *khandi*.

*British Consul-General:* J. S. R. Duncan, MBE.
*USA Consul:* John T. Wheelock (resident in Aden).

# NEPÁL

**HISTORY.** From 1846 to 1951 Nepál was virtually ruled by the Ráná family a member of which always held the office of prime minister, the succession being determined by special rules. The last Ráná prime minister (and, until 18 Feb. 1951, Supreme C.-in-C.) was H.H. Máhárája Mohan Shumsher Jung Bahádur Ráná, who resigned in Nov. 1951.

**RULING KING.** The sovereign is H.M. Mahárájádhirája **Mahendra Bir Bikram Jang** Bahádur Sháh Bahádur Shamsher Jang Deva, born on 11 June 1920, who succeeded his father Tribhuwan Bir Bikram Sháh Deva on 14 March 1955. H.R.H. Prince Birendra Bir Bikram Sháh Deva is the heir apparent.

**CONSTITUTION AND GOVERNMENT.** On 18 Feb. 1951 the King proclaimed a constitutional monarchy, and on 16 Dec. 1962 a new constitution of the 'Constitutional Monarchical Hindu State'. The village and town *panchayat*, recognized as the basic units of democracy, elect the district *panchayat*, these elect the zonal *panchayat*, and these finally the 90 members of the national *panchayat*. In addition, 19 representatives of professional organizations and university graduates, and royal nominees not exceeding 15% of the elected members, will be included in the national *panchayat*. The executive power is vested in the King, who appoints a council of ministers from the national *panchayat*. A state council will advise the King and proclaim the successor or, if the heir is a minor, a regency council. Art. 81 empowers the King to declare a state of emergency and to suspend the constitution.

On 25 Aug. 1963 the King formed a 31-member National Guidance Council under his chairmanship.

*Prime Minister and Foreign Minister:* Dr Tulsi Giri.

Relations with the UK are regulated by the treaty of peace and friendship signed on 29 Oct. 1950, which supersedes the treaties of 1792, 1815 and 1923. Diplomatic relations with the USA were established in 1950.

For relations with Tibet *see* p. 1471.

*National anthem:* 'May glory crown our illustrious sovereign' (1952).

**AREA AND POPULATION.** Nepál, situated between 26° 20′ and 30° 10′ N. lat. and between 80° 15′ and 88° 15′ E. long. is bounded on the north by Tibet, on the east by Sikkim and West Bengal, on the south and west by Bihar and Uttar Pradesh. On 5 Oct. 1961 a treaty was signed in Peking, according to which the Chinese–Nepalese boundary line 'runs generally south-eastwards along the mountain ridge, passing through Cho Oyu mountain, Pumoli mountain, Mount Chomo Lungma (the Chinese name for Everest) and Lhotse Too Makalu mountain'. Nepál gained about 300 sq. miles of territory. Area about 54,600 sq. miles (141,400 sq. km); population (estimate, 1958), 8,473,478. Number of voters (estimate, 1953), 4,226,000. The census of the eastern districts (16,222 sq. miles), taken in 1953, gives their population as 3,344,797 (1,665,590 males, 1,679,207 females).

The aboriginal stock is Mongolian with a considerable admixture of Hindu blood from India. They were originally divided into numerous hill clans and petty principalities, one of which, Gorkha or Gurkha, became predominant in 1559 and has since given its name to men from all parts of Nepál. The 15 semi-independent feudal chieftainships were integrated into the kingdom on 10 April 1961.

Capital, Káthmándu, 75 miles from the Indian frontier; population about 195,260, and of the surrounding valley 415,000, including Pátan with a population of 135,230, and Bhátgáon with 84,240.

The country is administratively divided into 14 zones and 34 districts.

**RELIGION.** Sanátan or Pauranic, *i.e.*, traditional or ancient Hinduism, and Buddhism are the religions of the bulk of the people. Christian missions are admitted, but conversion is forbidden. The royal family are Hindu Rajputs.

**EDUCATION.** In 1958 there were 2,443 English schools, 242 Sanskrit and Nepáli schools, 54 basic schools, 22 colleges and 7 other institutions. In 1960 the Tribhuvan University was founded.

About 12% of the population are literate. The national language is Nepáli.

**JUSTICE.** The Supreme Court Act, 1956, established a uniform judicial system, culminating in a supreme court of a Chief Justice and no more than 6 judges. Special courts to deal with minor offences may be established at the discretion of the Government.

**FINANCE.** The general budget for the fiscal year beginning 18 July 1963 envisages revenue NRs 261·8m. and expenditure NRs 295·4m. The revenue includes NRs 125m. foreign aid, namely NRs 84·6m. from USA, 20·9m. from India, 10m. from China and smaller sums from USSR, New Zealand, UK, the Ford Foundation and the International Labour Office. Foreign loans amounted to NRs 11·5m. from USSR and NRs 2m. from UK.

**DEFENCE.** The Army consists of about 45,000 men, mainly infantry, of whom about 20,000 are regulars.

**PRODUCTION.** The second 3-year plan is running from 1962 to 1965. Its cost is estimated at NRs 670m., of which 500m. is expected to come from foreign aid and 60m. from external loans. Priority is given to the training of technicians, agricultural improvements including irrigation, road-building, extension of schools, and several hydro-electric projects.

Nepál has valuable forests in the southern part of the country, and in the northern part, on the slopes of the Himálayas, there grow large quantities of medicinal herbs which find a world-wide market. Of the total area, nearly one-third (11·2m. acres) is under forest; 5·4m. acres is covered by perpetual snow; 9·6m. acres is under paddy, 2·9m. maize and millet, 0·8m. wheat.

Livestock: Cattle, 7m., including 2·1m. cows and 1·2m. buffaloes; sheep and goats, 1·75m.; hogs, 140,000; poultry, 14m.

New industries, such as jute- and sugar-mills, match, glass, ceramic, paper and cement factories, and chemical works are being established.

Three hydro-electric plants (1 in Morang and 2 in the valley of Káthmándu) are in operation; total electricity output is 6,000 kw.

**TRADE.** The principal articles of export are food grains, jute, timber, oilseeds, ghee (clarified butter), potatoes, medicinal herbs, hides and skins, cattle. The chief imports are textiles, cigarettes, salt, petrol and kerosene, sugar, machinery, medicines, boots and shoes, paper, cement, iron and steel, tea. The trade is mostly financed by the Nepál Bank, Ltd (established in 1937) and the Rástra Bank of Nepál (established in 1956).

Total trade between Nepál and UK (British Board of Trade returns, in £ sterling):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK . . | 1 | 50 | 415 | 195 | 2,751 |

**COMMUNICATIONS.** *Railways* (2 ft 6 in. gauge) connect Raxaul with Amlekganj (30 miles) and Jayanagar on the North Eastern Indian Railway with Janakpur and thence with Bijulpura (33 miles).

*Roads.* With the co-operation of India and the USA 900 miles of motorable roads are being constructed, including the East–West Highway through southern Nepál. A road from Lhasa to Káthmándu is being built in co-operation with China.

There are about 500 miles of motorable roads. A ropeway for the carriage of goods covers the 14 miles from Dhursing above Bhimphedi into the Káthmándu valley; it is being extended to Káthmándu. A road connects Káthmándu with the railhead at Amlekhganj (80 miles).

*Post.* A telephone connects the capital with Birganj and Raxaul (North Eastern Indian Railway) on the southern frontier with Bihar. A second telephone line connects Káthmándu with the eastern part of the Terai foot-hills; an extension to the western districts is being completed. Number of telephones (1962) 1,155. Under an agreement with India and the USA, a network of 56 wireless stations is being established in Nepál, with further stations in Calcutta and New Delhi. Radio Nepál at Káthmándu broadcasts in Nepáli, Hindi, Newári and English.

On 14 April 1959 Nepál took over from India the administration of the post, telephone and telegraph services.

*Aviation.* The Royal Nepal Airline Corporation has linked Káthmándu, the capital, with 11 districts of Nepál; and 23 more airfields are under construction. The Royal Nepalese Airline Corporation has services between Káthmándu and Calcutta, Patna, New Delhi.

**MONEY.** The Nepalese rupee is 171 grains in weight, as compared with the Indian rupee, which weighs 180 grains. The rate of exchange is 160 Nepalese rupees for 100 Indian rupees. 100 Nepalese pice = 1 Nepalese rupee. Coins of all denominations are minted. The Rástra Bank also issues notes of 1, 5, 10 and 100 rupees.

# THE NETHERLANDS

KONINKRIJK DER NEDERLANDEN

**REIGNING QUEEN. Juliana Louise Emma Marie Wilhelmina,** born 30 April 1909, daughter of Queen Wilhelmina (born 31 Aug. 1880, died 28 Nov. 1962) and Prince Henry of Mecklenburg-Schwerin (born April 1876, died 3 July 1934); succeeded to the throne on the abdication of her mother (who assumed the title of Princess of the Netherlands), 4 Sept. 1948, and was enthroned on 6 Sept.; married to Prince Bernhard Leopold Frederick Eberhard Julius Coert Karel Godfried Pieter of Lippe-Biesterfeld (born 29 June 1911) on 7 Jan. 1937. *Offspring:* Princess Beatrix Wilhelmina Armgard, born 31 Jan. 1938; Princess Irene Emma Elisabeth, born 5 Aug. 1939; Princess Margriet Francisca, born in Ottawa, 19 Jan. 1943; Princess Maria Christina, born 18 Feb. 1947.

The royal family of the Netherlands, known as the House of Orange, descends from a German Count Walram, who lived in the 11th century. Through the marriage of Count Engelbrecht, of the branch of Otto, Count of Nassau, with Jane of Polanen, in 1404, the family acquired the barony of Breda and settled in the Netherlands. The alliance with another heiress, only sister of the childless Prince of Orange and Count of Châlons, brought to the house a rich province in the south of France; and a third matrimonial union, that of Prince Willem III of Orange with Mary, the eldest daughter of King James II, led to the transfer of the crown of Great Britain to that prince. Previous to this period, the members of the family had acquired great influence in the United Provinces of the Netherlands under the title of 'stadhouders', or governors. In 1747 the dignity was formally conferred on Willem IV and his heirs; but his successor, Willem V, had to take refuge in England, in 1795, at the invasion of the French Army. In Nov. 1813 the United Provinces were freed from French domination. The Congress of Vienna joined the Belgian provinces, the 'Austrian Netherlands' before the French Revolution, to the Northern Netherlands. Willem I was proclaimed King of the Netherlands at The Hague on 16 March 1815. The union was dissolved by the Belgian revolution of 1830, and the treaty of London, 19 April 1839, constituted Belgium an independent kingdom.

**CONSTITUTION AND GOVERNMENT.** According to the Constitution of the Kingdom of the Netherlands, the Kingdom consists of the Netherlands, Surinam and the Netherlands Antilles. Their relations are regulated by the 'Statute' for the Kingdom, which came into force on 29 Dec. 1954. Each part enjoys full autonomy; they are united, on a footing of equality, for mutual assistance and the protection of their common interests.

The first Constitution of the Netherlands after its restoration as a Sovereign State was promulgated in 1814. It was revised in 1815 (after the addition of the Belgian provinces, and the assumption by the Sovereign of the title of King), 1840 (after the secession of the Belgian provinces), 1848, 1884, 1887, 1917, 1922, 1938, 1946, 1948, 1953, 1956 and is being reconsidered in 1963–64.

The Netherlands is a constitutional and hereditary monarchy. The royal succession is in the direct male line in the order of primogeniture: in default of male heirs, the female line ascends the throne. The Sovereign comes of age on reaching his 18th year. During his minority the royal power is vested in a Regent—designated by law—and in some cases in the Council of State.

The central executive power of the State rests with the Crown, while the central legislative power is vested in the Crown and Parliament (the *Staten-Generaal*), consisting of 2 Chambers. After the 1956 revision of the Constitution the Upper or First Chamber is composed of 75 members, elected by the members of the Provincial States, and the Second Chamber consists of 150 deputies, who are elected directly. Members of the States-General must be Netherlanders or recognized as Netherlands subjects and 30 years of age or over; they may be men or women. They receive an allowance.

First Chamber (as constituted in 1963): Catholics, 26; Labour Party, 24; Anti-Revolutionaries, 7; Christian Historicals, 7; Party for Freedom and Democracy, 7; Communists, 1; Pacifist Party, 1.

Second Chamber (as constituted in 1963): Catholics, 50; Labour Party, 43; Anti-Revolutionaries, 17; Christian Historicals, 13; Party for Freedom and Democracy, 16; Communists, 4; Political Calvinists, 3; Pacifist Socialist Party, 6; Farmers Party, 3; Reformed Political Party, 1.

The revised Constitution of 1917 has introduced an electoral system based on universal suffrage and proportional representation. Under its provisions, members of the Second Chamber are directly elected by citizens of both sexes who are Netherlands subjects not under 23 years (since 11 March 1946). Criminals, lunatics and certain others are disqualified; for certain crimes and misdemeanours there may be temporary disqualification.

The members of the Second Chamber are elected for 4 years, and retire in a body, whereas the First Chamber is elected for 6 years, and every 3 years one-half retires by rotation. The Sovereign has the power to dissolve both Chambers of Parliament, or one of them, subject to the condition that new elections take place within 40 days, and the new House or Houses be convoked within 3 months.

The Sovereign and the Second Chamber may propose new Bills; the First Chamber can only approve or reject them without inserting amendments. The meetings of both Chambers are public, though each of them may by a majority vote decide on a secret session. The Ministers and Secretaries of State may attend both Chambers, but only in an advisory capacity as a member of the States-General cannot be a Minister or Secretary of State.

The Constitution can be revised only by a Bill declaring that there is reason for introducing such revision and containing the proposed alterations. The passing of this Bill is followed by a dissolution of both Chambers and a second confirmation by the new States-General by two-thirds of the votes. Unless it is expressly stated, all laws concern only the realm in Europe, and not the overseas parts of the kingdom. Every act of the Sovereign has to be covered by a responsible Minister.

The Ministry, appointed 24 July 1963, is composed as follows:

*Prime Minister and Minister for General Affairs:* Dr V. G. M. Marijnen (Cath.).

*Foreign Affairs:* Dr J. M. A. H. Luns (Cath.). *Finance:* Dr J. W.

Witteveen (F. and D.). *Home Affairs:* Dr E. H. Toxopeus (F. and D.). *Social Affairs and Public Health:* Dr G. M. J. Veldkamp (Cath.). *Education, Arts and Science:* Dr Th. H. Bot (Cath.). *Justice:* Dr IJ. Scholten (Christ. Hist.). *Social Welfare:* Mrs J. F. Schouwenaar-Franssen (F. and D.). *Defence:* P. J. S. de Jong (Cath.). *Housing and Building:* P. C. W. M. Bogaers (Cath.). *Minister of Transport and Shipping:* Dr J. van Aartsen (Anti-Rev.). *Economic Affairs:* Dr J. E. Andriessen (Christ. Hist.). *Vice-Premier and Minister of Agriculture and Fisheries:* Dr B. W. Biesheuvel (Anti-Rev.).

The Council of State (*Raad van State*), appointed and presided over by the Sovereign, is composed of a deputy chairman and not more than 16 members. It can be consulted on all legislative matters. Decisions of the Crown in administrative disputes are prepared by a special committee of the Council.

LOCAL GOVERNMENT. The kingdom is divided in 11 provinces and 980 municipalities. Each province has its own representative body, the Provincial States. The members are elected for 4 years, directly from the Netherlands inhabitants of the province who are 23 years of age. The electoral register is the same as for the Second Chamber. The members retire in a body and are subject to re-election. The number of members varies according to the population of the province, from 83 for South Holland to 43 for Zeeland. The Provincial States are entitled to issue ordinances concerning the welfare of the province, and to raise taxes pursuant to legal provisions. The provincial budgets and the provincial ordinances and resolutions relating to provincial property, loans, taxes, etc., must be approved by the Crown. The members of the Provincial States elect the First Chamber of the States-General. They meet twice a year, as a rule in public. A permanent commission composed of 6 of their members, called the 'Deputy States', is charged with the executive power and, if required, with the enforcement of the law in the province. Deputy as well as Provincial States are presided over by a Commissioner of the Sovereign, who in the former assembly has a deciding vote, but attends the latter in only a deliberative capacity. He is the chief magistrate in the province. The Commissioner and the members of the Deputy States receive an allowance.

Each municipality forms a Corporation with its own interests and rights, subject to the general law, and is governed by a Municipal Council, directly elected for 4 years, by the electorate registered for the Provincial States, provided they are residents of the municipality. All Netherlands inhabitants 23 years of age are eligible, the number of members varying from 7 to 45, according to the population. The Municipal Council has the right to issue bye-laws concerning the communal welfare. The Council may levy taxes pursuant to legal provisions; these ordinances must be approved by the Crown. All bye-laws may be vetoed by the Sovereign. The Municipal Budget and resolutions to alienate municipal property require the approbation of the Deputy States of the province. The Council meets in public as often as may be necessary, and is presided over by a Burgomaster, appointed by the Sovereign for 6 years. The day-to-day administration is carried out by the Burgomaster and 2–7 Aldermen (*wethouders*), elected by and from the Council; this body is also charged with the enforcement of the law. The Burgomaster may suspend the execution of a resolution of the Council for 30 days, but is bound to notify the Deputy States of the province. In maintaining public order, the Burgomaster acts as the chief of police. The Burgomaster and Aldermen receive allowances.

[1] The Southern IJssellakepolders (drained in 1957) are part of the former Zuiderzee, now called IJsselmeer; they have not yet been incorporated in any province.

[2] The Central Register of population includes persons who are residents of the Netherlands but who have no fixed residence in any particular municipality (living in caravans and houseboats, shipping population on the water, etc.).

Of the total population on 31 Dec. 1962, 5,923,811 were males, 5,966,151 females.

The total area of the Netherlands up to the low water line (*i.e.*, sea-level at low tide) is 40,892·84 sq. km (15,784·64 sq. miles), of which 33,539·97 sq. km (12,949·9 sq. miles) is land area.

On 14 June 1918 a law was passed concerning the reclamation of the Zuiderzee. The work was begun in 1920; the following sections have been completed: 1. The Noordholland–Wieringen Barrage (25 km), 1924; 2. The Wieringermeer Polder (194·78 sq. km), 1930 (inundated by the Germans in 1945, but drained again in the same year); 3. The Wieringen–Friesland Barrage (30 km), 1932; 4. The Noordoost Polder (503·64 sq. km), 1942; 5. Oost Flevoland (540 sq. km), 1957.

Two more polders, Zuidelijk Flevoland (600 sq. km) and Markerwaard (400 sq. km), together, Southern IJssellakepolders, will be reclaimed. A portion of what used to be the Zuiderzee behind the barrage will remain a fresh-water lake: IJsselmeer (1,250 sq. km). *See* MAP in THE STATESMAN'S YEAR-BOOK, 1959.

**RELIGION.** Entire liberty of conscience is granted to the members of all denominations. The royal family belong to the Dutch Reformed Church.

The number of adherents of the Churches according to the census of 1960 was: Dutch Reformed Church, 3,240,481; Reformed Churches, 1,068,600; Roman Catholics, 4,634,478; other creeds, 416,170; no religion, 2,102,235.

The government of the Reformed Church is Presbyterian. On 1 Jan. 1963 the Dutch Reformed Church had 1 synod, 11 provincial districts, 54 classes, 158 districts and 1,430 parishes. Their clergy numbered 1,903. The Roman Catholic Church had, Jan. 1963, 1 archbishop (of Utrecht), 6 bishops and 1,705 parishes and rectorships. The Old Catholics had (end of 1962) 1 archbishop (Utrecht), 2 bishops and 28 parishes. The Jews had, in 1963, 54 communities.

**JUSTICE.** Justice is administered by the High Court of the Netherlands (Court of Cassation), by 5 courts of justice (Courts of Appeal), by 19 district courts and by 62 cantonal courts; trial by jury is unknown. The Cantonal Court, which deals with minor offences, is formed by a single judge; the more serious cases are tried by the district courts, formed as a rule by 3 judges (in some cases one judge is sufficient); the courts of appeal are constituted of 3 and the High Court of 5 judges. All judges are appointed for life by the Sovereign (the judges of the High Court from a list prepared by the Second Chamber of the States-General). They can be removed only by a decision of the High Court.

Juvenile courts were set up in 1922. The juvenile court is formed by a single judge specially appointed to try children's civil cases, at the same time charged with the administration of justice for criminal actions committed by young persons who are not yet 18 years old, unless imprisonment of 6 months or more ought to be inflicted; such cases are tried by 3 judges.

**DEFENCE.** The Netherlands are bordered on the south by Belgium, on the east by Germany. On both sides the country is quite level and there are no natural defences along the frontiers, except the big rivers running about 10–50 km inside the Netherlands territory and parallel to the eastern frontier.

ARMY. According to an Act of 1922, service in the Army is partly voluntary and partly compulsory; the voluntary enlistments bear a small proportion to the compulsory. The initial period of service in the Army is 22 months (23 for officers, n.c.o.s and specialists), of which the last 4 months (2 months for officers, etc.) may be spent at will as 'short leave'. After this period the conscript personnel is sent on long leave, but it remains—until the age of 35 (n.c.o.s 40, officers 45) has been reached—liable to call-up in the event of a mobilization or for refresher exercises of its unit.

The Netherlands distinguishes between its NATO forces and National Sector forces, in accordance with its NATO membership. The NATO forces comprise an army corps of 2 divisions, a third mobilizable division and support and logistical units. The mechanization and motorization of the army corps will be completed in 1965.

The National sector forces have mobilizable defence-units, standing anti-aircraft units as well as schools for training officers, n.c.o.s and specialists.

NAVY. The Royal Netherlands Navy has its bases in the Netherlands (principal base Den Helder) and in the Caribbean (Netherlands West Indies).

Following is a list of principal ships of the Royal Netherlands Navy:

[1] Completely modernized in 1958.

[1] Being converted to a guided-missile cruiser.

There are also 12 destroyers, 7 frigates, 6 corvettes, 5 submarines, 1 minesweeper support ship, 6 ocean minesweepers, 46 coastal minesweepers, 16 inshore minesweepers, 5 patrol vessels, 3 surveying vessels, 1 boom defence vessel, 3 supply ships, 23 landing craft, 2 weather observation ships (*ex*-frigates), 8 tenders, 3 sea-going tugs and 1 torpedo tender.

Four frigates, 2 submarines and 1 fleet replenishment ship are under construction.

On 1 Jan. 1963 naval personnel totalled 26,262 officers and ratings, including the Royal Marine Corps of 3,406 officers and men.

The naval air service maintains one squadron of Grumman Tracker S2F anti-submarine aircraft and one squadron of Sikorsky HSS-1N helicopters on board the *Karel Doorman*, with 2 squadrons of Grumman Trackers ashore. There are also a squadron of Seahawks armed with Sidewinder missiles and a squadron of Lockheed P2V-7B.

Naval estimates (in 1m. guilders): 1960, 380·7; 1961, 430·8; 1962, 503·9; 1963, 512·9.

AIR FORCE. The Royal Netherlands Air Force was established on 1 July 1913.

The total personnel strength at 1 July 1963 amounted to 21,000. The frontline forces comprised 9 aircraft squadrons and 6 surface-to-air missile (high-altitude) squadrons. In the 9 aircraft squadrons (4 fighter squadrons 4 fighter-bomber squadrons and 1 reconnaissance squadron) most of the older type aircraft (F-84F, RF-84F, F-86K and Hunters) are being replaced by F-104G Starfighters. This conversion programme will be completed in 1965.

The number of 6 surface-to-air missile (high-altitude) squadrons (Nike Hercules and Nike Ajax) will be increased to 8, and 12 surface-to-air missile (low-altitude) squadrons (HAWK) will be set up.

In addition the RNLAF comprises 1 transport squadron (Fokker Friendships) and 3 observation and communications squadrons of light aircraft and helicopters. The latter are under the operational command of the Army.

Air force estimates in 1m. guilders: 1963, 543·9; 1964, 617·7.

STATISTICAL INFORMATION. The 'Centraal Bureau voor de Statistiek' at the Hague, is the official Netherlands statistical service. *Director-General of Statistics:* Prof. Dr Ph. J. Idenburg.

The Bureau was founded in 1899. Prior to that year, statistical publications were compiled by the 'Centrale commissie voor de statistiek', the 'Vereniging voor staathuishoudkunde en statistiek' and various government departments. These activities have gradually been taken over and co-ordinated by the Central Bureau, which now compiles practically all government statistics.

Its current publications include:

*Jaarcijfers voor Nederland (Statistical Year Book).* From 1923/24 (preceded by *Jaarcijfers voor het Koninkrijk der Nederlanden, 1898–1922*): latest issue, 1959/60
*Statistisch zakboek (Pocket Year Book).* From 1899–1924 (1 vol.); latest issue 1962
*Maandschrift van het CBS (Monthly Bulletin).* From 1906
*Maandstatistiek van de in-, uit- en doorvoer (monthly statement of the import, export and transit trade).* From 1917
*Results of the Second Census of Industries, 1950*
*Results of the Thirteenth Census, Population and Housing, 31 May, 1960*
*Statistical and Econometric Studies.* Quarterly, from 1946

# OVERSEAS PARTS OF THE KINGDOM

For the constitutional position of the overseas parts of the Kingdom of the Netherlands, according to the Constitution of 29 Dec. 1954, *see* p. 1253.

## SURINAM

**HISTORY** At the peace of Breda (1667) between Great Britain and the United Netherlands, Surinam was assigned to the Netherlands in exchange for the colony of New Netherland in North America, and this was confirmed by the treaty of Westminster of Feb. 1674. Since then Surinam has been twice in British possession, 1799–1802 (when it was restored to the Batavian Republic at the peace of Amiens) and 1804–16, when it was returned to the Kingdom of the Netherlands according to the convention of London of 13 Aug. 1814, confirmed at the peace of Paris of 20 Nov. 1815.

**GOVERNMENT.** The Governor is the representative of the sovereign and the constitutional head of the Government. He is assisted by an Advisory Council of 5 members.

*Governor:* Archibald Currie (appointed 26 March 1963).

There is a council of 9 ministers who are responsible to the Legislative Council (*Staten van Suriname*). The Legislative Council (36 members) is elected for a 4-year period.

Surinam is divided into 8 districts: Paramaribo (urban district), Commewijne, Coronie, Marowijne, Nickerie, Saramacca, Suriname and Brokopondo.

**AREA AND POPULATION.** Surinam is situated on the north coast of South America and bounded on the north by the Atlantic Ocean, on the east by the rivers Marowijne, Lawa, Litani and the Koelé-Koelé creek, which separate it from French Guiana, on the west by the rivers Corantijn, Coeroeni and Koetari, which separate it from British Guiana, and on the south by inaccessible forests and savannas, which separate it from Brazil.

Area, 142,822 sq. km (55,143 sq. miles). Estimated population (1962), 330,000, including 33,000 Bush Negroes and 5,000 aboriginal Indians. The capital, Paramaribo, has about 118,000 inhabitants.

Birth-rate 46 per 1,000, death-rate 9 per 1,000.

**RELIGION.** There is entire religious liberty. At the end of 1958 the various religious bodies were: Reformed and Lutheran, 19,000; Moravian Brethren, 46,000; Roman Catholics, 52,000; Jews, 400; Moslems, 68,000; Hindus, 66,000; Confucians, 3,000.

**EDUCATION.** At the end of 1962 there were 370 schools, including kindergarten, with a total of 85,842 pupils and 2,496 teachers. There are also a medical school, a law college, a technical school and 2 teachers' training colleges.

**JUSTICE.** There is a court of justice, whose members are nominated by the Sovereign. There are 3 cantonal courts.

**WELFARE.** The Government subsidizes orphanages and other religious or philanthropical institutions, and maintains an almshouse and institutions for delinquent boys and girls.

**DEFENCE.** The armed forces of the Kingdom of the Netherlands stationed in Surinam consist of artillery, tanks and infantry.

**FINANCE.** The expenditures and local revenues (derived from import, export and excise duties, taxes on houses and estates, personal imports and some indirect taxes) are as follows (in 1,000 Surinam guilders):

| | *1957* | *1958* | *1959* | *1960* | *1961* | *1962*[1] | *1963* |
|---|---|---|---|---|---|---|---|
| Revenues | 62,400 | 68,300 | 71,300 | 76,513 | 87,169 | 76,102 | 81,200 |
| Expenditures | 62,000 | 63,000 | 68,000 | 84,506 | 89,313 | 89,430 | 89,800 |

[1] Provisional figures.

Outstanding loans in 1963: Local, 7,926.378; foreign, 15,816.094 Surinam guilders. Public debt as at 30 June 1963, 71m. Surinam guilders.

**PRODUCTION.** *Agriculture.* Agriculture is restricted to the alluvial coastal zone; cultivated area in 1962, 42,602 hectares. The staple food crop is rice; 27,071 hectares of paddy were planted in 1962.

Principal products (in 1,000 units) in 1962:

| | | | | | |
|---|---|---|---|---|---|
| Sugar-cane (kg) | 153,982 | Maize on cob (kg) | 1,173 | Oranges (pieces) | 44,684 |

|---|---|---|---|---|---|
| Imports to UK . . | 39,468 | 39,150 | 91,957 | 151,950 | 203,183 |
| Exports from UK . . | 1,313,845 | 1,603,815 | 1,514,307 | 1,444,833 | 1,355,667 |
| Re-exports from UK . | 20,719 | 16,734 | 13,259 | 6,098 | 8,180 |

**COMMUNICATIONS.** *Shipping.* The Royal Netherlands Steamship Co. plies between Amsterdam and Paramaribo, and New York, Baltimore and Paramaribo. Regular sailings are made to Georgetown, Ciudad Bolívar and most Caribbean ports. The Surinam Navigation Co. maintains services from Paramaribo to Georgetown and Cayenne, and once a month to the Caribbean area. A French and an Italian company maintain passenger services to Europe. The Alcoa Steamship Co. has a fortnightly service to New York, Baltimore and Norfolk, and the Boomerang Line maintains a monthly freight and passenger service between Surinam and Australia. In 1962, 1,662 vessels totalling 3·62m. GRT entered and 1,660 of 3,614,000 GRT cleared Paramaribo.

*Roads.* There are 1,260 km of main roads. Two of them lead from Paramaribo, one to the bauxite centres of Smalkalden (29 km) and Paranam (30 km) and the other to the airport of Zanderij (49 km). Another main road runs across the districts of Saramacca (71 km) and Coronie (68 km), a fourth across the Commewijne district (41 km) and a fifth in the Marowijne district, from the bauxite centre Moengo to Albina (45 km).

The 'East–West connexion' is almost completed, linking the Corantijn and the Marowijne rivers (375 km).

In 1962 there were 20,088 registered motor vehicles in Surinam, including 5,675 passenger cars, 1,282 trucks, 180 buses, 11,837 powered bicycles and 845 motor cycles.

*Railway.* There is one single-track railway, running from Onverwacht to Kabelstation (102 km); part of the track from Paramaribo to Onverwacht (34 km) has been removed.

*Post.* Automatic telephone service links most of the districts in the interior. In 1962 there were 4,362 telephones. Wireless telephone connects Surinam with the Netherlands, USA, Curaçao, British and French Guiana, and Trinidad. There are 5 broadcasting stations.

*Aviation.* Regular air services are maintained by KLM, Pan American World Airways, Air France and Empressa de Transportes Aerovias Brasil.

The international airfield at Zanderij is capable of handling all types of planes.

Surinam Airways Ltd provides daily services between all major districts and maintains also a charter service.

In 1962, 2,003 aircraft landed at Zanderij airport with 9,635 incoming and 10,591 outgoing passengers, 269,827 lb. of incoming and 145,568 lb. of outgoing mail and freight.

**CURRENCY.** Surinam florin notes ranging from 5 to 1,000 Surinam florins are legal tender. Currency notes of 1·00 and 2·50 guilders are issued by the Government. US$1 = 1·90 Surinam florins; £1 sterling = Sfl5·33, and 1 Netherlands florin = Sfl0·52.

**BANKING.** The Central Bank of Surinam is a bankers' bank and also a bank of issue; the Surinaamsche Bank, the Hollandsche Bank Unie and the O.R.G. Vervuurt's Banking Corporation Ltd, are commercial banks; the Surinam People's Credit Bank operates under the auspices of the Government; Surinaamse Postspaarbank (postal savings bank); Surinaamse Hypotheekbank NV (mortgage bank); Surinaamse Investerings Mij. NV (investment bank); Agentschap van de Maatschappij tot financiering van het Nationaal Herstel NV (long-term investments).

# THE NETHERLANDS ANTILLES

## DE NEDERLANDSE ANTILLEN

**GOVERNMENT.** Since Dec. 1954, the Netherlands Antilles have been fully autonomous in internal affairs, and constitutionally equal with the Netherlands and Surinam. The Sovereign of the Kingdom of the Netherlands is Head of the Government of the Netherlands Antilles and is represented by a Governor.

The executive power in internal affairs rests with the Governor and the Council of Ministers, who together form the government. The Ministers are responsible to the unicameral legislature (*Staten*). This consists of 22 members (12 from Curaçao, 8 from Aruba, 1 from Bonaire, 1 from the Windward Islands) and is elected by general suffrage.

The executive power in external affairs is vested in the Council of Ministers of the Kingdom, in which the Antilles is represented by a Minister Plenipotentiary with full voting powers.

In 1951 the Netherlands Antilles Islands Regulation provided for self-government of each of the 4 insular communities Aruba, Bonaire, Curaçao and the Windward Islands. The autonomous powers of the insular communities are divided between the Island Council (elected by general suffrage), the Executive Council and the Lieut.-Governor (*Gezaghebber*), who is responsible for maintaining public peace and order.

*Governor:* Dr N. Debrot.
*Prime Minister:* E. Jonckheer (appointed Dec. 1954, re-appointed Oct. 1958 and Nov. 1962).

Dutch is the official language. Spanish and English are also spoken. In addition a 'lingua franca'. *Papiamento*, has evolved out of Spanish, Dutch and some other languages.

**AREA AND POPULATION.** The Netherlands Antilles consists of two groups of 3 islands each, situated in the Caribbean Sea, about 550 miles apart. The total area is 1,019 sq. km (394 sq. miles) and the population was 199,607 as at 1 Jan. 1963.

| Benedenwinds group | Sq. km | Population | Bovendewinds group | Sq. km | Population |
|---|---|---|---|---|---|
| Curacao . . . | 473 | 129.676 | St Maarten (St Martin)[1] | 34 | 3,250 |
| Aruba . . . | 190 | 58,506 | St Eustatius . . | 21 | 1,069 |
| Bonaire . . . | 288 | 6,086 | Saba . . . . | 13 | 1,020 |

[1] The southern part belongs to the Netherlands Antilles, the northern to France.

In 1962, 6,529 births and 935 deaths were registered.

**EDUCATION** (1963). Schools numbered 256, with 57,061 pupils and 1,865 teachers.

*Cinemas* (1962). Curaçao and Aruba had 16 cinemas with a seating capacity of 10,000.

**ECONOMY.** The economy of the Netherlands Antilles is almost entirely based on the refining of oil imported from Venezuela to Curaçao and Aruba. About 25% (Curaçao) and 30% (Aruba) of the gainfully occupied are working at the refineries or their shipping establishments. On account of the activities of the oil companies (affiliated to the Royal Dutch 'Shell and the Standard Oil of New Jersey), the prosperity on Curaçao and Aruba is great in comparison with the other islands.

In Aruba there are some petrochemical factories; Curaçao has a paint factory, 2 cigarette factories, a brewery and some smaller industries. Almost all products needed for consumption and production are imported, as the rocky soil permits little agriculture and local fishing is insufficient for home consumption. The tourist industry is being developed.

Bonaire, St Maarten, St Eustatius and Saba are of less economic importance.

**FINANCE.** The central budget for 1963 balanced at 56·6m. guilders, that for 1964 at 58·3m. The separate budget of Curaçao balanced at 46·5m. guilders in 1963; that of Aruba at 41m. (with a deficit of 1·5m.).

The official rate of exchange is £1 = 5·23 Netherlands Antilles guilders.

**TRADE** (1962). Total imports (in 1,000 Antilles guilders): Curaçao, 620,996; Aruba, 737,365. Total exports: Curaçao, 537,368; Aruba, 759,714. Exports of oil products: Curaçao, 518,592; Aruba, 755,829.

Total trade between the Netherlands Antilles and UK in £ sterling (British Board of Trade returns):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK . . | 25,399,111 | 22,651,537 | 21,983,813 | 21,838,750 | 23,230,822 |
| Exports from UK . . | 9,456,968 | 7,538,613 | 5,151,609 | 6,755,550 | 5,765,042 |
| Re-exports from UK . | 798,689 | 55,589 | 60,198 | 62,585 | 60,641 |

The Free-Zones Ordinance of 1956 has established free zones in the ports of Curaçao and Aruba.

**COMMUNICATIONS.** *Shipping.* There entered the port of Curaçao, in 1962, 5,949 vessels of 50·3m. gross tons; Aruba, 3,061 vessels of 40·1m. gross tons.

*Roads.* In 1963 the Netherlands Antilles had 971 km of surfaced highway distributed as follows: Curaçao, 445; Aruba, 325; Bonaire, 158; St Maarten, 27; St Eustatius, 6; Saba, 10. Number of motor vehicles (1 Jan. 1963): 17,224 in Curaçao, 8,162 in Aruba.

*Post.* Number of telephones, 1963, 6,887 in Curaçao, 2,750 in Aruba.

*British Consul for Netherlands Antilles and Surinam:* E. F. Wise, OBE (*Curaçao*). There is also a Vice-Consul at Aruba.
*USA Consul-General:* Harris H. Huston (*Curaçao*).

# NICARAGUA

REPÚBLICA DE NICARAGUA

**HISTORY.** Active colonization of the Pacific coast was undertaken by Spaniards from Panama, beginning in 1523. After links with other Central American territories, and Mexico, Nicaragua became completely independent in 1838, but subject to a prolonged feud between the 'Liberals' of León and the 'Conservatives' of Granada. Mosquitia remained an autonomous kingdom on the Atlantic coast, under British protection until 1860.

On 5 Aug. 1914 the Bryan–Chamarro treaty between Nicaragua and the United States was signed, under which the US in return for $3m. acquired a permanent option for a canal route through Nicaragua and a 99-year option for a naval base in the Bay of Fonseca on the Pacific coast and Corn Island on the Atlantic coast. It was ratified by Nicaragua on 7 April 1916 and by the US on 22 June 1916. US Marines finally left in 1933.

**CONSTITUTION AND GOVERNMENT.** Since 1963 the President of the Republic, 3 Vice-Presidents, 16 Senators, 42 deputies and members of local councils are directly elected for a term of 4 years. A secret ballot has been introduced. The franchise extends to all men and women over 21 and to those over 18 who can read or write or are married as well as to those under 18 who have a 'bachelor's', *i.e.*, school-leaver's, degree. Deputies are elected on a national list, senators in 4 electoral districts. Seats in Congress (the Senate and the Chamber of Deputies) are awarded by a modified system of proportional representation which secures not less than one-third of the seats to the minority parties. In addition, ex-presidents of the Republic are life senators and the presidential candidate who is runner up in the elections is a senator for the succeeding term. The supervision of the elections is in the hands of the Supreme Electoral Tribunal and subordinate tribunals which rank as a fourth 'power' of the state '*el poder electoral*', together with the Executive, Legislative and Judicial powers.

Under the constitution the President of the Republic and members of his family 'to the fourth degree of consanguinity and affinity' are debarred from the Presidency for the succeeding presidential term, though not thereafter.

*President:* Dr René Schick Gutierrez, elected 3 Feb. 1963, for the term beginning 1 May 1963.

*Minister for Foreign Affairs:* Dr Alfonso Ortega Urbina.

Ministers, who are heads of departments, are chosen by the President and cannot be members of Congress.

The republic is divided into 16 'departments' and 1 *comarca* (district), each of which is under a political head (appointed by the President), who has supervision of finance, education and other matters. The departments have 123 *municipios*, headed by a mayor (*alcalde*). The Mosquito Reserve now forms part of the departments of Zelaya and Río San Juan.

*National flag:* Blue, white, blue (horizontal); with the coat of arms on the white stripe.

*National anthem:* Salve a ti Nicaragua (words by S. Ibarra Mayorga, 1937).

**AREA AND POPULATION.** Area estimated at 148,000 sq. km (57,143 sq. miles) or 139,000 sq. km (54,296 sq. miles) if the lakes are excluded. The coastline runs 336 miles on the Atlantic and 219 miles on the Pacific. The population as at 31 Jan. 1964 was 1,559,526; density, 11 per sq. km.

Nicaragua is the largest in area and most thinly populated of the Central American republics, with a density of 10·62 per sq. km. Crude birth rate, 1960, 43·24 per 1,000 population; crude death rate, 8·57; infantile mortality rate, 70·21 per 1,000 live births; crude marriage rate, 6·99 per 1,000 population.

About 80% of the inhabitants live in the area between the great lakes and the Pacific. The two areas differ greatly in many respects, and there is little communication between them, the journey by trail and river being slow and difficult, though progress is being made.

The people of the western half of the republic are principally of mixed Spanish and Indian extraction, some of pure Spanish descent and many Indians. The population of the eastern half is composed mainly of Mosquito and other Indians and Zambos, and Negroes from Jamaica and other islands of the Caribbean. The main ethnic groups in 1955 were: Mestizo, 68%; white, 15%; Negro, 9%; Indio, 5%.

Nicaragua is administratively divided into the following 16 departments and 1 territory, with population as on 30 June 1963:

| | | | | | |
|---|---|---|---|---|---|
| Boaco | 71,905 | Jinotega | 74,818 | Nueva Segovia | 45,323 |

Of the 123 *municipios*, 98 have from 2,000 to 50,000 inhabitants. The capital is Managua, situated on the lake of the same name, 180 ft above sea level, with (1963) 317,641 inhabitants; Bluefields, 17,649; Chinandega, 36,277; Granada, 40,092; Jinotepe, 16,112; León, 61,649; Masaya, 34,127; Matagalpa, 61,383; Diriamba, 24,177; Boaco, 20,428; Juigalpa, 18,259; Estelí, 26,764.

**RELIGION.** The prevailing form of religion is Roman Catholic, but religious liberty is guaranteed by the Constitution. The republic constitutes 1 archbishopric (seat at Managua) and 6 bishoprics (León, Granada, Estelí, Matagalpa, Juigalpa and Puerto Cabezas). Protestants established principally on the Atlantic coast, numbered 43,600 in 1962.

**EDUCATION.** There were (1959–60) 2,082 elementary schools, of which 1,967 were state and 115 private, with a total of 152,783 pupils; and 102 secondary schools, 68 of which were private, with 12,267 pupils. Illiterate persons, of all ages, number 63·7% of the population. The National University at León has faculties of medicine, law, pharmacy, dentistry, engineering (at Managua) and economics. It had 1,621 students in 1963–64.

A Roman Catholic university was founded in Managua in 1961, and has faculties of engineering, public administration and law; 531 students.

*Cinemas.* Cinemas numbered 98 in 1960.

*Newspapers.* There are 7 daily newspapers (5 in Managua and 2 in León), with a total circulation of about 75,000.

**JUSTICE.** The judicial power is vested in a Supreme Court of Justice at Managua, 5 chambers of second instance (León, Masaya, Granada, Matagalpa and Bluefields), and 153 judges of inferior tribunals.

**FINANCE.** Revenue and expenditure for fiscal years, ending 30 June, in córdobas (C$1 = 14·2857 US cents):

| | *1959–60* | *1960–61* | *1961–62* [1] | *1962–63* [1] | *1963–64* [1] |
|---|---|---|---|---|---|
| Revenue | 275,236,909 | 250,452,400 | 253,000,000 | 311,800,000 | 341,300,000 |
| Expenditure | 274,425,388 | 259,948,100 | 253,213,517 | 311,800,000 | 341,300,000 |

[1] Estimates.

The 1961–62 budget includes C$10·4m. for the Ministry of Economy, 36·9m. for education, 40·9m. for development and public works, 10·2m. for agriculture and 17·7m. for health.

The practice of borrowing heavily from the National Bank resulted in a debt of 28·25m. córdobas, which, 1950, was funded for 25 years.

Of Nicaragua's external debt, the sterling bonds were finally redeemed in

1958. The external debt at the end of 1961 was 27·6m. córdobas (mainly International Bank loans); the internal debt at 31 Dec. 1961 was 38·5m. córdobas.

A Social Security scheme became operative in 1958 for the Managua area.

**DEFENCE.** The National Guard (which functions as police force and army) numbers 560 officers and some 4,850 other ranks, besides 4,000 in the trained reserve. Period of enlistment, 3 years, but military service may be made compulsory at any time. There is a military academy.

Two coastguard boats patrol the east and west coast to prevent smuggling.

Formed in June 1938 as the Nicaraguan Army Air Force, the air force has been semi-independent since 1947 when it received a small number of piston-engined F-51D Mustang fighters and F-47D Thunderbolt fighter-bombers from the USA. A few of these remain in service, but the air force is primarily a transport and training organization, using C-47 and C-45 twin-engined transports; also 4 B-26s and, recently, 6 TV2 jets.

**PRODUCTION.** Of the total land area (about 36·5m. acres), about 17·5m. acres are under timber, 0·9m. acres are used for grazing and 2·1m. acres are arable. The unit of area used locally is the *manzana* (= 1·73 acres). A survey in 1954 showed that of the arable only 1,044,000 acres were actively cultivated, 500,000 in annual crops such as cotton and rice and the remainder in perennial crops such as coffee and sugar-cane, or in two harvests a year in the cases of maize, sorghum and beans. Five-sevenths of the working population are in agriculture. A Natural Resources Law came into operation on 17 April 1958.

*Agriculture.* Agriculture is the principal source of national wealth, finding work for 65% of the labour force, and furnishing, 1961, 37% of the gross national product of C$2,294,424,000. There are big plans to increase its efficiency by means of irrigation schemes depending on the Tipitapa and Tuma rivers. The principal production of the eastern part of the republic was formerly bananas, but the exports in 1961 were only 62,766 stems. An American company, in 1961, laid out banana plantations on the west coast on new soil which should be free of the Panama disease. Cotton production in 1962–63 was 1·5m. quintals, of which approximately 700,000 quintals was exported, value US$26m. There are 19 gins, of which 16 are operating. Plantains, oranges, pineapples, sweet potatoes and yucca are raised for home consumption.

The products of the western half are much more varied, the most important being cotton, coffee, sugar-cane, cocoa, maize, sesame and beans. A firm has been organized to produce soluble banana, cocoa and coffee powder, principally for export. Sugar-cane output, 1962–63, was 1·1m. tons.

Rice is grown (500,561 quintals in 1962–63) and wheat in León and the hilly Jinotega district, while tobacco is cultivated round Masaya. Sesame seed is the country's only oilseed of importance, but it is fourth only to coffee, gold and cotton as an export; the 1962–63 crop was 56,327 quintals. An experimental planting of castor seed was made in May 1957. The coffee crop (from 155,000 acres) was 601,146 quintals in 1962–63 (539,597 in 1961–62). There are 67 processing plants. Some other 1962–63 crops (in quintals) were: Maize, 2·7m.; beans, 627,400; sorghum, 1m. With the exception of plantains and yucca or cassava, the greater part of the food supply of the eastern section is imported from the US. The western half of the country produces much of its own food, but is seriously dependent upon weather conditions. There are about 1·5m. head of cattle; 5,491 head were exported in 1963. A modern meat-packing plant was established in 1955; slaughterings were 151,522 in 1961.

*Fishery.* On the Atlantic coast fisheries are an important subsistence activity; the only significant export (1961) were 1,673 turtles, value US$8,510.

*Forestry.* Timber production is declining, though the forests, which cover 10m. acres, contain mahogany and cedar, which were formerly largely exported, three varieties of rosewoods, guayacán (*lignum vitae*) and dyewoods. The ipecacuanha crop was 23,000 lb. in 1957–58, valued at some C$1·4m. Production of timber in 1961, 67·12m. bd ft, value C$70m., of which 22·54m. bd ft were exported. Of 59 sawmills, 25 are inactive.

*Mining.* Production of gold in 1962 was 221,904 fine oz.; of silver, including scrap, 500,050 fine oz. Copper (8,000 tons in 1962) and precious stones are also found. Large deposits of tungsten in Nueva Segovia were announced in 1961. Experimental drilling for petroleum took place on the Atlantic coast in 1956–57, in the Puerto Cabezas area; and at the end of 1958 concessions were granted near the Costa Rica border, and Lake Nicaragua on the west coast. A petroleum refinery handling 5,000 bbls a day is functioning at Managua.

*Industry.* Chief local industries are matches, cigarettes, beer, soap, leather, metal products, flour, cement, cotton and silk, strong and soft drinks, soluble coffee, dairy products, meat, plywood, cosmetics, detergents, paints and plastic goods.

*Power.* In 1961, 71 diesel and 11 hydro-electric power units produced 121,791,383 kwh. of electricity for public consumption, and industrial, mining and other companies produced 72,908,058 kwh. Construction work on the Río Tuma hydro-electric scheme, designed to augment the supply to Managua and west-coast districts, continues; the first unit of 25,000 kw. is expected to be operating by the end of 1964.

**Labour.** From 26 May 1963 a minimum daily wage of 6 córdobas was introduced nationally. Workers in towns of over 20,000 inhabitants receive 40% more; agricultural workers receive additional food allowances and house loans.

**COMMERCE.** The foreign trade of Nicaragua, in US$1m., was as follows in calendar years:

| | *1957* | *1958* | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|---|---|
| Imports . . | 68·8 | 77·9 | 66·8 | 72·5 | 74·4 | 98·2 | 77·0 |
| Exports . . | 71·2 | 71·1 | 72·2 | 62·7 | 68·4 | 90·2 | 94·3 |

The main imports in 1963 (in US$1m.) were: Manufactured goods, 28; machinery and vehicles, 19·4; chemicals, 17; foodstuff, 6. These were supplied largely by USA, Germany, Japan and UK.

In 1963 the main exports (in US$1m.) were: Cotton, 39·7; coffee, 18·4; meat, 8·7; timber, 1; sugar, 4·7; soluble coffee, 3·6; bananas, 1·43.

Total trade between Nicaragua and UK (British Board of Trade returns) in £ sterling:

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK . . | 1,148,917 | 1,001,174 | 885,089 | 1,139,133 | 1,059,494 |
| Exports from UK . . | 824,217 | 882,269 | 981,770 | 1,347,992 | 1,791,544 |
| Re-exports from UK . . | 2,436 | 2,525 | 2,153 | 1,801 | 3,012 |

**COMMUNICATIONS.** *Shipping.* The Pacific ports are Corinto (the largest), San Juan del Sur and Puerto Somoza through which pass most of the external trade. The chief eastern ports are El Bluff (for Bluefields) and Puerto Cabezas. The merchant marine consists solely of the Mamenic Line with 4 vessels owned and 5 chartered. In 1960, 1,034 ships entered and 1,015 left Nicaraguan ports.

*Roads.* 669 km are paved, out of a total of 6,137 km. All but one short stretch of the Nicaraguan section of the Pan-American Highway is now (1962) paved. The all-weather Roosevelt Highway linking Managua with the river port Rama is almost completed, to provide the first overland link with the Atlantic coast. There are paved roads to San Juan del Sur, Puerto Somoza and Corinto. Motor vehicles, 1961, were 8,309 passenger cars, 4,784 trucks, 674 buses and 1,713 motor cycles.

*Railways.* The Pacific Railroad of Nicaragua, owned and operated by the Government, has a total length of 403 km, all single-track, and connects Corinto, Chinandega, León, Managua, Masaya and Granada. Passenger traffic decreased from 2·3m. in 1960 to 1·4m. in 1961; freight from 419,901 to 253,137 net tons.

*Post.* There are (1962) 7,474 km of (government-owned) telegraph wire, and 221 offices; also 6,384 km of telephone wire and 208 telephone stations serving 11,700 instruments, 80% automatic and all government-operated. There are 233 post offices, and good service between the chief towns of the western section; service into the interior is carried by air-mail. All American Cable Co. connects with New York and has a powerful station at San Juan del Sur.

The Tropical Radio Telegraph Company maintains a powerful station at Managua, and branch stations at Bluefields and Puerto Cabezas. The Government operates the National Radio with 47 broadcasting stations: there are 31 commercial stations and some 70 others. Number of wireless sets in 1954 was 20,000. There is a television station at Managua.

*Aviation.* LANICA, the Nicaraguan national airline, has 3 flights a week to Miami and daily flights to Bluefields, Puerto Cabezas and the mining towns of Siuna and Bonanza. Pan-American World Airways and TACA (Transportes Aéreos Centroamericanos), a US-owned line registered in El Salvador, have daily services to Panama, Mexico, the other Central American countries and USA. Eleven airlines were operating in Nicaragua in 1960. In that year over 20,000 passengers entered and left, and air freight was nearly 3m. kg in either direction.

Las Mercedes airport, Managua, is being extended to accommodate jet aircraft, with the help of a 1963 A.I.D. loan of US$950,000.

**MONEY.** The monetary unit is the *córdoba*, divided into 100 *centavos*. Its exchange parity with gold is managed by the Central Bank of Nicaragua and the Government. No gold or silver coins are minted. On 31 March 1963 total money supply was 440m. córdobas. Gold coins provided by law (1912) were 10, 5 and 2½ córdobas, but have never been struck. National bank-notes form the greater part of the currency, in denominations from 1,000 córdoba to 1 córdoba. Silver coins struck, but now out of circulation, are 50, 25 and 10 centavos; copper–nickel and copper–zinc coins, 50, 25, 10 and 5 centavos; copper coin, 1 centavo.

Effective 1 July 1955 the córdoba was devalued from its 1946 rate of 5 córdobas = US$1 to 7 córdobas = $1. At the new rate, 1 córdoba = 0·126953 gramme of fine gold, 245 = 1 troy oz. of gold and 1 córdoba = 14·2857 US cents.

**BANKING.** The National Bank of Nicaragua at Managua, founded in 1912, owned by the Government since 1924 was completely reorganized in May 1940. Its directorate was transferred from the US to Managua in 1938. On 1 March 1962 the capital of the National Bank was increased to C$130m. and a new law reorganized the functional purposes of the bank giving it increased responsibilities as a development bank. The Central Bank of Nicaragua came into operation on 1 Jan. 1961 as an autonomous bank of issue, absorbing the assets and liabilities of the issue department of the National Bank. The total foreign-exchange reserve of the Central Bank was, as of 30 Sept. 1963, US$30·1m. A new exchange law came into force on 1 March 1963 under which the free convertibility of the Nicaraguan córdoba was decreed. A new import law effective also as from 1 March 1963 waived the formality of issuing import permits for consular purposes. The standard 3 classifications still remain in force, namely essential goods, less essential goods and non-essential or luxury goods. The Foreign Investment Law of 26 Feb. 1955 guarantees the repatriation of capital and profits of foreign investments.

Two private commercial banks opened in Managua in 1953, the Banco Nicaragüense SA, and the Banco de América SA with paid-up capital of C$15m. and $C14·5m. respectively. There is a branch of the Bank of London & Montreal Ltd in Managua. The legal minimum cash holding for commercial banks with the Central Bank is 28% for all accounts.

**WEIGHTS AND MEASURES.** Since 1893 the metric system of weights and measures has been recommended.

# NORWAY

## Kongeriket Norge

**HISTORY.** By the Treaty of 14 Jan. 1814 Norway was ceded to the King of Sweden by the King of Denmark, but the Norwegian people declared themselves independent and elected Prince Christian Frederik of Denmark as their king. The foreign Powers refused to recognize this election, and on 14 Aug. a convention proclaimed the independence of Norway in a personal union with Sweden. This was followed on 4 Nov. by the election of Karl XIII (II) as King of Norway. Norway declared this union dissolved, 7 June 1905, and Sweden agreed to the repeal of the union on 26 Oct. 1905. The throne was offered to a prince of the reigning house of Sweden, who declined. After a plebiscite, Prince Carl of Denmark was formally elected King on 18 Nov. 1905, and took the name of Haakon VII.

**REIGNING KING.** **Olav V**, born 2 July 1903, married on 21 March 1929 to Princess Märtha of Sweden (born 28 March 1901, died 5 April 1954), daughter of the late Prince Carl (son of King Oscar II). He succeeded on the death of his father, King Haakon VII, on 21 Sept. 1957. *Offspring:* Princess Ragnhild Alexandra, born 9 June 1930 (married, 1953, Hr. Erling Lorentzen); Princess Astrid Maud Ingeborg, born 12 Feb. 1932 (married, 12 Jan. 1961, Hr. Johan Martin Ferner); Crown Prince Harald, born 21 Feb. 1937.

**CONSTITUTION AND GOVERNMENT.** Norway is a constitutional and hereditary monarchy. The royal succession is in direct male line in the order of primogeniture. In default of male heirs the King may propose a successor to the Storting, but this assembly has the right to nominate another, if it does not agree with the proposal.

The constitution, voted by the constituent assembly at Eidsvoll on

17 May 1814 and modified at various times, vests the legislative power of the realm in the *Storting* (Parliament). The royal veto may be exercised twice; but if the same Bill passes three Stortings formed by separate and subsequent elections, it becomes the law of the land without the assent of the sovereign. The King has the command of the land, sea and air forces, and makes all appointments.

*National flag:* A blue cross with white borders on red.

*National anthem:* Ja, vi elsker dette landet (words by B. Björnson, 1865; tune by R. Nordraak, 1865).

The Storting assembles every year. The meetings take place *suo jure*, and not by any writ from the King or the executive. They begin on the first weekday in October each year, and their duration is not limited. Every Norwegian subject of 21 years of age (provided that he resides and has resided for 5 years in the country) is entitled to vote, unless he is disqualified from a special cause. Women are, since 1913, entitled to vote under the same conditions as men. The mode of election is direct and the method of election is proportional. Since 5 April 1938 the people chose their 150 representatives every fourth year. The country is divided into 20 districts, each electing from 4 to 13 representatives. Representatives must not be less than 21 years of age and must have resided in Norway for 10 years; they can be elected in any district of the kingdom without regard to their residence.

Since June 1938 all branches of the Government service, including the state church, are open to women.

At the elections for the Storting held on 11 Sept. 1961 the following parties were elected: Labour, 74; Conservative, 29; Liberal, 14; Agrarian, 16; Christian Popular, 15, and Socialist People's Party, 2.

The Storting, when assembled, divides itself by election into the *Lagting* and the *Odelsting*. The former is composed of one-fourth of the members of the Storting, and the other of the remaining three-fourths. Each Ting (the Storting, the Odelsting and the Lagting) nominates its own president. Most questions are decided by the Storting, but questions relating to legislation must be considered and decided by the Odelsting and the Lagting separately. Only when the Odelsting and the Lagting disagree, the Bill has to be considered by the Storting in plenary sitting, and a new law can then only be decided by a majority of two-thirds of the voters. The same majority is required for alterations of the Constitution, which can only be decided by the Storting in plenary sitting. The Storting elects 5 delegates, whose duty it is to revise the public accounts. The Lagting and the ordinary members of the Supreme Court of Justice (the *Høyesterett*) form a High Court of the Realm (the (*Riksrett*) for the trial of ministers, members of the *Høyesterett* and members of the Storting. The impeachment before the *Riksrett* can only be decided by the Odelsting.

The executive is represented by the King, who exercises his authority through the Cabinet called the Council of State (*Statsråd*), composed of a Prime Minister (*Statsminister*) and at least 7 ministers (*Statsråder*). The ministers are entitled to be present in the Storting and to take part in the discussions, but without a vote. The Cabinet was in April 1964 composed as follows (all Labour Party):

*Prime Minister:* Einar Gerhardsen.

*Foreign Affairs:* Halvard Lange. *Municipal Affairs and Labour:* Jens Haugland. *Finance and Customs:* Andreas Cappelen. *Defence:* Gudmund

Harlem. *Ecclesiastical Affairs and Education:* Helge Sivertsen. *Industry and Handicraft:* Karl Trasti. *Trade and Shipping:* Trygve Lie. *Communications:* Eric Himle. *Fisheries:* Magnus Andersen. *Wages and Prices:* Idar Norstrand. *Social Welfare:* Olav Gjærevoll. *Family and Consumer Affairs:* Fru Aase Bjerkholt. *Justice and Police:* Oscar Christian Gundersen. *Agriculture:* Leif Granli.

The official languages are Bokmål (or Riksmål) and Landsmål (or Nynorsk).

LOCAL GOVERNMENT. For the purposes of administration the country is divided into 20 counties (*fylker*), in each of which the central government is represented by a county governor (*fylkesmannen*). In addition, there are 49 urban districts (*by-kommuner*) and 476 rural districts (*herredskommuner*), each of which usually corresponds in size to a parish (*prestegjeld*). The districts are administered by district councils (*kommunestyre*), whose membership may vary between 13 and 85 councillors, and by a committee (*formannskap*) which is elected by and from the members of the council. The council is four times the size of the committee. The council elects a chairman and a vice-chairman from among its members. Councillors are elected in accordance with rules which are in most cases identical with the rules governing election to Parliament.

Each of the 18 counties forms a county district (*fylkeskommune*), while the remaining 2, Oslo and Bergen, each comprise an urban district. The supreme authority in a county district is the county council (*fylkesting*). Every district council elects its district representatives in the proportion of one to every 6,000 inhabitants, though no one district may elect more than one-third of the total number of representatives in the county council. In a county district the county committee (*fylkesutvalg*) occupies a position corresponding to that of the committee (*formannskap*) in the primary districts. The county committee is elected by and from among the members of the county council. The number of county committee members is one-fourth of the membership of the county council, but must be at least 5 and not more than 11. The county council elects from among the members of the county committee a county sheriff (*fylkesordfører*) and a deputy sheriff.

As from 1 Jan. 1924 the name of the capital, Kristiania, was changed to Oslo. As from 1 Jan. 1948 part of Akershus fylke has been included in Oslo.

**RELIGION.** The Evangelical Lutheran religion is the national church, endowed by the State. Its clergy are nominated by the King. All other religions are tolerated. Ecclesiastically Norway is divided into 9 *Bispedømmer* (bishoprics), 91 *Prostier* (provostships or archdeaconries) and 562 *Prestegjeld* (clerical districts). In 1960 there were 134,551 dissenters. The Roman Catholics are under a Bishop at Oslo, a Vicar Apostolic at Trondheim and an Apostolic Prefect at Tromsø.

**EDUCATION.** Education is compulsory, the school age being from 7 to 14. In 1962–63 there were 3,851 primary schools in the districts with 313,225 pupils, and 207 schools with 106,927 pupils in the towns. In 1959 a new law on primary schools, superseding the 1936 regulations, authorized the municipalities to extend the school-leaving age by 2 years by introducing an 'upper stage' in primary schools. In 1962–63 this scheme was applied in 64 schools with 17,473 pupils. Primary continuation schools had 39,834 pupils. There were 315 secondary general schools (103,105 pupils)—42 state schools (18,446 pupils), 249 communal schools (81,662 pupils) and 24 private schools (2,997 pupils).

There are also several special, industrial, technical and arts schools, as well as teachers' training colleges (4,667 students in 1962–63).

Norway has 2 universities, at Oslo (founded 1811), attended in 1962 by 7,373 students, and at Bergen (established in 1946, opened 30 Aug. 1948), attended by 1,465 students. There is a state institute of technology at Trondheim attended by 2,047 students, a college of agriculture and forestry in Aas with 293 students, the state academy of fine arts with 60 students, a veterinary college with 163 students and a state college of business administration and economics with 215 students. In 1962–63 about 2,950 Norwegians were studying at foreign universities.

*Cinemas* (1962). There were 646 cinemas with a seating capacity of 170,724.

*Newspapers* (1962). There were 81 daily newspapers with a combined circulation of 1,377,000; of these, 10 with a combined circulation of 500,000 appear in Oslo.

**SOCIAL WELFARE.** In 1961 a total of 2,400m. kroner were paid under different social welfare schemes, amounting to 7·8% of the net national income.

The following conspectus gives a survey of the schemes established by law. Many municipalities grant additional benefits.

| Type of scheme | Introduced[1] | Scope | Principal benefits |
|---|---|---|---|
| Unemployment insurance | 1938 (1959) | Nearly all wage-earners | Kr. 3 to 19 per day |

**JUSTICE.** The judicature in Norway is common to both civil and criminal cases. The same judges, who are state officials, preside over both kinds of cases. The participation of lay assessors and jurors, summoned for each case, varies according to the civil or criminal nature of the case.

The ordinary Court of First Instance (*Herreds- og byrett*) is presided over by a judge who in criminal cases is, and in civil cases may be, assisted by 2 lay assessors, chosen by ballot from a panel elected by the district council. In criminal matters the Court of First Instance is generally competent in cases where the maximum penalty incurred is 5 years imprisonment. Altogether there are 106 Courts of First Instance. There is a Conciliation Council (*Forliksraad*) for each community, consisting of 3 men or women, elected by the district council, before which, as a general rule, civil cases must first be brought for mediation.

The Court of Second Instance (*Lagmannsrett*) is presided over by a judge, together with 2 other judges. In civil matters they may be assisted by lay assessors, ordinarily 4 but in some cases 2, chosen and elected in the same way as mentioned above. In criminal cases the lay element is a jury composed of 10 jurors. This court is a court of appeal in both civil and criminal cases. In addition, as a court of first instance, it takes cognizance of all criminal cases (other than those coming under the *Riksrett*—the court for impeachments) which do not come under the competence of the Court of First Instance. The kingdom is divided into 5 districts (*Lagdömmer*) for the purpose of the Courts of Second Instance.

The Supreme Court (*Höyesterett*) is the ultimate court of appeal. In criminal cases the competence of the court, however, is limited to the complaints against the application of laws, the measuring out of the penalty and the trial of the case of the subordinate courts. The Supreme Court consists of a president and 17 judges. In each single case the court consists of 5 judges.

All serious offences are prosecuted by the State. The public prosecution is led by a general prosecutor (*riksadvokat*) and there are 12 district prosecutors (*statsadvokater*). Counsel for the defence is paid by the State.

There are 6 penal and correctional institutions for delinquents; inmates (1 July 1963), 644 males and 31 females. There are also 44 local prisons in which were detained (1 July 1963) 990 males and 7 females.

**DEFENCE.** Service is universal and compulsory, liability in peacetime commencing at the age of 20 and continuing till the age of 44. The training period in the Army is 12 months, in the Navy and Air Force, 15 months.

*Army.* The Army is divided into 5 territorial commands, comprising all land forces. The territorial commands again are divided into a number of land defence districts. Major units are organized mainly in Regimental Combat Teams. Peace establishment mainly consists of 2 RCTs, one of which has a reduced table of organization.

*Navy.* The Navy is divided into 5 commands, and consists of the following seagoing warships: 3 fleet destroyers (purchased from Great Britain), 5 frigates (2 lent by Great Britain in 1953 and bought in 1956, and 3 lent by Canada in 1956 and transferred outright to Norway in 1958), 6 submarines (4 *ex*-British, 1 *ex*-German, 1 on loan from Germany), 2 ocean minesweepers (acquired from USA in 1955), 7 coastal minesweepers, 24 motor torpedo-boats, 1 MGB, 4 coastal minelayers (acquired from USA in 1959–60), 1 mine-planter, 1 training ship (*ex*-seaplane tender transferred from USA in 1958), 2 depot ships, 1 sonar training ship, the royal yacht *Norge* and 3 fishery protection vessels.

Five destroyer escorts, 2 patrol craft, 4 MTBs and 15 coastal submarines are under construction.

Naval personnel in 1963 totalled 6,300 officers and ratings.

*Air Force.* The Royal Norwegian Air Force is divided into 2 commands. It operates 2 squadrons of F-86 Sabre day fighters, 2 squadrons of F-86 K Sabre all-weather fighters and 1 squadron of RF-84F Thunderflash photo-reconnaissance fighters, 1 squadron of F-104G, 2 anti-submarine squadrons equipped with SA-16B Albatross aircraft, a squadron of C-119 Fairchild Packet and C-47 transports, a number of communications, helicopter and training units, as well as a Nike-missile battalion and several anti-aircraft battalions.

*Agriculture.* Norway is a barren and mountainous country. The arable soil is found in comparatively narrow strips, gathered in deep and narrow valleys and around fiords and lakes. Large, continuous tracts fit for cultivation do not exist. Of the total area, 73·9% is unproductive, 22·8% forest and 3·3% under cultivation and other used soils.

| Hay | 505,930 | 501,509 | 485,111 | 3,033,538 | 2,935,756 | 2,809,080 |

Livestock, 20 June 1962: 94,037 horses, 1,158,802 cattle (592,051 milch cows), 1,864,238 sheep, 98,955 goats, 550,440 pigs, 4,845,202 poultry.

Fur production in 1962–63 was estimated as follows (1961–62 actual production in brackets): Silver fox, 1,500 (2,100); blue fox, 105,000 (124,000); mink, 1·06m. (1m.).

*Forestry.* The forests are one of the chief natural sources of wealth. The total area covered with productive forests is estimated at 59,545 sq. km, of which 81% is under pine-trees. In addition, there are 10,713 sq. km of deciduous woods above the conifer limit and along the Arctic coast. The forest area covers 22·8% of the land area. Forests in public ownership cover 7,271 sq. km of productive forests and 6,431 sq. km of deciduous woods above the conifer limit. Beyond the home consumption of timber and fuel wood, the essential part of the growth is consumed as raw material in the paper industry, most of which is exported. The annual natural increase is about 13m. cu. metres. In 1961–62, 7·4m. cu. metres were felled for production of pulp and other industrial wood products. In 1962 the export value of timber produce was 18% of the total exports.

*Fisheries.* The number of persons in 1961 engaged in cod fisheries was 31,174; in winter herring fisheries, 13,263; the total number of persons engaged in the fisheries was 59,381, of whom 15,183 had another chief occupation. The number of fishing vessels with motor was 42,100 (380,860 gross tons).

The value of sea fisheries (based on prices paid at the fishing places) in kroner in 1962 was: Cod, 186m.; mackerel, 13m.; coal-fish (saithe), 45m.; haddock, 35m.; herring, 171m.; dogfish, 14m.; deep-water prawn, 42m. The catch totalled in 1962, 1·1m. metric tons, valued at 658m. kroner.

Whale oil and by-products (in 1,000 bbls): 691 in 1960, 754 in 1961, 582 in 1962. Total value of oil and by-products was, in 1960, 199m.; 1961, 217m.; 1962, 124m.

The Norwegian fishery limit is 12 miles from 1 Sept. 1961, except for the coast east of Lindesnes.

*Manufactures.* Industry is chiefly based on raw materials produced within the country (wood, fish, etc.), and on water power, of which the country possesses a large amount. The pulp and paper industry, the canning industry and the chemical and basic metal industries are the most important export manufactures. In the following table are given figures for industrial establishments in 1961, excluding one-man shops. Electrical plants, construction and building industry and publishing are not included. The values are given in 1,000 kroner.

*Electricity.* Norway is a large producer of hydro-electric energy. The potential total hydro-electric power, for a whole year at regulated minimum water flow and by 82% efficiency, is estimated at 15m. kw. or about 131,000m. kwh. annually. About 60% of the water power suitable for development consists of waterfalls with a height of at least 900 ft.

By the end of 1961, 4,006,000 kw. (about 27%) of the available water power had been developed for production of electricity. At the same time the capacity of the installations for production of thermo-electric energy amounted to only 165,000 kw. As at 31 Dec. 1961 the total capacity of generators (of hydro-electric and thermo-electric plants) was 8·41m. kva.

In 1962 the total production of electricity amounted to 37,470m. kwh., of which about 99% was produced by hydro-electric plants.

Most of the electricity is used for industrial purposes, especially by the chemical and basic metal industries for production of nitrate of calcium and other nitrogen products, carbide, ferrosilicon and other ferro-alloys, aluminium and zinc. The paper and pulp industries are also big consumers of electricity.

In 1961, 99·3% of the population were supplied with electricity in their homes.

**COMMUNICATIONS.** *Shipping.* The total registered mercantile marine on 1 Jan. 1963 was 2,292 vessels, 12,509,000 gross tons (steam and motor vessels above 100 gross tons). These figures do not include fishing and catching boats, floating whaling factories, tugs, salvage vessels, ice-breakers and similar special types of vessel, totalling 649 vessels of 260,000 gross tons. Ships under construction or on order on 1 July 1963 totalled 4·1m. gross tons, of which 3·5m. gross tons were tanker tonnage.

Goods (in 1,000 metric tons) discharged, 11,198; loaded, 21,644, of which 13,032 was Swedish iron ore shipped from Narvik.

*Roads.* On 31 Dec. 1962 the length of the public roads was 53,224 km. Of these, 25,663 km were main roads and 27,561 km local roads; 4,648 km had some kind of paving, mostly bituminous treatment, nearly all the rest being gravel-surfaced.

Number of registered motor vehicles (31 Dec. 1962) was 662,200, including 321,652 passenger cars (including taxis), 146,265 lorries, vans and special vehicles, 5,766 buses, 188,517 motor cycles. The scheduled bus and lorry services in 1962 drove 2,849m. passenger-km and 89m. net ton-km.

*Railways.* The length of state railways on 31 Dec. 1962 was 4,330 km; of private companies, 78 km. On 1,827 km of state and 42 km of private railways electric power is installed. Total receipts of the state railways in the year 1962 were 522m. kroner; total expenses (excluding interest on capital), 621m. kroner. The state railways carried 18·9m. metric tons of freight (of which 13·3m. was iron ore on the Ofoten railway) and 38·4m. passengers.

*Telecommunications.* Length of telegraph and telephone lines and circuits, 31 Dec. 1962: 89,000 km of line, 2·45m. km of circuits (state, 83,000 and 2·35m. km respectively). Number of telephones, 774,000; state telegraph and telephone offices, 1,862. Receipts, 406·7m. kroner; expenses, 378·9m. kroner (interest on capital included).

*Aviation.* Det Norske Luftfartselskap (DNL) started its post-war activities on 1 April 1946. On 1 Aug. 1946 DNL, together with DDL (Danish Airlines) and ABA/SILA (Swedish Airlines), formed the 'Scandinavian Airlines System'—SAS. The 3 companies remained independent units, but all services were co-ordinated. In 1951 a new agreement was signed (retroactive from 1 Oct. 1950) according to which the 3 national companies became holding partners in a new organization which took over the entire operational system. Denmark and Norway hold each two-sevenths and Sweden three-sevenths of the capital, but they have joint responsibility towards third parties.

In the autumn of 1962 SAS had a fleet of 50 planes (including 22 jet planes), serving some 80 cities in 41 countries. Length of route net, about 200,000 km.

**CURRENCY AND BANKING.** By a treaty signed 16 Oct. 1875 Norway adopted the same monetary system as Sweden and Denmark. The Norwegian *krone*, of 100 *öre*, is of the value of 1*s*. at par, or about 20 kroner to the £ sterling. The standard of value is gold. National bank-notes of 5, 10, 50, 100, 500 and 1,000 kroner are legal means of payment, and the bank is ordinarily bound to exchange them for gold on presentation. By a royal decree of 27 Sept. 1931 the gold standard was suspended and there was placed an embargo on gold.

On 30 June 1963 the nominal value of the coin in circulation was 151m. kroner; notes in circulation, 4,221m. kroner.

The Norges Bank is a joint-stock bank; in 1949 the state acquired all the shares hitherto privately owned. The bank is governed by laws enacted by the State, and its directors are elected by the Storting, except the president and vice-president of the head office, who are nominated by the King. It is the only bank of issue.

At the end of 1962 there were 58 private joint-stock banks. Their total amount of capital and funds was 777m. kroner (capital 382m., funds 395m.). Deposits amounted to 6,764m. kroner, of which 2,608m. kroner were at call and notice, and 4,156m. kroner on time.

The number of savings banks at the end of 1962 was 590. The total amount of the funds of the savings banks amounted to 430m. kroner, and total deposits 8,776m. kroner, of which 962m. kroner were at call and notice and 7,814m. kroner on time.

**WEIGHTS AND MEASURES.** The metric system of weights and measures has been obligatory since 1875.

## SVALBARD

An archipelago situated between 10° and 35° E. long. and between 74° and 81° N. lat. The distance from Ingøy, Norway, to Bear Island is about 390 km and to Spitsbergen (Sørkapp) about 635 km.

Total area, 62,050 sq. km (23,950 sq. miles). The chief islands are: Vestspitsbergen, Nordaustlandet (North East Land), Edgeøya (Edge Island), Barentsøya (Barents Island), Prins Karls Forland, Kong Karls Land, Hopen (Hope Island), Kvitøya (White Island) and Bjørnøya (Bear Island). The climate is essentially arctic, tempered by the Gulf Stream.

The archipelago was probably discovered by Norwegians in 1194 and rediscovered by the Dutch navigator Barents in 1596. The English explorer Henry Hudson visited Spitsbergen in 1607. In the 17th century the very lucrative whale-hunting caused rival Dutch, British and Norwegian claims to sovereignty and quarrels about the hunting-places. But when in the 18th century the whale-hunting ended, the question of the sovereignty of Spitsbergen lost its actuality; it was again raised in the 20th century, owing to the discovery and exploitation of rich coalfields. It was settled by a treaty, signed on 9 Feb. 1920 at Paris, in which Norway's sovereignty over the archipelago was recognized. On 14 Aug. 1925 the archipelago was officially incorporated in Norway.

In the autumn of 1944 the Soviet Government approached the Norwegian Government on the question of revising the treaty of 1920. Both governments agreed that any modification could be made only with the approval of the other signatory powers. On 15 Feb. 1947 the Storting reiterated Norway's willingness to discuss with the Soviet Union the revision of the 1920 treaty and economic questions concerning Svalbard, but refused bilateral discussions of the defence of Svalbard.

Coal is the principal product. There are 6 mining camps (3 Norwegian and 3 Russian), but 2 Norwegian and 1 Russian are not being worked. They are inhabited all the year round. The total Norwegian population in Svalbard on 31 Dec. 1961 was 907, the Russian, 2,054. In 1961, 318,430 metric tons of coal were exported from the Norwegian and 397,927 metric tons from the Russian mines.

An American, a Russian and a Norwegian company have been prospecting for oil.

UK exports to Spitzbergen (British Board of Trade returns): 1958, £991; 1959, nil; 1960, £329; 1961, nil; 1962, nil; 1963, £107. UK imports from Spitzbergen, 1957–63, nil.

## JAN MAYEN

This is a bleak and desolate island between Greenland and Northern Norway, about 300 miles north of Iceland. The total area is 380 sq. km (145 sq. miles). It is of volcanic origin and is mountainous, Beerenberg in the north reaching a height of 2,277 metres.

The island was possibly discovered by Henry Hudson in 1608, and it was first named Hudson's Tutches (Touches). It was again and again rediscovered and renamed. Its present name derives from the Dutch whaling captain Jan Jacobsz. May, who indisputably discovered the island in 1614. It was uninhabited, but occasionally visited by seal hunters and trappers, until 1921 when Norway established a radio and meteorological station. On 8 May 1929 Jan Mayen was officially proclaimed as incorporated in the Norwegian state, and at the same time the manager of the meteorological station on the island was invested with police authority. Its relation to Norway was finally settled by law of 27 Feb. 1930. In 1958–59 a loran station and a landing strip for aircraft were built; and oil and fresh water can now be supplied.

# BOUVET ISLAND

### BOUVETÖYA

This uninhabited island in the southern Atlantic was discovered in 1739 by a French naval officer, Jean Baptiste Lozier Bouvet, but no flag was hoisted till, in 1825, Capt. Norris raised the Union Jack. A neighbouring island, Thompson Island, has been reported, but its existence is seriously doubted. In 1928 Great Britain waived its claim to Bouvet in favour of Norway, which in Dec. 1927 had occupied the island. A law of 27 Feb. 1930 declared Bouvet Island a Norwegian dependency. The area is 58 sq. km (36 sq. miles).

# PETER I ISLAND

### PETER I ÖY

This uninhabited island in the Antarctic Ocean was discovered in 1821 by the Russian explorer, Admiral von Bellingshausen, who sighted it at a distance. The first landing was made in 1929 by a Norwegian expedition which hoisted the Norwegian flag. On 1 May 1931 Peter I Island was placed under Norwegian sovereignty, and on 24 March 1933 it was incorporated in Norway as a dependency. The area is 249 sq. km (150 sq. miles).

# QUEEN MAUD LAND

### DRONNING MAUD LAND

On 14 Jan. 1939 the Norwegian Cabinet placed that part of the Antarctic Continent from the border of Falkland Islands dependency in the west to the border of the Australian Antarctic dependency in the east (between 20° W. and 45° E.) under Norwegian sovereignty. The territory was explored only by Norwegians and had hitherto been ownerless. During 1949–52 and 1957–61 a number of Norwegian and other expeditions explored Queen Maud Land.

## DIPLOMATIC REPRESENTATIVES

Norway maintains embassies in Argentina (also Minister for Paraguay and Uruguay), Austria (also Minister for Czechoslovakia and Hungary), Belgium (also Minister for Luxembourg), Brazil, Canada, Chile (also Minister for Bolivia and Peru), China, Colombia (also for Venezuela and Minister for Ecuador), Cuba (also Minister for Dominican Republic and Haiti), Denmark, Finland, France, Germany, Iceland, India (also for Burma and Minister for Ceylon), Iran (also for Pakistan), Israel (also Minister for Cyprus), Italy (also for Greece), Japan (also for Korea), Mexico (also Minister for Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, Panama), Morocco (also for Algeria, Tunisia and Madagascar), Netherlands, Nigeria, Poland, Portugal, Spain, Sweden, Switzerland, Thailand (also for Philippines and Minister for Indonesia), Turkey (also Minister for Iraq), USSR, UAR (also for Saudi Arabia and Minister for Ethiopia, Lebanon, Sudan and Yemen), UK (also for Irish Republic), USA, Yugoslavia (also Minister for Bulgaria and Rumania.)

# PANAMA

## REPÚBLICA DE PANAMÁ

**HISTORY.** A revolution, inspired by the USA, led to the separation of Panama from the United States of Colombia and the declaration of its independence on 3 Nov. 1903. The *de facto* Government was on 13 Nov. recognized by the USA, and soon afterwards by the other Powers. In 1914 Colombia agreed to recognize the independence of Panama. This treaty was ratified by the USA and Colombia in 1921, and on 8 May 1924 diplomatic relations between Colombia and Panama were established.

For the treaties regulating the relations between Panama and the United States *see* pp. 1298–99.

**CONSTITUTION AND GOVERNMENT.** The new constitution of 1 March 1946 continued the existing provisions for a National Assembly of 42 members (increased to 53 since the 1950 census, 1 for every 15,000 inhabitants). The deputies' mandate is for 4 years. The Assembly meets annually on 1 Oct. The term of the President of the Republic, elected by direct vote, is 4 years, and he is not eligible for the two succeeding terms. Women have equal rights with men.

The official language is Spanish.

*President of the Republic:* Roberto F. Chiari (National Union of Opposition), elected 8 May 1960; inaugurated 1 Oct.

He defeated Ricardo A. Arias (National Patriotic Coalition) and Victor F. Goytía (Liberal Party of Civil Resistance).

*First Vice-President:* Dr Sergio González Ruiz.
*Second Vice-President:* José D. Bazán.
*Minister for Foreign Affairs:* Galileo Solís.

There are normally 2 vice-presidents, elected every 4 years by direct popular vote, and a cabinet of 7 ministers nominated by the President, who may attend and address the legislature but may not vote. The Comptroller General is elected by the National Assembly for 4 years.

*National flag:* Rectangle of 4 quarters: white with blue star, blue, white with red star, red.

*National anthem:* Alcanzamos por fin la victoria (words by J. de la Ossa; tune by Santos Jorge, 1903).

**AREA AND POPULATION.** Extreme length is about 480 miles; breadth between 37 and 110 miles; coastline, 426 miles on the Atlantic and 767 on the Pacific; total area (excluding the Canal Zone) is 28,576 sq. miles (74,010 sq. km); population according to the census of 11 Dec. 1960 was 1,075,541 (14·1 per sq. km) including 62,187 tribal Indians. No recent figures are available of the racial composition of the population; the 1940 census gave 12% white, 14·5% Negro, 72% mixed and 1·5% other races. There are approximately 10,000 British subjects, chiefly coloured people from the West Indies.

The capital is Panama City, on the Pacific coast; population, estimated 1960, 273,440. There are 9 provinces (with census populations Dec. 1960) as follows (the capitals in brackets): Bocas del Toro (Bocas del Toro), 32,660; Chiriquí (David), 188,350; Coclé (Penonomé), 93,156; Colón (Colón), 105,416; Los Santos (Las Tablas), 70,554; Herrera (Chitré), 61,672; Darién (La Palma), 19,715; Panama (Panama City), 372,393; Veraguas (Santiago), 131,685. The port of Colón on the Atlantic coast had 59,598. Smaller ports on the Pacific are Aguadulce, Pedregal, Montijo, Puerto Mutis and Puerto Armuelles; on the Atlantic, Bocas del Toro, Almirante, Portobello, Mandinga and Permé.

Birth rate, 1960, was 41 per 1,000 population; death rate, 8·4; marriage rate, 13·1; infantile death rate, 56·8 per 1,000 live births. The figures exclude the tribal Indians.

**RELIGION.** The 1956 census showed that 95% of the population was Roman Catholic and 5% Protestant. There is freedom of religious worship and separation of Church and State. Clergymen may teach in the schools but may not hold public office.

**EDUCATION.** Elementary education is compulsory for all children from 7 to 15 years of age, with an estimated 213,330 students in schools throughout the Republic in 1962–63; 51 private primary schools and 107 private post-primary schools are included in these figures. The University of Panama at Panama City, inaugurated on 7 Oct. 1935, had a total enrolment (1962) of 4,227 students in the schools of law, science and other professional subjects; the university was granted autonomy on 28 Sept. 1946. Up to the academic year 1956–57 the university was a centre of evening studies (except for the faculty of medicine); since 1956–57 all faculties hold day classes as well. A new site, called University City, on the outskirts of Panama City was inaugurated in June 1950.

The 1960 census showed that 14% of the population over 10 years old were illiterate, excluding the tribal Indians (compared with 28·3% in 1950).

*Newspapers.* Of the 5 daily newspapers published in the capital, 2 have separate English editions. There is also an English weekly with a Spanish supplement, catering for the large British West Indian community in Panama.

*Cinemas.* There were, in Dec. 1963, 52 cinemas, of which 27 were in the district of Panama. All films must have Spanish subtitles.

**JUSTICE.** The death penalty does not exist. The Supreme Court consists of 9 justices appointed by the executive with the approval of the National Assembly, one every 2 years to serve 18 years.

**FINANCE.** The USA have the right to import into the Canal Zone supplies of all descriptions required for canal construction, maintenance and protection and for the use of their employees, free of all taxes.

The budget for calendar years until 1962, fiscal years March–Feb. from 1 March 1963, balanced as follows (in balboas; 1 balboa = US$1): 1960, 59,436,080; 1961, 63,127,027; 1962, 66,802,227; 1963–64, 77,202,913; 1964–65, 77,772,559.

The revenue includes the rent paid by the US Government for the Canal (US$1,930,000 per annum). Panamanian citizens working in the Canal Zone are now subject to taxation by Panama.

The funded internal debt on 31 Aug. 1962 amounted to 47,525,497 balboas, and the external debt to 41,354,692 balboas.

**DEFENCE.** The Republic has no Army or Navy to support, but there are 2 coastguard patrol vessels, and compulsory military service may be imposed in case of need. The National Police Force has an authorized strength of 3,370 officers and men.

**PRODUCTION.** Of the whole area (1950 census), only 15·4% is developed 3·1% is cultivated, 7·3% is natural or artificial pasture land and 5% is fallow. Of the remainder only a small part is cultivated, though the land is rich in resources. About 60% of the country's food requirements are imported. In Jan. 1953 the Institute for Economic Development, a semi-governmental organization, was formed with large powers, *e.g.*, to buy up leading crops at fixed prices and to loan machinery to farmers. Of the land under cultivation, 18% is owned and 59% is usufructuary. The most important export product is bananas, grown by an affiliate of the United Fruit Company and shipped to the USA. Exports, 1962, 6·5m. stems. Most important food crop, for home consumption, is rice, grown on 80% of the farms; Panama's *per capita* consumption is very high. Output of rough rice from 97,400 hectares, was 5,244,700 quintals in 1962. Other products are maize (91,800 hectares yielding 1,003,700 quintals in 1962), cocoa, abacá fibres, abacá seeds, coffee and coconuts. Beer, whisky, rum, 'seco', anice and gin are produced. Coffee is grown in the province of Chiriquí, near the Costa Rican frontier; total production in 1961-62 was 110,000 quintals, and small amounts were exported to West Germany and USA. The country has great timber resources, notably mahogany. According to the livestock estimate of April 1962 there were 835,400 cattle, 204,100 pigs and 2,410,100 poultry. Hides are among minor articles of export.

Consumption of electric energy, 1962, amounted to 192,000 Mw (Panama City and Colón). Gas consumption was 617,138,000 cu. ft. Apart from 2 cement factories, there are few industries; foreign firms are being encouraged to establish industries, and a petrol refinery is operating in Colón.

**COMMERCE.** The imports and exports (excluding re-exports), in balboas, or 6 calendar years are as follows (1 balboa = US$1):

| | Imports | Exports | | Imports | Exports |
|---|---|---|---|---|---|
| 1956 | 83,120,176 | 17,168,624 | 1959 | 98,260,005 | 22,339,170 |
| 1957 | 93,035,784 | 21,953,599 | 1960 | 109,149,098 | 21,200,000 |
| 1958 | 92,802,530 | 21,118,835 | 1961 | 124,413,631 | 21,612,810 |

The huge adverse trade balance is mainly with the USA and is due to the heavy import of consumer goods for sale to the Canal Zone employees and to the big transient population. In 1961 the USA furnished 60% of Panama's imports and took 95·8% of her exports. The United Kingdom was the second largest supplier.

A Free Zone has been constructed at Colón for the storage, processing or sale of goods in transit; a number of US manufacturers and one British firm have leased warehouses and begun operations.

Chief exports (virtually all to the USA) in 1962 (in balboas or dollars) were: Bananas, 10,295,276; fresh shrimps, 6,275,432 (4,334·5 metric tons); cacao (1961), 506,589; refined sugar (1961), 780,189.

Chief imports, 1961, were valued (in balboas or dollars f.o.b.): Petroleum products, 10,974,333; road vehicles, 8,286,195; clothing and cotton materials, 8,556,744; wheat flour, 2,275,051; food, 14,527,504; chemicals and pharmaceuticals, 13,251,401.

Total trade between Panama (including Canal Zone) and UK (British Board of Trade returns, in £ sterling):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK . . | 453.464 | 500.398 | 530.599 | 496.879 | 1,585.374 |
| Exports from UK . . | 3,312,196 | 4,052,279 | 5.281,388 | 4,754.474 | 4,233.150 |
| Re-exports from UK . | 47,965 | 41,590 | 139,949 | 57,673 | 46,281 |

**COMMUNICATIONS.** *Shipping.* Ships under Panamanian registry total about 4m. tons; most of these ships never see Panama but elect Panamanian registry because fees are low and labour laws lenient. All the international maritime traffic for Colón and Panama runs through the Canal Zone ports of Cristóbal and Balboa; Bocas del Toro and Almirante are used for both the provincial and international trade.

*Railways.* The Panama Railroad (owned by the Panama Canal Company), which connects Ancón on the Pacific with Mount Hope on the Atlantic, is the principal railway. It is 47·61 miles long and lies entirely within the Canal Zone territory. As most vessels unload their cargo at Cristóbal (Colón), on the Atlantic side, the greater portion of the merchandise destined for Panama City is brought overland by the Panama Railroad. Between David and La Concepción there is a line 18 miles long, which has now been extended to the port of Puerto Armuelles. From Bocas del Toro, between the Atlantic port of Almirante and Guabito (property of the United Fruit Company), a third railway runs to Suretka on the Costa Rican border (51 miles).

*Roads.* Panama had on 31 Dec. 1962, 4,720 km of roads.

There is a road from Panama City westward as far as the cities of David and Concepción, with several branches. From Concepción it continues to the frontier where it links up with the Costa Rican road system. A concrete highway, maintained by the USA, connects Panama City and Colón. On 31 Dec. 1962 registered motor vehicles, private and commercial, numbered 30,878; this excludes vehicles owned by residents of the Canal Zone.

*Post.* There are telegraph cables from Panama to North America and Central and South American ports, and from Colón to the USA and Europe. There are 33 licensed commercial broadcasting stations, one of which functions in the Canal Zone. There are 3 television stations, one of them run by the US Army in the Canal Zone. Number of telephones in 1963

---

[1] Including new ships built for foreign owners and registered in Panama.

was 26,434 in Panama City and 3,474 in Colón, nearly all operated by private companies.

*Aviation.* Commercial aviation has developed rapidly. Pan American World Airways, Panagra Airways, KLM and other international companies operate at Tocumen Airport (17 miles from Panama City), which takes jets. The Compañía Panameña de Avación provides a local service between Panama City and the provincial towns. The Panamanian APA airline serves Miami, Guayaquil, Lima and Kingston.

**MONEY AND BANKING.** The present monetary unit is the *balboa,* which is of the same size and fineness as the US silver dollar but is maintained equivalent to the gold dollar. Panama has officially recorded this with the International Monetary Fund. Other silver coins are the half-balboa (of 12·5 grammes 0·900 fine, and equal to 50 cents, US); the quarter and tenth of a balboa piece; a cupro-nickel coin of 5 cents, and a copper coin of 1 cent. US silver coinage is also legal tender. Volume of the currency has not been disclosed since 31 Dec. 1950, when it stood at 1·5m.; 5·1m. balboas of Panamanian coin had been minted up to 31 Dec. 1963. The only paper currency used is that of the USA.

Gold and short-term assets in the USA (both official and private) on 30 June 1958 were $101·4m., of which private firms held about 70%.

The National Bank of Panama (not a central bank) on 30 June 1962 had (in balboas or dollars) capital of 6·3m., reserves of 743,983, current deposits of 28m. and loans, net outstanding, of 34·7m. In 1956 the National Bank took over the 4 provincial banks formerly operated by the Institute of Economic Development. There are 6 other Panamanian banks. The First National City Bank and the Chase Manhattan Bank of New York have branches in Panama City and Balboa (CZ), the latter also in Colón, David and Chitré.

**WEIGHTS AND MEASURES.** English weights and measures are in general use; those of the metric system are also used.

## THE PANAMA CANAL AND THE CANAL ZONE

On 18 Nov. 1903 a treaty between the USA and the Republic of Panama was signed making it possible for the US to build and operate a canal connecting the Atlantic and Pacific oceans through the Isthmus of Panama. The treaty granted the US in perpetuity the use, occupation and control of a Canal Zone, approximately 10 miles wide, in which the US would possess full sovereign rights 'to the entire exclusion of the exercise by the Republic of Panama of any such sovereign rights, power or authority'. In return the US guaranteed the independence of the Republic and agreed to pay the Republic $10m. and an annuity of $250,000. The US purchased the French rights and properties—the French had been labouring from 1879 to 1899 in an effort to build the Canal—for $40m.

The treaty of 1936 increased the annuity to $430,000 and, as desired by Panama, withdrew the guarantee of independence. In 1955 the annuity was increased to $1,930,000, and the Panama Canal Company turned over to the Republic the Panama City railroad yards and other properties valued at $25m. At the end of 1962 the US completed the construction of a high level bridge over the Pacific entrance of the Canal, and the flags of Panama and the US were flown jointly over areas of the Canal Zone under civilian authority.

*Governor of the Canal Zone and President of the Panama Canal Company:* Maj.-Gen. Robert J. Fleming, Jr., US Army.

*Lieut.-Governor and Vice-President:* Col. David S. Parker, US Army.

The Canal Zone Government and the Panama Canal Company are the two principal agencies in the Zone. The Government is responsible for such governmental functions as police and fire protection, postal service, and schools and hospital services. The Company is concerned primarily with the actual operation of the Canal. The Canal Company has not increased tolls since 1914 and has operated at a minimal net margin averaging well under $4m. per year, after paying its own expenses as well as reimbursing the US Treasury for the net cost of the Canal Zone Government and paying interest on the $490m. net investment of the US Government in the Canal enterprise.

The area of the Canal Zone, including land and water, is 648·01 sq. miles (1,678·3 sq. km). The water area of the zone, including the water area within the 3-mile limit from the Atlantic and Pacific ends, is 274·52 sq. miles.

The total population of the Canal Zone (1960 census) was 42,122 (52,822 in 1950). The total full-time force employed by the Panama Canal Company and the Canal Zone Government on 30 June 1963 numbered 3,766 US citizens and 10,370 others, mostly Panamanian citizens.

There are 135 miles of improved streets and highways in the zone, exclusive of those within Armed Forces reservations. Motor vehicles number about 13,000.

The Canal was opened to commerce on 15 Aug. 1914. There has been no appreciable interruption since 11 Jan. 1917.

The Canal is 85 ft above sea level. It is 50 statute miles in length from deep water in the Caribbean Sea to deep water in the Pacific Ocean, and 36 miles from shore to shore. The channel ranges in bottom-width from 300 to 1,000 ft; it is being widened to a minimum width of 500 ft. The average time of a vessel in Canal waters is 15 hours, 8 of which are in transit through the Canal proper.

For details of the physical character of the canal, *see* THE STATESMAN'S YEAR-BOOK, 1951, p. 1295; a map showing the Panama, Suez and Kiel canals on the same scale will be found in the 1959 edition.

Particulars of the ocean-going traffic through the canal are given as follows (vessels of 300 tons and over; cargo in long tons):

| Fiscal year ending 30 June | North-bound (Pacific to Atlantic) | | South-bound (Atlantic to Pacific) | | Total | | Tolls levied (in $) |
|---|---|---|---|---|---|---|---|
| | *Vessels* | *Cargo* | *Vessels* | *Cargo* | *Vessels* | *Cargo* | |
| 1960 | 5,216 | 31,684,378 | 5,579 | 27,573,841 | 10,795 | 59,258,219 | 50,939,428 |
| 1961 | 5,211 | 29,222,093 | 5,655 | 34,447,645 | 10,866 | 63,669,738 | 54.127,877 |
| 1962 | 5,414 | 29.817,156 | 5,735 | 37,707,396 | 11,149 | 67,524,552 | 57,289.705 |
| 1963 | 5,384 | 29,160,889 | 5,633 | 33,086,205 | 11,017 | 62,247,094 | 56,368,073 |

In the fiscal year ending 30 June 1963, of the 11,017 toll-paying ships which passed through the canal 1,593 were US vessels, 1,441 Norwegian, 1,309 British and Canadian, 1,095 German, 846 Japanese, 833 Liberian, 692 Netherlands, 603 Greek, 464 Panamanian, 364 Swedish, 314 Danish and the remaining were of 27 other nationalities.

## República del Paraguay

**HISTORY.** The Republic of Paraguay gained its independence from Spain on 14 May 1811. In 1814 Dr José Gaspar Rodríguez Francia was elected dictator, and in 1816 perpetual dictator (el Supremo), by the National Assembly. He died 20 Sept. 1840. In 1844 a new constitution was adopted, under which Carlos Antonio López (first elected in 1842, died 10 Sept. 1862) and his son, Francisco Solano López, ruled until 1870. During the devastating war against Brazil, Argentina and Uruguay (1865–70) Paraguay lost probably 500,000 men. Argentina, in Aug. 1942, and Brazil, in May 1943, voided the reparations debt imposed upon Paraguay, which Paraguay had never paid.

**CONSTITUTION AND GOVERNMENT.** The constitution, which was ratified at a plebiscite on 4 Aug. 1940, gave the President wide emergency powers. Parliament consists of one chamber only; of its 60 seats, 20 are shared among any minority parties participating in the elections. All citizens above the age of 18, male and female, have the right and duty to vote. The place of the Senate is taken by a Council of State, the members of which are nominated by the Government on a corporative basis. The President is elected for 5 years, and he appoints the Cabinet, which exercises all the functions of government, and need only inform the Chamber and the Council of State of its policy. The constitution guarantees private property (women were given full control of their own property in Nov. 1954), but the State is given the right to regulate economic activities.

*President:* Gen. Alfredo Stroessner, Commander-in-Chief, elected 11 July 1954 to complete the presidential period of his predecessor; assumed office 15 Aug. He was re-elected as 'Colorado' candidate on 9 Feb. 1958; his second term began on 15 Aug. 1958. At the presidential and parliamentary elections on 10 Feb. 1963 he was confirmed in office for a final term of 5 years. He had 556,872 out of a total of 638,070 votes; his Liberal opponent, Dr Ernesto Gavilán, had 46,774, and the remaining 34,424 were blank or spoiled.

The following is a list of past presidents since 1920, with the date on which each took office:

Manuel Gondra, 15 Aug. 1920.
Dr Félix Paiva, 31 Oct. 1921.[2]
Dr Eusebio Ayala, 3 Nov. 1921.
Dr Eligio Ayala, 1 April 1923.[1]
Dr Luis Riart, 12 April 1924.[1]
Dr Eligio Ayala, 15 Aug. 1924.
Dr José Guggiari, 15 Aug. 1928.
Emiliano González Navero, 26 Oct. 1931.
Dr José Guggiari, 28 Jan. 1932.
Dr Eusebio Ayala, 15 Aug. 1932 (deposed).
Col. Rafael Franco, 18 Feb. 1936.[1]
Dr Félix Paiva, 15 Aug. 1937.
Gen. José Félix Estigarribia, 15 Aug. 1939 (killed in aeroplane accident).
Gen. Higinio Morínigo, 7 Sept. 1940 (resigned).
Dr Juan Manuel Frutos, 3 June 1948.[1]
Dr J. Natalicio González, 15 Aug. 1948 (deposed).
Gen. Raimundo Rolón, 30 Jan. 1949
Dr Felipe Molas López, 14 May 1949 (resigned).
Dr Federico Chávez, 16 July 1950 (resigned).
Tomás Romero Pereira, 4 May 1954.

---

[1] Provisional, *i.e.*, following a *coup d'état.*

[2] Succeeded as Vice-President.

The President has a cabinet of 11 ministers.

*National flag:* Red, white, blue (horizontal); the white stripe charged with the arms of the republic on the obverse, and, on the reverse, with a lion and the inscription *Paz y Justicia*—the only flag in the world with different obverse and reverse.

*National anthem:* ¡Paraguayos, república ó muerte! (words by F. Acuña de Figueroa; tune by F. Dupey).

The country is divided into 2 sections: the 'Oriental', east of Paraguay River, and the 'Occidental', west of the same river. The Oriental section is divided into 13 departments, subdivided into 133 *partidos*; the Occidental section (the Chaco) is divided into 3 departments with 4 *partidos*. The Chaco suffers from the fact that its table of water underground is salty; inhabitants, some 64,000, collect rain-water.

The 16 departments of the republic are officially numbered and named as follows: 1, Concepción (capital, Concepción); 2, San Pedro (capital, San Pedro); 3, Cordillera (capital, Caacupé); 4, Guairá (capital, Villarrica); 5, Caaguazú (capital, Coronel Oviedo); 6, Caazapá (capital, Caazapá); 7, Itapúa (capital, Encarnación); 8, Las Misiones (capital, San Juan Bautista); 9, Paraguarí (capital, Paraguarí); 10, Alto Paraná (capital, Hernandarias); 11, Central (capital, Ipacaraí); 12, Neembucú (capital, Pilar); 13, Amambay (capital, Pedro Juan Caballero); 14, Presidente Hayes (capital, Villa Hayes); 15, Boquerón; 16, Olimpo.

All the departments and all municipalities are governed directly by the national government, but mayors (*intendentes*) have a large measure of control over local administration of essential services.

**AREA AND POPULATION.** The area of Paraguay proper or 'Oriental' section, which is situated between the rivers Paraguay and Alto Paraná, is officially estimated at 159,827 sq. km (61,705 sq. miles). The boundary between Paraguay and Bolivia, the section known as Chaco, in dispute since 1870, was fixed by arbitration in Oct. 1938. The area of Paraguay's 'Occidental section' is officially estimated at 246,925 sq. km (95,337 sq. miles), making the total area of the republic 406,752 sq. km.

The Chaco is a torrid zone; the eastern section has a cooler season around 70° F. (21° C.) between May and Sept., but can also exceed 100° F. (38° C.) in Dec.–Feb. The rainiest season is from March to May; annual precipitation reaches 80 in. in the Brazilian frontier region, and over 40 in. along the Paraguay.

A census of the population was taken on 1 Oct. 1962; provisional total was 1,816,890, of which 895,551 were males, 921,339 females. Population density was 11·5 per sq. mile; Eastern Paraguay only, 29·5.

The population of Paraguay ('Oriental' section) is overwhelmingly mestizos (mixed Spanish and Guaraní Indian) forming a homogeneous stock. There are no Negroes. In 1962 the capital, Asunción (founded 1537), had an estimated population of 305,160.

The 16 departments and principal towns had estimated populations as follows (1962):

Number of births, 1959, was 47,362; deaths, 9,430; infant mortality rate in 1958 was 54 per 1,000 live births (compared with 98·1 in 1938).

Paraguayans are bi-lingual, speaking both Spanish and Guaraní, the language of the autochthonous Guaraní Indians, who held the country at the time of the Spanish conquest.

Immigration in Aug. 1948 was restricted to citizens of American countries, but in 1951 Paraguay agreed to admit some 10,000 Italian families over a period of 3 years. In 1956 a colony of 100 Japanese familes settled on the Alto Paraná River beyond Encarnación, and 80,000 more are to be admitted over the next 30 years under an agreement signed with Japan for the provision of merchant ships. There are also German agricultural settlements.

**RELIGION.** The Roman Catholic Church is the established religion of the State; the constitution stipulates that the President must be a Roman Catholic. On the other hand, the Government controls church appointments; the head of the Church and all bishops must be Paraguayans. The free exercise of other religions is permitted. The seat of the Paraguayan archbishopric is Asunción; there are bishoprics at Villarrica, Pilar and Concepción and for the Chaco. Religious marriage ceremonies are allowed, but the civil ceremony alone gives validity to a marriage. Protestants number about 25,000.

**EDUCATION.** Education is free and nominally compulsory, but schools are not everywhere available, and the system has been extensively revised to provide, *inter alia*, primary education for adults. There are no statistics of illiteracy. In 1962 there were 2,383 government primary schools and 160 private schools, with together 310,081 pupils and 11,518 teachers; 292 secondary schools had 41,014 pupils and 3,177 teachers. The National University and the Catholic University, both in Asunción, had, in 1962, an estimated 4,500 students and 500 professors.

*Cinemas* (1963). Cinemas numbered 37 with seating capacity of 25,000; 27 are in Asunción.

*Newspapers* (1963). There are 4 daily newspapers with an aggregate circulation of 50,000.

**JUSTICE.** The highest court is the Supreme Court with 3 members. There are special Chambers of Appeal for civil and commercial cases, and criminal cases. Judges of first instance deal with civil, commercial and criminal cases in 6 departments. Minor cases are dealt with by Justices of the Peace.

The Attorney-General represents the State in all jurisdictions, with representatives in each judicial department and in every jurisdiction. In matters of revenue, taxes, etc., the State is represented by the Abogado del Tesoro.

**FINANCE.** Revenue and expenditure, in 1,000 guaraníes; the guaraní is officially valued at 32·36 cents US (but in April 1962 the rate had fallen to 126 guaraníes = US$1):

| | *1959* | *1960* | *1961* | *1962* | *1963*[1] |
|---|---|---|---|---|---|
| Revenue . . . | 2,367,700 | 2,637,200 | 2,842,927 | 3,424,600 | 2,150,500 |
| Expenditure . . . | 2,312,400 | 2,451,400 | 2,805,400 | 3,421,600 | 2,116,000 |

[1] Estimates for Jan.–July.

The budget figures exclude various special accounts.

The 1962 budget provided (in 1m. guaraníes) 680 for national defence, 308 for interior, and 371 for education; in 1962 internal taxes were to furnish 486m.; sales tax, 512m., and taxes on imports and exports, 791m.

Paraguay agreed, beginning 1 Jan. 1945, to resume service on the external sterling debt, in default since 1934; coupons in arrears were to be paid off at the rate of 7*s*. 9*d*. per £1 nominal. Balance outstanding was £652,150. In 1951 payments were £40,387 to London, $1·56m. to the Export-Import Bank of Washington and 2·5m. in Argentine pesos.

British investments, end of 1949, had a par value of £3,300,290, of which 85·1% was in default. Foreign investments, 1950, in 1m. guaraníes, were 181·8, of which Argentina furnished 77·7 (42·7% of the total), Britain 51·2 (28·2%) and US 45·9 (25·3%).

**DEFENCE.** The military establishment is about 600 officers and 8,500 regulars, plus about 8,000 conscripts. The Army consists of 1 cavalry division (3 regiments); 1 group of 4 infantry and 1 artillery regiments; 1 group of 4 infantry and 1 cavalry battalions, and 6 engineering battalions. There are 5 training schools for officers and technical specialists; a US military mission directs the training in one of the schools. There are also a US air mission, Argentine military and naval missions, and a Brazilian military mission.

Military service is compulsory in the active Army for 2 years between the ages of 18 and 20; between 20 and 29 in the reserve of active Army; between 29 and 39 in the national guard, and between 39 and 45 in the territorial guard.

The Navy consists of 3 armoured river gunboats of 636 tons (built in Italy) and 2 patrol boats, river craft armed with modern guns. The largest of the latter displaces about 206 tons. There are also 6 American-built picket boats.

The Air Force came into being in the early thirties as a combat service, but now has only transport and training formations. These are equipped with US aircraft of wartime origin, including a number of C-47 and C-45 twin-engined transports and T-6 Texan basic trainers. HQ and flying school are at Campo Grande, Asunción.

**PRODUCTION.** Stock-raising, forestry and agriculture are the most important sources of production. Only a small percentage of the cultivable area is given over to farming, but rich areas of virgin forest near the Paraná River are now being opened up and colonized.

*Agriculture.* The soil of Paraguay is productive and the climate suitable for many sub-tropical products, but only some 0·7m. hectares are cultivated out of 16·8m. hectares of cultivable land. Much of the country is admirably suited to pastoral purposes and large estates are the rule, in one instance amounting to 2m. hectares.

*Yerba maté*, or strong-flavoured Paraguay tea, which is a plantation product as well as a natural product of the virgin forests, continues to be produced; in 1962 production was 11,500 metric tons, of which 6,495 metric tons were exported. The tobacco output was 15,000 metric tons in 1962, of which 11,902 metric tons were exported. Production of coffee in 1962, 5,300 metric tons. Quebracho extract has lost its former importance.

Cotton, sugar and coffee are increasing in importance, though the latter is still on a very small scale.

Area (in hectares) and yield (in metric tons) of the main agricultural products in 1962:

| | Area | Yield | | Area | Yield |
|---|---|---|---|---|---|
| Cotton | 50,000 | 32,145 | Maize | 95,000 | 123,500 |
| Rice | 7,000 | 16,800 | Manioc | 71,200 | 996,800 |
| Sugar-cane | 22,400 | 672,000 | Beans | 22,000 | 17,600 |

The 1962 (and 1961) production in 1,000 metric tons of certain crops was: Manioc, 996·8 (994); alfalfa, 20 (18·5); sugar-cane, 672 (646·7); maize, 123·5 (110); sweet potatoes, 70 (72); cotton, 32·5 (35); rice, 16·8 (16); tobacco, 15 (8·5); wheat, 7·2 (9).

Sugar-cane gives refined sugar, molasses and *caña*, a kind of rum (1962 production, 6·9m. litres). The 1963 crop is estimated at 35,000 tons, which should leave a small export surplus.

Much of the agriculture is still primitive, and outputs per worker and per hectare are still low despite the training of smallholders since 1942. A large proportion of the peasants is landless. About 100,000 acres are normally planted to maize. The cultivation of cotton of the American uplands type is encouraged by the authorities: it matures early and reaches the market when the American crop is scarce; production of cotton fibre in 1962 was 11,400 metre tons; in 1961, 8,500 metric tons. The total crop unginned was 32,500 tons for 1962. It is commonly sold, however, as Argentine cotton, chiefly to UK.

A National Development Bank has been instituted, to grant loans, mainly to farmers. Several loans for the development of agriculture and stock-raising have recently been either received or promised from international organizations.

*Livestock.* In 1962 Paraguay had about 4·7m. cattle; in 1959, 292,000 horses and 160,000 sheep. Import of cattle for the 3 meat-packing plants has top priority in the list of essential imports; jerked beef, corned beef and other animal products are exported. In 1950 a combined government and private corporation took over the sale and distribution of meat. Exports of meat products in 1962 were 16,987 metric tons. In 1962 production of fresh meat was 47,747 metric tons; of preserved meat, 13,589 metric tons; processed livestock was 472,721 head. Paraguay produces and exports salted and dry cattle hides.

*Forestry.* Timber resources of excellent quality are enormous, the cedars and hardwoods being a particularly valuable article of export; timber logs, 1962, amounted to 167,300 metric tons. Paraguay produces in the Chaco region quebracho logs, from which quebracho extract (tannin) is derived; production, 1962, 35,500 metric tons compared with over 28,200 metric tons in 1952. Total exports of timber in 1962 were 202,195 tons. Yaguarón is the chief source of petit-grain oil, distilled from the leaves of a bitter orange tree and used in the manufacture of many perfumes; the oil is widely exported; production, 1962, 200 metric tons. Exports of tung oil, 1962, were 5,200 metric tons.

*Mining.* Iron, manganese, copper and other minerals are reported in abundance, but are little worked. The Ibicuí iron mines were worked as early as 1863. The Quiquió and Ibicuí manganese mines contain ore deposits estimated at 60m. tons. Copper has been found at San Miguel. Concepción and Quiquió. The Government is exploring the Chaco region for petroleum, especially the north-east area, in Olimpia province, but no strikes have been reported. An agreement has been ratified with Bolivia for 2 oil pipelines across the territory. This is to be the main activity of the Corporación Paraguaya de Fomento (1957) with a capital of Gs.200m.

*Industry.* There are 3 main meat-packing plants and other factories producing vegetable oil, flour products, leather goods, etc. A textile industry supplies some of the local needs, and there are small match, soap, cigarette, footwear, furniture, cement, building materials industries.

*Electricity.* Fourteen power-plants, which in 1962 produced 90·2m. kwh., supply 18 cities and towns.

*Labour.* Trade unionists number about 25,000 (Confederación Paraguaya del Trabajo).

A contributory national insurance scheme for all salary and wage earners except civil servants and railway employees went into effect 1 Jan. 1951.

**COMMERCE.** Canned meat and meat products are the principal exports. Timber is also important, but the industry has recently met difficulties in selling its products to Argentina, its main market. *Yerba maté* continues to be exported. Imports and exports, in 1,000 guaranícs at the current rate:

| | *1957* | *1958* | *1959* | *1960* | *1961* | *1962* |
|---|---|---|---|---|---|---|
| Imports . | 2,056,200 | 3,343,100 | 2,985,200 | 3,866,400 | 3,767,100 | 4,257,300 |
| Exports . | 2,561,500 | 3,730,000 | 3,701,400 | 3,284,900 | 3,792,600 | 4,142,300 |

Paraguayan trade, in US$1m., was as follows: Imports: 1960, 32·5; 1961, 34·7; 1962, 34·3. Exports: 1960, 27; 1961, 30·6; 1962, 33·5.

Chief exports in 1962 included (in US$1,000): Meat products, 7,475; timber, 6,659; hides, 1,847; quebracho extract, 2,531; coffee, 2,835; tobacco, 3,092.

Of the imports in 1962, $10·8m. came from US, $5m. from Argentina, $4·7m. from Germany, $2·1m. from Japan and $2·6m. from the UK. Of the exports, Argentina took $9·6m.; US, $7m.; UK, $3·5m.; Netherlands, $2·6m.; Uruguay, $1·1m.; Spain, $0·9m.; Germany, $0·8m.

The trade between Paraguay and UK (British Board of Trade returns) in £ sterling was as follows:

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK . . | 1,761,813 | 1,838,103 | 2,298,017 | 2,310,856 | 2,032,151 |
| Exports from UK . . | 863,085 | 818,287 | 978,104 | 1,081,048 | 805,487 |
| Re-exports from UK . | 9,320 | 11,753 | 15,609 | 29,574 | 11,437 |

The import licence and official exchange-market system was abolished on 12 Aug. 1957.

**COMMUNICATIONS.** *Shipping.* The Paraguay River, which divides the country into two distinct parts, is navigable for 12-ft draft vessels as far as Concepción, 180 miles north of Asunción, and for smaller vessels for a further distance of 600 miles northward. The Paraná River is navigable by large boats from Corrientes up to Puerto Aguirre, at the mouth of the Yguazú River. Boats of a few hundred tons capacity navigate the tributary rivers.

Asunción, the chief port, is 950 miles from the sea. In June 1945 the Government formed—after a break of 80 years—a national merchant marine which operates in the River Plate basin, connecting with Argentine, Uruguayan and Brazilian ports. It handles some 10% of Paraguay's total exports and imports; cargo boats from Spain and Japan, including a refrigerated vessel, have been delivered (1960) and more are being negotiated.

*Railways.* The Paraguay Central Railway runs from Asunción to Encarnación, on the Río Alto Paraná, with a main-track length of 274 miles. The railway was sold to the Paraguayan Government for £200,000 in Oct. 1961. There is a through train service from Asunción to Buenos Aires. El Ferrocarril del Norte, owned by a Paraguay company, runs from Concepción to Horqueta, a distance of 33 miles. Total length of railways, 713 miles.

*Roads.* The country roads are mainly dirt- or gravel-surfaced and transport is difficult during heavy rainstorms. In the more populated areas bus services now link a number of towns and villages. Highways, 1962, had a length of 1,700 miles. About 120 miles are asphalted and a further programme, financed by international loans, is in being. A road from Asunción to Iguazú on the Brazilian frontier has been completed, and another is being built across the Chaco to the Bolivian frontier, of which 600 km have been completed. Motor vehicles, 1962, numbered about 10,000, of which three-quarters were in Asunción; 4,500 were passenger cars.

*Post.* The national telegraph (137 offices) connects Asunción with Corrientes and Posadas in the Argentine Republic, and thus with the outside world; new direct links have been opened with Germany (1957) and USA (1958). In addition, 34 stations are operated by the Paraguay Central Railway; total, 2,070 miles. Three companies (12 stations) offer radio-telegraph service. The telephone system has been under government control since 5 Oct. 1945; a new government agency, the National Telephone Administration, took over the telecommunication services in July 1947. Telephone lines, 1949, 5,225 miles; instruments, 1962, 12,181, of which 10,923 were in Asunción and were automatic. Wireless sets in use, 1953, numbered about 80,000.

*Aviation.* Air services are furnished by 10 airlines (domestic and foreign).

**MONEY.** The *guaraní* was established on 5 Oct. 1943 equal to 100 of the old paper pesos. The old gold peso, no longer used, is nominally valued at 1·75 guaraníes. The latter is divided into 100 céntimos, and is symbolized by the letter G with a line through it, similar to the $ sign. Total monetary circulation was Gs.3,571m. at the end of July 1963; of this, notes were Gs.1,973m. and the remainder money at sight.

On 30 Dec. 1963 the guaraní stood at Gs.347·6 = £1. The International Monetary Fund computes 126 guaraníes per US$ (30 Sept. 1963).

**BANKING.** The Banco Central del Paraguay opened 1 July 1952 to take over the central banking functions previously assigned to the National Bank of Paraguay, which had opened in March 1943 and been reorganized as the Banco del Paraguay in Sept. 1944 with a monetary, a banking and a mortgage department. The Banco del Paraguay closed in Nov. 1961 and has been replaced, with the aid of a US loan of US$3m., by the Banco Nacional de Fomento.

The Banco Central on 30 June 1963 had gold amounting to $81,000 (2,320 troy oz.) and foreign exchange equal to $0·4m. Reserve of gold and foreign currency at 30 Nov. 1961 was reported as worth US$2,857,000. It has no legal gold reserves. Outstanding balances on foreign loans at 31 Dec. 1960 were announced by the Ministry of Finance as: Export-Import Bank loans, US$10·08m.; Development Fund, $3,445,000; Port of Asunción, $1,113,000; IBRD, $2,051,000; Brazil, $660,000; ship purchase, Japan and Spain, $6,648,000; other loans, $3·66m.

The Argentine Banco de la Nación has an agency in Asunción and sub-agencies in various centres. The other banks are the Bank of London and South America, Ltd; the Banco del Hogar Argentino; Banco de la Nación Argentina; Banco do Brasil; First National City Bank of New York; Banco de España; Banco Paraguayo de Crédito.

**WEIGHTS AND MEASURES.** The metric system was officially adopted on 1 Jan. 1901.

## DIPLOMATIC REPRESENTATIVES

Paraguay maintains embassies in Argentina, Belgium, Brazil, Bolivia, Chile, Colombia, Ecuador, France, Germany (also Minister for Denmark, Norway, Sweden), Italy, Mexico, Peru, Spain, UK, USA, Uruguay, Vatican, Venezuela; and legations in Costa Rica, El Salvador, Netherlands.

# PERSIAN GULF STATES

The Persian Gulf States include the British protected states of Bahrain, Qatar and the Trucial States. They are in special treaty relations with Great Britain dating mainly from the 19th century, by which H.M. Government is responsible for the conduct of their foreign relations. This responsibility is exercised through H.M. Political Resident in the Persian Gulf, who has his headquarters in Bahrain and, subordinate to him, Political Agents in Bahrain, Doha (Qatar), Dubai and Abu Dhabi (Trucial States). *See* MAP in THE STATESMAN'S YEAR-BOOK, 1956. Until 19 June 1961 Kuwait was also in similar treaty relations (*see* p. 1199).

The currency used in all the territories is the special Persian Gulf Indian rupee (Rs 13·33 = £1).

*British Political Resident:* Sir William Luce, GBE, KCMG.
*Deputy Political Resident:* F. D. W. Brown, CMG.

*Persian Gulf Gazette.* Ed. British Political Resident. London and Bahrain, 1953 ff.
*Persian Gulf Pilot.* Ed. Admiralty. 10th ed. London, 1955

Caroe, O., *Wells of Power: the oilfields of south-western Asia.* London, 1951
Hay, Sir Rupert, *The Persian Gulf States.* Washington, D.C., 1959

**Bahrain.** *Area and Population.* The Bahrain islands form an archipelago in the Persian Gulf, between the Qatar peninsula and the mainland of Saudi Arabia. The total area is about 231 sq. miles (598·3 sq. km). Bahrain ('Two Seas'), largest island, is 30 miles long and 10 miles wide. Muharraq, to the north-east, 4 miles long and 1 mile wide, is connected with Bahrain by a causeway, nearly 2 miles long, carrying a motor road. Other islands are Sitra, to the east, 3 miles long and 1 mile wide; Umm An-Nasaan, to the west, 3½ miles by 2½ miles; Jidda, also to the west, 1 mile by ½ mile, the Hawar group off Qatar and several islets, some uninhabited. From Sitra oil pipelines and a causeway carrying a road extend out to sea for 3 miles to a deep-water anchorage. The islands are low lying, the highest ground being a hill in the centre of Bahrain, 450 ft high.

The census population in 1959 was 143,213. The majority of the people are Moslems. There is an Indian community, a number of Pakistanis and Persians, and about 3,000 British and Americans, including the staff of the Bahrain Petroleum Company.

Manama, the capital of the state and the commercial centre, is situated at the northern end of the largest island and extends for 1½ miles along the shore. It has a population of 61,837 (1959 census). Electricity from the government power-stations in Manama supplies light and power in Manama, Muharraq (32,279), Hidd (4,435), and Rifa'a (6,648) and the villages.

Water is obtained from artesian wells, and there is a piped supply in Manama, Muharraq and Rifa'a.

*Reigning Shaikh:* The ruling family, the Al Khalifah, came originally from the neighbourhood of Kuwait and occupied Bahrain in 1782. The 11th ruler, H.H. Shaikh Isa bin Sulman Al Khalifa (born 1933) succeeded on 2 Nov. 1961.

*Flag:* Scarlet, with white serrated border on hoist.

*Government.* The administration is carried out by officials, assisted and advised by representative and nominated councils and committees. The head of the administration is the Secretary.

The 4 towns of Bahrain and 2 of the larger groups of villages are administered by their municipalities, independent bodies, half of whose councils are elected by the male and female ratepayers and half nominated by the government.

*Education.* There were, in 1960, 34 boys' schools with 470 teachers and 12,364 pupils, and 16 girls' schools with 201 teachers and 5,467 pupils.

*Health.* There is a free medical service for Bahrainis. There are 9 government hospitals (including a tuberculosis and a mental hospital) with 700 beds, an American mission hospital and 2 oil company hospitals.

*Finance.* The revenue of the state is derived from oil royalties and from customs duties, which are 10% *ad valorem* for luxury goods and 5% for all others, with the exception of liquor and tobacco, which are charged 15%. Revenue in 1959, Rs 72·5m.; 1960, Rs 76m.; 1961, Rs 72·7m.; 1962, Rs 74m.; 1963 (estimate), Rs 72m.

On 2 Jan. 1958 Manama was declared a free transit port and the former 2% transit duty was abolished, but storage charges are levied.

*Production.* In 1932 oil was discovered. Operations are being conducted by the Bahrain Petroleum Company, registered in Canada but owned by US interests, under a concession granted by the Shaikh. Production of oil in 1961 was 2·2m. tons. A large oil refinery on Bahrain Island, besides treating crude oil produced locally, also processes oil from Saudi Arabia, transported by pipeline. Refinery throughput in 1962 was 11·57m. tons.

In addition to the traditional minor industries such as boat-building, weaving, pottery, etc., a number of new modern industries have developed, which include the manufacture of building materials, soft drinks and woollen garments, drinking straws, paper bags, woollen garments and other consumer goods. There is also an important fishing industry and a fairly large farming community. The most important crops are dates and vegetables, and there is also dairy and poultry farming.

The pearling industry for which Bahrain used to be famous has considerably declined. Only about 30 boats visit the pearl banks each year, as compared with the 600–1,000 that were employed 30 years ago.

*Commerce.* Bahrain's entrepôt trade is expected to increase as a result of the inauguration of the free transit port and the opening of the new deep-water harbour on 31 May 1962.

In 1962 imports totalled £23,385,345, of which £8,236,030 (35·15%) were re-exported to Saudi Arabia (£3,741,330), Qatar (£1,038,430), Iran (£881,820), Dubai (£743,785), Muscat (£563,395), Kuwait (£433,610), Das Island (£347,460). The chief imports were: Household goods (£3,905,040);

provisions (£2,215,735); miscellaneous cloths (£2,143,905); machinery (£1,558,840); rice (£1,293,490); wearing apparel (£1,222,740); motor cars, lorries and tractors (£1,037,645). The chief re-exports were: Household goods (£1,019,960); machinery (£941,260); rice (£662,825); provisions (£553,120); cotton piece-goods (£458,145); wearing apparel (£433,180); timber and wood (£365,765).

Import of arms and ammunition and telecommunication equipment is subject to special permission; the sale of alcoholic liquor is restricted and the import of cultured pearls is forbidden.

*Communications.* Steamships of several lines and BOAC aircraft make regular calls. The airport, situated at Muharraq, can take the largest aircraft. Gulf Aviation, Middle East Airlines, Aryana, Afghan Airways, Air Ceylon, Aden Airways, Kuwait Airways, Air Liban, Saudi Arabian Airways, Lebanese International Airways, Cyprus Airways and Air India International also operate to and from Bahrain. There were, in 1963, 4,045 telephones. There is a state-operated radio station.

*Banking.* Banking facilities are provided by the Bank of Bahrain and branches of the Eastern Bank, the British Bank of the Middle East and the Arab Bank.

*Weights and Measures.* The *dhara* (= 18 in.), *roba* (4 lb.), *maund* (56 lb.) and *rafa* (560 lb.) are the principal local weights and measures.

*British Political Agent:* J. P. Tripp.

*Secretary to the Bahrain Government:* G. W. R. Smith, MBE.

**Qatar.** *Area and Population.* This state, which includes the whole of the Qatar peninsula, extends on the landward side from Khor al Odeid to the boundaries of the Saudi Arabian province of Hasa. Area, about 4,000 sq. miles (10,360 sq. km); population about 50.000, including a large number of migrant labourers from neighbouring states. The relations of the ruler of Qatar with the British Government are similar to those of the Trucial rulers, and are regulated by a treaty of 3 Nov. 1916.

The capital is Doha, where there are branches of the Eastern Bank and the British Bank of the Middle East, the Ottoman Bank, the Arab Bank and the Intra Bank. Other towns are Dukhan, the centre of the oilfield, and Umm Said, the oil port of Qatar.

*Ruler:* H.H. Shaikh Ahmad, son of Ali bin Abdullah Al Thani, KBE, succeeded on his father's abdication on 24 Oct. 1960. *Heir apparent:* Shaikh Khalifa bin Hamad.

*Flag:* Maroon, with white serrated border on hoist.

*Production.* There are 2 oil companies operating in Qatar, the Qatar Petroleum Co. (a subsidiary of the Iraq Petroleum Co.) and the Shell Co. of Qatar (a subsidiary of Royal Dutch Shell). In 1963 the Continental Oil Co. obtained a concession to operate in the area relinquished earlier in the year by Shell. Oil production by QPC is over 8m. tons per annum.

*Finance.* The revenue derived from oil operations is the principal source of income; it has enabled the Government to institute an extensive programme of development, which includes schools, hospitals, and water and electricity supply.

*Trade.* Total trade between Qatar and UK, in £ sterling (British Board of Trade returns):

| | *1959* | *1960* | *1961* | *1962* | *1963* |

*Communications.* Two shipping lines call at Umm Said. The Gulf Aviation Co., Ltd, operates daily services from Bahrain; BOAC, Middle East and other airlines operate regular services from Beirut, London and elsewhere.

Telephone and radio-telephone services connect Qatar with Europe and America; there were 3,990 telephones on 1 Sept. 1963.

*British Political Agent* (in Doha): P. McKearney.

**The Trucial States.** From Sha'am, 35 miles south-west of Ras Musandam, for nearly 400 miles to Khor al Odeid at the south-eastern end of the peninsula of Qatar, the coast, formerly known as the Pirate Coast, of the Persian Gulf (together with 50 miles of the coast of the Gulf of Oman) belongs to the rulers of the 7 Trucial States. In 1820 these rulers, after committing acts of hostility against the East India Company, signed a treaty prescribing peace with the British Government and perpetual abstention from plunder and piracy (specifically including the slave trade) by land and sea. This treaty was followed by further agreements providing for the suppression of the slave trade and by a series of other engagements, of which the most important are the Perpetual Maritime Truce (May 1853) and the Exclusive Agreement (March 1892). Under the latter, the shaikhs, on behalf of themselves, their heirs and successors, undertook that they would on no account enter into any agreement or correspondence with any power other than the British Government, receive foreign agents, or cede, sell or give for occupation any part of their territory save to the British Government.

*Area and Population.* The area of these states is approximately 32,300 sq. miles (83,660 sq. km). The total population is estimated at about 110,000, of whom about one-tenth are nomads. The formerly independent small state of Kalba on the Gulf of Oman was merged with Sharjah in 1952.

The largest town on the Trucial Coast is Dubai (about 45,000 inhabitants). Most of the inhabitants of the coast depend for their livelihood on trading and fishing; pearling is still carried on but has lost its former importance.

*Government.* The rulers of the Trucial States are:

| | | | |
|---|---|---|---|
| Abu Dhabi | Shaikh Shakbut bin Sultan | Succeeded | 1928 |
| Dubai | Shaikh Rashid bin Said | ,, | 1958 |
| Sharjah and Kalba | Shaikh Saqr bin Sultan al Qasimi | ,, | 1951 |
| Ajman | Shaikh Rashid bin Humaid al Naimi | ,, | 1928 |
| Umm al Qaiwain | Shaikh Ahmad bin Rashid al Mu'alla, MBE | ,, | 1929 |
| Ras al Khaimah | Shaikh Saqr bin Mohammed al Qasimi | ,, | 1948 |
| Fujairah | Shaikh Mohammed bin Hamad al Sharqi | Recognized | 1952 |

*Education.* Primary-intermediate education for boys is available in all the Trucial states; a limited secondary education for boys, in Dubai and

Sharjah. There are 4 boys' and 2 girls' schools in Dubai; 5 boys' and 5 girls' schools in Sharjah; 4 boys' and 4 girls' schools in Ras al Khaimah; 3 boys' schools in Abu Dhabi; 1 boys' and 1 girls' school in Umm al Qaiwain; and 1 boys' school each in Ajman and Fujairah. The educational system is the same as that followed in Kuwait, and many of the teachers in the Trucial States are supplied by the Kuwait, Qatar, UAR and Bahrain education departments.

There is also a trade school in Sharjah, financed by the British Government; with a branch at Dubai, financied jointly by the Ruler of Dubai and the British Government.

*Health.* There are hospitals in Dubai, Ras al Khaimah and Buraimi; a 50-bed hospital is planned in Abu Dhabi. The rest of the area is served by dispensaries regularly visited by touring doctors. The Kuwaiti Government has built a hospital in Dubai and some clinics elsewhere.

*Agriculture.* For lack of water and good soil there is little agriculture in the Trucial States. But since the establishment of an agricultural trials station and an agricultural school in Ras al Khaimah the number of gardens under cultivation has more than doubled and there have been remarkable increases in the variety of crops and the length of the agricultural season.

*Finance.* Revenue is principally derived from customs dues on imports and oil-concession payments. No accurate estimates can be made, but it is known that the revenues of Abu Dhabi and Dubai run into millions of rupees and are rapidly increasing.

*Oil.* In 1962 oil was shipped for the first time from Das Island in Abu Dhabi territory by Abu Dhabi Marine Areas Ltd. The Abu Dhabi Petroleum Company, who hold the land concession in Abu Dhabi, started to ship oil in Dec. 1963. Mecomoil, of Texas, hold the land and sea-bed concession in Sharjah, Ajman and Umm al Qaiwain, and are engaged in exploration. In 1963 the land concession in Dubai was let to Continental Oil.

*Commerce.* Imports in 1962 amounted to about £9m.; exports and re-exports to £2·1m. The UK was the principal supplier (£1·7m.), followed by Japan (£1·3m.) and India (£1m.).

Total trade between the Trucial States and UK, in £ sterling (British Board of Trade returns):

| | *1959* | *1960* | *1961* | *1962* | *1963*[1] |
|---|---|---|---|---|---|
| Imports to UK | 27,479 | 18,501 | 11,447 | 30,604 | 98,500 |

[1] Excluding Abu Dhabi.

In 1963 Abu Dhabi exported to UK £8,179,610, imported from UK £2,951,876; re-exported from UK £4,189.

*Aviation.* Dubai, Sharjah and Abu Dhabi have civil airports. Gulf Aviation, Ltd, a subsidiary of BOAC, operate services from Bahrain and Kuwait. Weekly services are operated by Iranair to Dubai and by Saudi Arabian Airlines and Syrian National Airlines to Sharjah.

*Shipping.* Two British and a Dutch shipping lines call at Dubai.

*Posts and Telecommunications.* The Dubai Telephone Co. had 850 subscribers in 1963; Sharjah, 68; Abu Dhabi, 133. All systems are linked to the international telecommunication network.

The British General Post Office ceased to be responsible for postal services in Dubai and Sharjah during 1963; these States have set up their own post offices and produce their own stamps. The British Post Office remains responsible for their representation with the Universal Postal Union. Abu Dhabi produced its own stamps in 1964.

*Banking.* The British Bank of the Middle East has branches in Dubai, Abu Dhabi, Sharjah and Ras al Khaimah; the Eastern Bank has branches in Sharjah, Abu Dhabi and Buraimi; the Ottoman Bank has branches in Abu Dhabi and Buraimi. The Arab Bank has a branch in Sharjah; the First National City Bank of New York have a branch in Dubai. There is also a National Bank of Dubai, formed in 1963.

## REPÚBLICA DEL PERÚ

**HISTORY.** The Republic of Peru, formerly the most important of the Spanish vice-royalties in South America, declared its independence on 28 July 1821; but it was not till after a war, protracted till 1824, that the country gained its actual freedom.

**CONSTITUTION AND GOVERNMENT.** The legislative power is vested in a Senate and a Chamber of Deputies elected together for 6 years. Voters are Peruvian males (native-born or naturalized), at least 21 years old, who are able to read and write; in 1956 the number of registered voters was about 1·6m., including, for the first time, some 300,000 women. Voting is compulsory for all literate males between 21 and 60 years of age; women were fully enfranchised by an amendment of the constitution, 7 Sept. 1955.

After the elections of 9 June 1963 the Senate consists of 15 members of the *Alianza Popular Revolucionaria Americana*, 14 *Acción Popular*, 6 *Unión Nacional Odriista*, 5 Christian Democrats, 2 Peruvian Democratic Movement and 3 independents. The Chamber of Deputies has 57 *Apra* members, 39 *Acción Popular*, 13 Christian Democrats (government coalition), 26 *Unión Nacional Odriista* and 5 independents.

The President is elected for 6 years and is not eligible for a consecutive term. He receives 72,960 soles a year, plus 120,000 soles for official expenses. The constitution gives him an economic advisory council, but such a body had never been established; the Klein Mission (of US experts) strongly urged, in June 1950, that it be created and given substantial planning duties. On 1 April 1936 the constitution was amended to provide for first and second vice-presidents to be elected simultaneously with the President. Further amendments passed in Nov. 1945 tended to increase the power of Congress, at the expense of the executive.

The following is a list of presidents from 1919:

Augusto Bernardino Leguia, 4 July 1919–24 Aug. 1930.[1]

Gen. Manuel Ponce (Acting), 24 Aug. 1930–28 Aug. 1930.[2]

Col. Luis M. Sánchez Cerro (Acting), 28 Aug. 1930–1 March 1931.[2]

Ricardo Leoncio Elías (Acting), 1 March 1931–5 March 1931.[2]

Col. Gustavo A. Jiménez (Acting), 5 March 1931–10 March 1931.[2]

David Samanez Ocampo (Acting), 10 March 1931–8 Dec. 1931.

---

[1] Deposed.

[2] Resigned.

Gen. Luis M. Sanchez Cerro (Constitutional), 8 Dec. 1931–30 April 1933.[3]
Gen. Oscar Raimundo Benavides, 30 April 1933–8 Dec. 1939.
Dr Manuel Prado y Ugarteche, 8 Dec. 1939–28 July 1945.
Dr José Luis Bustamante y Rivero, 28 July 1945–27 Oct. 1948.[1]
Gen. Manuel A. Odría (Acting), 27 Oct. 1948–1 June 1950.[2]
Gen. Zenón Noriega, 1 June 1950–28 July 1950.
Gen. Manuel A. Odría, 28 July 1950–28 July 1956.
Dr Manuel Prado y Ugarteche, 28 July 1956–July 1962.
Gen. Ricardo Pérez Godoy, 18 July 1962–28 July 1963.

[1] Deposed. [2] Resigned. [3] Assassinated.

*President:* Fernando Belaúnde Terry (*Acción Popular*), elected on 9 June 1963 by 712,761 votes against 612,985 cast for Dr Haya de la Torre, 465,556 for Gen. Odria, and 19,271 for Dr Samane; inaugurated on 28 July 1963.

*Prime Minister and Foreign Minister:* Fernando Schwalb López (appointed 1 Jan. 1964).

The government has 20 members in the Senate and 70 in the Chamber; the opposition parties total 25 members in the Senate and 85 in the Chamber.

The President exercises his executive functions through a cabinet of 12 ministers (120,000 soles a year), responsible to Congress. The cabinet has its own 'President'.

As of 31 July 1953 the 23 departments are divided into 141 provinces (plus the 'constitutional province' of Callao) and 1,436 districts; the province of Callao has some of the functions of a department. Each department is administered by a prefect, and each province by a sub-prefect. Municipal councillors are nominally elected by direct vote, and foreigners are eligible, but for some years municipal bodies have been selected without recourse to the popular vote.

*National flag:* Red, white, red (vertical).

*National anthem:* Somos Libres, seámoslo siempre (words by J. de la Torre Ugarte; tune by J. B. Alcedo, 1821).

**AREA AND POPULATION.** A report dated 30 Jan. 1959, by the Military Institute of Geography, calculated the total area of Peru to be 1,285,215 sq. km (496,093 sq. miles).

The long-standing dispute with Chile over the provinces of Tacna and Arica (*see* THE STATESMAN'S YEAR-BOOK, 1928, p. 1198) reached an amicable settlement on 3 June 1929 at Lima, Tacna going to Peru and Arica to Chile. For an account of the settlement of other boundary disputes, *see* THE STATESMAN'S YEAR-BOOK, 1948, p. 1173. A map of the boundary with Ecuador is to be found in THE STATESMAN'S YEAR-BOOK, 1942.

A new census under the direction of a special commission, of population, housing, agriculture and livestock, was taken on 2 July 1961.

The census taken on 2 July 1961 gave the population as 10,364,620 (preliminary), excluding nomadic jungle Indians. The language is Spanish, but the Indian population speak either Quechua or Aymará.

Foreign residents registered in May 1960: Japanese, 12,060; Chinese, 8,886; Italian, 7,587; USA, 7,144; Spanish, 5,788; German, 3,070; British, 2,882; Swiss, 1,458; French, 1,429.

The census population (2 July 1961, preliminary) of Lima was 1,715,971; Callao City, 161,286; Arequipa, 156,657; Cuzco, 72,120; Trujillo, 65,030; Chiclayo, 86,904; Iquitos, 55,695; Huancayo, 50,275; Talara, 41,613; 9 other cities had between 28,000 and 38,000.

In 1960 there were registered 376,356 births, 114,605 deaths and 43,549 marriages.

The area of the 23 departments and the constitutional province of Callao are given below with the population, according to the official census (revised) of 1940 and the official estimate for 30 June 1960. The department of Pasco, created in Nov. 1944 from the department of Junín, is shown with its present area and 1959 estimate. The area of the department of Puno includes the Peruvian zone of Lake Titicaca, 4,996·28 sq. km. The chief towns are shown in brackets:

| Departments | Area (sq. km) 1959 | Population |  | Pop. per sq. km 1960 |

[1] Constitutionally, Callao is a Province.

[2] Present area and 1958 population shown but the population for 1940 is that of the larger area (22,814 sq. miles) from which Pasco was carved in 1944.

**RELIGION.** Religious liberty exists, but the Roman Catholic religion is protected by the state, and since 1929 only Roman Catholic religious instruction is permitted in schools, state or private. In 1956 there were 4 Roman Catholic archbishops (the archdiocese of Lima, dating from 1545, takes precedence), 12 bishops, 4 vicars-general, 2 apostolic prefects, 1,662 priests, 605 cloistered monks and 3,182 members of religous orders.

Protestants numbered 94,000 in 1962.

All marriages must be civil, regardless of religion and preceded by medical examination; there are liberal divorce regulations, including divorce for 'absence without just cause for more than 2 years', and by mutual consent. Divorcees may re-marry immediately. A law of 1936 emphasizes that the religious obligations of marriage are fully recognized.

**EDUCATION.** Elementary education is compulsory and free for both sexes between the ages of 7 and 16; secondary education is also free. But schools, despite substantial increases, are still too few. The system is highly centralized; all teaching appointments are made by the Minister of Education for the public schools; for the private schools he supervises plant and equipment but does not appoint teachers.

In 1961 there were 14,860 public, private and state-supervised elementary schools, including kindergartens, with 43,550 teachers and 1,495,050 pupils;

260 state secondary schools, with 6,700 teachers and 184,850 students; 420 private secondary schools with 7,490 teachers; religious orders, etc., conducted 306 secondary schools, with 4,000 teachers and 50,000 students. Training in 191 public technical schools is also free; in 1961 they had 4,200 teachers and 43,000 pupils. Fifty-seven rural schools for the Indians give primary school education and instruction in agriculture and livestock. There are also 29 normal schools for teachers.

Higher education is provided at the central university in Lima, called 'Universidad Nacional Mayor de San Marcos', founded by Charles V in 1551. Students in 1962 numbered 14,000; teachers, 1,200. There are 3 other state universities at Arequipa (founded in 1827), with (1957) 1,650 students and 135 teachers; Cuzco with 1,254 students and 222 teachers; Trujillo, 2,944 students and 176 teachers, while the Catholic University (Lima) had 1,791 students and 213 teachers. The state maintains the National College for Engineering (2,282 students and 434 teachers) and the National College of Agriculture (795 students and 84 teachers).

*Cinemas* (1959). Cinemas numbered 385, with seating capacity of 420,000.

*Newspapers* (June 1958). There were 38 daily newspapers; in all there were 165 newspapers and periodicals.

**SOCIAL WELFARE.** There were, in 1958, 125 hospitals (19,702 beds), of which 37 were private, 24 administered by the state and 64 by public welfare organizations. Physicians numbered 1,761, equal to 1 per 6,165 of the population.

**JUSTICE.** Justice is administered in the Supreme Court at Lima composed of 11 judges and 4 fiscals, and in 19 superior courts composed of 156 judges and 42 fiscals. The judges of the Supreme Court are chosen by Congress from lists of names presented by the Government; those of the superior courts and of the minor courts are chosen by the Government from lists of names presented by the supreme and superior courts, respectively.

**FINANCE.** The revenue and expenditure for calendar years were as follows in 1m. soles:

| | *1960* | *1961* | *1962* | *1963*[1] | *1964*[1] |
|---|---|---|---|---|---|
| Revenue | 5,597·5 | 7,576·5 | 8,161·4 | 14,021·1 | 19,000 |

[1] Budget estimates.

In the 1964 budget proposed expenditures include (in 1m. soles): Defence, 2,823·9; finance, 2,043; interior (including police), 2,046; education, 3,204·8; public works, 3,538·3; public health, 2,853.

The external debt, at rates ruling on 31 Dec. 1959, was composed of US$138·3m.; £6·6m.; 32·5m. Argentine pesos, and 217,415 Swiss francs. In addition, the state had a liability as guarantor of US$69,391,942·35 and S/.7,793,497 in respect of loans made to private entities. In 1961 the consolidated internal debt amounted to 3,454m., the floating internal debt to 978·87m. Currency in circulation on 31 Aug. 1962 was S/.4,667·6m. Between 1950 and 1961, foreign long-term investment was US$903·5m.; short-term, $82·1m.

**DEFENCE.** The national budget for 1963 included the following estimates: War, S/.1,268·2m.; Air, S/.676·6m.; Navy, S/.667·7m. In 1961 US military aid was worth US$16·8m.

*Army.* Military service is compulsory and universal, though only a limited number of the annual quota of conscripts is called up for active duty with the colours. The term of service is 2 years and all males of 20–25 years of age are liable. The country is divided into 7 military districts.

The Army of 30,000 consists of 4 infantry divisions, an armoured division and a jungle division and paratroops and commando units. The infantry has artillery, cavalry and engineer units. Equipment consists of approximately 90 tanks, 50 light armoured fighting vehicles and 105-mm. artillery.

The national police force has a strength of about 18,000 including the 'Guardia Civil' and the 'Guardia Republicana', the latter being responsible for supplying prison guards.

*Navy.* The Peruvian Navy consists of 2 cruisers, *Almirante Grau* (ex-*Newfoundland*) and *Coronel Bolognesi* (ex-*Ceylon*), acquired from Great Britain in 1959–60; 2 destroyers acquired from USA during 1960–61; 3 destroyer escorts; 2 frigates acquired from Canada; 2 corvettes acquired from USA in 1960–61; 4 new submarines completed in the USA in 1954–57; 4 landing ships; 4 coastal patrol boats (acquired in 1960 from Italy); 7 river gunboats; 2 transports; 3 fleet tankers and 5 small tankers; 3 floating docks; a submarine salvage vessel and 2 tugs. There is a naval school for cadets at La Punta and a submarine base at El Callao. Naval personnel in 1963 totalled 6,640 officers and men.

*Air Force.* The Air Force is under the direction of the Air Ministry. The General Air Staff controls the organization of the Air Force. Officers and pilots are trained at the Air War Academy in Lima.

The operational force consists of 3 combat groups, with 1 squadron of F-86F Sabres, 1 of Hunters, 2 of F-80C Shooting Stars, 2 of piston-engined F-47D Thunderbolts, 1 of Canberra jet-bombers, 1 of Albatross anti-submarine aircraft and 2 of B-26 Invader and B-25 Mitchell piston-engined bombers. Other equipment includes 6 B-34s and C-60s (Photographic), 24 transports and 6 helicopters. There are also 9 T-33 and 26 T-37B jet trainers, some Alouette II and III helicopters and 120 miscellaneous types of piston-engined aircraft. There are military airfields at Talara, Chiclayo, Piura and Las Palmas, and a seaplane base at Iquitos.

**PRODUCTION.** The distribution of working population in 1958 was (in 1,000): Agriculture, 2,242·9; industry, 724·3; professions, 266·1; commerce, 209·2; government, 127·1; services, 177·2; mining and petroleum, 64·9; banking and insurance, 13·8.

*Agriculture.* The country may be divided into 3 zones: the coast strip, with an average width of 80 miles; the Sierra, or Uplands, lying between the coast range of mountains and the Andes proper; and the forest or wooded region, called the Montaña. Land under cultivation, 1960, was 1,824,420 hectares; unused potentially productive land, 13m. hectares. In the arid coast region the Government has brought under irrigation 62,400 acres during the last few years. A fertilizer factory near El Callao started production in June 1959.

Peru is a substantial importer of foodstuffs, chiefly wheat (266,520 metric tons, 1958), but including also fats and oil, meat and dairy products, which use up over 20% of the available foreign exchange.

About 62% of the population is dependent on agriculture, mainly with the help of irrigation. The land-reform law of 16 Nov. 1962 aims at a juster distribution of the holdings and modernization of agricultural methods.

The chief agricultural productions of Peru are, in the order named: Cotton, sugar, wool, hides, skins, coffee and rice.

Cotton production (1963) was 3·25m. quintals from 245,000 hectares. Pima and Tangüis are especially famous. Exports of ginned cotton in 1960 was 103,295 metric tons.

The sugar industry is carried on chiefly by irrigation in the river valleys of the coast region and by sinking wells (1 lb. of sugar is estimated to require 500 gallons of water). Peru is a low-cost producer. About 50 large estates covering 75,000 acres raise 95% of the crop; production (1962), 810,000 metric tons; exports in 1960, 513,435 tons, chiefly to USA and Japan. At the International Sugar Conference in July 1960, Peru's export quota was reduced by her request (220,215 tons in 1964).

The chief coffee-growing districts are Chanchamayo, Perené and Paucartambo in central Peru; output, 1962, was 45,000 metric tons. Exports are about 35,000 tons, chiefly to USA; value, S .684m. Cocoa cultivation is extending, especially in the Perené region, 4,590 metric tons in 1958. Wheat-growing on the plateaux of the Andes is encouraged. Wheat production (1958) was 151,643 metric tons from 159,289 hectares.

Rice production, 1962, was 349,000 metric tons (rough) from 60,914 hectares; there were no exports. It grows well in the valleys of Piura, Lambayeque, La Libertad and Ancash.

The gathering of wild rubber, once the most important industry in the Amazon region of Peru, is again being stimulated; 1958, 1,648 metric tons high grade and 142 metric tons low grade. Exports of balata, quinine, quinoa, kapok and rotenone from this region are being pushed. Tobacco, wines and spirits, olives, ramie and maize are also produced. Coca (made a government monopoly in 1949) is grown for the Indian population, which chews the leaf, but cocaine is manufactured in Lima, Cuzco and several other towns, principally for export: exports 1960, 601·9 kg. In addition there are dyes, cinchona and other medicinal plants.

Output of cattle hides, 1958, 350,000; sheepskins, 3·08m.; goatskins, 1,134,000; pigskins, 383,000. Export of hides and skins, 1958, 1,750 metric tons. Output of sheep wool ranged from 15 to 20m. lb.: in 1958 it was 7,940 metric tons. Alpaca and llama wool and vicuña hair, 4,150 metric tons; exports, 1958, were sheep wool, unwashed, 1,969 metric tons; llama, alpaca and vicuña wool, 2,957 metric tons.

*Livestock* (1958). 2,758,730 llamas, alpacas, etc., 1,060,859 horses and mules, 3,176,230 cattle, 14,016,710 sheep, 3,996,390 goats, 1,370,275 swine, 11·3m. poultry.

*Fisheries.* Peru's fishing industry has shown a remarkable expansion during the past few years. At the end of 1959 there were 4,300 fishing boats operated by some 16,000 fishermen, and 116 factories processing fishery products employed some 12,000 workers. There were 11 freezing plants, 52 canning plants, 106 fishmeal plants and 55 fish oil plants; also 3 whale reduction plants and 8 chasers. Volume of fish landed expanded from 453,134 tons in 1957 to 5·2m. metric tons in 1961, making Peru second among fish-producing countries. The increase was due mainly to the fishing of anchovies for production of fishmeal, of which Peru is now the largest exporter. Fish-product exports in 1961 were 942,793 metric tons, valued US$72m., fourth after copper, cotton and sugar as a source of foreign exchange.

*Mining.* Lead, copper, iron, silver, zinc and petroleum are the chief minerals exploited. Crude petroleum output, from 3,100 wells, is around

2·2m. metric tons—17·4m. bbls (of 42 gallons) in 1961 and 21·1m. in 1962. Oil consumption is growing and now absorbs more than 70% of the production. The state-owned Empresa Petrolera Fiscal has 94 wells producing 1,059,894 bbls in 1957. In March 1957 the 'El Oriente' Company made a promising strike at Contamana, in Loreto. Mine production (in metric tons, 1962) of copper, 165,869; lead, 123,401; zinc, 150,215; antimony, 400; tungsten, 445; bismuth (1957), 365; gypsum (1957), 42,586; barite, 94,980; refractory clay (1959), 2,160; gold (1962: 126,223 troy oz.); silver (1962: 36,016,676 troy oz.). Iron deposits are large; production (60% Fe), 1962, 6,569,000 long tons. Excellent coal deposits, with an ash content of from 5 to 7% lie near by; output 1959, 178,000 metric tons; manganese (50%), 6,315,661 kg. Nepheline was discovered in Puno department in 1962.

Foreign interests, especially American, predominate in the petroleum industry. Mine concessions, 1957, numbered 10,850. Exports of crude oil and by-products were worth S/.388·4m. in 1961; S/.488m. in 1960.

The government-controlled guano deposits on Huanillos, Punta Lobos and other islands are important; the 1961 production was 159,198 metric tons, but the bird population is decreasing.

Production of salt in 1958 was 105,413 metric tons.

*Industry.* At the end of 1958, 5,035 industrial entities reported 138,931 employees and workmen; capital and reserves totalled 8,328m. soles. Provisional returns of the 1961 census indicated that 20% of the national income derived from industrial production, compared with 11% 20 years before. Textiles form the most important industry—its 345 concerns with resources amounting to S/.1,940m. employed 32,015. There are 92 spinning-and-weaving mills, and 109 weaving mills, comprising cotton, 42; wool, 43; silks and rayons, 18; linen, 6. Also, there are 85 knitting factories and 39 manufacturers of stockings and socks. Other industries include boots and shoes, cement, tyres and rubber products, flour, paint, hollowware, matches, soap, glass, leather goods, housing components, explosive, fertilizer, plastics, chemicals and provisions. In 1962, 5 cement plants produced 701,000 metric tons.

Peru's first iron and steel mill came into production at Chimbote in April 1958. Products include pig-iron, blooms, billets, largets, round and round-deformed bars, wire rod, black and galvanized sheets and galvanized roofing sheets. Refractories are manufactured at Lima.

The Government has a monopoly in the import and/or local manufacture and sale of guano, salt, alcohol, explosives and playing cards; the monopoly in matches was abandoned in 1954 and that in tobacco in June 1955.

There is considerable foreign investment in mining, petroleum and sugar-processing. The capital of the Banco Industrial was raised from S/.31m. to S/.400m. by law of 8 Feb. 1957.

*Electricity.* At the end of 1960 installed capacity for private services was 445,005 kw. and for public services 353,495 kw., total 798,500 kw. This was more than double the total at the end of 1954. Plant under construction and planned should add a further 400,000 kw. by the end of 1964. Consumption in 1960 was 2,501m. kwh.

**Trade Unions.** Trade unions have about 400,000 members, mainly for textile workers, bank clerks, railway workers, bus and taxi drivers, miners, oil workers and stevedores. The central trade union organization is the *Confederación de Trabajadores del Perú*, which was reconstituted in 1956 after being in abeyance for some years. In 1962 a beginning was made with minimum wage agreements for various coastal cities and certain central and southern provinces.

**COMMERCE.** The value of trade has been as follows (in 1m. soles):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports | 8,123,963 | 11,722 | 12,584·1 | 14,412·6 | 14,900 |
| Exports | 8,643,658 | 10,172 | 13,306·6 | 14,478·5 | 14,500 |

On 2 May 1961 Peru ratified the Montevideo treaty and thereby became one of the members of the Latin American Free Trade Area (LAFTA).

All imports from the USSR, China, Albania, Bulgaria, Eastern Germany, Hungary, Poland and Rumania are prohibited since 13 March 1953. Travel to these countries was banned in April 1962.

Chief imports, by value, in 1m. soles in 1962 were: Foodstuffs, drinks and tobacco, 1,964; machinery and vehicles, 6,127; chemicals and pharmaceuticals, 1,408; metals and manufactures thereof, 1,531; fuel and lubricants, 495; textiles and yarns, 669; fats and waxes, 275; paper, cardboard, etc., 349; wearing apparel, 225; non-metallic minerals, 221; rubber and products, 164; wood and cork, 150.

Imports (in metric tons) in 1959, 1,263,050; 1960, 1,649,407; 1961, 1,973,147. Exports (in metric tons) in 1959, 5,739,367; 1960, 8,149,293; 1961, 8,935,291.

The distribution of the trade (in S/.1m.) was mainly as follows:

| Imports from | *1961* | *1962* | Exports to | *1961* | *1962* |
|---|---|---|---|---|---|
| USA | 5,551 | 5,707 | USA | 4,754 | 4,996 |
| Germany | 1,467 | 1,780 | Chile | 385 | 634 |
| UK | 885 | 924 | UK | 1,174 | 1,407 |
| Canada | 276 | 312 | Belgium | 1,067 | 968 |
| Argentina | 564 | 805 | Germany | 1,222 | 1,591 |
| Netherlands | 450 | 453 | Netherlands | 1,191 | 1,230 |
| Belgium | 243 | 365 | Japan | 1,005 | 935 |
| Switzerland | 410 | 390 | Italy | 237 | 288 |
| Italy | 323 | 368 | Argentina | 219 | 221 |
| Japan | 517 | 782 | | | |

Principal exports in recent years have been:

| | *1960* | | *1961* | |
|---|---|---|---|---|
| | 1,000 tons | S/.1m. | 1,000 tons | S/.1m |
| Copper | 168 | 2,580 | 199 | 2,808 |
| Iron Ore | 2,125 | 2,472 | 3,382 | 2,782 |
| Lead | 118 | 590 | 142 | 600 |
| Petroleum | .. | 488 | .. | 388 |
| Silver | 1 | 656 | 1 | 738 |
| Zinc | 158 | 456 | 207 | 511 |
| Cotton | 100 | 1,997 | 113 | 2,140 |
| Fishmeal (*production*) | 592 | 1,417 | 943 | 2,252 |
| Sugar | 553 | 1,299 | 557 | 1,721 |

Total trade between Peru and UK in £ sterling (British Board of Trade returns):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK | 14,395,215 | 17,264,996 | 18,652,526 | 23,661,242 | 24,361,275 |
| Exports from UK | 6,198,957 | 7,967,412 | 10,505,012 | 10,359,445 | 13,159,651 |
| Re-exports from UK | 46,690 | 63,211 | 102,523 | 109,652 | 116,538 |

**COMMUNICATIONS.** *Shipping.* In 1957, 11,899 vessels of 17,937,747 entered, and 11,675 of 18,014,228 tons cleared the ports, chief of which is Callao. Since 1928 the coasting trade has been largely reserved for Peruvian-owned vessels with Peruvian crews; in 1955 it handled 1,684,624 tons, valued at 799,345,675 soles. The merchant marine, 1953, consisted of 13 vessels (53,066 tons) in international trade, 15 (of 19,944 tons) in coastal trade and 18 (3,628 tons) in inland waters. Lloyds reports, 1954, 28 steamships (64,827 gross tons) and 21 motor ships (32,467 tons). In March 1957 it was agreed to spend US$6m. on 6 'Liberty' type ships each of 10,000 tons, and 2 of 4,000 tons.

*Roads.* There were at 30 June 1958, 39,933 km, of which 9,214 km were made up and 4,098 km asphalted. The Central Highway over the Andes from Lima to Oroya was completed in 1935; the Callao–Huánuco–Pucallpa Highway, completed in 1943, opens up the rich eastern portion of Peru and makes possible a land and water journey (*via* the Ucayali and Amazon rivers) from the Pacific Ocean to the Atlantic Ocean. In 1944 the Lima–Pucallpa Highway, 522 miles, was completed, joining Lima with Iquitos.

On 31 Dec. 1961 there were 83,324 licensed road vehicles, including private cars, 48,483; taxis, 7,128; lorries, 21,093; buses, 1,122; motor cycles, 2,869; scooters, 355; tricycles, 371.

*Railways.* In 1957 the total working length of the railways was 2,726 km, including 524 km retained by the state. These are standard gauge (4 ft 8½ in.), with the exception of 5 small lines. A railway linking the new port of Matarani with the south (78 km) was opened in Jan. 1951. Number of passengers in 1957, 6,205,722; goods, 4,759,803 metric tons.

*Post.* In 1957 there were 1,843 post offices, 288 telegraph and 382 telephone stations and 79 radio-telegraph offices. Length of telegraph lines was 21,720 km. The privately-owned telephone system (1963) had 117,415 instruments, of which 75,431 were in Lima; radio-telephone circuits connect Lima with distant towns. Three submarine telegraph cables connect Peru and Chile, and one connects Peru and the republics to the north. There are 58 broadcasting stations, of which 6 are government. Wireless receiving sets, about 600,000. There are 6 television stations, 4 in Lima, one in Arequipa and one in Trujillo.

*Aviation.* In 1957, 323,454 passengers used the commercial aviation routes, covering 13·6m. km with 800,927 kg of mail and 20·9m. kg of cargo. Air-mail and passenger services connecting Lima and the capitals of every South American republic has been established. The first Peruvian international line, Aerolíneas Peruanas, SA began operating with 3 planes on 3 June 1957; and Expreso Aéreo Peruano SA was authorized to begin with 2 freight planes.

**MONEY.** Peru's currency unit, the Peruvian gold *sol* (by law of 18 April 1931), was equal to one-tenth of the old Peruvian *libra* or pound; the gold sol was not then minted but contained, theoretically, 42·1264 centigrams of fine gold. Eventually, in 1950, gold 10-sol pieces were minted for the account of gold producers, out of the gold they had been required to deliver to the Bank; the coins were then exported and sold, the proceeds being handed to the gold producer less minting and selling costs. Peru abandoned the gold standard on 18 May 1932. The foreign-exchange market is entirely free. Rates on 11 Feb. 1964 were S/.74·95 (buying) and 75·25 (selling) to the £ and S/.26·80 (buying) and 26·85 (selling) to the US$.

Silver is legal tender up to 10% of the amount, but silver coins—the sol, and half-sol, $\frac{5}{10}$ths fine—disappeared beginning in 1935 and were replaced by coins, including the sol and half-sol (copper–zinc), the 20, 10 and 5 centavos (copper–zinc and copper–nickel) and 2 and 1 centavo (zinc–copper). Peru has a paper currency issued by the Banco Central in denominations of 500, 100, 50, 10 and 5 soles. Money in circulation at 31 Dec. 1963 was S/.5,884m.

**BANKING.** The Government bank of issue, known as the Banco Central de Reserva de Perú, was established 9 March 1922, and in Sept. 1931 was reorganized with a 30-year charter and authorized capital of 30m. soles (reduced to 10m. soles in May 1932). The bulk of the gold stock is undervalued; some 525,289 oz. are carried on the books at a valuation equivalent to $11.35 a fine oz. instead of $35. The bank had on 31 Dec. 1963 gold and foreign exchange totalling US$125·1m., a record.

Banks, domestic and foreign, are supervised by the Superintendent of Banks. There were, in March 1963, 12 important domestic banks and 3 foreign—1 British, 1 Canadian and 1 American. At 30 Sept. 1962 advances were 9,159m. soles and deposits 11,564m. soles.

**WEIGHTS AND MEASURES.** The metric system of weights and measures was established by law in 1869, and since 1916 has come into general use. Spanish measures are still in use.

# REPUBLIC OF THE PHILIPPINES

REPÚBLICA DE FILIPINAS—REPUBLIKA ÑG PILIPINAS

**HISTORY.** The Philippines were discovered by Magellan in 1521 and conquered by Spain in 1565. Following the Spanish–American war, the islands were ceded to the USA on 10 Dec. 1898, after the Filipinos had tried in vain to establish an independent republic in 1896.

The Republic of the Philippines came into existence on 4 July 1946, by agreement with the US Government embodied in an Act of Congress signed by President Roosevelt on 24 March 1934, accepted by the Philippine Legislature on 1 May 1934 and ratified at a plebiscite on 14 May 1935. This Act established a 10-year transitional period, designated as that of the Philippine Commonwealth, at the end of which complete independence was automatically effective.

**CONSTITUTION AND GOVERNMENT.** The republic is governed by a constitution adopted on 14 May 1935 and amended in 1940 and 1946. The President and Vice-President are elected for 4 years; both may be re-elected for another term. The President is assisted by 11 departmental secretaries in charge of Foreign Affairs; Finance; Justice; National Defence; Health; Education; Public Works and Communications; Labour; Commerce and Industry; Agriculture and Natural Resources; General Services; and by 9 other officials of cabinet rank, namely the Executive Secretary, the Budget Commissioner, the Social Welfare Commissioner, the Chairman of the National Economic Council, the Press Secretary, the

Administrator of Economic Co-ordination, the Commissioner of National Integration, the Commissioner of Civil Service and the Chairman of the National Science Development Board.

*President:* Diosdado Macapagal (Liberal), formerly Vice-President, was elected in Nov. 1961 against the former President Carlos Garcia (Nationalist) and assumed office on 1 Jan. 1962.
*Vice-President:* Emmanuel Pelaez.

Congress consists of a Senate of 24 members and a House of Representatives of 104 members. All male and female citizens 21 years of age or older who can read or write Spanish, English or a native dialect and who meet certain residential qualifications are entitled to vote. Registered voters at the 1961 presidential election, numbered 8·5m.

The constitution vests in the republic all ownership of the country's natural resources, which, apart from public agricultural land, may not be alienated. An agreement with the USA signed on 4 July 1946, ratified by plebiscite on 11 March 1948 and expiring in 1974, admits American interests or companies to the exploitation of any resources and public-utility business open to Filipinos. Concessions and leases are limited to 25 years, renewable for another 25 years; maximum area of agricultural public land which any corporation may acquire or lease is 1,024 hectares (2,529 acres) and not more than 2,000 hectares (4,940 acres) if used for grazing purposes.

*National flag:* Blue and red (horizontal), with a white canton charged with a gold sun (with 8 rays) and 3 gold stars.

*National hymn:* 'Tierra adorada', 'Land of the morning', lyric in English by M. A. Sane and C. Osias, in Spanish by José Palma (1899), tune by Julian Felipe (1898); 'Pambansang Awit ñg Pilipinas', Tagalog lyric by the Institute of National Language, music by Julian Felipe.

LOCAL GOVERNMENT. The country is administratively divided into provinces, municipalities and cities. Each of the 56 provinces elects its executive, consisting of a governor, vice governor and 3 members of the provincial board. The municipalities are public corporations, each composed of a number of barrios; the elected municipal mayor is the executive official. There are 39 chartered cities; their mayors are elective.

**AREA AND POPULATION.** The Philippines is situated between 21° 20′ and 4° 30′ N. lat. and between 116° 55′ and 126° E. long. It is composed of 7,107 islands and islets, 2,773 of which are named; only 462 have areas of 1 sq. mile or over. Total area, 115,707 sq. miles; land area, 114,830 sq. miles (299,681 sq. km). In July 1948 the Philippine Government took over from the British North Borneo Company the Turtle Islands, a small group off the northern tip of Borneo. The 11 most important islands with their areas are: Luzon, 40,420 sq. miles; Mindanao, 36,537; Samar, 5,050; Negros, 4,905; Palawan, 4,550; Panay, 4,446; Mindoro, 3,759; Leyte, 2,785; Cebu, 1,703; Bohol, 1,492, and Masbate, 1,262 sq. miles.

The total population at the census of 15 Feb. 1960 was 27,087,685, or 236 persons per sq. mile of land area.

The population of Manila, the capital, in 1960, was 1·1m. The new capital, Quezon City, just north-east of Manila, had a population of 397,990. Other cities, with their population in Feb. 1960, are: Iloilo on Panay, 150,976; Cebu on Cebu, 251,146; Zamboanga on Mindanao, 131,411; Davao on Mindanao, 231,833; Basilan on Basilan Island, 156,046; Bacolod on Negros, 119,315; San Carlos, 124,756; Rizal (Pasay City), 132,673.

On 7 June 1940 the President of the Philippines approved a law, effective 4 July 1946, making a new language based on Tagalog (a Malayan dialect) the official national language of the republic. About 10,689,200 people speak English and about 558,650 Spanish; for government and commercial purposes these two languages are commonly used. Some 70 native languages are spoken in the Philippines, of which 9 are of major importance; they belong to the Malayo-Polynesian family.

**RELIGION.** About 83% of the population are Roman Catholic, organized in 6 archbishoprics, 14 bishoprics, 1 apostolic prefecture and 5 prelatures.

The Philippine Independent Church, founded in 1902, and comprising about 10% of the population, denies the spiritual authority of the Roman Pontiff. It is divided into two groups, one of which has accepted ordinations by the Episcopalian Church. In 1962 the non-Roman Christians numbered 3·2m.; in 1948 Buddhists numbered 42,751; Moslems, 791,817, chiefly in Mindanao and Sulu; Pagans, 353,842, and others, 92,783.

**EDUCATION.** Education is free in the primary schools and is completely co-educational. In all schools English is the main medium of instruction, although the Filipino language is also taught. The vernaculars are used as the medium of instruction in the lower primary grades, and Spanish is one of the possible subjects in all high schools and obligatory in all colleges. In 1956, of the persons 10 years old and over, 65% were literate.

There were in 1960–61 school year 4,257,610 pupils and 126,905 teachers in the 30,035 public schools; expenditure on education was P.195,607,010. The Normal College and other collegiate normal schools had 5,700; the trade schools, 3,372; the agricultural schools, 723; the Nautical School, 65 students. The University of the Philippines, founded in 1908, had 14,326 students. There were 2,107 authorized private schools in 1959–60 with 895,853 pupils. The Dominican Order maintains the University of Santo Tomas, established in 1611 and made a pontifical university in 1645.

*Newspapers* (1961). There were 936 newspapers with a circulation of 6,139,639; 19 of them are dailies, of which the 6 largest are published in English.

*Cinemas* (1955). Cinemas numbered 550, with seating capacity of 330,000.

**SOCIAL WELFARE.** The government programme includes the purchase and subdivision of big landed estates for resale on easy instalment plans to tenants, the opening of virgin lands and settlement of landless families, the granting of bank loans to such families for seeds and the building of homes, the opening of rural roads and rural schools, the setting up of travelling medical clinics and the distribution of relief goods, including food, clothing and medicine, to families who have been displaced due to the depredations of the communist outlaws.

**JUSTICE.** The judiciary is headed by the Supreme Court, with a chief justice and 10 associate justices; it can declare a law or treaty unconstitutional by the concurrent votes of 8 judges. There is a court of appeal, headed by a presiding justice, with 17 associate justices. There are 16 judicial districts subdivided into 132 branches, each with several judges of first instance. Every city has a municipal court and every municipality has one justice of the peace. In addition, the juvenile and domestic relations court in Manila has exclusive jurisdiction to try all cases involving minors and matrimonial disputes.

There are also 3 agencies of the Government which have been denominated as 'courts', namely, the Court of Tax Appeals, the Court of Industrial Relations and the Court of Agrarian Relations, which perform judicial as well as quasi-judicial functions.

All members of the judiciary are appointed by the President with the consent of the Commission on Appointments.

**DEFENCE.** On 14 March 1947 the Philippine and US Governments signed a 99-year military-base arrangement. The USA was granted the use of a series of army, navy and air bases, with the right to use a number of others on mutual agreement. On 21 March a second agreement provided for a US Military Advisory Group as well as military assistance. A treaty of mutual assistance was signed in Washington on 30 Aug. 1951; the instruments of ratification were exchanged in Manila on 27 Aug. 1952. The Philippines is also a signatory of the S.E. Asia Collective Defence Treaty (*see* p. 44).

The Chief of Staff of the Armed Forces has overall command over the Army, Air Force, Navy and Constabulary.

*Army.* The Army consists of 15,000 officers and men in the active force and a reserve of 120,000 ready for mobilization. It is organized in 1 combat-ready division and 4 training divisions, one each per military area.

*Navy.* The Navy includes 6 escort patrol vessels, 2 command ships, 1 transport, 2 new coastal minesweepers, 7 submarine chasers, 19 patrol boats, 7 landing ships, 1 surveying vessel, 10 auxiliary vessels, all *ex*-USA, and 15 coastguard vessels. Naval personnel in 1963 totalled 4,800 officers and men.

*Air Force.* The Air Force has a strength of some 6,000 officers and men, with 200 aircraft, and is being built up with US assistance to meet its commitments to SEATO. Its fighter-bomber wing is equipped with 3 squadrons of F-86F Sabre jets, and there is a squadron of F-86D Sabre all-weather fighters. There are also transport, observation, air/sea rescue and training units, flying aircraft of US design, including 36 Japanese-built Mentor primary trainers (received as war reparations).

*Police.* Public order is maintained partly through the Philippine constabulary and partly through the local police forces. The constabulary now forms part of the Armed Forces.

The main disturber of law and order is the remnant of the Communist-led *Huks* (formerly *Hukbong Bayan Laban sa Hapon*, People's Army against Japan, now known as the *Hukbong Mapagpalaya ñg Bayan*, People's Liberation Army). After the surrender, capture or killing of several of its commanders, the *HBM* has lost in efficiency, morale and mass support.

**FINANCE.** The revenues and expenditures of the central government for 5 fiscal years (ending 30 June) were, in 1m. Philippine pesos (up to 1960, 1 Philippine peso = 50 cents US). In 1961, since the beginning of decontrol, the value of the Philippine peso fluctuated. From Oct. 1962 the Philippine peso equals 26 cents US.

| Expenditure | 1,183·5 | 1,416·8 | 1,509·1 | 1,574·0 | 2,159·8 |

[1] Actual. [2] Revised estimates. [3] Budget estimates.

The gaps between revenue and expenditures were covered by borrowing and the surplus of previous years. Expenditure (1961–62) included (in 1m. pesos): National defence and police, 192·5; social welfare, 508·1; general administration, 122·8; economic development, 464·6; public debt, 64·6. Taxation furnished P.914·7m. of the revenue.

As of 30 June 1962 the total internal public debt outstanding of the national and local governments, including those of the government corporations, stood at 2,500·7m. pesos, while the external public debt amounted to US$306m.

**PRODUCTION.** Of the total land area of 29,741,290 hectares, 9,329,280 hectares are commercial forests; 3,842,120 hectares non-commercial forests; 5,726,580 hectares cultivated land; 716,260 hectares mangrove and marshes and the rest are brushed land and open land.

*Agriculture.* About 98·4% of the total cultivated area is owned by Filipinos; the average size of the farm is 3·21 hectares. The principal products are unhusked rice (palay), Manila hemp (abaca), copra, sugar-cane, maize and tobacco. In Oct. 1959, 5,158,000 persons were employed in agriculture (60·1% of the working population).

In the crop year ended 30 June 1962 the production of milled rice was 2,538,000 metric tons from 7,852,600 acres; corn, 1,266,300 metric tons from 4,980,200 acres; copra, 1,356,100 metric tons; desiccated coconut, 62,800 metric tons, all from 3,170,800 acres; sugar (centrifugal), 1,468,200 metric tons from 531,100 acres; abaca, 116,300 metric tons from 451,100 acres; Virginia and native tobacco, 69,700 metric tons from 248,200 acres; sweet potatoes, 695,500 metric tons from 333,700 acres; bananas, 524,900 metric tons from 545,300 acres.

Minor crops are fruits, nuts, root crops, vegetables, onions, beans, coffee, cacao, peanuts, ramie, rubber, maguey and kapok.

*Livestock.* In 1961 there were 3,452,000 carabaos (water buffaloes), 1,054,700 cattle, 197,300 horses, 6,191,400 hogs, 532,300 goats, 20,100 sheep and 52m. poultry.

*Forestry.* The forests (covering 44·3% of the area, with an estimated stand of 416,400,000m. bd ft) furnish cabinet and construction timber, gums and resins, vegetable oils, rattan and bamboo, tan and dye barks and dye woods. About 97·5% of this belongs to the Government. In 1962–63, 2,871,235,000 bd ft of timber was produced; sawn lumber, 406,073,000 bd ft.

*Fisheries.* Fish production from all sources amounted to 454,899 metric tons valued at P.470·8m. in 1961.

*Mining.* The important mineral products are gold, silver, lead, zinc, copper, manganese, chromite, iron, quicksilver, cement, coal, rock asphalt, sand, gravel and salt. Gold is produced chiefly in Northern and Southern Luzon, Mindanao and Masbate. Chromite mines are in Zambales and Pangasinan provinces; coal in Albay, Cebu and Zamboanga del Sur; copper in Cebu, Zambales, Samar and Pangasinan: nickel in Surigao; uranium ore has been discovered at Larap, Southern Luzon.

Mineral production in 1962 (and 1961), in metric tons: Chromite ore, 642,280 (540,302); manganese ore, 14,476 (19,038); copper, 63,360 (51,875); lead, 99 (101); iron ore, 1,366,000 (1,170,548); quicksilver, 3,321 (3,167); coal, 107,779 (152,328); rock asphalt, 2,484 (6,651); asbestos, 1,141 (913); in fine oz.: gold, 423,394 (423,983); silver, 675,570 (812,793).

*Industry.* Manufacturing is largely carried on in homes (chiefly embroidery, buntal hats, woven cloths, mats and pottery), but the number of factories has been fast increasing. In 1954 there were 19 coconut-oil mills, 77 cigar and cigarette factories, 8,232 rice-mills, 165 leather-shoe factories, 7 rubber-shoe factories, 25 sugar centrals, 4 cement plants and 1 hydro-electric plant. The non-agricultural labour force in Oct. 1960 was 3,314,000 out of a total of 8,539,000 employed.

*Electricity.* In 1962 the Manila Electric Company produced 1,937,826,912 kwh.

**COMMERCE.** The values of imports and exports for calendar years are stated as follows in 1m. pesos (for rate of exchange *see* above under FINANCE):

| | *1958* | *1959* | *1960* | *1961* | *1962* |
|---|---|---|---|---|---|
| Imports . . . | 1,106·6 | 1,041·9 | 1,249·0 | 1,249·3 | 2,267·7 |
| Exports . . . | 919·6 | 1,011·1 | 1,069·2 | 1,081·5 | 1,990·3 |

The principal exports in 1961 were (in P.1m.): Copra, 189·5 (exports, 1963, 927,183 long tons); sugar and molasses, 278·8; minerals and metals, 158; logs, lumber and timber, 192·8; abaca fibres and manufactures, 61·5; coconut oil, 30·7 (exports, 1963, 217,030 long tons); desiccated coconut, 26·5.

Main imports in 1961 (in P.1m.): Machinery, 201·8; mineral fuels and lubricants, 98·7; textiles 128·9; cereals, 56·8; dairy products, 49; transport equipment, 137.

Owing to the commercializing of agriculture for export, foodstuffs have to be imported, representing normally from 15 to 20% of all imports, chiefly meat and fish products and wheat and dairy products from USA.

For over a half century the foreign trade has been chiefly with the USA, which is biggest buyer of Philippine copra, sugar, abaca, coconut oil, desiccated coconut, canned pineapples, embroideries, copra meal, rope and gold. The trade relationship of the two countries is governed by the Philippine Trade Act of 1946 as amended. American goods entering the Philippines paid a tariff duty of 50% of the regular duty on other foreign goods from 1 Jan. 1959 to 31 Dec. 1961; they pay 75% from 1 Jan. 1962 to 31 Dec. 1964; 90% from 1 Jan. 1965 to 31 Dec. 1973, and 100% from 1 Jan. 1974.

Philippine products entering the USA paid 10% of the US tariff in 1959–61, and pay 20% in 1962–64, 40% in 1965–67, 60% in 1968–70, 80% in 1971–73 and 100% from 1 Jan. 1974.

The USA imported from the Philippines goods valued at $288·68m. in 1961 ($255·3m. in 1960) and exported to the Philippines goods valued at $268·7m. in 1961 ($284·1m. in 1960).

Total trade between the Philippines and UK (British Board of Trade returns, in £ sterling):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports from UK . | 3,409,238 | 4,485,644 | 4,004,468 | 3,016,683 | 3,716,834 |
| Exports to UK . | 7,781,662 | 8,907,238 | 9,269,936 | 9,552,068 | 12,227,050 |
| Re-exports from UK | 55,621 | 102,114 | 163,056 | 94,877 | 87,101 |

**COMMUNICATIONS.** *Shipping.* In 1961, 1,888 vessels of 7,840,422 net tons entered and 1,774 vessels of 7,405,664 net tons cleared the port of Manila. Of the vessels entering, 280 (1·44m. tons) were American, 263 (1·05m. tons) Norwegian, 235 (1·24m. tons) British and 181 (658,631 tons) Filipino.

*Roads.* In 1962 highways extended 49,604 km, of which 15,143 km were national roads. In 1961 there were registered 87,700 motor cars, 79,314 lorries and buses, and 6,385 motor cycles.

*Railways.* Railway tracks (1962), 1,145 km, of which 942 km were on Luzon and 117 km on Panay. In 1961, 11·5m. passengers and 1·2m. metric tons of freight were carried by rail.

*Post.* In 1962 there were in operation 1,283 post offices and 1,070 telecommunication stations and offices. 8,817 km of telegraph lines and 22,885 km of cable. There were 139,659 telephones, of which 83,693 were in Manila.

Licensed radio stations in 1962 numbered 4,111, of which 2,561 are private stations.

*Aviation.* The Philippine Air Lines, Inc., with a capital of P.6m., in 1961 carried 790,000 passengers (37,000 on international routes), 10,641 metric tons of cargo and 636 metric tons of mail.

**MONEY.** The republic is on a free foreign exchange market starting on 22 Jan. 1962, with the peso equivalent to about 26 cents US. Total money supply, 31 Dec. 1961, was P.2,219·3m. of which P.1,049·6m. was currency in circulation and P.1,169·7m. were demand deposits. The peso contains 20 grammes of silver, 0·800 fine. The coins used are: Peso, one-half peso, peseta (20 centavos), media peseta (10 centavos), all in silver of 0·750 fine; 5 centavo in cupro-nickel, and 1 centavo in copper–tin–zinc. Central Bank notes of 5, 10, 20 and 50 centavos supplement the metal coins. Treasury certificates and Central Bank notes are issued in 1, 2, 5, 10, 20, 50, 100 peso denominations.

**BANKING.** As of 31 Dec. 1961 there were 182 branches of commercial banks, 41 of savings and mortgage banks and 181 of rural banks. Total bank assets at 30 June 1961 were 3,412m. pesos, excluding the Central Bank, the post savings bank and the Development Bank. At 30 June 1960 the post savings bank held deposits of P.50m. for 426,320 depositors.

Under a law passed 15 June 1948 the Central Bank of the Philippines was created to have sole control of the credit and monetary supply, independent of the Treasury. It has a capital of P.10m. furnished solely by the Government. Its total assets, as of 30 June 1962, were P.2,337·7m.

## POLSKA RZECZPOSPOLITA LUDOWA

**HISTORY.** Modern Polish history begins with the three partitions of the elective kingdom between Russia, Austria and Prussia in 1772, 1793 and 1795. After the creation by Napoleon I of a semi-independent 'Grand-Duchy of Warsaw' under the King of Saxony (1807–13), the country was again partitioned at the Congress of Vienna in 1815. Thereby the old kingdom of Poland was distributed as follows: Russia, 178,000 sq. miles; Austria, 30,000 sq. miles; Prussia, 29,000 sq. miles; the 'Kingdom of Poland', in personal union with Russia, 47,000 sq. miles; and the free city of Cracow. The Polish revolution of 1830–31 caused in 1832 the suppression of the constitution granted in 1815 and made 'Congress Poland' virtually a Russian province, and the Prussian 'Grand Duchy of Posen' lost its privileges. The revolution of 1846–48 led to the incorporation of Cracow in Austria, the abolition of the 'Grand Duchy of Posen' and further repression in 'Congress Poland', which was intensified after the revolution of 1863–64.

During the First World War Russian Poland was occupied by the Austro-German forces. On 5 Nov. 1916 the German and Austrian emperors, in a joint manifesto, proclaimed the independence of Poland, but neither the boundaries nor the constitution of the state had been defined when the Central Powers collapsed in Nov. 1918. On 10 Nov. 1918 the independence of Poland was proclaimed by Joseph Pilsudski, the founder of the Polish Legions during the war. On 28 June 1919 the Treaty of Versailles recognized the independence of Poland.

On 1 Sept. 1939 Germany invaded Poland, on 17 Sept. 1939 Russian troops entered eastern Poland, and on 29 Sept. 1939 the fourth partition of Poland took place. After the German attack on Russia, launched on 22 June 1941, the Germans occupied the whole of Poland, but Poles at home and abroad continued the fight against the Germans throughout the war, by land, sea and in the air. War casualties and victims of German terror amounted to 6–7m. people. By March 1945 the country had been liberated by the Russians.

In July 1944 the Soviet Union recognized the Polish Committee of National Liberation (*Polski Komitet Wyzwolenia Narodowego*) established in Lublin as an executive organ of the National Council of the Homeland (*Krajowa Rada Narodowa*). The Committee was transformed into the Provisional Government in Dec. 1944, and on 28 June 1945, supplemented by members of the Polish Government in London (which had been recognized by the UK and USA), it was re-established—in Moscow—as the Polish Provisional Government of National Unity and on 6 July recognized as such by the UK and USA.

The Government, pledged by the Yalta agreement of 11 Feb. 1945 to the holding of free and unfettered elections, held them, on 19 Jan. 1947, in an atmosphere of Communist and secret police terror. Of the 12·7m. votes cast, 11·24m. were recognized as valid, and 9m. were given for the Communist-dominated 'Democratic Bloc'.

On 15 Dec. 1948 the Socialist and Communist parties merged into the United Workers' Party. In Dec. 1949 the Peasants' Party and the Polish Peasants' Party merged into the United Peasants' Party.

**CONSTITUTION AND GOVERNMENT.** The Constitution was adopted on 22 July 1952, and the office of President of the Republic was, on 20 Nov. 1952, replaced by a Council of State of 15 persons.

After the workers' and students' riots in Poznań in June 1956 and the bloodless anti-Stalinist 'palace revolution' in Oct. 1956, the nationalist elements gained control of the Communist Party, under the leadership of W. Gomułka, who had spent several years in prison for 'Titoist deviation'.

The supreme *de facto* power is in the hands of the Politburo of the United Workers' Party. A new Politburo of 12 members was elected by the Central Committee of the Polish United Workers' Party on 19 March 1959: Władysław Gomułka, *First Secretary of the Central Committee*; Józef Cyrankiewicz, *Chairman of the Council of Ministers*; Stefan Jędrychowski, *a Deputy Chairman of the Council of Ministers and Chairman of the Planning Council*; Ignacy Loga-Sowiński, *Chairman of the Central Council of Trade Unions*; Edward Ochab, *a Secretary of the Central Committee*; Adam Rapacki, *Minister of Foreign Affairs*; Aleksander Zawadzki, *Chairman of the Council of State* (*i.e.*, the titular Head of State); Edward Gierek and Zenon Kliszko, *Secretaries of the Central Committee*; Marshal Marian Spychalski, *Minister of Defence*. Two members resigned in Oct. 1959 and July 1963.

In Jan. 1963 the Polish United Workers' Party had 1,397,000 members and candidates.

According to the 1952 Constitution, the authority of the Polish People's Republic is vested in the Sejm, which is elected for 4 years by all citizens over 18 years (including serving soldiers) in the proportion of 1 deputy to 60,000 inhabitants. The Sejm elects a Council of State, composed of a Chairman, the Secretary and 14 members, including 4 vice-chairmen. It also elects the Council of Ministers. Local administration is carried out by People's Councils, elected for 4 years in voivodships, districts, boroughs, towns and villages.

Elections for the Sejm took place on 16 April 1961. The electorate numbered 17,944.081; of these, 16.892,213 persons (94·14%) voted; the single list of the Front of National Unity received 98·4% of the votes cast. The 460 seats are distributed as follows: 256 United Workers' Party, 117 United Peasants' Party, 39 Democratic Party, 48 others. The Sejm has 60 women deputies.

*National flag:* White, red (horizontal).

*National anthem:* Jeszcze Polska nie zginęła (words by J. Wybicki, 1797; tune by M. Ogiński, 1796).

**AREA AND POPULATION.** The republic comprises an area of 312,520 sq. km (120,733 sq. miles), and a population (census, 6 Dec. 1960) of 29,731,000 (14,374,400 males and 15,356,600 females; preliminary results). Estimate, 30 Sept., 1963, 30,805,600 (14,935,000 males, 15·87m. females).

For the present territory *see* MAP in THE STATESMAN'S YEAR-BOOK, 1946.

In Feb. 1951 the Soviet Union and Poland exchanged some frontier districts, covering 480 sq. km inhabited by 14,000 people. Poland received from the Soviet Union territory in the Drohobycz district, near Ustrzyki Dolne. The USSR received from Poland territory in the voivodship of Lublin, in a triangle between the rivers Bug, Sołokija and Huczwa, south of Hrubieszów and east of Tomaszów Lubelski. On 4 May 1957 the Soviet–Polish frontier adjacent to the Baltic coast was demarcated.

The republic is for administrative purposes divided into 17 voivodships and 5 cities of voivodship status. These are subdivided into 322 rural and 74 urban districts. The capital is Warszawa (Warsaw).

The names, area (in sq. km) and population (in 1,000; census, preliminary, Dec. 1960) of the voivodships are as follows:

| Voivodship | Area | Population | Voivodship | Area | Population |
|---|---|---|---|---|---|
| Warsaw City | 446 | 1,136 | Gdańsk (Danzig) | 10,939 | 1,219 |
| Warsaw | 29,338 | 2,315 | Koszalin | 17,974 | 686 |
| Bydgoszcz | 20,800 | 1,706 | Szczecin (Stettin) | 12,677 | 755 |
| Poznań City | 220 | 408 | Zielona Góra | 14,514 | 777 |
| Poznań | 27,705 | 1,994 | Wrocław City (Breslau) | 225 | 429 |
| Łódź City | 212 | 708 | Wrocław | 18,827 | 1,799 |
| Łódź | 17,153 | 1,598 | Opole | 9,509 | 927 |
| Kielce | 19,408 | 1,819 | Katowice | 9,515 | 3,264 |
| Lublin | 24,876 | 1,800 | Kraków City | 230 | 479 |
| Białystok | 23,148 | 1,090 | Kraków | 15,350 | 1,989 |
| Olsztyn (Allenstein) | 21.023 | 878 | Rzeszów | 18,646 | 1,586 |

This total is short of 369,800 people compared with the preliminary census results; this may possibly be the strength of the armed forces and auxiliaries.

Census population of the largest towns (Dec. 1960):

| | | | | | |
|---|---|---|---|---|---|
| Warsaw (Warszawa) | 1,136,000[1] | Bydgoszcz | 231 500 | Sosnowiec | 131,600 |
| Łódź | 708,400 | Zabrze | 188,800 | Ruda Śląska | 131,300 |
| Kraków | 479,000 | Bytom | 182,500 | Radom | 130,100 |
| Wrocław (Breslau) | 429,200 | Lublin | 180,700 | Białystok | 120,800 |
| Poznań | 407,800 | Czestochowa | 163,800 | Wałbrzych | 117,100 |
| Gdańsk (Danzig) | 286,500 | Gdynia | 147,800 | Toruń | 104,800 |
| Szczecin (Stettin) | 268,900 | Chorzów | 146,700 | | |
| Katowice[2] | 268,900 | Gliwice | 134,900 | | |

[1] On 30 June 1963: 1,203,400.
[2] March 1953–Oct. 1956 named Stalinogród.

Rate (per 1,000 persons) of live births, in 1962, was 19·6; of deaths, 7·9; marriages, 7·5; divorces, 0·6; infantile mortality, 55. On 30 June 1963, 49% of the population lived in 783 towns and 51% in the country.

National minorities in Dec. 1963 numbered 453,000. They included 180,000 Ukrainians, 165,000 Byelorussians (mostly in Białystok voivodship), 19,000 Russians, 3,000 Germans, 31,000 Jews, 21,000 Slovaks, 2,000 Czechs, 10,000 Lithuanians, 12,000 gypsies, 5,000 Greeks and 5,000 Macedonians.

**RELIGION.** The great majority of the population is Roman Catholic. On 14 April 1950 the Roman Catholic bishops concluded an agreement with the Government, by which the Church accepted the Communist régime in return for guarantees concerning the papal authority and religious education. A new agreement on the relations between Church and State was signed on 8 Dec. 1956.

There are 3 archbishoprics and 15 dioceses; the archbishop of Warsaw and Gniezno is the primate of Poland (since 1948, Stefan Cardinal Wyszyński). The Polish hierarchy claim the archbishopric of Breslau and the bishoprics of Danzig and Warmia (Ermland) as Polish sees; the Vatican considers the archbishoprics of Lwów and Vilno (incorporated in the USSR in 1940) as still being under Polish jurisdiction.

The Polish Orthodox Church, which broke away from Moscow after the Russian Revolution and received canonical status under the Patriarchate of Constantinople, in 1948 returned to Moscow obedience and was promptly granted autocephaly. The Orthodox Church in Poland, in Sept. 1961, claimed 413,000 members in 2 dioceses with 198 parishes, under a Metropolitan.

The Protestants are estimated to number 140,000, including 120,000 Lutherans, 15,000 Methodists and Baptists, 5,000 Reformed. There are also 30,000 Old Catholics with headquarters at Płock and 60,000 'Polish Catholics'.

The number of Jews, who in 1939 constituted 10% of the population (about 3·5m.), is now estimated at 31,000. The majority—at least 3m.—perished under the Nazi occupation.

**EDUCATION.** Education up to the age of 14 is free and compulsory. In 1962–63 there were: Kindergartens, 7,422 with 439,725 pupils; primary schools, 26,462 with 5,117,300 pupils and 156,181 teachers; secondary schools, 847 with 339,540 pupils and 13,569 teachers; special schools (for blind, deaf and sick children), 433 with 54,500 pupils and 3,100 teachers; primary schools for adults, 885 with 86,400 pupils and 1,200 teachers; secondary schools for adults (including correspondence courses), 234 with 93,600 pupils and 700 teachers. Vocational and evening schools, 7,645 with 1,183,500 pupils (of whom 410,492 in the 1,698 evening schools) and 40,252 teachers.

In Aug. 1962 the last schools run by Roman Catholic monks and nuns were taken over by the Government.

In 1962–63 Poland had 73 institutions of higher education: 7 universities, 15 technical universities, 7 agricultural schools, 9 schools of economics, 4 teachers' training colleges, 10 medical academies, 4 schools of physical training, 6 academies of music, 7 academies of art, 3 drama schools and 3 theological academies, with together 190,303 students (including some 50,000 part-time and correspondence students) and 3,280 professors and 14,491 lecturers and assistants.

In 1951 the Polish Academy of Sciences was reorganized on the pattern of the Academy of Sciences of the USSR.

*Cinemas* (1963). Cinemas numbered 3,411, with a seating capacity of over 550,000.

**SOCIAL WELFARE.** In June 1963 there were 665 hospitals with 175,623 beds, 86 tuberculosis sanatoria with 24,250 beds, 4,187 dispensaries and 1,788 health centres. There were 33,558 physicians and surgeons and 10,538 dentists.

In 1962 social-insurance expenses totalled some 11,600m. zlotys, including 8,200m. for family allowances and 2,900m. for sickness benefits.

**JUSTICE.** The legal system was reorganized in July 1950. The Minister of Justice described the main objectives of the reform as follows: closer connexion of Courts and Prosecutors' offices with the popular masses and other organs of the government, in particular with the public security organs; strengthening of the people's element in legal pronouncements; strengthening of the prosecutor's authority and concentration on preliminary legal proceedings; better safeguarding of individuals' rights in investigation and court proceedings; higher efficiency of simplified procedure courts for special offences; and an extension of the existing apparatus of juvenile courts.

There exist the following courts: The Supreme Court; voivodship, district and special courts. Judges and lay assessors are elected. The State Council elects the judges of the Supreme Court for a term of 5 years, and appoints the Prosecutor-General. The office of the Prosecutor-General is separated from the judiciary.

As from 1 Jan. 1964 lawyers must belong to a 'legal collective'; their private practice has been abolished.

**FINANCE.** Budget in 1m. zlotys, for calendar years:

| | *1959* | *1960* | *1961* | *1962* | *1963*[1] | *1964*[1] |
|---|---|---|---|---|---|---|
| Revenue . | 186,521 | 209,467 | 235,200 | 257,300 | 263,570 | 276,117 |
| Expenditure . | 182,516 | 200,115 | 233,500 | 249,800 | 260,352 | 270,950 |

[1] Estimates.

The 1964 (and 1963) budget expenditure shows (in 1m. zlotys): National economy, 203,575 (193,892); education, science and culture, 28,373 (26,249); health, 21,208 (19,269); defence, 22,233 (21,783).

On 30 June 1952 the external debt of Poland (including that of Danzig) comprised £3,415,000; $108,215,385; 179,996,500 lire; at the same date, Poland's outstanding share of the pre-1918 Austrian debt amounted to 66,617,779 gold florins and 20,912,447 Austrian crowns.

On 11 Nov. 1954 a finance agreement was signed in Warsaw which provided for the settlement of Polish debts to Britain by instalments over a period of 12 years. The debt was fully repaid by Dec. 1962.

**DEFENCE.** Poland is divided into 3 military districts: Warsaw (the eastern half of Poland); Pomerania (Baltic coast, part of central Poland; headquarters at Bydgoszcz); Silesia (Silesia and southern Poland; headquarters at Wrocław).

ARMY. In 1950 the Army was completely remodelled on Soviet lines. It is divided into army (18 months service), air force (3 years), navy (3 years), anti-aircraft, rocket and radio-technological units (3 years) and internal security forces (27 months).

The military age extends from the 19th to the 50th year. The strength of the Armed Forces including the security troops (frontier guards and security police) may be about 370,000, which would correspond to some unexplained discrepancies of the 1960 census figures (*see above*, p. 1333).

The Army consists of 4 armoured, 9 motorized and 1 airborne divisions. Tanks number 2,750. Officers are required to learn Russian. Arms, equipment, training, tactics and military doctrine have been brought in line with those in the USSR.

NAVY. The Navy comprises 3 destroyers, 8 submarines, 12 fleet minesweepers, 25 patrol vessels, 40 motor torpedo-boats, 4 coastal minesweepers, 17 landing craft and 7 auxiliaries. Its personnel numbers 20,020.

AIR FORCE. The Air Force has a strength of some 45,000 officers and men and 1,000 operational aircraft of Soviet design. There are 4 fighter-ground-attack regiments (mainly with MiG-17s), 5 fighter regiments (MiG-19s and -21s) and 2 bomber regiments (twin-jet Il-28s). The MiG jet fighters are Polish-built. There are also numerous transport, helicopter and training units.

In 1962, 3 Soviet divisions were stationed in Poland.

**PRODUCTION.** Whereas before 1940 Poland was a predominantly agricultural country, in 1960 only 38·2% of the census population made their living by agriculture. A complete transformation of Poland's economic structure has taken place; the key industries have been nationalized or are under state control; in all branches of industry planned economy has been introduced. All industrial undertakings employing over 50 workers are placed under the control of the Central Industrial Boards.

*Planning.* In March 1959 the Third Congress of the United Workers' Party adopted the development plan for 1959–65 (to run parallel with the USSR 7-year plan); by Dec. 1963 the plan had been revised four times, lowering the production targets.

Targets for 1964: Yield (in 1m. metric tons) per hectare (1963 actual yield in brackets): Grain, 14·7 (14·5); potatoes, 40·3 (44·8); sugar beet, 11·57 (10·6). Industrial output (in 1m. metric tons): Coal, 114·3; crude steel, 8·29; sulphuric acid, 1·02; cement, 8·7. Livestock: 9·9m. cattle, 12·3m. pigs. Electricity, 40,000m. kwh.

*Agricultural and Forestry.* In June 1963 there were 20·3m. hectares of agricultural land and forests, of which 17·4m. were in private hands, 0·2m. in producer co-operatives, 2·5m. in state farms. 15·8m. hectares were arable, 0·23m. gardens and orchards, 2·4m. meadows, 1·8m. pasture lands, 7·5m. forests.

The number of collective farms has gone down from 10,600 in June 1956 to 1,463 on 30 June 1963. A new approach to collectivization is being made by organizing 'agricultural groups' (29,565 with 1,194,900 members at 30 June 1963, including 17,454 'rural housewives' groups' with 354,300 members).

| Crops | Area (1,000 hectares) | | | Yield (1,000 metric tons) | | |

| Sugar beet | 420 | 430 | 372 | 11,600 | 9,650 | .. |
| Maize | 143 | 136 | 109 | The yield is kept secret. | | |

In 1961 deliveries of 45,900 tons of tobacco and in 1960 of 1,600 tons of hops were made from 38,500 and 2,100 hectares respectively.

Livestock, June 1963: 9·8m. cattle (6m. cows), 11·7m. pigs, 3·1m. sheep and 2·6m. horses.

Milk production in 1962 was 12,400m. litres.

Agricultural tractors in 1962 numbered 84,500 (in 15-h.p. units).

*Fisheries.* Catch of sea fisheries, 1962, was 164,200 (1963: 200,000) metric tons, of which cod accounted for 47,300 tons and herring 76,100 tons.

*Industry.* Production in 1961 (and 1962) (in 1,000 metric tons): Coal 106,600 (109,600; 1963: 112,825); brown coal, 10,338 (11,100; 1963: 15,820); coke, 12,600 (13,100); iron ore, 2.386 (2.436); pig-iron, 4,770 (5,311); crude steel, 7,234 (7,684); rolled steel, 4,824 (5,238); cement, 7,360 (7,541); sulphurous acid (100%), 794 (852); nitrogenous fertilizers, 282 (308); phosphoric fertilizers, 235 (265); aluminium, 47·3 (47·7); electrolytic copper, 22·2 (24·1); lead, 39·8 (40·7); zinc, 153 (159); petroleum, 203 (203); salt, 2,050 (2,070); sugar, 1,500 (1,200); electricity, 32,308m. kwh. (35,400m.); natural gas, 733·6m. cu. metres (820·6m.); silver, 128,600 (128,600) fine oz.

Output of light industry in 1961 (and 1962): Cotton fabrics, 710m. metres (693); woollen fabrics, 77·6m. metres (82·6; silk fabrics, 111m. metres (104·4); linen and hemp fabrics, 89·5m. metres (92·5); leather shoes, 39m. pairs (42·9); soap, 89,000 metric tons (95,300); paper, 542,000 metric tons (560,000).

**Trade Unions.** Total membership of all trade unions on 30 June 1962 was 6·57m. (including 2·13 women), *i.e.*, 90% of the working population. The largest unions were (in 1,000): Commerce and co-operative employees, 688; miners, 536; building workers, 500. The labour force in the 'socialist sector' numbered 7·67m. and in the 'private sector' 0·16m.; 42·3% were in industry, 11·2% in building, 7·4% in agriculture, 9·3% in transport and communications, 10·8% in social and cultural services, 10% in commerce.

Total trade between Poland and UK for 5 years (according to British Board of Trade returns) was (in £ sterling):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK | 32,481,595 | 35,841,970 | 36,838,875 | 38,369,893 | 40,190,894 |

| Re-exports from UK | 298,369 | 104,618 | 802,782 | 516,691 | 473,418 |

Under the 5-year trade agreement signed in May 1963, the annual quota for British exports to Poland is £28m. (mainly chemicals, machinery, iron and steel, non-ferrous metals) and for Polish exports to Britain, £30m. plus an estimated £13m. for goods not on quota.

**COMMUNICATIONS.** *Shipping.* The principal ports are Gdynia, Gdańsk (Danzig), Szczecin (Stettin) and Kołobrzeg (Kolberg). Elbląg (Elbing) is an inland river harbour and can serve sea-going shipping only to a limited extent. There are 7,000 km of inland waterways.

In Dec. 1963 the Polish sea-going merchant marine numbered 365 vessels of 100 gross tons or more, totalling 925,000 GRT. The Poles lead in transports between Soviet-bloc countries, China and Vietminh, and there are regular lines between Gdynia–Gdańsk, Taku Bar, Shanghai and Haiphong. Regular lines to Africa and Latin America are being developed.

Total shipping entering Polish ports in 1962 was 11,554 vessels of 12·6m. NRT. Of these, 2,605 vessels of 3·9m. NRT were Polish.

Freight traffic in 1962 was 8·8m. tons ocean-going and 3·05m. tons inland and coastal. In 1963 Szczeczin handled 9·66m., Gdynia 7·6m. and Gdańsk 6m. metric tons of freight.

*Roads.* In 1963 Poland had 106,114 km of hard-surfaced roads. Number of motor vehicles, 31 Dec. 1963: Passenger cars, 183,000 (of which 140,000 private property); lorries, 177,000; tractors, 114,000; buses, 16,500; motor cycles, 1,175,000 (of which 1·1m. private property).

In 1962 state and co-operative road transport carried 480·2m. passengers and 52·35m. metric tons of freight.

*Railways.* The length of the normal-gauge railway system was (1962) 23,207 km (1,384 km electrified); of narrow gauge, 3,596 km. In 1962 the railways carried 305·7m. tons of freight and 867·2m. passengers.

*Post.* In 1962 there were 7,051 post and telecommunications offices and 636,100 telephone subscribers.

Wireless licences, on 30 June 1963, numbered 5·69m.; television licences, 1,111,800.

*Aviation.* In 1962 the Polish State Air Service, 'Lot', carried 245,700 passengers and 4,600 metric tons of luggage, goods and mail.

**CURRENCY.** The currency unit is the *zloty*, divided into 100 *groszy*. From 30 Oct. 1950 to 31 Dec. 1960 the zloty equalled the Soviet rouble, but with the revaluation of the rouble on 1 Jan. 1961, the basic relation changed to 1 rouble = 4·44 zloty and, for non-trade transactions within the Soviet bloc, to 1 rouble = 1·5 zloty. The currency consists of notes of 5, 10, 20, 50, 100 and 500 zlotys; and of coins of 1 grosz, 2, 5, 10, 20 and 50 groszy and 1, 2, 5 and 10 zlotys. The official rate of exchange has since then been Zl. 11·17–11·23 to the £ sterling and Zl. 3·99–4·01 to the US$. On 11 Feb. 1957 the zloty was devalued for non-trade transactions with all non-Soviet-bloc countries; the rates of exchange for this purpose were in Aug. 1959, Zl. 67·32–67·68 = £1; Zl. 23·94–24·06 = US$1.

**BANKING.** The whole banking system was reorganized on 25 Oct. 1948, with effect from 12 Nov. 1948. The National Bank of Poland, established on 15 Jan. 1945, continues to be the central bank, retains exclusive authority to issue currency, is charged with control of money and credit, and has responsibility for financial implementation of the national economic plan. The national Investment Bank (Bank Inwestycyjny) has the exclusive right to issue bonds, and exercises centralized control over investment financing.

The Agricultural Bank (Bank Rolny) has exclusive responsibility for direct financing of rural areas through both short-term and investment loans. It operates through a comprehensive network of branch offices and communal co-operative banks. The General Savings Bank (Powszechna Kasa Oszczędności) exercises central control over savings activities, transfers, and checking transactions, including activities of workers' co-operative banks.

In addition to the National Bank of Poland, other authorized foreign-exchange banks are: Bank for the National Economy, the Polish Welfare Bank (Bank Polska Kasa Opieki SA) and the Commercial Bank of Warsaw (Bank Handlowy w Warszawie SA).

Deposits in savings institutions amounted to 25,357m. zlotys on 31 Aug. 1963, to the credit of 12·7m. depositors.

**WEIGHTS AND MEASURES.** The metric system is in general use.

## República Portuguesa

**CONSTITUTION AND GOVERNMENT.** Portugal has been an independent state since the 12th century; until 1910 it was a monarchy. The last King was Manuel II of the house of Braganza-Coburg, born 15 Nov. 1889, died 2 July 1932. On 5 Oct. 1910 the republic was proclaimed with Dr Teófilo Braga as the provisional president (5 Oct. 1910 to 24 Aug. 1911). Thereafter there were duly elected presidents, as follows:

Dr Manuel de Arriaga, 24 Aug. 1911–29 May 1915.[1]
Dr Joaquim Teófilo Braga, 29 May 1915–5 Oct. 1915.
Dr Bernardino Luís Machado Guimarães, 5 Oct. 1915–11 Dec. 1917.[2]
Dr Sidonio Bernardino Cardoso da Silva Pais, 11 Dec. 1917–14 Dec. 1918.[3]
Admiral João de Canto e Castro Silva Antunes, 16 Dec. 1918–5 Oct. 1919.
Dr António José de Almeida, 5 Oct. 1919–5 Oct. 1923.
Manuel Teixeira Gomes, 5 Oct. 1923–11 Dec. 1925.[1]
Dr Bernardino Luís Machado Guimarães, 11 Dec. 1925–1 June 1926.[1]
Provisional government, 1 June–29 Nov. 1926.
Marshal António Oscar Fragoso Carmona, 29 Nov. 1926–18 April 1951.
Marshal Francisco Higino Craveiro Lopes, 22 July 1951–9 Aug. 1958.

[1] Resigned. [2] Deposed. [3] Assassinated.

*President of the Republic:* Rear-Adm. Américo de Deus Rodrigues Tomás; born 19 Nov. 1894 (elected 22 July 1958; assumed office 9 Aug. 1958).

*National flag:* Green, red (vertical).
*National anthem:* A Portuguesa (words by Lopes de Mendonça, 1890; tune by Alfredo Keil).

On 19 March 1933 the present constitution, which declares that the Portuguese state is a unitary and corporative republic, was adopted by plebiscite. The latest amendment to the constitution was passed on 29 Aug. 1959. The present is to be elected for 7 years by an electoral college, constituted of members of the National Assembly and the Corporative Chamber, with representatives of municipalities and oversea legislative councils.

The National Assembly (one chamber) of 130 Deputies is elected for 4 years by direct suffrage. Angola and Moçambique are represented by 7 deputies each, India by 3, Cape Verde by 2, Guinea, S. Tomé and Principe, Macao, Timor by 1 each.

At the elections in Nov. 1961 only government candidates were returned.

A State Council composed of the Prime Minister, the Presidents of the National Assembly, the Corporative Chamber and the Supreme Court, the Public Prosecutor and 10 other members assists the President of the Republic. A Corporative Chamber functions alongside the National Assembly.

The Cabinet was, in Jan. 1963, composed as follows:

*Prime Minister:* Dr António de Oliveira Salazar.

*Minister of the Presidency:* Dr José Gonçalo da Cunha Sottomayor Correia de Oliveira.

*Defence:* Gen. Manuel Gomes de Araújo.

*Interior:* Dr Alfredo Rodrigues dos Santos Júnior.

*Justice:* Dr João de Matos Antunes Varela.

*Finance:* Dr António Manuel Pinto Barbosa.

*Army:* Col. Joaquim da Luz Cunha.

*Marine:* Rear-Adm. Fernando Quintanilha Mendonça Dias.

*Foreign Affairs:* Dr Alberto Marciano Gorjão Franco Nogueira.

*Public Works:* Eduardo de Arantes e Oliveira.

*Overseas Provinces:* Cdr António Augusto Peixoto Correia.

*Education:* Dr Inocêncio Galvão Teles.

*Communications:* Carlos Gomes da Silva Ribeiro.

*National Economy:* Dr Luís Maria Teixeira Pinto.

*Corporation and Social Security:* Dr José João Gonçalves de Proença.

*Health and Welfare:* Dr Francisco Pereira Neto de Carvalho.

[3] Resident population.

In 1960 the population consisted of 4,254,416 males and 4,634,976 females, or 109 females to every 100 males.

The Azores islands are divided into 3 widely separated groups, with clear channels between, São Miguel together with Santa Maria being in the most easterly. About 100 miles north-west of them lies the central cluster of Terceira, Graciosa, São Jorge, Pico and Faial. Still another 150 miles to the north-west are Flores and Corvo, the latter being the most isolated and primitive of the islands. São Miguel, Terceira and Pico are the largest, the first measuring 41 miles in length and 9 in breadth, and containing over half the total population of the archipelago. For political and administrative purposes they are divided into 3 districts, each sending its representatives to the Chamber at Lisbon. The capitals of the 3 districts are the chief seaports, Ponta Delgada on São Miguel Island, Horta on Faial Island and Angra do Heroísmo on Terceira Island.

Vital Statistics for calendar years:

| | Births | Still-births | Marriages | Divorces | Deaths | Emigrants |
|---|---|---|---|---|---|---|
| 1960 | 213,895 | 7,705 | 69,457 | 749 | 95,007 | 32,318 |

| 1962 | 220,200 | 7,622 | 70,817 | 743 | 96,864 | 33,539 |

In 1962 the births included 113,842 (1961, 111,869) boys and 106,358 (105,531) girls; the deaths, 49,697 (50,745) males and 47,167 (48,854) females.

At the census of 15 Dec. 1960 the population of Lisbon was 802,230; Oporto, 303,424; Vila Nova de Gaia, 45,739; Coimbra, 46,313; Setúbal, 44,435; Braga, 40,977; Amadora, 36,331; Matosinhos, 37,694; Almada, 30,688; Barreiro, 30,399; Évora, 24,144; Guimarães, 23,229; Covilhã, 23,091; Moscavide, 22,065; Faro, 18,909.

In 1961, 16,073 emigrants went to Brazil and 3,370 to USA.

**RELIGION.** The predominant faith is the Roman Catholic, but there is freedom of worship, both in public and private, with the exception of creeds incompatible with morals and the life and physical integrity of the people.

On 7 May 1940 a Concordat and a Missionary Agreement with the Vatican were signed. The Concordat recognizes the lawful existence of the Catholic Church and the exercise of its spiritual mission according to the Canon Law. Religious marriages, duly notified to the Registrar's Office, are recognized, and divorce is forbidden to parties married by the Church. Church property which had come into the possession of the State is restored, except that used for public services or classified as immovable property of public interest, or national monuments.

The Missionary Agreement regulates religious activities in the Overseas Provinces. Since the 16th century, Portugal has had the privilege of the Roman Catholic jurisdiction in the Orient (Padroado), which had by 1950 been reduced to Portuguese India and part of India; agreements of 18 July 1950 and 25 Sept. 1953 adapted the Concordat to the changed political situation in India.

Portuguese territory is divided into 5 ecclesiastical provinces, with their sees respectively at Lisbon, Braga, Évora, Luanda (Angola) and Lourenço Marques (Moçambique). The Archbishop of Lisbon (Patriarch since 1716 and Cardinal since 1737) has the following suffragans: Guarda, Leiria and Portalegre on the continent; Angra do Heroísmo and Funchal in the adjacent islands, and Cape Verde in Africa. The Archbishop of Braga (Primate of the Iberian Peninsula) has as suffragans: Aveiro, Bragança, Coimbra, Lamego, Oporto, Vila Real and Viseu. The Archbishop of Évora has 2 suffragans: Beja and Faro.

By the concordat of 1940 the metropolitan sees of Luanda (Angola) and Lourenço Marques (Moçambique) were created. The former has as suffragans, besides the see of S. Tomé, the 4 new dioceses of Nova Lisboa, Silva Porto, Sá da Bandeira and Malange; the second has as suffragans the 4 new dioceses of Beira, Nampula, Quelimane and Porto Amélia. The Archbishop of Goa and Damão (who also holds the titles of Archbishop of Cranganor, Primate of the East and Patriarch of Eastern India) has jurisdiction over the diocese of Goa. The privilege of the Far East is constituted by the suffragan sees of Macao, with the vicariats of Shiu-Hing, Singapore and Malacca, and Dili (Timor). The province of Guinea is an Apostolic Prefecture.

**EDUCATION.** According to the latest statistics, 70% of the population over 7 years could read and write. Compulsory education had been in force since 1911. In 1961–62 there were 18,202 public primary schools with 886,820 pupils and 26,786 teachers. Private elementary schools numbered 845 with 40,442 pupils and 1,707 teachers. Secondary instruction is supplied in two types of schools: in the *liceus* and other grammar schools, and in schools of technical instruction. In 1961–62 there were 43 *liceus* and 347 institutions of *liceu* standard, with 118,250 pupils, and 389 professional and technical secondary schools, with 118,358 pupils. For higher education there are 3 universities: at Lisbon (founded in 1911), Coimbra (founded 1290) and Oporto (founded 1911). In 1961–62 the number of students at the universities was 17,124. There is also the Technical University at Lisbon (founded in 1930), which in 1961–62 had 3,574 students. There are also a military and a naval school, art schools in Lisbon and Oporto (998 students) and 5 colleges of music (199 students).

*Cinemas* (1962). There were 456 cinemas with a seating capacity of 265,216.

**JUSTICE.** Portuguese law distinguishes civil (including commercial) and penal, labour, administrative and fiscal law, each branch having its lower courts, courts of appeal and the Supreme Court.

The republic is divided for civil and penal cases into 167 *comarcas*; in every comarca there is a lower court. In the comarca of Lisbon there are 33 lower courts (16 for criminal procedure and 17 for civil or commercial cases); in the comarca of Oporto there are 17 lower courts (8 for criminal and 9 for civil or commercial cases); at Braga, Coimbra, Setúbal, Guimarães, Santarém, Leiria, Aveiro, Viseu, Almada, Feira, Anadia and Funchal there are 2 courts. There are 3 courts of appeal (Tribunal de Relação) at Lisbon, Coimbra and Oporto, and a Supreme Court in Lisbon (Supremo Tribunal de Justiça). There are also 34 municipal courts. The municipal courts are also lower courts, similar to those of the comarcas; their service is, however, limited.

Capital punishment is abolished, except, in the case of war, by court martial.

The permanent effectives of the army in Overseas Portugal consist of 12 battalions of *caçadores*, 14 independent companies of *caçadores*, 2 battalions of field artillery, 6 independent batteries of field artillery, 1 battalion of motorized cavalry, 6 independent squadrons of motorized cavalry, 3 companies of military police, 2 battalions of engineers, 1 signal company and several quartermaster units.

In 1962 the Republican Guard (*Guarda Nacional Republicana*) consisted of 8,259 all ranks, and the Fiscal Guard (*Guarda Fiscal*) of 5,647 all ranks. The *Legião Portuguesa* and Civil Defence force numbered 97,553 volunteers.

*Navy.* The Navy comprises: 3 destroyers; 11 frigates; 3 submarines; 4 ocean minesweepers; 2 minesweeping trawlers; 14 patrol vessels; 12 coastal minesweepers; 1 gunboat; 14 patrol launches; 1 sailing training ship; 5 surveying vessels; 1 corvette; 5 fishery protection vessels; 2 river gunboats; 2 fleet oilers; 1 lighthouse tender; 1 diving tender; 1 depot ship; 7 landing craft. The navy personnel in 1963 totalled 1,007 officers and 11,493 men including marines.

*Air Force.* Formed in 1912, the Air Force has been independent since 1952, when it was combined with the naval air service and given equal status with the Army and Navy. In 1963 it had a strength of about 12,500 officers and men, with some 350 aircraft. It contributes 1 anti-submarine squadron of P2V-5 Neptunes to the NATO air forces.

Portugal is divided into 3 air regions, with headquarters in Lisbon, Luanda and Lourenço Marques.

The Air Force comprises 2 fighter squadrons (F-86F Sabre jets), 2 fighter-bomber squadrons (F-84G Thunderjets), a maritime reconnaissance squadron (P2V-5 Neptune), a military air-transport service (Noratlas, C-47, C-54 and DC-6), and a squadron of transport helicopters.

**PRODUCTION.** *Development.* During the first 6-year plan (1953–58), 15·2m. contos were invested (10·3m. in metropolitan Portugal, 4·9m. in the oversea provinces). The second 6-year plan (1959–64) envisages investments of 31m. contos (22m. in metropolitan Portugal, 9m. overseas). The main branches of industry to be fostered are transport and communications (6·6m.), fishing, mining and manufactures (6·3m.), electricity (4·6m.) and agriculture (3·8m.) in Portugal; of the overseas provinces, Angola is to receive 4·6m.; Moçambique, 3·2m.; Cabo Verde, India, Macau and Timor, 210,000–220,000 each; Guiné, 180,000; S. Tomé, 170,000.

*Agriculture.* The following figures show the area (in hectares) and yield (in metric tons) of the chief crops:

| | *1960* | | *1961* | | *1962* | |
|---|---|---|---|---|---|---|
| Crop | *Area* | *Yield* | *Area* | *Yield* | *Area* | *Yield* |

Wine production, 1962, 15,268,071 hectolitres (1961, 7,419,666), and olive oil, 1962, 577,436 hectolitres (1961, 1,257,409). In 1955, 228,996 hectolitres of port wine were exported; 1956, 246,125; 1957, 236,693; 1958, 212,944; 1959, 230,487; 1960, 228,880; 1961, 267,815; 1962, 268,444.

In 1955 Portugal (continental and islands) possessed 74,000 horses, 127,000 mules, 237,000 asses, 1,074,000 oxen, 4m. sheep, 738,000 goats and 1,516,000 pigs.

*Forestry.* The forest area covers 2·5m. hectares, of which 1·17m. are pine, 600,000 cork oak, 500,000 other oak, 70,000 chestnut, 100,000 eucalyptus and 60,000 other species.

The production of cork in Portugal surpasses that of the rest of the world (1960, 179,210; 1961, 152,929; 1962, 157,537 metric tons). Most of it is exported in the crude condition; exports of cork and cork products totalled 176,096 metric tons in 1960; 169,552 in 1961; 172,102 in 1962. Production of resin (in metric tons) was 76,250 in 1960; 99,127 in 1961; 78,417 in 1962; more than two-thirds are exported. Exports of turpentine (in metric tons) were 9,765 in 1960; 12,069 in 1961; 8,922 in 1962.

*Fisheries.* The fishing industry is of importance. At 31 July 1962 there were 46,781 men and boys employed, with 18,658 boats. The sardine catch, 1961, was 139,405 metric tons, valued at 421,694 contos; 1962, 130,466 metric tons, 357,742 contos. Exports of tinned sardines (in metric tons) amounted to 59,606 in 1959, 54,389 in 1960, 60,516 in 1961. The most important centres of the sardine industry are at Matosinhos, Setúbal, Portimão and Olhão.

*Mining.* Portugal possesses considerable mineral wealth. Production in metric tons:

*Electricity.* Total production of electrical power in 1961 was 3,611,026,052 kwh. (1962, 3,833,159 kwh.); the installed capacity totalled 1,470,768 kw. (1962, 1,469,923), of which 1,203,647 kw. (1960, 1,085,213) were hydro-electric. New power plants were inaugurated in 1951 (Castelo do Bode, Venda Nova, Belver), 1953 (Salamonde), 1954 (Cabril), 1955 (Caniçada and Bouçã), 1958 (Picote) and 1960 (Miranda).

*Tourism.* Tourism is of increasing importance for the invisible balance of payments. In 1962 visitors, including 274,565 British and 214,783 Americans, spent 1,357,515 nights in Portugal.

**Trade Unions.** The organization of trade unions is based on the Labour Charter (*Estatuto do Trabalho Nacional*), implemented by the decree no. 23: 050 of 23 Sept. 1933. 324 unions (*sindicatos nacionais*) had in 1961 a membership of 1,044,963 (827,891 men; 217,072 women).

**COMMUNICATIONS.** *Shipping.* In 1962, 15.451 vessels of 40.971.950 tons entered the ports (continental and islands). Of those entering 9,012 (13,910,925 tons) were Portuguese, 922 (7,454,454 tons) British and 756

(1,366,928 tons) Spanish. In Jan. 1963 the merchant marine consisted of 294 vessels of 633,543 tons.

*Railways.* A decree of 9 May 1951, based on the law of 7 Sept. 1945, merged all leases and concessions in a single concession for all Portuguese railways, granted to the Companhia dos Caminhos de Ferro Portugueses, except the Estoril railway (Lisbon–Cascais), of 26 km length. In 1962 total railway length was 3,597 km. In 1962, 107,881,000 passengers were carried and 3,664,000 tons of merchandise transported.

*Roads* (1962). There were 28,329 km of road. There were in continental Portugal 280,692 motor vehicles, including 25,939 motor cycles and 10,821 tractors; in addition, there were 5,644 government-owned vehicles, not counting those used by the armed forces.

*Post* (1962). The length of telegraph lines was 69,562 km; number of offices, 1,594. The state owned 565,772 km of telephone line and the Anglo-Portuguese Telephone Co., Ltd, owned 778,289 km of lines. Number of telephones was 455,063, of which 136,994 were government-owned.

Cable and Wireless, Ltd, operate in Portugal (Carcavelos), the Azores, Madeira and the Cape Verde Islands, connecting Portugal with Great Britain, North and South America, and West and South Africa.

*Aviation.* Regular services connect Lisbon with Porto Santo, Oporto, Madrid, Lourenço Marques, Paris, London, Beira–Lourenço Marques and Luanda. These lines in 1962 carried 167,864 passengers and 841·7 metric tons of freight. The Azores are served by airlines between S. Miguel, Sta Maria and Terceira, carrying, in 1962, 14,698 passengers and 103 metric tons of freight.

**MONEY.** The unit of currency is the *escudo* of 100 *centavos*, which contains 0·66567 gramme of fine gold. It was stabilized on 9 June 1931, and the paper currency re-linked to gold when the notes of the Bank of Portugal became payable in gold or its equivalent in foreign currency. The mint par of the escudo with the British sovereign was fixed at 110 escudos = 1 sovereign; when Great Britain devalued the £ in Sept. 1949, Portugal fixed the value of the escudo at 80·50 escudos = £1 sterling.

At present there are silver coins of 20, 10, 5 and 2½ escudos; 5 and 2½ escudos (nickel and copper); Alpaca coins of 1 and ½ escudo (50 centavos), and bronze coins of 20 and 10 centavos. New 20- and 10-centavo coins, issue in 1943, were made of an alloy of 95% copper, 3% zinc and 2% tin.

**BANKING.** The one bank of issue for the mainland of the country and adjacent islands is the Bank of Portugal, founded 19 Nov. 1846. By decree of 29 June 1962, its constitution was modified and its privileges were prolonged until 30 June 1991. The capital of the bank was fixed at 200m. escudos. The bank is the treasury of the State, and its reserve must be not less than 50% of the total amount of its notes in circulation and other sight liabilities. Not less than 25% of the amount of the notes in circulation and other sight liabilities must be represented by gold (coin or bullion). The bank issues notes of 1,000, 500, 100, 50 and 20 escudos. The cash in hand of the bank on 31 Dec. 1962 was gold and bullion 10,021m. escudos. The notes in circulation amounted to 17,876m. escudos.

The National Development Bank began operations on 4 Jan. 1960. Of its total capital of 1,000m. escudos, 650m. have been subscribed by the Government and 75m. by the Bank of Angola.

There are 30 banks registered on the mainland and 3 in the islands, with cash in hand on 31 Dec. 1962, 6,895m. escudos; bills, 22,004m. escudos; deposits, 38,157m. escudos. The deposits in the savings banks and general deposit bank (state) amounted to 14,347m. escudos.

**WEIGHTS AND MEASURES.** The metric system of weights and measures is the legal standard.

# OVERSEAS TERRITORIES

By law no. 2.048 of 11 June 1951 the status of the Portuguese overseas possessions was changed from 'colonies' to 'overseas territories'. Each one has a Governor and enjoys financial and administrative autonomy. Their budgets are under approval of the Minister for the Overseas Territories. They are not allowed to contract public loans in foreign countries.

On 6 Sept. 1961 all Africans were given full Portuguese citizenship, thereby achieving the same status as the inhabitants of Portuguese India and the other provinces.

All customs duties between Portugal and the overseas provinces were abolished with effect from 1 Jan. 1964.

The **Cape Verde Islands** were discovered in 1460 by Diogo Gomes, the first settlers arriving in 1462. In 1587 its administration was unified under a governor. The territory consists of 10 islands and 5 islets which are administered by a Governor, whose seat is at Praia, the capital. The islands are divided into 2 groups, named Barlavento (windward) and Sotavento (leeward), the prevailing wind being north-east. The former is constituted by the islands of São Vicente, Santo Antão, São Nicolau, Santa Luzia, Sal and Boa Vista, and the small islands named Branco and Raso. The latter is constituted by the islands of Santiago, Maio, Fogo and Brava, and the small islands named Rei and Rombo. São Vicente is an oiling station which supplies all navigation to South America. The total area is 4,033 sq. km (1,557 sq. miles). The population (census of 15 Dec. 1960) was 201,549 (in 1950 there were 2,913 Europeans, 103,251 half-castes, 42,092

Negroes). There were in 1960–61, 147 primary schools with 9,383 pupils and 2 secondary schools (1,257 pupils), 6 technical schools (380 pupils) and a church school (33 pupils).

The chief products are coffee, salt, tunny, bananas, nuts and pozzolana. The coffee is of excellent quality; exports in 1960 were 42 metric tons. In 1961 there were 11,441 goats, 8,141 oxen, 9,459 pigs and 4,846 asses. The estimated revenue and expenditure in 1963 balanced at 66,644,652 escudos; public debt, in 1962, 448,540,855 escudos. Imports, in 1962, 197,185,000 escudos (special commerce); exports, 22,190,000 escudos (special commerce). The currency is Portuguese. In 1960, 4,739 steamers entered the ports of the province; total shipping, 5,323,342 net tons. There were 678 km of roads in 1960. There is an airport at Ilha do Sal.

There are British and American consular representatives at São Vicente.

The islands of **S. Tomé** and **Príncipe**, which are about 125 miles off the coast of Africa, in the Gulf of Guinea, were discovered in 1471 by Pedro Escobar and João Gomes, and since 1522 constitute a province under a Governor. The province also includes the islands of Pedras Tinhosas and Rolas; the fort of St Jean Baptiste d'Ajudá on the coast was annexed by the Dahomey republic on 1 Aug. 1961. Area of the islands 964 sq. km (372 sq. miles). According to the census of 1960 the population of the islands was 63,676. There were, in 1960–61, 26 elementary schools with 4,059 pupils, 2 technical schools with 149 pupils and a secondary school with 299 pupils. The chief commercial products are cacao, coffee, coconut and copra, palm-oil and cinchona. In 1961 there were 1,429 goats, 3,339 sheep, 5,491 pigs and 4,189 oxen.

In 1961 revenue was 111,662,000 escudos and expenditure 103,914,000 escudos; public debt, 54·4m. escudos. Imports (1961), 141,442,000 escudos; exports (1961), 160,571,000 escudos (special commerce).

There were 313 km of roads in 1961. In 1962, 1,209 vessels of 846,063 net tons entered the ports. There were, in 1962, 2 wireless stations, 600 km of telephone lines and a telephone exchange (with 480 instruments).

*Governor:* Maj. António da Silva Sebastião.

**Angola**, with a coastline of over 1,000 miles, is separated from the Congo (Brazzaville) by the boundaries assigned by the convention of 12 May 1886; from the Congo (Léopoldville) by those fixed by the convention of 22 July 1927; from Rhodesia in accordance with the convention of 11 June 1891, and from South-West Africa in accordance with that of 30 Dec. 1886. The Congo region was discovered by the Portuguese in 1482, and the first settlers arrived there in 1491. Luanda was founded in 1575. It was taken by the Dutch in 1641 and occupied by them until 1648. The area is 1,246,700 sq. km (481,351 sq. miles). It is under a Governor-General, who resides at Luanda. By a decree of 20 Oct. 1954 it is divided into 13 districts. The important towns are S. Paulo de Luanda (capital), Benguela, Moçâmedes, Lobito, Sá da Bandeira, Malange and Huambo (Nova Lisboa), the future capital. The population numbered 4,840,719 in 1960.

For primary education there were (1960–61) 2,011 elementary schools with 103,781 pupils; 40 secondary schools with 7,486 pupils; 63 professional schools with 6,647 pupils, 2 teachers' training schools with 294 students, an art school (130 pupils) and 8 church schools (610 pupils).

There were, in 1961, 19 cinemas with a seating capacity of 15,761.

In 1961 the revenue was 3,232,417,491 escudos and the expenditure 3,117,671,084 escudos. The public debt on 31 Dec. 1961 stood at 2,440m. escudos.

Livestock, 1958: 1,217,245 cattle, 118,782 sheep, 465,057 goats, 292,578 pigs, 2,976 asses, 1,524 horses and mules.

The principal crops are coffee, maize, sugar, palm-oil and palm kernels. Other products are cotton, wheat, tobacco, cocoa, sisal and wax. The country possesses valuable diamond deposits. Exports of diamonds during 1961 totalled 1,276,573 carats valued at 662,133,217 escudos. Production (1961) of iron ore, 812,138 metric tons; copper 8,425 metric tons; manganese, 20,589 (1962, 12,680) metric tons.

Imports, 1961, 3,267,692 (1962, 3,898m.) escudos; exports, 3,874,116 (1962, 4,264m.) escudos. The chief imports of the province are textiles, machinery, coal and foodstuffs; chief exports are coffee (over 40% of total exports), maize, diamonds, sugar, wax, sisal, cotton and groundnuts. Coffee exports amounted to 118,122 metric tons in 1961, of which 65,602 tons were exported to USA.

The Portuguese National Navigation Company has most of the carrying trade to and from Europe. The length of railways open for traffic is 2,930 km. The Benguela Railway runs from Lobito through the Congo (Léopoldville) and Rhodesia, ending at Beira in Moçambique. A further extension goes through Rhodesia, as far as Mafeking, and from thence to Komati Port, in the Republic of South Africa, where it connects with the Lourenço Marques Railway. The total length of railway, from Lobito to Lourenço Marques, is 5,638 km. In 1961 Angola's railways carried 799,363 passengers and 4,093,434 metric tons of freight.

There were, in 1961, 35,500 km of roads.

Angola is connected by cable with east, west and south African telegraph systems. There were, in 1962, 6,726 km of telegraph lines, 47 telephone stations (with 10,974 instruments). 164 telegraph stations and 18 wireless stations.

In 1961, 3,813 vessels of 6,720,015 net tons entered Angolan ports.

Regular air service is maintained by the Divisão de Transportes Aéreos from Luanda to: (South) Moçâmedes *via* Porto Amboim, Novo Redondo, Lobito and Benguela, with connexions for Porto Alexandre and Lucira; (east) Vila Luso *via* Lobito, Nova Lisboa, Silva Porto and General Machado; (north) Pointe Noire (Congo) *via* Ambrizette, Toto, Damba, Sazaire and Cabinda; and to Léopoldville (Congo).

**Moçambique** was discovered by Vasco da Gama's fleet on 1 March 1498, and was first colonized in 1505. The frontier with British Central and South Africa was fixed between Great Britain and Portugal in June 1891. The border with Tanganyika Territory, according to agreements of 1886 and 1890, runs from Cape Delgado at 10° 40′ S. lat. till it meets the course of the Rovuma, which it follows to the point of its confluence with the 'Msinje, the boundary thence to Lake Nyasa being the parallel of latitude of this point. The Treaty of Versailles, confirmed by the Peace Conference on 23 Sept. 1919, allotted to Portugal the original Portuguese territory south of the Rovuma, known as the 'Kionga Triangle' (formerly part of German East Africa).

Moçambique, with an area of 783,030 sq. km (302,250 sq. miles), is administered by the state, since 19 July 1942, when the state took over the territory of Manica and Sofala, which was incorporated as a fourth district of the province, with Beira as its capital. The Companhia de Moçambique was then wound up on the expiration of its charter. Lourenço Marques is the capital of the province. The administrative organization of the province was established by decree of 20 Oct. 1954. It is divided into 9 districts: Lourenço Marques, Gaza, Inhambane, Manica and Sofala, Tete, Zambézia, Moçambique, Cabo Delgado, Niassa.

There is a government council composed of officials and elected representatives of the commercial, industrial and agricultural classes, and als an executive council. The population, according to the census of 196 (preliminary), was 6,592,994. In 1960–61 there were 3,173 primary school with 415,611 pupils, 16 secondary schools with 2,822 pupils, 85 technical an professional schools with 11,277 pupils, 6 normal schools with 650 pupils 7 theological and mission schools with 474 pupils.

There were, in 1961, 37 cinemas with a seating capacity of 12,834.

The budget for 1961 balanced at 3,533,243,762 escudos; that for 1962 a 3,996,104,519 escudos; that for 1963 at 4,319,048 contos. Estimates, 1964 revenue, 3,827,551 contos; expenditure, 3,822,109 contos. Public debt on 31 Dec. 1961 was 1,776,956,748 escudos.

The chief products are sugar (exports, 1961, 121,096 tons), maize, cotton (exports, 1961, 40,777 tons), copra (exports, 1961, 60,070 tons), sisal (exports, 1961, 28,427 tons), cashew nuts (exports, 1961, 84,583 tons) and mining products (gold, 1961, 3 kg; beryl, 1961, 973 metric tons; bauxite, 1961, 4,671 tons). In 1961, there were 1,117,231 oxen, 419,564 goats, 94,148 sheep, 85,453 pigs and 12,407 asses.

Imports, 1961, amounted to 3,720,211 contos; exports, 2,548,126 contos.

The principal ports are: Lourenço Marques (1,670 vessels of 6,877,347 net tons handled in 1961); Beira (1,115 vessels of 4,458,021 net tons handled in 1961), Moçambique (219 vessels of 600,871 net tons entered in 1961) and Nacala (240 vessels of 739,621 net tons handled in 1961).

There were, in 1961, 3,372 km. of railway and 37,817 km of road, of which 11,657 km are main roads. Motor vehicles, in 1961, included 33,139 passenger cars, 10,127 lorries and buses, and 3,100 motor cycles.

The Delagoa Bay Railway has a length of 57 miles in Portuguese territory and is continued for 290 miles to Pretoria. The Beira Railway has a length of 200 miles in the territory formerly administered by the Moçambique Co., and links up at the frontier with the Rhodesian Railway system. The Trans-Zambézia Railway, 175 miles in length, from Dondo, on the Beira Junction Railway, to Murraça, on the southern bank of the Zambezi, was opened for traffic on 1 July 1922. On the northern bank of the Zambezi, the Central Africa Railway (61 miles long, of which 45 miles are in Portuguese territory) connects at Port Herald with the Shiré Highlands Railway. With the opening of the Lower Zambezi Bridge on 14 Jan. 1935 (3,677 metres, one of the longest bridges in the world), these 3 railways give a continuous connexion between British Nyasaland and the port of Beira.

Regular air service is maintained between Lourenço Marques and Mocímboa da Praia-Tete (26,482 passengers in 1961), Johannesburg (4,545), Salisbury (2,266) and Durban (3,212).

Beira is connected by telegraph with Salisbury in Southern Rhodesia, and Lourenço Marques with the Transvaal system. Quelimane has telegraphic communication with Chiromo. In 1962 there were 14,424 km of telegraph line, 24 wireless stations, 87 telephone stations and 225 telegraph stations; length of telephone lines, 47,312 km, including 30,935 km of conductor wires in cable; number of telephones, 15,531.

Barclays Bank DCO has branches in Beira and Lourenço Marques.

By decree of 22 July 1939 only the escudo currency is in use in Portuguese East Africa. Note circulation, Nov. 1963, was 1,366,947,790 escudos. The metric system is used.

Portuguese **Timor** has been under Portuguese administration since 1586. It consists of the eastern portion of the island of that name in the Malay Archipelago, with the territory of Ambeno and the neighbouring islands of Pulo Cambing and Pulo Jako, a total area of 14,925 sq. km. By treaty of April 1859, ratified 18 Aug. 1860, the island was divided between Portugal and Holland; by convention of 1 Oct. 1904, ratified in 1908, the boundaries were straightened and settled. The territory, formerly administratively joined to Macao, was in 1896 (confirmed in 1926) made an independent province. Population in 1960, 517,079. There were (1959–60) 1 secondary school with 135 pupils and 105 primary schools with 6,269 pupils.

In 1962 estimated revenue and expenditure balanced at 94,296,799 escudos. Imports (1961), 73,917,000 escudos; exports, 33,249,000 escudos. Chief exports are coffee, sandal wood, sandal root, copra, manioc, maize, rubber and wax. The port is Dili, the capital (population, 7,000). In 1961, 37 ships of 53.542 gross tons entered and cleared. There is a good road system of 2,042 km, telephone lines of 3,957 km, 33 telephone stations (523 instruments in 1962) and 4 wireless stations at Dili.

# RUMANIA

## REPUBLICA POPULARĂ ROMÎNĂ

**HISTORY.** For the history and constitution of the principality and kingdom of Rumania from 1859 to 1947, *see* THE STATESMAN'S YEAR-BOOK, 1947, pp. 1187–89. On 30 Dec. 1947 King Michael abdicated under Communist pressure and shortly afterwards left the country. On the same day the Rumanian parliament proclaimed the 'Rumanian People's Republic'.

**CONSTITUTION AND GOVERNMENT.** On 28 March 1948, 414 deputies of the Grand National Assembly were elected: 405 of the Popular Democratic Front, 7 Liberals and 2 Democratic Peasants. The Popular Democratic Front was a coalition of the 4 remaining political parties, *i.e.*, the Rumanian Workers' Party (a merger of the Communist and Social Democratic Parties), the Ploughmen's Front (a pro-Communist Peasant Party), the National Popular Party and the Hungarian Popular Union. The Popular Democratic Front was reorganized in July 1952; it contained representatives of the Rumanian Workers' Party, the mass organizations, independents (members of the professions, arts, trades, etc.) and a few remnants of the Ploughmen's Front.

Elections held on 30 Nov. 1952 returned 425 deputies on the single list of the Popular Democratic Front. Of the potential electorate 98% went to the polls; the single list received 98·84% of the votes. Of the deputies, 308 belonged to the Rumanian Workers' Party; the remainder were described as independent. A further general election was held on 5 March 1961, when 99·78% of the electorate went to the polls and the single list received 99·77% of the votes cast. The new chamber consists of 465 deputies.

The Grand National Assembly is elected for 4 years, on the basis of 1 deputy for every 40,000 of the population. It holds short sessions twice a year, and, in the intervals between sessions, it delegates its legislative rights to the State Council (1 chairman, head of state; 3 deputy chairmen, 1 secretary and 12 members). All citizens of 18 and over have the right to vote.

The Central Committee of the Rumanian Workers' Party elects the Politburo and the Secretariat. In March 1964 the Politburo consisted of 9 full and 5 alternate members. The Party had 1·1m. full and candidate members in June 1963, *i.e.*, 6% of the total population.

*Chairman of the State Council:* Gheorghe Gheorghiu-Dej (born 8 Nov. 1901; elected 21 March 1961).

*Head of the Politburo and First Secretary of the Workers' Party:* Gheorghe Gheorghiu-Dej. Other members are: Gheorghe Apostol, *First Deputy Chairman of the Council of Ministers*; Army-Gen. Emil Bodnăraş, Petre Borilă, *Deputy Chairmen*; Nicolae Ceauşescu, Chivu Stoica, *Secretaries of the Central Committee of the Workers' Party*; Col.-Gen. Alexandru Drăghici, *Deputy Chairman and Minister of the Interior*; Ion Gheorghe Maurer, *Chairman of the Council of Ministers and Deputy Chairman of the State Council*; Alexandru Moghioroş, *Deputy Chairman.* Alternate members are: Dumitru Coliu, Army-Gen. Leontin Sălăjan (*Minister of the Armed Forces*), Leonte Răutu, Stefan Voitec (*Deputy Chairman of the State Council and Chairman of the Grand National Assembly*).

*Council of Ministers* (March 1964). *Chairman:* Ion Gheorghe Maurer; *First Deputy Chairman:* Gheorghe Apostol; *Deputy Chairmen:* Emil Bodnăraş; Petre Borilă; Alexandru Bîrlădeanu; Alexandru Drăghici (*Minister of the Interior*); Alexandru Moghioroş; Gheorge Gaston Marin (*Chairman, State Planning Committee*); Gogu Rădulescu; Constantin Tuzu. *Foreign Affairs:* Corneliu Mănescu; *Armed Forces:* Army-Gen. Leontin Sălăjan; *Foreign Trade:* Victor Ionescu; *Finance:* Aurel Vijoli; *Metallurgy:* Ion Marinescu; *Machine Building:* Georghe Radoi; *Oil and Chemical Industries:* Mihai Florescu; *Building Industry:* D. Mosora; *Justice:* I. C. Manoliu; and 10 others.

The first Constitution of the Rumanian People's Republic, adopted on 13 April 1948, has been superseded by the new Constitution, voted on 24 Sept. 1952. This affirms the role of the Rumanian Workers' Party as the 'leading political force'. It was amended in Jan. 1954 and March 1961.

The peace treaty was signed in Paris on 10 Feb. 1947. It fixed the frontiers as on 1 Jan. 1941, with the exception of the frontier with Hungary, which was restored as on 1 Jan. 1938. The political clauses stipulate that the Rumanian citizens, except fascists, shall enjoy all personal liberties (freedom of expression, religious worship, political opinion, public meetings, etc.). Losses caused to the Soviet Union were to be made good over a period of 8 years beginning from 12 Sept. 1944 to the total value of $300m., *i.e.* one-fifth of the damage caused by the Rumanian troops. Rumania is to restore to the United Nations and their nationals all legal rights and interests in Rumania as they existed on 1 Sept. 1939 and to return to them all property situated in Rumania. For the military and shipping clauses, *see* below under DEFENCE and SHIPPING.

*National flag:* Blue, yellow, red (vertical), with the coat of arms of the republic in the middle.

*National anthem:* Te slăvim Romînie, pămînt strămoșesc (We praise thee, fatherland Rumania).

| Bucharest City | 970 | 1,354 | Bucureşti | 1,226,033 |
| Constanţa City | 530 | 151 | Constanţa | 117,079 |

The mid-1961 population of other principal towns (*municipii*) was: Arad, 113,730; Brăila, 116,364; Sibiu (Hermannstadt), 99.318; Satu-Mare, 62.642; Hunedoara, 51,911; Reşiţa, 46,475.

Vital statistics, 1960 (per 1,000 population): Live births, 17·5; deaths, 8·7; marriages, 9·7; divorces 1·78; stillborn (per 1,000 live births), 16; infantile mortality (per 1,000 live births), 69.

The 1956 census gave the following division of the population according to nationality and (in brackets) language: Rumanian, 14,996,114 (15,080,686); Hungarian, 1,587,675 (1,653,700); German, 384,708 (395,374); Jewish, 146,264 (34,337); Ukrainian, 60,479 (68,252, including Ruthenian); Yugoslavs, 46,517 (43,057); Russians, 38,731 (54,029); Tatars, 20,469 (20,574); Turks, 14,329 (14,228); Bulgarians, 12,040 (13,189); others and not stated, 182,124 (121,024).

**RELIGION.** The Rumanian Orthodox Church had 13·67m. members in 1950. Under a new statute of 23 Feb. 1949 it is administered by consultative organs (Holy Synod and National Ecclesiastical Assembly) and executive organs (National Ecclesiastical Council and Patriarchal Administration). The Synod is formed by the Patriarch (present holder Justinian Marina, May 1948), the 4 Metropolitans (Hungarian–Walachian, Moldavia, Transylvania, Oltenia and Banat) and all the bishops (Suceava, Rîmnic and Arges, Buzău, Galaţi, Arad, Cluj, Oradea, Constanța, Roman). There were, in 1958, 12 dioceses with 10,165 priests and deacons and 5,814 monks and nuns. The Orthodox have 2 theological colleges and 6 seminaries.

The Serbs of Rumania have an Orthodox Vicariate at Timișoara and the Ukrainians one at Sighet.

The Uniate (Greek Catholic) Church, which had about 1·32m. members, severed its connexion with the Vatican, which dated from 1698, and was reincorporated in the Orthodox Church on 3 Oct. 1948. It had a Metropolitan, 3 bishops and 1,594 priests in 1930.

Under the religious law of 1948 the Roman Catholic archbishopric of Bucharest and the bishoprics of Alba Iulia, Iași, Timișoara, Satu Mare and Oradea Mare were amalgamated into the archbishopric of Bucharest–Iași and the bishopric of Alba Iulia. There were 820 priests and 254 monks and nuns in 1958. The Roman Catholic Church had not secured approval for a Statute; there is no hierarchical connexion with the Vatican.

The Calvinists (780,000 members) have bishoprics at Cluj and Oradea, the Lutherans (250,000 members) a bishopric at Sibiu and the Unitarians a bishopric at Cluj. The Baptists (814 communities), Adventists (587 communities), Evangelicals (165 communities) and Pentecostals (447 communities) have formed a federation. The 3 main Jewish communities (140,000 members) have also formed a federation under a Chief Rabbi. The Moslems have a Muftiate at Constanța.

All denominations are under the control of the Department of Cults.

The salaries of the clergy of all denominations are paid by the state.

**EDUCATION.** Primary education is free and compulsory; it comprises 8 years.

In 1962–63 education at all levels (including evening and correspondence classes) comprised 7,615 kindergartens with 13,243 teachers and 374,079 children; 15,496 'general education' and evening schools with 119,321 teachers and 3,020,523 pupils; 9 teachers' training schools with 7,024 pupils; 362 secondary technical schools with 3,908 teachers and 64,437 pupils; 473 vocational schools with 8,981 teachers and 170,020 apprentices.

There are 3 universities: In Bucharest, founded in 1864; in Jassy (Iași), founded in 1860; in Cluj, founded in 1945. Other university centres with institutes of higher education are in 8 provincial towns. In 1962–63 there were in all 165 faculties with 98,810 students.

The Rumanian Academy of Sciences, with seat at Bucharest, had, at the end of 1961, 2 branches at Iași and Cluj, 2 research centres at Timișoara and Tîrgu Mureș, an observatory, 32 research institutes and over 2,500 research workers.

National minorities were taught in 3,500 schools and at the medical faculty of Cluj University (in Hungarian). The German minority (2·2% of the total population) had, in 1957–58, 264 elementary and 11 secondary schools, a theological college (in Sibiu) and about 115 'sections' attached to Rumanian schools of various grades.

A spelling reform was introduced in 1954.

*Newspapers.* There were, in 1962, 32 daily newspapers, including 8 in languages of national minorities.

*Cinemas.* There were, in 1962, 4,701 cinemas.

**WELFARE.** In 1962, there were 138,767 hospital beds.

**JUSTICE.** Justice is administered by the Supreme Court, 16 regional courts and the people's courts. In principle, people's assessors (elected for 4 years) participate in all court trials, collaborating with the judges. The Procurator-General of the Rumanian People's Republic exercise 'supreme supervisory power to ensure the observance of the law' by all authorities, central and local, and all citizens. The Procurator's Office and its organs are independent of any organs of justice or administration, and only responsible to the Grand National Assembly (which appoints the Procurator-General for 5 years) and, between its sessions, to the State Council. Private legal practice has been abolished as from 1 April 1950, and all lawyers have been placed under the control of the Ministry of Justice.

**FINANCE.** Ordinary revenue and expenditure (in 1m. new leï) for calendar years:

| | *1958* | *1959* | *1960* | *1961* | *1962* | *1963* [1] | *1964* [1] |
|---|---|---|---|---|---|---|---|
| Revenue . . | 47,006 | 51,006 | 58,171 | 66,142 | 76,216 | 82,463 | 92,100 |
| Expenditure . | 44,689 | 48,260 | 55,423 | 63,726 | 73,011 | 79,463 | 91,200 |

[1] Estimates.

In 1963 the 'socialist sector' was to furnish 77,808m. leĭ of the revenue; direct taxes, 4,654m. Main items of expenditure in 1963: National economy, 51,795m.; social and cultural, 19,122m.; national defence, 4,120m.

The revenues of the local and regional councils are planned to total 13,344m. leĭ in 1963.

Rumania's external debts consist of pre-war obligations and those stipulated in the peace treaty. Total UK claims in Dec. 1961 amounted to over £100m., including some £20m. of bonded debt. A financial agreement signed in Nov. 1960 provides for payment by Rumania of £1·25m. in settlement of British claims arising out of the peace treaty. Payment will be made in annual instalments to be completed by 31 Jan. 1967.

**DEFENCE.** The military clauses of the Peace Treaty allow: (*a*) Land Army, including frontier troops, of 120,000 men; (*b*) AA artillery of 5,000 men; (*c*) Air Force of 150 aircraft, of which not more than 100 may be of combat type; personnel, 8,000; (*d*) Navy of 15,000 tons; personnel, 5,000. The Soviet occupation forces left Rumania in July 1958.

*Army.* At the end of 1962 the Rumanian armed forces were reported to consist of 200,000 men in the Army and 100,000 in para-military forces (frontier troops, internal-security troops, militia, military firemen, labour troops).

Units of the Ministry of the Armed Forces are under one of the 3 military regions of Iași, Bucharest and Cluj. There are 3 army corps, each made up of 3 infantry divisions and supporting tank, artillery, engineer and reconnaissance elements. There are also 2 mountain divisions at Tirgu Mureș and Sinaia, 2 tank divisions at Bucharest and Lipova, 2 motorized divisions and an independent artillery division at Tecuci. The AA artillery consists of 14 regiments.

*Navy.* In 1963 there were 3 old destroyers, 10 submarines, a minelayer, 3 patrol vessels, 14 fleet minesweepers, 8 motor torpedo-boats, 22 inshore minesweepers and 4 training ships. The Danube force comprised some small craft. Headquarters of the Danube flotilla and main river port is Braila. The naval school is in Constanţa.

*Air Force.* The Air Force has been reorganized under Russian supervision. It is believed to have 15,000–18,000 officers and men, with 350 operational aircraft. These are organized into 3 fighter regiments, each made up of 6 12-plane squadrons of MiG-15 and MiG-17 jet-fighters, one regiment of Il-28 twin-jet tactical bombers, a transport group and helicopter and training units.

Equipment includes MiG-21 fighters and 'Guideline' surface-to-air missiles.

**PRODUCTION.** All resources of the subsoil which were formerly in private hands, and virtually all manufacturing or processing enterprises of importance in Rumania—as well as banking, insurance, mining, transportation and telecommunication enterprises—were nationalized on 11 June 1948.

The two 5-year plans covered the years 1951–60; a 6-year plan has been adopted for 1960–65. The actual production figures were as follows:

| Product | *1950* | *1955* | *1958* | *1959* | *1960* | *1961* | *1962* |
|---|---|---|---|---|---|---|---|
| Crude oil (1,000 metric tons) | 5,047 | 10,555 | 11,336 | 11,438 | 11,500 | 11,582 | 11,864 |
| Electric energy (1m. kwh.) | 2,113 | 4,340 | 6,184 | 6,802 | 7,650 | 8,657 | 10,073 |
| Pig-iron (1,000 metric tons) | 320 | 570 | 737 | 846 | 1,014 | 1,099 | 1,511 |
| Steel (1,000 metric tons) | 555 | 766 | 934 | 1,419 | 1,806 | 2,127 | 2,451 |
| Coal (1,000 metric tons) | 3,893 | 6,104 | 7,388 | 7,977 | 8,163 | 8,704 | 9,589 |
| Methane gas (1,000 cu. metres) | 1,950 | 3,972 | 5,075 | 5,782 | 6,519 | 7,197 | 8,837 |
| Wheat (1,000 metric tons) | 2,219 | 3,006 | 2,913 | 4,000 | 3,450 | 3,990 | 4,054 |
| Maize (1,000 metric tons) | 2,101 | 5,876 | 3,657 | 5,680 | 5,530 | 5,740 | 4,932 |
| Sugar beet (1,000 metric tons) | 633 | 2,000 | 1,732 | 3,446 | 3,399 | 2,911 | 2,180 |

*Agriculture.* The distribution of the land in 1962 was as follows (in 1,000 hectares): Ploughed land, 9,921; meadows and pasture, 4,127; vineyards and fruit trees, 569; forests, 6,397.

Livestock, 3 Jan. 1963, was 1m. horses, 4·7m. cattle, 4·6m. pigs, 12·2m. sheep and 44·6m. poultry.

On 31 Dec. 1962 there were 5,398 collective farms, holding 77·4% of the arable land. State farms numbered 597, with 1·77m. hectares of land, of which 1·38m. hectares were arable. There were 250 machine and tractor stations with 57,500 tractors, 54,200 mechanical seeders and 28,400 mechanical harvesters. The socialist sector comprised 92·8% of the arable land. Complete collectivization of agriculture was officially stated to have been achieved in March 1962, over 3 years ahead of schedule.

*Forestry.* In 1962 the output of sawn timber was 4·3m. cu. metres, of which 2·8m. was coniferous. In 1961, 75,000 hectares were afforested.

*Mining.* The principal minerals are salt, coal, lignite, iron and copper ores, bauxite, chromium, manganese, crude oil and natural gas. Petroleum wells are worked in the Prahova valley, Moldavia, Oltenia and the Piteşti area. The saltmines are situated in the region of the lower Carpathians, from Bukovina to the west of Oltenia, an area of over 250 sq. miles. Saltmining has been a state monopoly since 1863; production in 1962 was 1·48m. metric tons, of which 291,800 tons were exported.

The 1961 (and 1962) output was (in 1,000 metric tons): Iron ore, 1,737 (1,742); pig-iron, 1,098 (1,510); steel tubes, 400 (456); metallurgical coke, 940 (1,119); rolled steel, 1,520 (1,667); manganese ore, 204 (198); lead, 11·9 (12·4; silver (1962), 643,000 fine oz.; bauxite (1960), 88,392 metric tons.

*Industry.* The 1961 (and 1962) output of selected industrial products was (in 1,000 metric tons): Chemical fertilizers, 86 (131); washing soda, 235

(288); caustic soda, 129 (160); paper, 146 (159); cement, 3,308 (3,489); sugar, 422 (342); edible oils, 125 (162); butter, 14 (14·6). Fabrics (in 1m. sq. metres): Cotton, 282 (296); woollen, 37 (34); silk, 29 (29). Light industry (in 1,000 units): Radio sets, 211 (251); TV sets, 15 (41·4); bicycles, 272 (267); sewing machines 15 (16·4); footwear, 30·9m. pairs (32·4).

*Electricity.* Concurrently with the general planning, there also ran the 10-year electrification plan (1951–60). The installed electric power rose from 740,000 kw. in 1950 to 1,863,000 kw. in 1961. Output rose from 2,113m. kwh. in 1950 to 10,073m. kwh. in 1962. A Rumanian–Yugoslav agreement of June 1963 provides for the building, in 1964–71, of a hydroelectric power plant on the Iron Gates betwen Gura Vaii (Rumania) and Sip (Yugoslavia); installed power is to be 2m. kw, yearly production 10,000m. kwh.

**Labour.** The total labour force at the end of 1960 was estimated at 9·36m., of whom 6·3m. were occupied in agriculture and forestry, 2·9m. in public services and 91,000 in private industry.

**COMMERCE.** A decree published on 6 May 1948 brought practically all domestic and foreign trade under state control. Since 1949 four-fifths or more of the external trade has been with the 'socialist' countries.

In 1962 exports totalled 4,909m. leï and imports 5,648m. leï.

Main items of Rumanian exports in 1962 were (in 1,000 metric tons): Oil (crude and products), 5,793; cement, 986; paper, 4; agricultural products, 1,068; timber, 1,376,200 cu. metres; tractors, 4,539 units; freight and tank wagons, 2,086 units; oilfield equipment 234·5m. leï; equipment for cement mills, 23m. leï; equipment for chemical factories, 58m. leï; equipment for refineries, 72m. leï; shipbuilding, 58m. leï. Principal imports include iron ores, industrial coke, finished rolled metals, complete industrial plants, electric cables and conductors, diesel engines.

In 1961 (and 1962) the main exports (in 1m. leï) went to: USSR 2,107 (2,061); Czechoslovakia, 341 (350); East Germany, 318 (280); West Germany, 300 (310); Italy, 173 (185); Hungary, 150 (230). In 1961 (and 1962) the main imports (in 1m. leï) came from: USSR, 1,793 (2,224); Czechoslovakia, 458 (532); West Germany, 380 (480); East Germany, 352 (334); UK, 308 (264); Hungary, 177 (219); France, 152 (124); China, 118 (63).

Total trade between Rumania and UK for calendar years (British Board of Trade returns) in £ sterling:

| | 1959 | 1960 | 1961 | 1962 | 1963 |
|---|---|---|---|---|---|
| Imports to UK | 2,148,756 | 3,901,074 | 6,066,695 | 7,074,354 | 7,426,832 |
| Exports from UK | 1,519,632 | 3,044,469 | 13,568,952 | 8,382,686 | 11,715,948 |
| Re-exports from UK | 851,184 | 1,206,628 | 1,225,694 | 767,998 | 160,113 |

In Nov. 1960 the Rumanian and UK Governments signed a 3-year trade arrangement; under quota lists agreed for the year 1962–63 Britain granted quotas worth £5·25m. for a range of goods (in addition to items such as timber and maize which are not subject to import licensing) such as furniture, carpets, caviare and fruits, poultry, canned pork and beef, fresh and canned vegetables, vines, electrical motors, textiles and shoes, leather articles, etc. In exchange, Rumania receives pedigree livestock, chemicals, man-made fibres, yarns and threads, factory plant, machinery and heavy electrical equipment worth £6·25m.

In 1960 all outstanding financial claims between USA and Rumania were settled and normal trade relations between the two countries have been resumed.

All foreign trade is conducted through official organizations which grant import licences guaranteeing the foreign exchange required.

**COMMUNICATIONS.** *Shipping.* The main ports are Constanța on the Black Sea and Braila and Galați on the Danube. The largest shipyard is at Galați.

In July 1962 the mercantile marine (NAVROM) totalled 24 ships of 70,557 gross tons. In 1962, sea-going transport totalled 3,365m. ton-km; river transport, 1,011m. ton-km.

*Railways.* Railway history in Rumania begins in 1854. The length of Rumanian state railways (4 ft 8½ in. gauge) in 1962 was 10,267 km single-track and 610 km double-track lines. Rail transport in 1962 was 24,429m. ton-km.

*Roads.* There were in 1962, 11,398 km of national roads, of which 6,088 km were modernized. Road transport in 1962 was 1,535m. ton-km.

*Post.* In 1946 there were 153,000 km of telegraph wire and cable and 148,000 km of telephone wire. Number of telephone subscribers in 1962 347,475. Radio receiving sets, in 1962, 2,372,000; television sets, 149,000. There were 15 broadcasting stations.

*Aviation.* TAROM (Transporturi Aeriene Romîne), the state airline, operates all internal services, and also services to and from Berlin, Prague, Vienna, Stockholm, Paris and Belgrade. Bucharest is also served by SABENA (Belgian Air Lines) which operates a service to and from Brussels; Aeroflot (USSR), to and from Moscow and Sofia; East German Lufthansa, to and from Berlin; CSA (Czechoslovakia), to and from Prague; MALEV (Hungary), to and from Budapest; Austrian Air Lines to and from Vienna.

Bucharest airport is at Băneasa (4½ miles from the centre of the city). Air transport in 1962 totalled 217,000 passengers and 3m. ton-km of freight.

**MONEY.** The unit of the monetary system is the *leu*, pl. *leï* (of 100 *bani*). On 1 Feb. 1954 the gold content of the leu was changed to 0·148112 gramme of fine gold, and the exchange rate was fixed at 1·5 leï for 1 Soviet rouble, 16·8 leï for £1 and 6 leï for US$1.

On 1 July 1957 the State Bank announced a 100% premium for 'non-commercial transactions' in some foreign currencies (including the US$, the £ sterling and the Yugoslav dinar); although the official value is still £1 = 16·8 leï, visiting tourists and businessmen can obtain leï at the rate of £1 = 42 leï.

On 4 Aug. 1961, after the revaluation of the Soviet rouble, the exchange rate was fixed at 100 leï = 15 roubles; 1 rouble = 6·67 leï. The rate for non-commercial transactions with communist countries was, on 1 April 1963, fixed at 1 rouble = 8·30 leï.

New legal tender consists of bank-notes in the denominations of 10, 25 and 100 lei issued by the State Bank and Treasury bills issued by the Minister of Finance of 1 leu, 3 leï and 5 leï.

**BANKING.** The majority of Rumanian banks, including the partly British-owned Bank of Rumania, were dissolved by the Government on 13 Aug. 1948.

The National Bank of Rumania (founded in 1880) was transformed into the State Bank of the Rumanian People's Republic on 13 Nov. 1948. The new bank is controlled by the Minister of Finance, and half of its net profits is being allotted to the State budget. There are also a Bank of Investments, an Agricultural Bank and the Savings Bank, all state-owned.

**WEIGHTS AND MEASURES.** The metric system for weights and measures was introduced in 1876.

# RWANDA

*History.* From the 16th century to 1959 the Tutsi kingdom of Rwanda shared the history of Burundi (*see* p. 857). In 1959 an uprising of the Hutu destroyed the Tutsi feudal hierarchy and led to the departure of the Mwami Kigeri V. Elections and a referendum under the auspices of the United Nations in Sept. 1961 resulted in an overwhelming majority for the republican party, the Parmehutu (Parti du Mouvement de l'Emancipation du Bahutu), and the rejection of the institution of the Mwami. The republic proclaimed by the Parmehutu on 28 Jan. 1961 was recognized by the Belgian administration (but not by the United Nations) in Oct. 1961. Internal self-government was granted on 1 Jan. 1962, and by decision of the General Assembly of the UN the Republic of Rwanda became independent on 1 July 1962. An agreement, signed with Burundi under United Nations auspices at Addis Ababa in April 1962, provides for a monetary and customs union.

*Area and Population.* Rwanda lies between lat. 1° and 3° S. and long. 29 and 31° E., with an area of 26,330 sq. km (10,166 sq. miles). The Nile-Congo mountain divide (about 9,000 ft) and the Kirunga volcanoes (Mt Karisimbi, 14,825 ft), rising steeply from Lake Kivu in the west, slope dow first to a hilly central plateau (7,000–5,000 ft) and farther eastwards to complex of marshy lakes in the upper reaches of the Kagera River. Rwand is bounded in the south by Burundi, in the west by Lake Kivu and the Congo in the north by Uganda and in the east by Tanganyika.

The population, the densest in Africa outside the Nile delta, was estimate at 2·7m. in 1960 and is now probably 3m. There are 3 ethnic groups the Tutsi (Nilotic), the Hutu (Bantu) and a few Twa (pygmoid). The Tutsi traditionally the ruling caste and about 15% of the population, have greatl diminished in number since the troubles of 1959–61, as a result of which ove 140,000 took refuge in neighbouring territories. In Jan. 1964 severa thousand Tutsi were massacred by the Hutu, and an exodus of 12,000 mor Tutsi followed. There are some 1,200 Europeans and 750 Asians.

Kigali, the capital, has a population of some 5,000, including about 25 Europeans and 75 Asians. Butare (formerly Astrida), somewhat larger, i the seat of the High Court. Other centres are Gisenyi and Gyangugu o Lake Kivu, and Giterama.

*Government.* Rwanda is a republic with an executive President as Hea of State, assisted by a Council of 9 Ministers. There is a Legislative Assembl of 44 members elected by universal suffrage for 4 years.

*Flag.* Three equal vertical panels of red, yellow and green (left to right the letter 'R' in black superimposed on the centre panel.

The administrative divisions are 10 prefectures (Kigali, Kibungo, Byumb Ruhengeri, Gisenyi, Kibuye, Gitarama, Gikongoro, Butare, Gyangugu) an 144 communes.

*President of the Republic and Prime Minister:* Gregoire Kayiband (elected 26 Oct. 1961).
*Foreign Affairs:* Lazare Mpakaniye.

*Religion.* The population is predominantly Roman Catholic; there is archbishop (Kabgayi) and 2 bishops. The Ruanda Mission of the Chur Missionary Society have 4 stations.

*Education.* There are some 260,000 pupils in the mission primary schoo and a considerably smaller number in the state primary schools; 3 seconda chools, 9 teacher-training colleges and 6 technical schools have a total of ome 4,000 pupils. A university college opened at Butare in 1963.

The local language is Kinyarwanda, a Bantu language. French is also an official language, and Kiswahili is spoken in the commercial centres.

*Finance.* There has been a budget deficit since 1954. The provisional budget for 1963 contains a deficit of about 200m. RB francs. By the end of 1963 the Government's indebtedness to the central bank was about 100m. RB francs.

*Defence.* The national army has a strength of about 1,000 all ranks, including a Belgian cadre.

*Agriculture.* Subsistence agriculture accounts for most of the gross national product. Staple food crops are beans, cassava, maize, sweet potatoes, peas, groundnuts and sorghum. The climate is the same as that of Burundi; the annual rainfall varies from under 40 in. in the north-east to 60 in. in the west and over 70 in. in the extreme north-west.

The main cash crop is *arabica* coffee as in Burundi. Tea production has begun on a pilot plot.

Long-horned Ankole cattle, over 0·5m. head, play an important traditional role. Efforts are being made to improve their present negligible economic value. There are over 1m. goats and some 400,000 sheep.

*Industry.* There is no general industrial development apart from mining. Mineral exports (mainly cassiterite) bring in approximately £1m. per annum. There are 3 hydro-electric installations and a large modern brewery.

*Commerce* and *Currency: see* Burundi, pp. 858–9. In 1963 imports to UK amounted to £39,776, exports from UK to £142,648, re-exports from UK to £60.

*Communications.* There is a dense network of dirt roads; but travelling can be difficult in the rainy season. There are road links with Burundi, Uganda and the Congo. Imports come by road *via* Dar es Salaam from Usumbura and increasingly *via* Mombasa from Kampala.

Kigali has an airport, being developed to international standards, with services to Usumbura, Entebbe and the Kivu province of the Congo.

*Ambassador in Brussels:* Augustin Munyaneza.
*Ambassador in London:* (Vacant).
*British Ambassador:* J. S. Bennett, CVO, CBE.
*Ambassador in USA:* Pierre Canisius Gyicarano.
*USA Ambassador:* Charles D. Withers.

# SAN MARINO

## REPUBBLICA DI SAN MARINO

ON 22 March 1862 San Marino concluded a treaty of friendship and a customs union with the new kingdom of Italy and thereby preserved the independence of the ancient republic, although completely surrounded by Italian territory. The treaty was renewed on 27 March 1872, 28 June 1897 and 31 March 1939, with 6 amendments in 1942–61. The republic has extradition treaties with Great Britain, Belgium, France, the Netherlands and USA

*National flag:* Sky-blue and white (horizontal).

The frontier line is 38·6 km in length, area is 60·57 sq. km (23·8 sq. miles) and the population, 17,000; some 20,000 citizens live abroad.

The legislative power is vested in the Great and General Council of 60 members elected every 5 years by popular vote, 2 of whom are appointed every 6 months to act as regents (*Capitani reggenti*).

The elections held on 13 Sept. 1959 gave 27 seats to the Christian Democrats, 9 to the Democratic Socialists (the government coalition), 16 to the Communists and 8 to the left-wing Socialists (opposition).

Women were given the vote in 1960.

The regents exercise executive power together with the Congress of State (*Congresso di Stato*), which comprises 10 departments, and through Commissions on social welfare, public works, etc. Law is administered by a Commissioner for civil and commercial cases and a Commissioner for criminal cases, from whom appeals can be made to a civil appeals judge and a penal judge and criminal appeals judge respectively. The highest legal authority is, in certain cases, the *Consiglio dei XII.*

There are 35 elementary schools, a secondary school and a grammar school, the diplomas of which are recognized by Italian universities. Civil marriage was instituted in Sept. 1953.

The militia consists, in case of necessity, of all able-bodied citizens between the ages of 16 and 55, with certain exceptions (teachers and students, etc.). The chief exports are wine, textiles, tiles, varnishes, ceramics and the building stone quarried on Mount Titano. Italian and Vatican City currency is in general use, but the republic issues its own coins and postage stamps.

San Marino is connected with Rimini by a bus service. There were 700 telephones in 1962.

*British Consul-General* (resides at Florence): C. M. Pirie-Gordon.
*USA Consul-General* (resides at Florence): Merritt N. Cootes.
*Consul-General in London:* Charles Forte.
*Consul-General in Washington:* Dr Franco Fiorio.

# SAUDI ARABIA

## AL-MAMLAKA AL-ʻARABIYA AS-SAʻUDIYA

**HISTORY.** Saudi Arabia was founded by Abdul-Aziz ibn Abdur-Rahman al-Faisal Al Sa'ud, GCB, GCIE (born about 1880; died 9 Nov. 1953), who had been proclaimed King of the Hejaz on 8 Jan. 1926 and had in 1927 changed his title of Sultan of Nejd and its dependencies to that of king, thus becoming 'King of the Hejaz and of Nejd and its Dependencies'. On 20 May 1927 a treaty was signed at Jidda between Great Britain and Ibn Sa'ud, by which the former recognized the complete independence of the dominions of the latter. The name of the State was changed to 'The Saudi Arabian Kingdom' by decree of 18 Sept. 1932.

In Nov. 1937 a general agreement between Saudi Arabia and the Yemen concerning the settlement of disputes was ratified, and an agreement regarding the delimitation of the frontiers was negotiated. In March 1953 the treaty of Taif, first signed with the Yemen in May 1934, was extended for 20 lunar years.

In 1942 Saudi Arabia and the British Government, acting on behalf of the Shaikh of Kuwait, signed agreements for friendship and neighbourly relations, for the extradition of offenders and for the regulation of trade between Saudi Arabia and Kuwait.

In Aug. 1962 Saudi Arabia and Jordan agreed on measures of co-operation in the military, political and economic fields.

**GOVERNMENT AND CONSTITUTION.** The dual character of the Kingdom, welded together from Hejaz and Nejd, is maintained provisionally, and there are still two capitals, Mecca and Riyadh. In May 1958 a 'Cabinet system' was instituted under which effective power devolved upon the President of the Council of Ministers, the Emir Faisal. But in Dec. 1960 the King himself assumed the premiership of a cabinet of his own nominees. The cabinet was reshuffled on 11 Sept. 1961 and on 15 March 1962, probably in order to conciliate the Emir Faisal, who became Deputy Prime Minister and Minister for Foreign Affairs; on 31 Oct. 1962 he was formally reappointed Prime Minister and Minister for Foreign Affairs.

The religious law of Islam is the common law of the land, and is administered by religious courts, at the head of which is a chief judge, who is responsible for the Department of Sharia (legal) Affairs. The constitution also provides for the setting up of certain advisory councils, comprising a consultative Legislative Assembly in Mecca, municipal councils in each of the towns of Mecca, Medina and Jidda, and village and tribal councils throughout the provinces. The members of these councils consist of chief officials and of notables nominated or approved of by the King.

*Reigning King.* **Saud ibn Abdul-Aziz**, born 1902, succeeded his father on 9 Nov. 1953. *Crown Prince:* Emir Faisal, brother of the King.

*Royal flag:* Green, with white crossed swords and the text 'There is no God but God and Mohammed is his prophet' in white Arabic characters.

**AREA AND POPULATION.** The total area of Saudi Arabia is probably some 600,000 sq. miles (1·5m. sq. km).

The population of the Hejaz is probably about 2m.; Mecca, the capital, is said to have 200,000; Jidda, 150,000; Medina, 30,000–50,000, and Taif, 30,000. The chief port is Jidda, the seaport of Mecca; ports of less importance are Yenbo, El Wejh, Rabigh, Lith and Kunfida. Taif, about 5,200 ft above sea-level and some 50 miles from Mecca, is a summer resort.

The population of Nejd is about 4m. The largest towns are: Riyadh, the capital (about 300,000), Buraida (30,000–50,000), Anaiza (25,000–30,000), Hail, Jauf and Sakaka.

Slavery was declared illegal in Nov. 1962.

**WELFARE.** A water supply for Jidda, built by a British firm, was completed in 1947; a new pipeline, completed in 1954, has doubled the supply. A hospital at Riyadh (completed 1956) has 400 beds. Such undertakings have been largely financed out of oil revenues, which have also permitted Saudi Arabia to embark on other economic and social projects. In addition, the oil companies have provided medical, educational and other services, and have assisted the Government in irrigation projects which have brought into cultivation thousands of acres of desert land.

**FINANCE.** The budget for 1961–62 balanced at SR2,166m., that for 1962–63 at SR2,452m., that for 1963–64 at SR2,686m. Receipts from the oil companies accounted for SR1,918m. in 1962–63 and SR2,249m. in 1963–64; since Jan. 1950 Saudi Arabia has had a 50:50 share in oil profits.

The main items of expenditure in 1963–64 were (in SR1m.): Development, 550; defence, 479·6; education, 243·8; privy purse, 183·1; health, 103·4; communications, 54·3; agriculture and irrigation, 47·7.

**DEFENCE.** In 1937 a Ministry of Defence and a training school for officers were established. British Military and Civil Air Missions helped in training the Army and civil aviation from 1947 to 1951. The United States now maintains a Military Mission (with an Air Force element) and in Jan. 1957 obtained a 5-year lease of the base of Dhahran. In Aug. 1962 it was announced that Saudi Arabia and Jordan intended to set up a joint military command.

The Air Force began as a small army support unit in 1932 and has been built up considerably with British and US assistance since 1950. Current equipment includes a squadron of F-86F Sabre fighters, T-33A jet advanced trainers, T-34 Mentor basic trainers, B-26 Invader piston-engined tactical bombers and C-123 Provider twin-engined transports of US design; 4 Vampire fighter-bombers bought from the Egyptian Government; and Chipmunk primary trainers from the UK. The main bases are at Riyadh and Jidda.

**PRODUCTION.** Medina produces excellent dates in abundance; Taif and other oases in the mountains and valleys produce honey and a fair variety of fruit; while Beduin products are hides, wool, charcoal and clarified butter. There are also some mineral deposits, including gold, which, however, are not now being worked. The exports of the Hejaz are insignificant, and the country depends for existence almost entirely on revenues derived from oil operations near the Persian Gulf coast. The annual pilgrimage to Mecca brings large numbers of pilgrims from abroad each year.

The products of Nejd are dates, wheat, barley, coffee, limes, henna, pearls, hides, wool, oil, clarified butter (*saman* or *ghi*) and abaas (Arab cloaks), besides camels, horses, donkeys and sheep.

The geologic–geographical mapping of Saudi Arabia was completed in 1961 under the joint sponsorship of the Saudi Arabian and US governments.

Oil operations are carried out by the Arabian American Oil Co. (Aramco) owned by US interests. Crude oil production was 26·2m. long tons in 1950, 46·8m. in 1955, 48·2m. in 1957, 49·3m. in 1958, 53·3m. in 1959, 61·1m. in 1960; 68·1m. in 1961.

The operating centre is at Dhahran, and the principal oilfield at Abqaiq; the next most important producers are in Ain Dar and the Dammam oilfield, where the original discovery of oil was made in 1938. Several other oilfields, notably the great Ghawar field south of Ain Dar and the offshore wells of Safaniya, are being developed. Of the 1948 concession area, Aramco had by March 1963 retained only 125,000 sq. miles, *i.e.* about 25%.

Some crude oil is refined in a large refinery at Ras Tanura (11m. tons in 1960), and some is transported by pipeline to Bahrain Island, for refining there. Crude oil is also shipped from the Persian Gulf. In addition, some 15m. long tons of crude oil is annually transported along the Trans-Arabian Pipeline system (TAPline). This 1,068-mile long pipeline connects the oilfields to a Mediterranean oil port at Saida; it came into operation at the end of 1950.

In addition to the oil-producing areas where Aramco works, other American interests have secured a concession of Saudi Arabia's oil rights in the Kuwait/Saudi Arabia Neutral Zone. Here first shipments began in 1954.

In 1958 a Japanese concern obtained concessions for both the Saudi and Kuwait half-shares in the Neutral Zone offshore.

**COMMERCE.** In 1960–61 imports totalled 1,198m. rials (1959–60: 978m.; 1958–59: 917m.). The chief imports, mainly from the USA, are piece-goods, cereals, tea, coffee, sugar, rice, motor vehicles and building materials.

Total trade with UK (British Board of Trade returns, in £ sterling):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK . . | 5,362,100 | 9,788,228 | 13,077,720 | 20,508,402 | 13,289,783 |
| Exports from UK . . | 6,843,692 | 6,179,561 | 6,690,224 | 8,728,260 | 9,588,044 |
| Re-exports from UK . . | 111,942 | 108,936 | 131,584 | 122,674 | 110,233 |

**COMMUNICATIONS.** *Shipping.* The ports of Dammam on the Persian Gulf and Jidda on the Red Sea have deep-water piers.

*Roads.* There are no roads, properly so called, in the Hejaz, except the roads from Jidda to Mecca and from Jidda to Medina, which are asphalted throughout. There is also a track from Mecca eastward through Riyadh to Uqair and Dhahran on the Persian Gulf, a distance of 829 miles, which is used for motor transport. Motor cars can travel between Riyadh and Kuwait, Riyadh and Hail, Jauf and the northern frontier towns, Jidda and Hail, and between Jidda and Jizan and Sabya. The total of paved roads is 1,065 miles.

*Railways.* A railway from Riyadh to Dammam on the Persian Gulf *via* Dhahran and the oilfields Abqaiq, Ithmaniya (near Hofuf) and Haradh was completed in Oct. 1951. That section of the Hejaz Railway which is in Saudi Arabian territory is not now in working order.

*Telephone.* Jidda, Mecca and Taif are linked by telephone, Jidda and Cairo by radio-telephone. An international radio-telephone station at Riyadh was opened in 1956. Number of telephones (1963), about 25,300.

*Aviation.* Saudi Arabian Air Lines, a government-owned company managed by Trans-World Airlines, operates regular internal air services, a thrice-weekly service to Cairo and a twice-weekly service to Beirut, as well as special flights for pilgrims. The pilots are mainly Americans, with a growing number of Saudi Arabian co-pilots. The main airports are at Jidda, Dhahran and Riyadh.

**MONEY.** The legal monetary unit is the *rial*, a silver coin containing 0·34 oz. fine. There are silver coins for ¼, ½ and 1 rial, and a nickel *qurush*, 20 of which (or 11 for certain official payments including Customs duties) equal 1 rial.

Since 1953 pilgrimage paper 'pilgrims' receipts' in denominations of 5 and 10 rials partially backed by coin reserves held by the Saudi Arabian Monetary Agency have been generally accepted into circulation. For higher denominations the Saudi gold guinea (of the same weight and fineness as the British sovereign) is the official currency, although now seldom seen; most have been withdrawn because of skilful replicas circulating on the market. The genuine Saudi sovereign has a fixed rate of 40 rials (about £4).

After the fixing of a par value in Jan. 1960 (*see* p. 19), the Saudi Arabian Monetary Agency announced the issue of a paper rial to replace the 'pilgrims' receipts'; the paper rial is to be divided into 20 qurush (instead of 22) and will be backed 100% by gold or transferable currencies; the gold rial will cease to be legal tender. The gold cover of the currency was raised to 50% in Sept. 1961.

**BANKING.** Branches of the Netherlands Trading Society of Amsterdam, the Banque de l'Indochine, the British Bank of the Middle East, the Arab Bank (of Jerusalem), the Banque de Caire, the National Bank of Pakistan and the Banque du Liban et d'Outremer conduct banking business in Jidda. The Banque de l'Indochine, the British Bank of the Middle East, the Netherlands Trading Society, the Banque de Caire and the Arab Bank have branches in Al Khobar and Dammam; the last two banks have also branches in Riyadh. The locally-controlled National Commercial Bank has branches in Jidda, Mecca, Taif, Medina, Riyadh, Al Khobar and Dammam.

# SOMALI REPUBLIC

## Al-Jumhouriya As-Somaliya

The Somali Republic came into being on 1 July 1960 as a result of the merger of the British Somaliland Protectorate, which became independent on 26 June 1960, and the Italian Trusteeship Territory of Somalia. For the previous history of these territories see The Statesman's Year-Book, 1960, pp. 337 and 1367.

**CONSTITUTION AND GOVERNMENT.** The constitution of the Somali Republic was established under the Italian trusteeship during 1960. It was provisionally adopted on 1 July 1960 by the two regions by means of an Act of Union and approved by a national referendum in June 1961. It is based on the classical separation of powers with a presidency, a single chamber elected by universal adult suffrage and an independent judiciary. The executive consists of the prime minister and up to 11 other ministers and 5 under-secretaries of state.

*National flag:* A white 5-pointed star on a blue background.

A provisional President of the Republic was elected by the National Assembly on 1 July 1960 for one year pending the approval of the constitution. A President has since been elected for a first term of 6 years with effect from 1 July 1961.

*President of the Republic:* Aden Abdulla Osman.

No Parliamentary elections have been held since the Republic became independent. The existing Parliament is made up of the members who were elected to the National Assembly under the Italian Trusteeship and to the Legislative Council under British protection. After a revision of the existing electoral laws, an election is due to be held in 1964.

A provisional Government was formed in July 1960 for a period of one year pending the approval of the constitution. The Government which was formed in July 1961 consists of:

*Prime Minister:* Dr Abdirashid Ali Shermarche.

*Foreign Affairs:* Abdullahi Issa Mohamud.

*Interior:* Abdirizak Haji Hussein. *Defence:* Sheikh Ali Ismail. *Finance:* Abdulkadir Mohamed Aden. *Education:* Mohamed Ibrahim Egal. *Grace and Justice:* Ahmed Gaileh Hassan. *Health, Labour and Veterinary:* Ahmed Mohamed Adan. *Agriculture and Animal Husbandry:* Ali Gerad Jama. *Works and Communications:* Abdi-nur Mohamed Hussein. *Information:* Ali Mohamed Hirave. *Industry and Commerce:* Dr Sheikh Abdulla Mohamud.

**AREA AND POPULATION.** The Somali Republic has a total area of about 637,660 sq. km (246,135 sq. miles) with an estimated population of 2–3m. Mogadiscio is the capital (population, 100,000).

The Somali Republic is administratively divided into 8 regions, Migiurtinia, Hiran, Mudugh, Benadir, Upper Giuba, Lower Giuba, North-Western Province (consisting of Hargeisa, Berbera and Borama districts) and North-Eastern Province (consisting of Burao, Erigavo and Las Anod).

The national language is Somali. Arabic, Italian and English are all official languages of the Government, and all 3 are extensively spoken.

**RELIGION.** The population is almost entirely Sunni Moslems. There are a small number of Roman Catholics, mainly in the capital.

**EDUCATION** (1962). Government schools: 576 primary schools with 28,707 pupils; 9 secondary schools with 950 pupils. Private schools: 642 primary schools with 27,812 pupils; 2 secondary schools with 110 pupils. A university institute had 489 students of law and economics and 45 students of education.

*Cinemas* (1962). There were 16 cinemas with a seating capacity of 7,000.

*Newspapers* (1962). Five newspapers are published in Italian, Arabic and English.

**HEALTH.** In Sept. 1962 there were 67 physicians and 11 hospitals with 2,800 beds.

**FINANCE.** The budget for 1962 envisaged Som.Sh.159·2m. expenditure and Som.Sh.119·4m. revenue. Owing to the inherent difficulties of a nomadic society, indirect taxation accounts for more than 80% of the revenue. The expenditure was allocated to economic services, 21%; social services, 22%, and general services, 57%.

**DEFENCE.** *Army.* The army is about 5,000, the police about 4,000, the finance guards about 400 and the local Illaloes (rural police) about 2,500.

*Air Force.* Formed with a nucleus of aircraft taken over from the former Italian Air Corps of Somalia, in 1960, the Air Corps is being built up with Soviet aid. Current equipment includes MiG-15 jet-fighters, obsolescent F-51D Mustang piston-engined fighter-bombers and small transport and training units.

**PRODUCTION.** A 5-year development plan (1963–67) envisages capital expenditure of Som.Sh.1,400m., to be vested mainly in transport and communications (29%), agriculture (18%) and industry (16%). The plan is to be financed by foreign aid; commitments include 317·5m. from USSR, 80m. from UAR, 78·4m. from USA, and about 677m. from the European Economic Community, Germany, Italy and Czechoslovakia.

*Agriculture.* Somalia is essentially a pastural country, and about 80% of the inhabitants depend on livestock-rearing (cattle, sheep, goats and camels). In Southern Somalia, especially along the Shebeli and Giuba rivers, there are Somali and Italian plantations with a cultivated area of some 90,000 hectares. There is an estimated annual output (1,000 quintals) of sugar from sugar cane, 110; bananas, 900; durra, 650; maize, 465 Fresh fruit and oil seeds are grown in increasing quantities. There are an estimated 140,000 acres under cultivation in the North-Western Province where the main crop is sorghum.

*Industry.* There are a number of small meat and fish canneries, a small leather tanning industry, oil seed and fresh fruit processing plants, a small shoe and leather works industry, weaving of coloured cloth for local use and some woodwork.

*Mining.* Deposits of iron ore in the south and gypsum in the north are known to exist. Beryl and columbite are also found in the north. None are commercially exploited. Several firms hold exploration and drilling licences for oil.

*Trade.* In 1961 imports were estimated at £10m. and exports at £7m. The chief exports are fresh fruit, livestock, hides and skins. The adverse balance of trade is offset by foreign aid receipts and remittances from Somalis living abroad.

Total trade between the Somali Republic and UK (British Board of Trade returns, in £ sterling):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK . . . | 121,145 | 86,766 | 51,844 | 127,069 | 63,795 |
| Exports from UK . . . | 989,320 | 897,089 | 788,226 | 846,818 | 892,732 |
| Re-exports from UK . . | 9,169 | 9,156 | 3,311 | 3,622 | 1,381 |

Customs duties are very high and are usually imposed on an *ad-valorem* basis. The Northern regions enjoy slightly lower rates of customs duties.

**COMMUNICATIONS.** *Roads.* Somalia has no developed transport system. Internal freight and passenger transport is almost entirely by means of road haulage. There are 2 asphalt roads from the capital northwards and southwards for 364 and 30 km respectively. Other roads are generally passable in dry weather. There are no railways.

*Post.* There is a manual telephone system in several towns, and Mogadiscio is about to instal an automatic system; number of telephones (1962), about 2,100. The state radio transmits in Somali, Arabic, English and Italian from Mogadiscio and Hargeisa.

*Aviation.* There is no commercial national airline. Mogadiscio airport is used by Alitalia, United Arab Airlines, Aden Airways and East African Airlines. Through Nairobi to the south and Aden to north there are reasonable connexions for travelling to any part of the world.

**CURRENCY.** The official currency since June 1961 is the Somali shilling, divided into 100 cents (20 Somali shillings = £1 sterling), issued in notes of 5, 10, 20, 100 shillings and coins of 5, 10, 50 and 100 cents. Currency in circulation about Som.Sh.60m.

**BANKING.** The Banco di Roma, Milano, Napoli and National & Grindlays Bank have all more than one branch each in the country. The Somali National Bank and the Credito Somalo are both state-owned.

**WEIGHTS AND MEASURES.** The metric system is used in 6 provinces and the Imperial system in 2; the latter is gradually disappearing.

**DIPLOMATIC REPRESENTATIVES.** The Somali Republic maintains embassies in Belgium, Ethiopia, France, Germany, Italy, Saudi Arabia, USSR, UK, USA.

Diplomatic relations with the UK were broken off on 18 March 1963.

# REPUBLIC OF SOUTH AFRICA

### REPUBLIEK VAN SUID-AFRIKA

**CONSTITUTION AND GOVERNMENT.** The Republic of South Africa Constitution Act 1961 established, with effect from 31 May 1961, the Republic, consisting of the 4 provinces—the Cape of Good Hope, Natal, the Transvaal and the Orange Free State—which until then comprised the Union of South Africa.

On 5 Oct. 1960 a referendum was held among the white voters (1,800,426 on roll) to decide whether the Union should become a republic. Of the 1,634,240 votes polled, 850,458 were in favour of a republican constitution, 775,878 against it; 7,904 votes were invalid. The voting was as follows: Transvaal, 406,632 for, 325,041 against; Cape Province, 271,418 for, 269,784 against; Orange Free State, 110,171 for, 33,438 against; Natal, 42,299 for, 135,598 against; South-West Africa, 19,938 for, 12,017 against.

The head of the Republic is the State President, who is elected for a 7-year term by an electoral college consisting of the members of the Senate and the House of Assembly at a meeting specially convened for the purpose.

Legislative power is vested in a Parliament consisting of the State President, a Senate and a House of Assembly. The State President has power to summon, prorogue and dissolve Parliament, either both Houses simultaneously or the House of Assembly alone. He may also dissolve the Senate at any time within 120 days of any dissolution of the House of Assembly or the expiry of the term of office of a provincial council. A session of Parliament must be held once at least in every year.

The Senate consists of 54 members, 11 being nominated by the State President-in-Council (2 for each of the 4 Provinces, 2 for South-West Africa and 1 for the Coloured voters in the Cape Province) and 43 being elected (14 in the Transvaal, 11 in the Cape Province, 8 in Natal, 8 in the Orange Free State, 2 in South-West Africa). A senator must be a white South African citizen, at least 30 years of age, qualified as a voter in one of the provinces and resident for 5 years within the Republic. Senators hold their seats for 5 years, subject to a prior dissolution of the Senate.

At least one of the 2 senators nominated by the State President from each province should be thoroughly acquainted with the interests of the Coloured population. Similarly, one of the senators nominated from South-West Africa should be selected mainly for his thorough acquaintance with the reasonable wants and wishes of the Coloured races of the Territory.

The House of Assembly consists of 160 members chosen in electoral divisions as follows: Cape of Good Hope, 52; Natal, 16; Transvaal, 68; Orange Free State, 14; South-West Africa, 6; 4 representatives elected to represent the electoral divisions for the Coloured voters in the Cape Province.

A member of the House of Assembly must be a white South African citizen, qualified as a voter and resident for 5 years within the Republic. Every House of Assembly continues for 5 years unless sooner dissolved.

Only the House of Assembly can originate money bills, but may not pass a bill for taxation or appropriation unless it has been recommended by the State President during the session. Restrictions are placed on the amendment of money bills by the Senate. Provision is made respecting disagreements between the Houses and the State President's assent to bills.

A member of one House cannot be elected to the other, but a minister and a deputy minister may sit and speak, but not vote, in the House of which he is not a member. To hold an office of profit under the State (with certain exceptions) is a disqualification for membership of either House, as are also insolvency, crime and insanity. Pretoria is the seat of government, and Cape Town is the seat of legislature.

The state of the parties in the House of Assembly after the elections of 18 Oct. 1961 was as follows: National Party, 105 (370,431 votes); United Party, 49 (302,875 votes); Progressive Party, 1 (69,042 votes); National Union, 1 (35,903 votes); other parties, 0 (19,394 votes).

In the Senate, for which elections were held on 26 Oct. 1960, the National Party has 39 members and the United Party 15.

The Executive Council (National Party) was, in April 1964, composed as follows:

*State President:* C. R. Swart (elected 1961).

*Prime Minister:* Dr H. F. Verwoerd.
*Lands, Forests and Public Works:* P. O. Sauer.
*Foreign Affairs:* Dr H. Müller.
*Finance:* Dr T. E. Dönges.
*Transport:* B. J. Schoeman.
*Social Welfare and Pensions:* J. J. Serfontein.
*Interior, Education, Arts and Science;* J. de Klerk.
*Bantu Administration and Development:* M. D. C. de Wet Nel.
*Agricultural Technical Services and Water Affairs:* P. M. K. le Roux.
*Bantu Education and Indian Affairs:* W. A. Maree.
*Economic Affairs and Mines:* Dr N. Diederichs.
*Posts and Telegraphs and Health:* Dr A. Hertzog.
*Agricultural Economics and Marketing:* D. C. H. Uys.
*Defence:* J. J. Fouché.
*Labour and Immigration:* A. E. Trollip.
*Coloured Affairs, Community Development, and Housing:* P. W. Botha.
*Justice.* B. J. Vorster.
*Information:* F. W. Waring.

The following are Deputy Ministers; they do not have Cabinet rank and are not members of the Executive Council:

*Interior, Education, Arts and Science, Labour, Immigration:* M. Viljoen.
*Bantu Administration and Development:* M. C. Botha.
*Planning, Economic Affairs, Mines:* J. F. W. Haak.
*South-West Africa Affairs:* J. G. H. van der Wath.

The Prime Minister receives an annual salary of R13,000 and a reimbursive allowance of R2,000; a member of the Cabinet an annual salary of R10,000 and a reimbursive allowance of R1,500; and a Deputy Minister an annual allowance of R8,000, a reimbursive allowance of R1,000 plus R80 per month in lieu of an official residence.

The English and Afrikaans languages are both official, subject to amendments carried by a two-thirds majority in joint session of both Houses of Parliament.

*National flag:* Orange, white, blue (horizontal), with the flags of the Orange Free State, the South African Republic and the Union Jack superimposed on the white stripe.

*National anthem:* Die Stem van Suid-Afrika (words by C. J. Langenhoven, 1918; tune by M. L. de Villiers, 1921).

PROVINCIAL ADMINISTRATION. In each province there is an Administrator appointed by the State President-in-Council for 5 years, and a provincial council elected for 5 years, each council electing an executive committee of 4 (either members or not of the council), the Administrator acting as chairman. Members of the provincial council are elected on the same system as members of Parliament. The number of members in each provincial council is as follows: Cape of Good Hope, 52; Natal, 25; Transvaal, 68; Orange Free State, 25. The provincial committees and councils have authority to deal with local matters, of which provincial finance, education (primary and secondary, other than higher education and technical education), hospitals, roads and bridges, townships, horse and other racing, and game and fish preservation are the most important. In 1953 the administration and control of Bantu education was transferred from the provincial councils to the central government. Other matters may be delegated to these councils. All ordinances passed by a provincial council are subject to the veto of the State President-in-Council.

There is a provincial revenue fund in each province.

BANTU ADMINISTRATION. In 1951 the Natives Representative Council was abolished and the Bantu Authorities Act enacted to provide a system of Bantu tribal, regional and territorial authorities. These were given administrative, executive and judicial functions and limited legislative powers. In 1959 the main ethnic groups received legislative recognition by the passing of the Promotion of Bantu Self-Government Act which provided *inter alia* for the 8 main Bantu groups to develop into self-governing national units, with a Commissioner-General for each of the 5 main ethnic units representing the Government and guiding the people towards greater development.

The scope of the powers previously granted to territorial authorities was widened and they were also given the power to pass enactments instead of bye-laws, while special provision was made for the transfer to territorial authorities of certain rights and obligations in respect of land at present held by the State President in his capacity as Trustee of the South African Native Trust.

As the Act envisages eventual political autonomy for each of the various national units and as representation in the highest European governing bodies is regarded as a retarding factor, the representation by Europeans in Parliament and the Cape Provincial Council was abolished with effect from 30 June 1960.

In 1961 the Zulu chief Albert Luthuli was awarded the Nobel Peace Prize for his advocacy of peaceful means in the achievement of Bantu aspirations.

The election for the first Bantustan legislative assembly in Nov. 1963 gave Paramount Chief Victor Poto the support of 30 and Chief Kaizer Matanzima that of 15 elected members (out of a total of 109). The Government appointed Chief Kaizer Matanzima, an advocate of *apartheid*, as Chief Minister of this Xhosa tribal reserve.

**AREA AND POPULATION.** The total area of the Republic is 471,445[1] sq. miles (1,221,042 sq. km), divided between the provinces as follows: Cape of Good Hope, 278,380 (721,004); Natal, 33,578 (86,967); Transvaal, 109,621 (283,918); Orange Free State, 49,866 (129,153).

On 25 Dec. 1947 the Union formally took possession of Prince Edward Island and, on 30 Dec., of Marion Island, about 1,200 miles south-east of Cape Town.

---

[1] Excludes Walvis Bay (374 sq. miles), which is an integral part of the Cape Province but is administered under Act No. 24 of 1922 by South-West Africa.

The census taken in 1904 in each of the four colonies was the first simultaneous census taken in South Africa. In 1911 the first Union census was taken.

[1] Preliminary.

Unifying Act No. 17 of 1923, which came into effect as from 1 Jan. 1924, abolished compulsory registration of Bantu vital events in rural areas, but made registration compulsory in all urban areas throughout the Union. Compulsory registration in rural areas was re-introduced from 1 July 1952, but is still incomplete.

*Technical and vocational education.* The Government is responsible for all vocational education, except agricultural schools, which fall under the jurisdiction of the provincial education departments. The Department of Education, Arts and Science administers technical colleges, schools of industries and technical, housecraft and commercial high schools for Whites. It is also responsible for the education and training of White blind, deaf, epileptic and deviate children, who are sent to schools of industries or reformatory schools.

The Department of Coloured Affairs has taken over all schools of this nature for Coloureds from the Department of Education, Arts and Science.

In 1962, 13 technical and 13 training colleges had 10,593 full-time and 42,041 part-time students; 12 schools for the blind, the deaf, epileptics and cerebral palsy had 1,402 white pupils.

*State and State-aided Education, other than Higher Education.* Subject to final control by the provincial administration, the central direction of primary and secondary public education is exercised by the provincial education departments, except for Bantu education which is controlled and administered by the Department of Bantu Education.

**SOCIAL WELFARE.** *Social Security.* Statutory provision exists for the following schemes, all on a non-contributory basis: Old-age pensions: pensions for the blind; war veterans pensions; disability grants; maintenance grants in respect of children payable to widows (and to certain othe parents) with children, as well as for foster children; family allowances t parents with low incomes and large families; war pensions and temporar public assistance to indigent persons or families.

*Voluntary Welfare Organizations.* Welfare work operates on a basis of ful co-operation between the State and private initiative. All welfare organizations, dependent on the public or statutory bodies for funds, are required t register under the Welfare Organizations Act of 1948. This Act set up National Welfare Board which considers applications for registration, co-ordinates welfare services and advises the Minister of Social Welfare an Pensions on social welfare matters. Of the about 2,000 registered organizations many are affiliated to national councils, such as the National Counc for Cripple Care, etc. The Department of Social Welfare and Pension subsidizes the salaries of about 520 trained social workers in the employ voluntary organizations—all with university degrees or recognized diplom training in social work. Private enterprise with regard to the care of th aged, the cripple, the blind, the treatment of alcoholics, etc., is also subsidized.

*Child and Family Welfare.* Welfare or professional officers employed by the State are responsible for the implementation and administration of the Children's Act (amended and consolidated in 1960). This Act makes provision for the prevention and treatment of neglected and maladjusted children, with the full integration of the services of voluntary child and family welfare organizations. Children's institutions, mainly established and controlled by private organizations, are subsidized by the State, as are crèches, community centres and other projects in aid of child and family welfare.

*General.* Apart from retreats managed by private organizations for the voluntary treatment of inebriates, the State has a retreat for female alcoholics and retreats and rehabilitation centres for male alcoholics and won't works. The inmates in the latter institutions are committed there by the courts and are under compulsory detention for a minimum period of 12 months.

**JUSTICE.** The common law of the Republic is the Roman–Dutch law—that is, the uncodified law of Holland as it was at the date of the cession of the Cape in 1806. The law of England as such is not recognized as authoritative, though by statute the principles of English law relating to evidence and to mercantile matters, *e.g.*, companies, patents, trademarks, insolvency and the like, have been introduced. In shipping and insurance, English law is followed in the Cape Province, and it has also largely influenced civil and criminal procedure throughout the Republic. In all other matters, family relations, property, succession, contract, etc., Roman–Dutch law rules, English decisions being valued only so far as they agree therewith.

The Supreme Court of South Africa is constituted as follows: (i) The Appellate Division, consisting of the Chief Justice and 11 Judges of Appeal, is the highest court and its decisions are binding on all courts. It has no original jurisdiction, but is purely a Court of Appeal. (ii) The Provincial Divisions: In each province there is a provincial division of the Supreme Court, while in the Cape there are two such divisions possessing both original and appellate jurisdiction. (iii) The Local Divisions: There is a local division each in the Cape, the Transvaal and Natal exercising the same original jurisdiction within limited areas as the provincial divisions. The division in the Cape has appellate jurisdiction within its area of jurisdiction.

The judges hold office till they attain the age of 70 years. No judge can be removed from office except by the State President upon an address from both Houses of Parliament in the same session praying for such removal on the ground of misbehaviour or incapacity. The circuit system is fully developed.

The Bantu appeal courts and 3 Bantu divorce courts were established in 1927, 1929 and 1948. All these courts have jurisdiction, to some extent concurrent with and in certain respects exclusive of that of the Supreme Court in cases in which Bantu are parties.

Each province is further divided into districts with a magistrate's court having a prescribed civil and criminal jurisdiction. From this court there is an appeal to the provincial and the Cape local divisions of the Supreme Court, and thence to the appellate division. A distinctive feature of the criminal system is that magistrates' convictions carrying sentences above a prescribed limit are subject to automatic review by a judge. In addition, several regional divisions consisting of a number of districts have been constituted. Convictions of such courts are not subject to automatic review by a judge.

Courts of Bantu affairs commissioners have been constituted in defined areas to hear all civil cases and matters between Bantu and Bantu only. An appeal lies to the Bantu appeal court, whose decision is final, unless the court consents to an appeal to the appellate division of the Supreme Court on a point stated by the court itself. Bantu affairs commissioners have concurrent criminal jurisdiction with magistrates' courts in respect of certain offences committed by Bantu, while a limited civil and criminal jurisdiction is conferred upon the Bantu chief or headman over his own tribe.

Persons of all races convicted, all courts, 1960: Males, 1,166,836; females, 198,007; 1959: males, 1,263,206; females, 248,229.

**FINANCE.** The financial relations between the central government and the provinces are being investigated by a commission of enquiry.

Prior to 1913–14 the expenditure of the 4 provinces was entirely met from grants by the Union Government. Since then various Financial Relations Acts have been passed defining the conditions upon which subsidies shall be granted to the provinces, assigning and transferring to them certain revenues and limiting their powers of taxation.

Public debt on 31 March 1963, R2,789,142,730, of which R2,525,520,954 was permanent debt; internal debt, R2,618,564,247.

**DEFENCE.** The South African Defence Force comprises a Permanent Force, a Citizen Force and a Commando organization. The Permanent Force consists of professional soldiers, airmen and seamen who are responsible for the administration and training of the whole Defence Force in peace-time, but who are gradually absorbed into the Citizen Force in time of war. The Permanent Force and the Citizen Force consist of Army, Air Force and Naval components; the Commando organization is entirely an army organization.

Every citizen between the ages of 17 and 65 is liable to undergo training and to render personal service in time of war. Those between the ages of 17 and 25 are liable to undergo a compulsory course of peace training in either the Citizen Force or the Commando organization over a period of 4 years, which may voluntarily be extended.

Most of the officers and many of the other ranks serving in the Citizen Force and Commando organization are volunteers. The number of citizens who are compulsorily posted to the Citizen Force and Commando organization is accordingly influenced by the number of volunteers accepted for service, the man-power needs and the international situation.

The S.A. Defence Force and the Cadet Corps are administered by the Commandant-General, SADF, the Army, Air and Naval Chiefs of Staff, the Adjutant-General, the Quartermaster-General and the Surgeon-General. The Secretary for Defence is the Permanent Head of the department as well as the Accounting Officer.

*Army.* South Africa is divided into 11 territorial Commands: Western Province, Eastern Province, Natal, Orange Free State, Western Transvaal, Northern Transvaal, Witwatersrand, North West Cape, South West Africa, South Western Districts and Walvisbaai Commands. Within the various Commands are training units and full-time force units, of which members of the Permanent Force form the permanent staff. Courses of various types are held also at the S.A. Military College.

*Navy.* The South African Navy with its headquarters at Simonstown is administered by the Naval Chief of Staff, who holds the rank of Rear-Admiral. The Navy includes 3 new British-built anti-submarine frigates, 2 destroyers (*Jan van Riebeeck*, *ex*-HMS *Wessex*, and *Simon van der Stel*, *ex*-HMS *Whelp*), 1 fast anti-submarine frigate (*Vrystaat*, *ex*-HMS *Wrangler*), 2 training frigates, 2 ocean minesweepers, 10 coastal minesweepers, 1 surveying vessel (*ex*-frigate), 2 boom defence vessels and 10 seaward defence boats. The 10 coastal minesweepers and 5 seaward defence boats are purchased from Great Britain in 1954–59. Naval personnel in 1963 totalled 3,000 officers and ratings.

The facilities of the base at Simonstown are available for use by the Royal Navy in peace and by the Royal Navy and ships serving with the Royal Navy and by navies or allies of the United Kingdom in any war in which the United Kingdom is involved.

*Air Force.* Units of the South African Air Force are administered by Tactical, Training, Maritime and Maintenance Groups. Aircraft in service include Mirage III and Sabre 6 jet fighter-bombers, turboprop C-130B Hercules and C-47 transports, Shackleton maritime patrol aircraft and helicopters. Twenty-four Buccaneer maritime strike-reconnaissance aircraft are on order. Advanced training is done at the S.A. Air Force College.

**PRODUCTION.** *Agriculture.* The number of farms owned by Whites in 1960 was 105,859, with an area of 107·2m. morgen (1 morgen = 2·11 acres) and an estimated selling value of R3,397·7m.

South African farmers produced mainly the following crops for the years indicated:

*Livestock* (1960). 12,294,604 cattle (of which 7·52m. belonged to White farmers); 38,789,492 sheep (35·12m. Whites); 5,057,050 goats (1·99m. Whites); 1,380,666 pigs (552,477 Whites); 17,573,120 fowls (10·76m. Whites); 471,599 horses (162,085 Whites); 56,714 mules (43,864 Whites); 376,901 donkeys (92,872 Whites).

Wool sold in 1961–62 amounted to 313·74m. lb. valued at R98·37m.; in 1960–61, 295·41m. lb. valued at R90·11m. In 1961–62 the production of factory butter was 103·75m. lb.; of factory cheese, 34,822,000 lb.

Cotton-growing is now undertaken by many farmers, the plant being found a better drought resistant than either tobacco or maize.

*Irrigation.* The government activities in respect of the control and utilization of water are governed by the Water Act, 1956, which is administered by the Department of Water Affairs. The Department's expenditure on revenue account during 1962–63 amounted to R12,729,331, while the expenditure on loan account was R14,724,552.

*Viticulture.* South African wines, sherries and brandy are produced exclusively in the Cape Province. In 1961, 4,074,772 gallons of wine (R3,449,944) and 416,712 gallons of spirits (R876,376) were exported, nearly half of it to the United Kingdom.

*Forestry.* On 31 March 1962 the state-owned and native trust reserve area comprised 4,249,271 acres.

*Fishing.* The catch of off-shore whaling in 1959 was 3,026 whales (1960: 3,409; 1961: 2,026); it yielded 9,017 long tons of whale oil (1960: 6,898; 1961: 5,960), 5,923 long tons of sperm oil (1960: 4,603; 1961: 3,991) and 7,731 short tons of whale meat (1960: 6,806; 1961: 6,142). Whaling is conducted off the Natal coast.

*Manufactures.* The industrial census in South Africa for 1960–61 (preliminary) gives the value (in R1,000) added by process of manufactures, etc., as R1,144,429, and the value of the gross production of the industries covered as R2,769,322. The total number of factories which made returns was 11,081. Value (in R1,000) of land and buildings, 371,998; machinery and plant, 617,444. Number of persons employed as at 30 Sept. 1960, 654,350; wages paid, R545,557,000. The net value of the output of the principal groups of industries was (in R1,000): Food, 170,097; beverages, 31,260; metals, 117,915; clothing and footwear, 95,475; chemicals, 107,959; transport equipment, 15,282; non-metallic minerals, 75,867; basic metal industries, 113,038; printing, 51,986; machinery, 61,815; textiles, 55,434; electrical machinery, 50,914; furniture, 24,922.

[1] Represents total trading revenue and not only sales.
[2] Preliminary.

The wholesale and retail trade excludes the motor trade, which is now regarded as a separate economic sector. The retail trade also excludes provision dealers (café) which are now regarded as catering services. Service establishments have been split up into catering, accommodation and personal services. The latest figures for personal services are those for the service year 1952. No censuses have been undertaken since then and no provision has been made under the above headings in this category. A new sector 'business services' has been instituted.

Census of the automotive industry 1956–60 (1959–60 preliminary). The automotive industry covers the motor trade and other motor-industry establishments, including manufacturers and assemblers.

[2] Capital represents owner's interest namely: issued share capital (ordinary and preference) plus general reserves plus undistributed profits in the case of incorporated firms; and private capital account of owners in the case of unincorporated firms. Capital statistics have been collected on a firm basis.

*Mining.* The table hereunder gives the total value of the principal minerals produced in South Africa to 31 Dec. 1960. The value of gold is calculated at £4·24773 per fine oz. up to 1919, when the gold premium came into effect, as from 24 July, and from 1925 onwards when the gold premium ceased to operate. The whole of the gold production of 1933–39 was sold at a premium; the premium for 1939 amounted to R116,649,740. Copper, tin, antimony, scheelite and silver are valued on the estimated pure metal contained by shipments according to the average current prices in London. The value of other base minerals is calculated on average local prices.

The value (R1,000) of certain minerals from earliest records to the end of 1961 was:

| | Transvaal | Cape | Orange Free State | Natal | Total |

Mineral production in 1962: Gold, 25,491.993 fine oz.; silver, 2,549,206 fine oz.; iron ore, 4,774,480 tons; copper, 51,115 tons; manganese ore, 1,614,599 tons; chrome ore, 1,006,173 tons; coal, 45,497,941 tons; asbestos, 221,302 tons; diamonds, 3,917,891 carats; beryl, 360 tons; tantalum, 4 tons; uranium concentrates (1961), 5,480 tons. As at the end of 1961, 15 mines were producing uranium oxide in 13 installations erected for that purpose.

In 1962 the average number of persons engaged in mining and quarrying totalled 624,206 (including 66,590 whites); of whese 457,882 (including 50,035 whites) were engaged in goldmining.

*Electricity.* The total capacity of the power plants controlled by the Electricity Supply Commission was, at the end of 1962, 3,758,950 kw. Power generated in 1962 was 20,805,518,186 kwh.; power sold, 18,121,036,820 kwh.

**COMMERCE.** Up to 31 Dec. 1954, the statistical territory 'Union of South Africa' in trade statistics comprehended the trade of the political territory of the Union of South Africa and the High Commission Territories of Basutoland, Swaziland and Bechuanaland Protectorate. As from 1 Jan. 1955 it includes, in addition, the territory of South-West Africa.

The total value of the imports and exports, exclusive of specie and gold bullion, was as follows (in £ sterling and, from 1960, in Rand):

| Yearly average | Imports | Exports |
|---|---|---|
| 1930–39 | 71,485,464 | 29,086,287 |

**COMMUNICATIONS.** *Railways.* Railway history in South Africa begins in 1860 with the line Durban–Point. With the formation of the Union in 1910, the state-owned lines in the 4 provinces (7,577 miles) were amalgamated into one state undertaking, which also took over the control of the harbours—the South African Railways and Harbours Administration.

Government-owned lines operated by the administration at 31 March 1962 totalled 13,615 miles, distributed as follows: Cape, 5,447; Transvaal, 3,507; Orange Free State, 1,670; Natal, 1,538; South-West Africa, 1,453; of which 13,175 miles were 3 ft 6 in. gauge and 439 miles 2 ft gauge. 231 miles of private railways are also operated by the administration. Passenger journeys, 1961–62, 315·6m.; goods and mineral traffic, 89·7m. tons.

*Roads.* The railway administration operated road motor services over a route mileage of 31,782 at 31 March 1962; during that year 7·86m. passengers were conveyed and 3·16m. tons of goods were carried.

There were at 31 March 1962, 5,806 miles of national roads, of which 5,472 miles were bituminous-surfaced. In addition, there were 109,248 miles of provincial roads; of these 7,878 miles are covered with bitumen.

Motor vehicles in operation in 1960 included 895,401 passenger cars, 211,525 trucks, 15,012 buses and 89,142 motor cycles.

*Shipping.* The 4 main ports are Durban, Cape Town, Port Elizabeth and East London. Smaller ports are Mossel Bay, Simonstown, Port Nolloth, Walvisbay and Lüderitz. During 1962 a total of 14,289 commercial vessels, whaling boats and fishing boats of 61,861,106 gross tons entered these ports.

*Aviation.* Civil aviation in South Africa is controlled by the Department of Transport, which administers the following state-owned airports: Jan Smuts Airport, Johannesburg; D. F. Malan Airport, Cape Town; Louis

Botha Airport, Durban; J. B. M. Hertzog Airport, Bloemfontein. At 13 other airports the Department provides air navigation services.

South African Airways, as the national air carrier, operate scheduled international air services within Africa and to Europe and Australia. Fifteen other lines also operate scheduled international air services; they include BOAC, Pan American World Airways, KLM, SAS, El-Al, Qantas, Alitalia, SABENA, Lufthansa, DETA, Central African Airways, Rhodesian Air Services, East African Airways, LUXAIR. Trek Airways operate international non-scheduled flights.

South African Airways, Commercial Air Services Ltd, Suidwes Lugdiens and Namakwaland-lugdiens operate scheduled air services within South Africa.

During 1962 South African Airways carried 409,551 passengers and flew 411,475,000 passenger-miles, 12,033,000 freight-ton miles and 3,532,000 mail-ton miles.

The total capital expenditure on railways, harbours, steamships, airways and aerodromes at 31 March 1962 amounted to R1,471,197,388. During the year the total revenue (all services) was R443,963,984, to which the railways contributed R397,278,614. Total expenditure (all services) amounted to R429,609,840 (R386,857,174 net on railways).

*Post.* On 31 March 1962 there were in South Africa (excluding South-West Africa) 3,506 post and telegraph offices. The cash revenue of the Department of Posts, Telegraphs and Telephones, 1961–62, was R86,738,245; expenditure R60,265,442. The revenue included R7,471,023 from the telegraph service and R53,385,963 from the telephone services.

There were, in 1962, 910,738 telephone stations and 14,577 public call offices, excluding the telephones and exchanges owned by the Durban Corporation.

Transmitting and receiving stations provide approximately 50 circuits to London, New York, Sydney, Buenos Aires, Rio de Janeiro, Nairobi, Léopoldville, Windhoek and other places.

**MONEY.** Act No. 31 of 1922 provided for the issue of a Union coinage with denominations identical with those of British coins. British silver coins ceased to be legal tender after 14 Jan. 1933. On 1 July 1941 the South African Mint replaced the Pretoria branch of the Royal Mint, which had struck South African coins from 1923.

Silver coins of 5*s*., 2*s*. 6*d*., 2*s*., 1*s*., 6*d*., 3*d*., and bronze coins of 1*d*., ½*d*., ¼*d*., are in circulation. Gold sovereigns and half-sovereigns were in circulation until 21 Dec. 1932, when the Union suspended gold payments. From 18 March 1952 pound and half-pound gold coins have been minted as 'proof' pieces.

The Decimal Coinage Act, 1959, introduced the decimal system, the coinage units being the *rand* (abbreviated as R) and the *cent* (abbreviated as c). The rand/cent coinage system came into operation on 14 Feb. 1961. The decimal coins and their duodecimal equivalents are: *Gold coins.* 2 rand = pound; rand = half-pound. *Silver coins.* 50 cents = crown; 20 cents = florin; 10 cents = shilling; 5 cents = sixpence; 2½ cents = threepence. *Bronze coins.* Cent = twelve-tenths of a penny; ½-cent = twelve-tenths of a half-penny; (¼-cent = twelve-tenths of a farthing, though provided for in the Act, will not be coined).

**BANKING.** Statistics of the South African Reserve Bank,[1] 31 March 1963, are as follows (in R):

| Liabilities | | Assets | |
|---|---|---|---|
| Capital | 2,000,000 | Gold coin and bullion | 390,444,485 |
| Reserve Fund | 9.413,101 | Foreign assets | 80,423,728 |
| Notes in circulation | 262,824,595 | Domestic assets: | |
| Deposits: | | Bills discounted | 44,220.000 |
| Government | 164,932,250 | Loans and advances | 12,808,136 |

| Other | 8,857,104 | | |

---

[1] In Dec. 1920, under the South African Currency and Banking Act, 1920, a Central Reserve Bank was established at Pretoria. It commenced operations in June 1921, and began to issue notes in April 1922. The bank has branches in Johannesburg, Cape Town, Durban, Port Elizabeth, East London, Bloemfontein, Pietermaritzburg and Windhoek. Liability for all outstanding notes of the commercial banks amounted to R575.665 on 31 March 1963.

Ratio of gold reserve to liabilities to the public less foreign assets was 83·5% on 31 March 1963.

The number of depositors in the post office savings bank at the end of March 1963 was 1,700,642, and the amount standing to their credit R135,004,074.

**WEIGHTS AND MEASURES.** The Weights and Measures Act, 1922, which came into effect on 1 April 1923, established standard weights and measures throughout the Union and embodied the principle of optional use of the metric system, subject to certain provisions. The Act was amended in 1933 and 1940, repealed and consolidated in 1958, and again amended by the Weights and Measures Amendment Act, 1960.

Regulations (consolidated and revised in 1962) prescribe the manner and frequency of assizing of trade weighing and measuring instruments, as well as controlling the sale of goods and fixing standard quantities for commodities in general use.

# PROVINCE OF THE CAPE OF GOOD HOPE

### KAAPPROVINSIE

**HISTORY.** The colony of the Cape of Good Hope was originally founded by the Dutch in the year 1652. Britain took possession of it in 1795 but evacuated it in 1803. A British force again took possession in 1806, and it was formally ceded to Great Britain by the Convention of London, 13 Aug. 1814. Letters patent issued in 1850 declared that in the colony there should be a Parliament which should consist of the Governor, a Legislative Council and a House of Assembly. On 31 May 1910 the colony was merged in the Union of South Africa, thereafter forming an original province ot the Union

**ADMINISTRATION.** At the provincial council election on 14 Oct. 1959 the following parties were returned: Nationalists, 33; United Party, 19; there are also 2 representatives of the Coloured people.

Cape Town is the seat of the provincial administration.

*Administrator:* J. N. Malan.

The province is divided into 135 magisterial districts, and the province proper, including Bechuanaland, but exclusive of the Transkeian territories (with the exception of the districts of Mount Currie and Matatiele, where there are also divisional council divisions), into 94 divisional council divisions. This figure includes the 2 divisions in the Transkei, viz., Mount Currie and Matatiele, and also Umzimkulu Road Board. Each division has a council of at least 6 members (14 in the Cape Division) elected quinquennially by the owners or occupiers of immovable property. The duties devolving upon divisional councils include the construction and maintenance of roads and bridges, local rating, vehicle taxation (except motor vehicles) and preservation of public health.

There are 165 municipalities, each governed by a mayor and councillors. Municipal elections are held triennially. There are also 80 village management boards and 11 local boards.

**AREA AND POPULATION.** The following table gives the population of the Cape of Good Hope[1] (area 278,380 sq. miles) at the last census:

| | All races | | | White | | Non-White | |
|---|---|---|---|---|---|---|---|
| | *Total* | *Males* | *Females* | *Males* | *Females* | *Males* | *Females* |

[1] Excludes 20,133 Bantu omitted from sample.

**EDUCATION.** Higher and vocational education is under the control of the Department of Education, Arts and Science, Pretoria. Primary and secondary education and the training of primary teachers are controlled by the Provincial Administration in respect of White pupils and by the Department of Bantu Education in respect of Bantu pupils. Coloured education has been transferred to the Department of Coloured Affairs from 1 Jan. 1964.

There are 114 school districts, each under a school board, consisting of both elected (by the ratepayers) and nominated members (by the Provincial Administration and the local authorities). Education is compulsory for all White children. Except for a few schools, primary and secondary education is free to the end of the calendar year in which the age of 19 years is attained.

In June 1962 there were 1,139 government and aided schools for White scholars, and in addition 7 institutions for the training of teachers. There were 207,593 White pupils, mostly under school boards, and 9,449 teachers. There were 1,518 government and aided schools for Coloured and Asiatic scholars, of which 10 were training institutions for teachers; there were 9,247 teachers in these schools and 297,851 pupils. Public Bantu schools numbered 2,763, including 13 teachers' training colleges, with 491,298 pupils.

There were also 99 private schools for Whites, with 18,049 pupils and 1,096 teachers, as well as 26 private schools for Coloureds and Asiatics, with 3,445 pupils and 124 teachers.

**FINANCE.** The provincial revenue and expenditure (in R1,000) for the financial year ended 31 March 1963 were as follows:

| Revenue: | | Expenditure: | |
|---|---|---|---|
| | | General administration | 3,119 |
| Provincial taxation and departmental receipts | 48,061 | Education | 47,031 |
| | | Hospitals and public health | 27,623 |
| Subsidies and grants from the State | 65,130 | Roads and bridges | 15,306 |
| | | Miscellaneous services | 2,056 |

## PROVINCE OF NATAL

**HISTORY.** Natal was annexed to Cape Colony in 1844, placed under separate government in 1845, and under charter of 15 July 1856 established as a separate colony. By this charter partially representative institutions were established, and, under a Natal Act of 1893, assented to by Order in Council, 26 June 1893, the colony obtained responsible government. The province of Zululand was annexed to Natal on 30 Dec. 1897. The districts of Vryheid, Utrecht and part of Wakkerstroom, formerly belonging to the Transvaal, were annexed in Jan. 1903. On 31 May 1910 the colony was merged in the Union of South Africa as an original province of the Union.

**ADMINISTRATION.** At the provincial council elections on 14 Oct. 1959 there were returned: United Party, 21; Nationalists, 4.

The seat of provincial government in Natal is Pietermaritzburg.

*Administrator:* T. J. A. Gerdener.

**AREA AND POPULATION.** The province (including Zululand, 10,375 sq. miles) has an area of 33,578 sq. miles, with a seaboard of about 360 miles. The climate is sub-tropical on the coast and somewhat colder inland. It is well suited to White persons. The province is divided into 44 magisterial districts.

The returns of the total population at the censuses were:

**EDUCATION.** The Natal Provincial Administration controls primary and secondary education for Whites, Coloureds and Indians, while higher technical and vocational education for all races is provided by the central government.

In June 1962 there were 70,706 White, 13,577 Coloured, 115,561 Indian and 307,199 Bantu pupils in provincial and aided schools, including 12 teacher-training colleges. The schools for Whites numbered 241, plus 2 training colleges, with a total of 3,452 teachers. There were 43 Coloured schools and 1 training college with altogether 484 teachers; 260 Indian schools plus 1 training college had 3,609 teachers; 1,813 Bantu schools and 8 Bantu training colleges had 5,877 teachers.

There were also 20 private White schools, 1 private Coloured and 10 private Indian schools, with respectively 3,702, 19 and 1,587 pupils and 218, 1 and 37 teachers.

**FINANCE.** The following figures show the provincial revenue and expenditure (in R1,000) for the financial year ended 31 March 1963:

| | | | |
|---|---|---|---|
| Revenue: | | Expenditure: | |
| Provincial collections | 23,994 | General administration | 1,496 |

| | | Miscellaneous | 2,007 |
| Total revenue | 46,606 | Total ordinary expenditure | 45,039 |
| | | Capital expenditure | 5,604 |

**PRODUCTION.** *Agriculture.* Sugar and citrus growing are of major importance. On the coast and in Zululand there are vast plantations of sugar-cane (522,000 acres). In 1961, 8·6m. tons of cane were produced, yielding 994,363 tons of sugar. Cereals of all kinds (especially maize), fruits, vegetables, the *Acacia molissima* (the bark of which is much used for tanning purposes) and other crops are produced. Large areas are being afforested.

*Industry.* Natal is highly industrialized. Metallurgical, chemical, paper, rayon and food-processing plants include iron and steel foundries, petrol refineries, pulp-mills, explosives and fertilizer plants, milk- and meat-canning factories.

*Mining.* The province is rich in mineral wealth, particularly coal. For figures of mineral production, *see* p. 1388.

## PROVINCE OF THE TRANSVAAL

**HISTORY.** The Transvaal was one of the territories colonized by the Boers who left the Cape Colony during the Great Trek in 1831 and following years. In 1852, by the Sand River Treaty, Great Britain recognized the independence of the Transvaal, which, in 1853, took the name of the South African Republic. In 1877 the Republic was annexed by Great Britain, but the Boers were not reconciled to the loss of their independence, and war broke out towards the end of 1880. In 1881 peace was made and self-government, subject to British suzerainty and certain stipulated restrictions, was restored to the Boers. The London Convention of 1884 removed the suzerainty and a number of these restrictions but reserved to Great Britain the right of approval of the Transvaal's foreign relations, excepting with regard to the Orange Free State. In 1886 gold was discovered on the Witwatersrand, and this discovery, together with the great influx of foreigners which it occasioned, gave rise to many grave problems. Eventually, in 1899, war broke out between Great Britain and the Transvaal. Peace was concluded on 31 May 1902, the Transvaal and the Orange Free State both losing their independence. The Transvaal was governed as a crown colony until 12 Jan. 1907, when responsible government came into force. On 31 May 1910 the Transvaal ceased to exist as a separate colony, becoming one of the four provinces of the Union.

**ADMINISTRATION.** At the provincial council election on 14 Oct. 1959 there were returned: National Party, 48; United Party, 20.

The seat of provincial government is at Pretoria, which is also the administrative capital of the Republic of South Africa.

*Administrator:* F. H. Odendaal.

**AREA AND POPULATION.** The area of the province is 109.621 sq. miles, divided into 53 districts. The following table shows the population at each of the last censuses:

Of the non-White population in 1960, 4.633,378 were Bantu, 63,787 Asiatics and 108,007 Coloureds.

Important towns of the province are listed on p. 1397.

**EDUCATION.** All education except that of a university and of a vocational type is under the provincial authority. The province has been divided for the purposes of local control and management into 20 school districts. Instruction in government schools, both primary and secondary, is free. The medium of instruction is the home language (English or Afrikaans) of the pupil. The teaching of the other language begins at the earliest stage at which it is appropriate on educational grounds. Both languages are taught as examination subjects to every pupil above the fifth standard.

In June 1962 there were 5 colleges of education for Whites (5,966 students), 2 for Coloureds and Asiatics (341 students) and 18 colleges for the 1,213 Bantu students. In addition, there were 864 provincial and 16 provincial-aided schools for Whites, with enrolments of 326,409 and 4,513 respectively; 117 provincial and 3 provincial-aided schools for Coloureds and Asiatics, with enrolments of 45,727 and 526 respectively, and 2,618 public Bantu schools with enrolments of 663,574 pupils.

In 85 private White schools there were 23,518 pupils, while 9 Asiatic and Coloured private schools accommodated 1,935 scholars.

**FINANCE.** The following figures show the provincial revenue and expenditure (in R1,000) for the financial year ended 31 March 1963:

| Revenue | | Expenditure: | |
|---|---|---|---|
| Provincial taxation, fees, etc. | 64,215 | General administration | 5,908 |
| Government grant in lieu of general subsidy | 58,281 | Education | 42,482 |

| Total ordinary revenue | 127,220 | Total ordinary expenditure | 128,585 |
| Capital revenue | 17,824 | Capital expenditure | 17,031 |

**PRODUCTION.** *Agriculture.* The province is in the main a stock-raising country, though there are considerable areas well adapted for agriculture, including the growing of tropical crops.

*Industry.* The province has iron and brass foundries and engineering works, grain-mills, breweries, brick, tile and pottery works, tobacco, soap and candle factories, coach and wagon works, clothing factories, etc.

*Mining.* For mineral production, *see* p. 1388. The output of gold for 1957 was 13,262,000 oz. (£165,535,000); 1958, 13,334,000 oz. (£165,512,000);

1959, 14,483,597 oz. (£180,552,100); 1960, 15,030,807 oz. (R376,784,600); 1961, 15,705,749 oz. (R393,575,406).

## PROVINCE OF THE ORANGE FREE STATE

### ORANJE-VRYSTAAT

**HISTORY.** The Orange River was first crossed by Europeans about the middle of the 18th century. Between 1810 and 1820, settlements were made in the southern parts of the Orange Free State, and the Great Trek greatly increased the number of settlers during and after 1836. In 1848 Sir Harry Smith proclaimed the whole territory between the Orange and Vaal rivers as a British possession and established the 'Orange River sovereignty'. However, in 1854, by the Convention of Bloemfontein, British sovereignty was withdrawn and the independence of the country was recognized.

During the first 5 years of its existence the Orange Free State was much harassed by incessant raids by, and fighting with, the Basutos. These were at length conquered, but, owing to the intervention of the British Government, the treaty of Aliwal North incorporated only a part of the territory of the Basutos in the Orange Free State.

On account of the treaty with the South African Republic, the Orange Free State took a prominent part in the South African War (1899–1902) and was annexed on 28 May 1900 as the Orange River Colony. Crown colony government continued until 1907, when responsible government was introduced. On 31 March 1910 the Orange River Colony was merged in the Union of South Africa as the province of the Orange Free State.

**ADMINISTRATION.** At the provincial council election on 14 Oct. 1959 there were returned 25 Nationalists.

The seat of provincial government is at Bloemfontein. There are 66 municipalities and 10 village boards of management.

*Administrator:* J. W. J. C. Du Plessis.

**AREA AND POPULATION.** The area of the province is 49,866 sq. miles; it is divided into 45 districts. The census population has varied as follows:

| | All races | | | White | | Non-White | |
|---|---|---|---|---|---|---|---|
| | *Total* | *Males* | *Females* | *Males* | *Females* | *Males* | *Females* |

Of the non-White population in 1960, 1,083,886 were Bantu, 25,909 Coloureds and 7 Asiatics.

**EDUCATION.** Higher and vocational education is under the control of the central Education Department, while primary and secondary education and the training of primary teachers are controlled and financed by the provincial administration. The province is divided into 24 school districts, for each of which there is a school board elected by the school committees in the district.

Education is free in all public schools up to the university matriculation standard, but certain schools are allowed to charge fees. Attendance is compulsory for Whites between the ages of 7 and 16, but exemption may be granted in special cases. Unless parents object, the two official languages—English and Afrikaans—are taught to all pupils, the home language of the pupil being the chief medium of instruction, and the second language being introduced gradually during the primary school course.

In June 1962 there were 299 public schools for Whites, 7 private schools and 1 training college with enrolments of 65,092, 1,553 and 551 pupils respectively. Teachers in White schools and colleges numbered 3,468. There were 39 public schools for Coloureds with 4,711 pupils and 162 teachers; 1,152 Bantu schools and 5 training colleges accommodated 202,719 and 696 pupils respectively, with a total of 3,352 teachers.

**FINANCE.** The following figures show the provincial revenue and expenditure (in R1,000) for the financial year ended 31 March 1962:

| Revenue: | | Expenditure: | |
|---|---|---|---|
| Provincial collections | 9,398 | General administration | 1,848 |
| Government subsidies | 13,863 | Education | 9,687 |
| Grants (excluding National Road Fund) | 31 | Medical and health services | 3,755 |
| | | Roads, bridges, works | 5,367 |
| | | Interest and redemption | 1,816 |
| Total revenue | 23,293 | Total ordinary expenditure | 22,985 |
| | | Capital expenditure | 2,981 |

**PRODUCTION.** *Agriculture.* The province consists of undulating plains, affording excellent grazing and wide tracts for agricultural purposes. The rainfall is moderate. The country was mainly devoted to stock-farming, but now a rapidly increasing quantity of grain is being raised, especially in the eastern districts.

*Industry.* The more important manufacturing industries in the province are the oil-from-coal factory at Sasolburg; fertilizer, agricultural implement, blanket and woollen products, clothing, hosiery, cement and pharmaceutical factories, grain-mills and brick, tile and pottery works.

*Mining.* For mineral statistics, see p. 1388. The production of the goldfields in the province has increased tremendously since 1951, when the output was 18,545 oz. valued at £230,186. The output in 1961 was **7,235,647 oz. valued at R181,320,401.**

## SOUTH-WEST AFRICA

### Suidwes-Afrika

**HISTORY.** The country was annexed by Germany in 1884, but was surrendered to the Forces of the Union of South Africa on 9 July 1915 at Khorab. The administration was vested in the Government of the Union of South Africa by mandate of the League of Nations dated 17 Dec. 1920. In 1921 the Governor-General delegated certain of his functions to the Administrator of the Territory, who was assisted by an Advisory Council and, from 1925, by an Executive Committee and the Legislative Assembly.

**ADMINISTRATION.** The South-West Africa Affairs Amendment Act, 1949, abolished the Advisory Council as well as the provision for the nomination of a certain number of members of the Legislative Assembly. All 18 members of the Assembly are now elected by the registered voters of the Territory. The elections held on 8 March 1961 returned 16 Nationalists and 2 United Party members

The Territory is represented in the House of Assembly by 6 members elected by the registered voters of the Territory, and in the Senate by 4 Senators, of which number 2 are elected by the members of the Legislative Assembly and the representatives of the Territory in the House of Assembly, and 2 nominated by the President of the Republic. One of the nominated Senators is selected mainly on the ground of his acquaintance with the conditions of the coloured races of South-West Africa. As from 4 Aug. 1961 a Deputy Minister for South-West African Affairs has been appointed.

The seat of the administration is Windhoek. The country is divided into 21 districts controlled by magistrates.

*Administrator:* W. C. du Plessis.

**AREA AND POPULATION.** The total area of the Territory, including the Caprivi Zipfel, is 318,261 sq. miles (824,295 sq. km); that of Walvis Bay, administered by South-West Africa, 374 sq. miles.

The country is bounded on the north by Portuguese West Africa (Angola) and Northern Rhodesia, on the west by the Atlantic Ocean, on the south and southern portion of the eastern boundary by the Cape Province, and on the remainder of the eastern boundary by the Bechuanaland Protectorate and Northern Rhodesia. On the western coast, a strip of approximately 60 miles in width and extending from the Orange River in the south to the Kunene River in the north, which river is also the northern border of what is known as the Kaokoveld, consists of barren desert, and this is also the case in that portion of the Great Kalahari depression which is included in the country on its eastern boundary. The eastern portion is, however, not barren, being good grazing ground.

The Kunene River and the Okavango, which form portions of the northern border of the country, the Zambesi, which forms the eastern boundary of the Caprivi-Zipfel, the Kwando or Mashi, which flows through the Caprivi-Zipfel from the north between the Okavango and the Zambesi, and the Orange River in the south, are the only permanently running streams. But there is a system of great, sandy, dry river-beds throughout the country, in which water can generally be obtained by sinking shallow wells; these are the Kuiseb, Swakop, Omaruru and Ugab on the west; the Fish River in the south; the Nossob, the Auob and the Elephant Rivers in the south-east, and a series of what are known as Omuramba in the north-east, with numerous smaller stream-beds. In the Grootfontein area, which geologists describe as a 'karst' region, there are large supplies of underground water, but except for a few springs, mostly hot, there is no surface water throughout the country.

Owing to the difficulty of satisfactorily controlling that part of the Caprivi-Zipfel, east of the line running due south from Beacon 22, situated west of the Kwando (or Mashi) River, which flows through the Caprivi-Zipfel from the north, as from Aug. 1939 it was decided to transfer the control of this area to the Union Department of Native Affairs.

The White population (1960 cenus) amounted to 73,464, the Bantu and Coloured population to 452,538 and 2 Asiatics; total, 526,004.

Windhoek, the capital, with its surrounding district contains a population of 19,378 Whites and 16,673 Coloureds and Bantu (census 1960).

The principal Native races are the Ovambos, Hereros, Bergdamaras or Klipkaffirs, Namas (Hottentots) and Bushmen.

The Ovambos are a Bantu race and are both agriculturists and owners of stock. They still possess tribal organization to its full extent.

The Hereros are a pastoral people who formerly owned enormous herds of cattle. The Germans oppressed them, their tribal organization completely disappeared and they were scattered throughout the country on farms and in the different towns, where they formed the ordinary source of labour. Under the Union and Republic administration, reserves have been set apart and they have considerably increased in numbers and in animal wealth.

The Bergdamaras are, it is believed, also of Bantu origin, though some authorities hold that they belong rather to the Nama race, whose language they now speak. They are an inferior tribe, and were alternately the slaves of the Hereros and the Namas in pre-European days, according as the former or the latter were in the ascendant.

The Namas consist of 2 distinct sections: one, whose remnants are found in the central portions of the country, being of pure native extraction, is thought to have migrated from the region of the Central African lakes in prehistoric times; the other is composed of tribes whose members are descended from persons born in the Cape a couple of centuries ago with an admixture of European and Nama blood. These tribes, after conflict with their European neighbours, sought refuge across the Orange River.

The Bushmen are among the oldest inhabitants of southern Africa. A number of them have survived in South-West Africa.

In the centre of the country just south of the Windhoek district is the Rehoboth Gebiet, occupied by a race known as the Bastards, whose origin is much the same as the second class of Namas mentioned above, except that the admixture of European blood is much greater and their ordinary language is Afrikaans. These people have a measure of self-government under a council of which the local magistrate is chairman. They number about 8,000.

**EDUCATION** (1962). *White.* There are 60 government schools with 15,539 pupils. Of the children in government schools 6,178 are accommodated in 64 hostels which are conducted by the Administration in conjunction with the government schools.

*Non-White.* The education of the non-Whites is mainly under the supervision of various missions. There are 20 government Bantu schools, 5 government Coloured schools and 123 government-aided mission schools for Coloured (45) and Bantu (78) children, with 21,004 (6,235 Coloured, 14,769 Bantu) pupils. Two Coloured schools have secondary classes with 181 pupils; 2 Bantu schools have secondary classes with 81 pupils. There are 2 training schools for Bantu teachers, 1 government and the other subsidized by the Government, with 87 student teachers in training and 41 students attending technical classes. In addition there are 197 government-aided Bantu schools with 30,801 pupils.

**FINANCE.** The revenue and expenditure (in £ sterling, from 1960 in Rand) were:

| | *1959–60* | *1960–61* | *1961–62* | *1962–63* | *1963–64*[1] |

[1] Estimates.

For the purposes of customs and excise revenue the Territory is included in the South African Customs Union.

**PRODUCTION.** *Agriculture.* South-West Africa is essentially a stock-raising country, the scarcity of water and poor rainfall rendering agriculture, except in the northern and north-eastern portions, almost impossible. Generally speaking the southern half is suited for the raising of small stock, while the central and northern portions are better fitted for cattle. The stock census, 1962, was as follows: 2,298,266 head of cattle, 4,686,715 head of small stock, 33,004 horses, 59,771 donkeys, 3,198 mules and 20,961 pigs. Considerable attention is being paid to the improvement of cattle and the production of butter. The quantity of butter manufactured in 1962 was 5,059,372 lb., of which 2,244,810 lb. were exported. Cheese manufactured at factories was 116,810 lb.

The production of karakul pelts is of increasing importance. The number of pelts exported during 1962 was 2,345,563, valued at R12,666,040.

201,223 head of slaughtered cattle, valued at R10,030,967, was exported to the Republic in 1962.

*Mining.* Mineral export/sales amounted to R53·14m. in 1961 and to R52,131,000 in 1962. Diamonds, which constitute the principal production, are mainly recovered from alluvial terraces on a 60-mile stretch along the coastline from the Orange River mouth northward. Exports in 1961, 907,540 carats, valued at R34,936,582; in 1962, 943,186 carats valued at R34,221,002.

Lead–copper–zinc ores containing silver, germanium and cadmium, lead–zinc, lead–vanadium and tin–wolfram ores are mined in the north. Beryl, lithium ores, tin, tantalite and semi-precious stones are recovered mainly from pegmatite deposits in the east, central and west; manganese is worked in the western section of the Territory. Kyanite and copper are mined in the central section, and salt is recovered from pans on the central coast north of Swakopmund.

Exports (1962, in short tons): Beryl, 130 (R26,130); copper ore, 1,612 (R102,762); lead–copper zinc, 189,209 (R14,056,657); lithium ores, 1,969 (R33,876); lead–vanadium, 8,505 (R625,626); tantalite, 12,802 lb. (R15,905); tin, 183 (R176,339); tin–wolfram, 403 (R250,000); salt, 84,005 (R293,000); germanium, 15·84 (R1,343,246); blister copper, 793 (R302,258); amethyst, 4·78 (R7,005); chalcedony, 2·37 (R1,540).

**COMMERCE.** The statistics concerning the external trade of South-West Africa are included in those of the Republic of South Africa.

The bulk of the direct imports into the country is landed at Walvis Bay, which is now administered as a portion of South-West Africa, and the Government proposes to develop this port as the main harbour.

Total trade between South-West Africa and UK, in £ sterling (British Board of Trade returns):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK | 8,036,786 | 9,011,198 | 7,484,741 | 11,655,817 | 14,502,000 |
| Exports from UK | 1,336,281 | 1,492,495 | 2,053,327 | 1,758,719 | 1,637,333 |
| Re-exports from UK | 2,627 | 806 | 1,981 | 2,250 | 17,815 |

**COMMUNICATIONS.** *Railways.* The railway line from Walvis Bay to Nakop extends southwards and connects with the main system of the South African Railways at De Aar. The total length of the line inside South-West Africa is 1,486 miles of 3 ft 6 in. gauge.

*Roads.* The Railway Administration also operates well-developed road motor services, including a weekly service from Karasburg to Cape Town. The service between the railhead at Grootfontein *via* Tsumeb and Angola border has established an important link between South-West Africa and Portuguese West Africa, and that between Gobabis station and Buitepos, on the farm Sandfontein, links South-West Africa with Bechuanaland.

*Shipping.* In 1962 Walvis Bay harbour handled 804,339 tons of cargo (907,104 in 1961).

*Post.* At 31 March 1963 there were 143 post offices and 1,198 private bag services distributed by rail or road transport.

On 31 March 1963 there were 9,005 circuit miles of trunk lines, 36,831 miles of carrier circuits, 30,428 miles of telegraph circuits and 15,990 miles of farm telephone lines; 105 telegraph offices, 109 telephone exchanges, 343 public call offices and 17,483 rented telephones. There are 15 point-to-point radio stations in operation.

As at 31 March 1963, 29,374 wireless licences were issued.

A post office savings bank was established in 1916. The number of accounts open at 31 March 1963 was 49,316 with a credit of R3,488,263. Savings certificates of a value of R200 are also issued. The balance due to holders as at 31 March 1963 amounted to R420,400.

*Aviation.* The Territory is served by regular air services between Windhoek and Cape Town, Johannesburg, Upington and Salisbury.

*Banking.* Barclays Bank DCO has 17 branches and 19 agencies.

# SPAIN

### ESTADO ESPAÑOL

**GOVERNMENT AND CONSTITUTION.** The Spanish State was established by Gen. Franco's victory on 1 April 1939. For a short account of the Civil War in Spain, 17 July 1936 to 28 March 1939, *see* THE STATESMAN'S YEAR-BOOK, 1939, pp. 1325–26. On 1 Feb. 1938 the first civil government was proclaimed, with Gen. Franco, possessing dictatorial powers, at its head. It was, on 11 July 1962, reconstituted as follows:

*Leader (Caudillo) of the Empire, Chief of the State, C.-in-C. of the Armed Forces, Prime Minister and Head of the Falange Party:* Gen. Francisco Franco Bahamonde (born 4 Dec. 1892).
*Vice-President of Government:* Capt.-Gen. Agustín Muñoz Grandes.
*Foreign Affairs:* Fernando María Castiella y Maiz.
*Army:* Gen. Pablo Martín Alonso.
*Navy:* Vice-Adm. Pedro Nieto Antúñez.
*Air:* Gen. José Lacalle Larraga.
*Justice:* Antonio Iturmendi Bañales.
*Secretary-General of the Falange Party:* José Solís Ruiz.
*Finance:* Mariano Navarro Rubio.
*Industry:* Gregorio López Bravo de Castro.
*Commerce and Food:* Alberto Ullastres Calvo.
*Agriculture:* Cirilo Cánovas García.
*Education:* Manuel Lora Tamayo.
*Public Works:* Gen. Jorge Vigón Suerodiaz.
*Labour:* Jesus Romeo Gorria.
*Interior:* Gen. Camilo Alonso Vega.
*Information and Tourism:* Manuel Fraga Iribarne.
*Housing:* José María Martínez Sánchez Arjona.
*Under-Secretary of the Presidency:* Vice-Adm. Luis Carrero Blanco.

On 31 March 1947 Gen. Franco announced that Spain is to become a monarchy, with a regency council and himself as the head of state. In the case of the incapacitation or death of the Chief of State, the regency council is to propose, by a two-thirds majority, a king or regent, who must be accepted by a two-thirds majority of the Cortes. On 6 July 1947 this 'Law of Succession' was approved by a referendum: out of a total of 17,178,812 electors, 14,145,163 voted for, and 722,656 against it; 351,744 votes were invalid.

*National flag:* Red, yellow, red (horizontal).
*National anthem:* Marcha granadera.

On 19 April 1937 the various political groups in the Nationalist Movement were united by Gen. Franco into one single political party, under the title *Falange Española Tradicionalista y de las Juntas de Ofensiva*

*Nacional Sindicalistas*, comprising the *falange española* or falangists created on 29 Oct. 1933 by José Antonio Primo de Rivera, eldest son of the general who was Dictator of Spain from 1923 to 1930, the traditionalists with the remaining monarchical groups, and the followers of Gil Robles, the leader of the right-wing *Acción Popular*.

This single party is ruled by a National Council composed of 100 members, or *Consejeros Nacionales*. The Government is further assisted by a *Junta Política*, presided over by the Chief Executive of the Movement.

The law of July 1942 re-established the Spanish *Cortes* (on corporative lines) as the supreme organ of state for the preparation and enactment of laws. The Cortes is composed of *Procuradores* (attorneys), either by election or by virtue of the state office or position held, as follows: (1) The Cabinet Ministers, 18; (2) the Members of the National Council, 103; (3) the Presidents of the State Council, of the Supreme Court of Justice and of the High Court of Military Justice, 3; (4) the representatives of the National Syndicates, elected from among their bodies, not to exceed one-third of the total number of *procuradores* in the Cortes, 142; (5) the *Alcaldes* or mayors of each of the 50 capitals of provinces, the cities of Ceuta and Melílla, and a representative for the remaining municipalities of each province appointed by the respective Provincial Assembly or *Diputación Provincial*, 102; (6) the heads of the universities, 12; (7) the Presidents of the Institute of Spain and of each of the royal academies composing it, and the 'Chancellor of Hispanity', 6; (8) the President of the Institute of Civil Engineers, 1; (9) 2 barristers to represent the inns of court, and 1 representative each for the medical, pharmaceutical, veterinary and architectural professions, 6; and (10) members appointed by the Chief of State, among persons of high standing in the ecclesiastical, military, administrative or social life who have rendered eminent services to Spain, 50; making a total of 441.

The Cortes have approved the law known as *Fuero de los Españoles*, proclaimed by Gen. Franco on 18 July 1945, by which civil rights are granted to the people. The *Fuero*, the Law of Succession, the constitution of the Cortes and similar fundamental laws which may be promulgated at some future date can only be modified or abrogated by a national referendum.

LOCAL GOVERNMENT. The provinces are constituted by the association of municipalities (9,214 in 1950). All municipalities are autonomous in their respective spheres, and at their heads stands the *Ayuntamiento*. The municipal councils are elected by the heads of family. The *Alcalde* or Mayor and the *Regidores* or councillors (in Madrid and Barcelona, 34 in number) are appointed by the Government. The *Diputaciones Provinciales* have entire jurisdiction over their own province and are their sole administrators. Each island of the Canaries has a corporation known as *Cabildo Insular*, to rule their special interests; the Balearic Islands have the same provincial administration as the mainland. Each province of Spain has its own Assembly, the *Diputación Provincial*.

The reconstruction of devastated regions is under the care of the *Dirección General de Regiones Devastadas*, a government department under the Ministry of the Interior, assisted by the *Junta de Reconstrucción*, the *Instituto de la Vivienda* and by the *Instituto de Crédito para la Reconstrucción Nacional*, created by law of 16 March 1939, whose duty is to grant and administer loans approved for reconstructing buildings, industries, agriculture, commerce and mining, and merchant vessels. On 7 Oct. 1939 the Chief of State was authorized to adopt towns, villages and other localities severely damaged by the civil war, and the State was given special powers for expropriation.

**AREA AND POPULATION.** Continental Spain has an area of 491,258 sq. km, and including the Balearic and Canary Islands 503,545 sq. km (194,945 sq. miles).

The growth of the population since 1857 has been as follows:

| Census year | Population | Rate of annual increase | Census year | Population | Rate of annual increase |
|---|---|---|---|---|---|
| 1860 | 15,655,467 | 0·34 | 1920 | 21,303,162 | 0·69 |

In 1960 there were 14,763,388 males and 15,667,310 females.

By decree of 21 Sept. 1927 the islands which form the Canary Archipelago were divided into 2 provinces, under the name of their respective capitals: Santa Cruz de Tenerife and Las Palmas de Gran Canaria. The province of Santa Cruz de Tenerife is constituted by the islands of Tenerife, Palma, Gomera and Hierro, and that of Las Palmas by Gran Canaria, Lanzarote and Fuerteventura, with the small barren islands of Alegranza, Roque del Este, Roque del Oeste, Graciosa, Montaña Clara and Lobos. The area of the islands is 7,273 sq. km; population (1 Jan. 1959), 908,718.

Places under spanish sovereignty in Morocco are: Alhucemas, Ceuta, Chafarinas, Melilla and Peñón de Vélez.

The following were the registered populations of the principal towns at 1 Jan. 1963:

| Town | Population | Town | Population | Town | Population |
|---|---|---|---|---|---|
| Albacete | 74,974 | Granada | 157,663 | Oviedo | 132,759 |
| Alicante | 126,107 | Hospitalet | 143,948 | Palma de Mallorca | 164,963 |
| Almería | 89,470 | Huelva | 77,231 | Pamplona | 105,397 |

| Gijón | 126,590 | Orense | 66,403 | Zaragoza | 343,468 |

The movement of population for calendar years was as follows:

| | Marriages | Births | Deaths | Immigrants | Emigrants |
|---|---|---|---|---|---|
| 1960 | 235,315 | 654,151 | 261,979 | 23,114 | 33,242 |
| 1961 | 237,160 | 645,260 | 253,211 | 24,197 | 34,370 |
| 1962 | 236,488 | 650,091 | 271,591 | 22,321 | 32,295 |

**RELIGION.** Under the Franco régime Catholicism is again established as the religion of the State. Religious bodies have recovered their legal status; confiscated property has been returned; allowances to clergy are again paid by the State; divorce is suppressed; cemeteries are brought back to ecclesiastical jurisdiction. There are 10 metropolitan sees and 64 suffragan sees, the chief being Toledo, where the Primate resides.

A concordat was signed in Rome on 27 Aug. 1953 to replace the concordat of 1851, which the Republic had denounced in 1931.

There are about 26,000 Protestants, with 200 churches and chapels, outside which no public ceremonies are permitted. There is no liberty for propaganda, and the circulation of Holy Scripture, except in annotated Roman Catholic editions, is forbidden. Several churches were closed in 1958 and 1959. The British and Foreign Bible Society was, on 10 March 1963, allowed to resume its activities.

The first Jewish synagogue since the expulsion of the Jews in 1492 was opened in Madrid on 2 Oct. 1959. The number of Jews is estimated at about 1,000.

**EDUCATION.** Educational administration is controlled by the *Sindicato Español Universitario* (SEU). The country is divided into 12 educational districts, with the universities as centres. Primary education is compulsory and free. The *Frente de Juventudes* (Youth Front) was created by law of 6 Dec. 1940; it comprises 3 sections (educational, labour, rural) and had, in 1958, 1,494,413 members. There is also the University Militia for army training under conscription.

In 1961–62 there were 100,970 primary schools attended by 3,201,716 pupils, with 99,448 teachers, including 6,735 private schools with 264,132 pupils and 6,580 teachers. Secondary education is conducted in 'institutos', or middle-class schools. There were, in 1961–62, 2,161 institutos with 657,194 pupils and 37,609 teachers. These schools prepare for the universities, of which there are 12, attended (1961–62) by 64,361 students (15,891 women), with 4,097 teachers. The universities are at Barcelona, Granada, Madrid, Murcia, Oviedo, Salamanca, Santiago, Sevilla, Valencia, Valladolid, Zaragoza and La Laguna (Canaries). There is, besides, a medical and science faculty at Cádiz in connexion with the University of Seville.

In 1960, 3,158,850 persons over 10 years of age (14·24%) could not read or write. A literacy test for all Spaniards born after 31 Dec. 1946 was introduced in 1963, to be able to vote, occupy administrative posts or obtain government contracts.

*Cinemas* (1961). There were 7,395 cinemas with a seating capacity of 4,355,732.

*Newspapers* (1960). There appeared 133 daily newspapers with a total annual circulation of 653,696,000 copies. Nine of them were published in Madrid (222,683,000) and 8 in Barcelona (121,875,000); all must be printed in Castilian.

**JUSTICE.** Justice is administered by *Tribunales* and *Juzgados* (Tribunals and Courts), which conjointly form the *Poder Judicial* (Judicial Power). Judges and magistrates cannot be removed, suspended or transferred except as set forth by law.

The Judicature is composed of the *Tribunal Supremo* (Supreme High Court); 15 *Audiencias Territoriales* (Division High Courts); 50 *Audiencias Provinciales* (Provincial High Courts); 579 *Juzgados de Primera Instancia* (Courts of First Instance), and 9,329 *Juzgados Municipales, Comarcales y de paz* (District Court, or Court of Lowest Jurisdiction held by Justices of the Peace).

The *Tribunal Supremo* consists of a President (appointed by the Government) and various judges distributed among 8 chambers: 1 for trying civil matters, 2 for administrative purposes, 1 for criminal trials, 1 for social matters and 3 for jurisdictional disputes. The *Tribunal Supremo* has disciplinary faculties; is court of cassation in civil and criminal trials; for administrative purposes decides in first and second instance disputes arising between private individuals and the State, and in social matters resolves in the last instance all cases involving over 20,000 pesetas.

The *Audiencias Territoriales* have power to try in second instance sentences passed by judges in civil matters.

The *Audiencias Provinciales* try and pass sentence in first instance on all cases filed for delinquency. The jury system is in operation except for military trials.

The *Juzgados Municipales* try small civil cases and petty offences. The *Juzgados Comarcales* deal with the same charges, but their jurisdiction embraces larger districts.

Military cases are tried by the *Tribunal Supremo de Justicia Militar.*

The prison population was, on 1 Jan. 1963, 13,735, including 1,092 women.

**SOCIAL WELFARE.** Schemes of wide social range include the Labour Charter (*Fuero del Trabajo*) of 9 March 1938, for a better distribution and remuneration of the working classes, with uninterrupted Sunday and feast-day wages. The law of Family Subsidy (*Subsidio Familiar*), which came into force on 1 March 1939, makes all working people contribute 1% of their earnings, plus an additional 6% from the employers, in a system of social insurance which entitles all families with from 2 to 12 children under 14 years of age to a proportional monthly allowance ranging from 60 to 4,500 pesetas, with an additional 3,000 pesetas for each child in excess of 12 (2 Sept. 1955). Married workers receive an additional bonus. Since 1949, old age pensions and health and maternity insurances have been added; workers contribute 1% and employers 5%. A decree of 22 Feb. 1941 established state loans on marriage to help large families, and the institution known as *Auxilio Social*, the funds of which are derived among other channels from a fortnightly public collection throughout the country, for supplying food and clothing to needy persons and the maintenance of nurseries and infirmaries. A national health insurance for all workers is now also in operation.

By a law dated 27 Feb. 1908 the *Instituto Nacional de Previsión* was founded for the purpose of granting old age pensions and administering a system of social insurance. The family-allowance and health-insurance schemes, described above, have been incorporated in the *Instituto*. In 1962, 1,585·2m. pesetas were paid out in family subsidies to 2,645,000 persons; 196·8m. pesetas were paid out in sickness benefits; 3,540m. pesetas for old age pensions, and 468m. pesetas in injury benefits.

**FINANCE.** Revenue and expenditure for budgetary periods of 2 calendar years, in 1,000 pesetas:

| | *1956/57* | *1958/59* | *1960/61* | *1962/63* | *1964/65* |

The total state debt on 1 Jan. 1963 was 156,347m. pesetas, of which 10,426,948,885 pesetas were Treasury bonds.

**DEFENCE.** On 26 Sept. 1953 the US and Spain signed three agreements covering the construction and use of military facilities in Spain by the US, economic assistance, and military end-item assistance. The American naval and air base at Rota (near Cádiz) is connected by pipelines with the American bomber bases at Morón de la Frontera (near Seville), Torrejón (near Madrid) and Zaragoza.

The agreement was renewed for a further 5 years on 26 Sept. 1963, when, in addition, a joint consultative committee was set up, with headquarters in Madrid.

Army. The Army was reorganized by a decree published on 24 July 1939 to be constituted by 8 army corps in the Peninsula and 2 in Morocco, in addition to the 2 *Comandancias Generales* in the Balearic and Canary Islands as heretofore. A decree of 30 Aug. 1939 created the High General Staff of the Army as the highest military authority.

On 21 Aug. 1940 military service was made compulsory for 2 years.

On 20 Dec. 1943 the Falangist Militia were dissolved.

On 1 Jan. 1944 a slight reorganization was made by withdrawing from the 2nd Región Militar the eastern provinces of Granada, Malaga and Almeria, which were to form the 9th Región Militar. After this reorganization there were 8 army corps attached to the 8 original military regions; 1 Región Militar, the 9th, with 1 division only and the Capitanias Generales on the Balearic and Canary Islands as heretofore.

The army corps are as follows: I, Madrid, 2 divisions; II, Sevilla, 2 divisions; III, Valencia, 2 divisions; IV, Barcelona, 2 divisions; V, Zaragoza, 2 divisions; VI, Burgos, 2 divisions; VII, Valladolid, 2 divisions; VIII, Coruña, 2 divisions; 9th Región Militar, 1 division. There are also 1 armoured division and 1 independent cavalry division attached to the 1st Región Militar (Madrid).

In Africa the army corps are as follows: IX (Ceuta), 2 divisions; X (Melilla), 2 divisions. There is also 1 armoured brigade and 1 independent cavalry brigade.

| 1925 | Galicia | 8,250 | | | | | |

The anti-aircraft cruiser *Méndez Núñez* was stricken from the list in 1963.

There are 25 destroyers, 8 frigates, 6 corvettes, 5 submarines, 6 frigate minelayers, 13 minesweepers, 12 coastal minesweepers, 2 submarine chasers, 3 motor torpedo-boats, 17 motor launches, 10 coastguard patrol vessels, 4 midget submarines, 2 training ships, 3 surveying vessels, 5 patrol craft, a river patrol boat, 8 landing ships, 4 oilers, 2 transports, 2 tenders, a boom defence vessel and 10 sea-going tugs.

Shipbuilding is mainly carried on at the dockyards at Ferrol and Cartagena, Cádiz having a smaller share in it.

There are naval wireless telegraphic stations at Cádiz, Barcelona, Mahón, Pontevedra, Cartagena and El Ferrol.

Barcelona, Bilbao, Seville and Cádiz are the chief of the 26 naval yards.

In 1963 naval personnel totalled 43,000 officers and ratings, including marines.

Air Force. The Air Force is organized as an independent service, dating from 1939. It comprises 5 air regions (with HQ at Madrid, Seville, Valencia, Zaragoza and Valladolid), 2 overseas air zones (Balearic and Canary Islands) and a separate Air Defence Command, which controls interceptor squadrons (including USAF elements) and control and warning stations.

The most important combat units are 6 wings (each with 3 25-plane squadrons) of F-86F Sabre jet-fighters. Other operational units are equipped with obsolescent aircraft, including 2 wings of Spanish-built Messerschmitt BF109 piston-engined fighter-bombers and 5 wings of Heinkel He111 bombers. Two transport wings operate a total of more than 200 C-54s, C-47s and Spanish-built Alcotán, Halcón and Azor transports. Large training and helicopter units bring the total strength of the Air Force to about 2,800 aircraft. Many trainers are of Spanish design.

**PRODUCTION.** A 4-year development plan, 1963–67, envisages a total investment of 355,000m. pesetas.

*Agriculture.* Spain is mainly an agricultural country. Land under cultivation in 1961 (in 1,000 hectares) was:

| | | | | | |
|---|---|---|---|---|---|
| Cereals | 7,244 | Potatoes | 381 | Artificial meadows | 821 |

In 1961, 1,617,000 hectares were under vines; production of wine was 20,482,000 hectolitres. The area of onions planted was 35,715 hectares, yielding 8,366,000 quintals. Other products are esparto (811,540 quintals), flax, hemp and pulse. Spain has important industries connected with the preparation of wine and fruits. Silk culture is carried on in Murcia, Alicante and other provinces; 521 tons were produced in 1961. Spain produced in 1962, 9,068 tons of honey and 597 tons of beeswax. The production of turpentine in 1960 was 47,156 metric tons. Beer factories produced 468·5m. litres in 1962.

Tobacco crop in 1961 was 31,000 tons; sugar-cane, 325,000 tons; sugar beet, 3·7m. tons.

The number of farm animals in 1962 was estimated as follows (in 1,000): Horses, 440; mules, 1,042; asses, 641; cows, 3,683; sheep, 20,099; goats, 2,599; pigs, 6,118; domestic rabbits, 4,132; fowls, 40,132.

*Fishery.* The most important catches are those of sardines, tunny fish and cod. The total catch amounted in 1962 to 782,800 tons, representing a value of 7,829·7m. pesetas. In the tinned fish industry there were 789 factories, producing (in 1962) 61,515 tons. The Spanish fishing fleet consists of 34,220 vessels of 400,000 tons.

*Mining.* Spain is rich in minerals. The production of the more important minerals in 1962 were as follows (in metric tons):

| | | | | | |
|---|---|---|---|---|---|
| Anthracite | 3,623,812 | Lead ore | 104,520 | Tin ore | 476 |
| Coal | 10,256,458 | Manganese ore | 13,934 | Zinc ore | 139,424 |
| Lignite | 2,696,771 | Potash ore | 1,575,701 | Wolfram ore | 690 |
| Copper ore | 19,493 | Rock salt | 614,293 [1] | Ilmenite | 48,212 |
| Iron ore | 5,841,289 | Sulphur | 26,460 | Silver (troy oz.) | [illegible] |
| Iron pyrites | 1,568,642 | Aluminium | 40,943 | Gold (troy oz.) | 7,388 |

[1] 1961.

In 1962, 370,464 workers were employed in the mining and metallurgical industries. The total value of the mining production was 12,108m. pesetas; of metallurgical production, 30,154m. pesetas. In 1962 Spain produced 2,017,737 tons of pig-iron and 2,225,000 tons of steel ingots and castings. A uranium plant to supply the material for nuclear energy was inaugurated at Andujar in Andalusia in Feb. 1960.

*Industry.* The manufacture of cotton and woollen goods is important, principally in Catalonia. In 1962 there were 2,000 cotton factories in operation, with 53,669 looms and 2,378,000 spindles, employing 211,025 workmen. Production (1962): 15,975 tons of woollen, 104,623 tons of cotton manufactures, 54,000 kg of silk yarn, 1,920 tons of rayon. There are in Spain 225 paper-mills, which produced in 1962, 394,635 tons of writing, printing, packing and cigarette paper. The production of cork in 1962 was 107,360 tons. The production of cement reached 6,788,217 tons in 1962.

*Power.* Electric power-stations numbered 1,232 (1,002 hydraulic) with a total of 8,779,000 kva and the total output registered amounted to 22,900m. kwh. in 1962, of which 15,900m. kwh. was hydraulic.

**Labour.** The economic policy is centred on vertical syndicates (trade unions) created under the Charter of Labour on 8 Aug. 1939, replacing the former local and provincial syndicates. The law of 23 June 1941 classified these syndicates into 26 branches of production, each working within its own respective economic sphere, without interrupting their unity or formation. The individual is replaced by the producing concern as a whole, made up of the capitalists, managers, experts and all those rendering some sort of labour, whether intellectual or manual. The vertical syndicate is invested with authority and hierarchy. The appointments are made from top to bottom. At the top stands the National Delegate of Syndicates, who is responsible for his conduct to the Minister who appoints him. Production, wages, prices and the distribution of domestic and foreign merchandise are controlled, and legislation has been adopted requiring government permission for the establishment of new industries.

On 10 Oct. 1953 a committee was appointed to provide for the participation of workers in the management of industrial concerns employing more than 1,000 workers.

**COMMERCE.** Foreign trade of Spain (Peninsula, Baleares, Canaries, Ceuta, Melilla), exclusive of Spanish Morocco and Guinea (in 1,000 gold pesetas until 1959, in 1,000 pesetas from 1960):

| | *1959* | *1960* | *1961* | *1962* |
|---|---|---|---|---|
| Imports | 2,433,184 | 43,287,301 | 65,537,081 | 82,397,618 |
| Exports | 1,486,994 | 43,523,662 | 42,574,804 | 39,480,052 |

In 1962 the most important items of import were: Machinery and electrical equipment, 115,477 tons, 16·2m. pesetas; mineral products

·78m. tons, 11·9m. pesetas; base metals and manufactures, 945,765 tons, ·47m. pesetas; vegetables, 1·38m. tons, 7·21m. pesetas; chemicals, 1·19m. ons, 7·18m. pesetas; textiles, 156,405 tons, 6m. pesetas; transport equipment, 163,102 tons, 5·78m. pesetas. The main items of exports were: egetables, 1·77m. tons, 13·4m. pesetas; food, drink, tobacco, 378,542 tons, ·8m. pesetas.

In 1962 Spain exported 1,059,500 metric tons of oranges; to Germany, 27,900; France, 146,900; UK, 118,600; Netherlands, 112,900; Belgium nd Luxembourg, 89,600; Sweden, 48,000; Switzerland, 30,000; Norway, 7,100; Denmark, 16,800.

Total trade between Spain and UK, in £ sterling (British Board of Trade eturns):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| mports to UK | 35,255,364 | 55,889,460 | 54,848,087 | 53,993,779 | 53,699,401 |
| xports from UK | 20,392,623 | 24,860,330 | 32,207,287 | 52,619,747 | 60,343,308 |
| e-exports from UK | 903,576 | 1,046,114 | 1,262,873 | 1,230,548 | 1,333,721 |

In Dec. 1948 special exchange rates were established to facilitate Spanish xports to the sterling and dollar countries, Belgium, Denmark, Netherlands, Portugal, Sweden and Switzerland.

COMMUNICATIONS. *Shipping.* The merchant navy on 1 Jan. 1963 contained 2,037 vessels of a gross tonnage of 1,998,875.

In 1961, 83,391 ships entered Spanish ports, carrying 1,998,875 passengers and discharging 34,997,000 tons of cargo; 83,248 ships cleared, carrying 1,153,374 passengers and loading 27,615,000 tons of cargo.

*Roads.* In 1962 the total length of highways and roads in Spain was 132,072 km, of which 80,245 km were macadamized. Number of motor cars was 1,487,810 in 1962.

*Railways.* The total length of the railways in 1961 was 18,022 km, of which 13,436 km are of a broad gauge (1·67 metres) and 4,589 km are of varying gauges, chiefly 1 metre. There are 2,189 km of lines electrified. On 1 Feb. 1941 the Spanish railways, of normal gauge only, passed into state ownership; they are under a board known as the *Red Nacional de Ferrocarriles Españoles* (RENFE). The gauge of the principal Spanish railways has, for strategic reasons, been kept different from that of France and Portugal; passengers therefore must change trains at the frontier stations.

Number of passengers carried in 1962 by government-owned lines was 128,457,837; operating revenue was 10,696m. pesetas; operating expenditure, 12,847m. pesetas.

There were 22 main lines of normal gauge and 55 of narrow gauge, the most important being those in the north, with 3,803 km; Madrid–Saragossa–Alicante (system Antigua and Catalana), 3,670 km; Andaluces, 1,644 km; Madrid–Cáceres–Portugal and west, 1,587 km; south of Spain, 397 km; La Robla to Valmaseda and Luchana (narrow gauge), 312 km, and Calatayud–Teruel–Valencia (Central de Aragón), 299 km. Length of subways in Madrid (1961) was 39 km; in Barcelona, 21 km.

*Post.* The receipts of the post office in 1962 were 2,010m. pesetas; expenses, 1,385m. pesetas. There were 13,755 post offices, 7,506 telephone exchanges and (1963) 2,096,100 telephones.

The length of telegraph lines in 1962 was 40,492 km: number of telegraph offices, 6,785; receipts, 520m. pesetas; expenses, 562m. pesetas.

The 'Compañía Nacional de Telegrafía sin Hilos' holds the government concession for the public service with ships, and between the Peninsula and the Canary Islands, and the international service with England, Italy, France, Switzerland and America, as well as various special press services. The National Radio Service 'Redera' operates a broadcasting station at Arganda, 15 miles from Madrid.

The overseas radio-telegraph circuits are operated in Spain mainly by Transradio Española, SA. Under an agreement with Cable and Wireless, Ltd, London, Transradio Española lease and operate the Bilbao end of the Bilbao–Great Britain cable and the Barcelona end of the Barcelona–Marseilles cable.

*Aviation.* The most important Spanish airline is 'Iberia'; it maintains a regular service with Tangier, Morocco, the Balearic and Canary Islands, Lisbon, Switzerland, London, Buenos Aires, Venezuela, Cuba, Canada and USA. There are 37 civilian and 7 military airports.

In 1962, 91,964 aircraft entered Spain, carrying 2,216,000 passengers and 13,111 metric tons of merchandise; 2·23m. passengers and 12,586 metric tons of merchandise left Spain by air.

**MONEY.** The *peseta* of 100 *céntimos* had the nominal value of a pre-war franc, 9½*d*., or 25·22 pesetas to the £ sterling. The exchange value of the peseta has not been restored to parity since the War, and in Nov. 1963 stood at 167·5 = £1.

Bank-notes of 1,000, 500, 100, 50, 25, 5 and 1 peseta value are in circulation. The denominations of coins are 5 and 10 *céntimos* (aluminium, tin and copper), 1 *peseta* (copper and aluminium) and 5, 25 and 50 *pesetas* (nickel and copper).

**BANKING.** On 1 Jan. 1922 the Bank of Spain came under the Bank Ordinance Law, according to which the Government participates in its net profits. The bank is now authorized to increase the capital up to the limit of 250m. pesetas. The law of 13 March 1942 provides for the issue of Treasury bonds amounting to 4,437,782,014 pesetas as a guarantee to offset liabilities of the war period entered by the Republican Government. On 18 Dec. 1950 the authorized issue of bank-notes was raised from 28,000m. (11 Jan. 1948) to 45,000m. pesetas. On 31 Dec. 1946 a bank ordinance was issued, regulating the activities of private banks.

In 1963 the Banco Central set up the Banco de Fomento (capital, 225m. pesetas) for long-term financing; the new bank is to absorb the Banco Central's investment company (Hispana de Inversiones), after which its capital is to be increased by 75m.

On 31 Aug. 1963 the note circulation totalled 126,171m. pesetas and the gold holdings of the Bank of Spain amounted to 3,953,005,815 pesetas (paper). A decree of 11 July 1941 established the voluntary nationalization of foreign banks in Spain, and the transference and amalgamation of the business of national banks.

Gold reserves at 31 Aug. 1963 consisted of: Revalued gold of Bank of Spain, 2,808,218,473 pesetas (paper); authorized gold acquisition, 28,279,104 pesetas; treasury gold, 1,144,787,342 pesetas (paper); current accounts of institute of foreign exchange, 65,069m. pesetas; gold in current accounts, 16,455m. pesetas.

Savings bank deposits (Popular Savings Banks) in Spain, 31 July 1963, amounted to 132,525m. pesetas. Post office savings banks opened on 12

March 1916. Deposits, 31 July 1963, amounted to 9,398m. pesetas; private banks saving deposits to 88,388m. pesetas.

By a decree of 20 Nov. 1941 the post office savings bank opens an account with an initial entry of 1 peseta for every Spanish child born.

**WEIGHTS AND MEASURES.** On 1 Jan. 1859 the metric system of weights and measures was introduced, but the old weights and measures are still largely used. They are: The *quintal* = 220·4 lb. avoirdupois; the *libra* = 1·014 lb. avoirdupois; the *arroba*, for wine = 3½ Imperial gallons; for oil = 2¾ Imperial gallons; the *square vara* = 1·09 vara = 1 yard; the *fanega* = 1½ Imperial bushels.

## PROVINCES IN AFRICA

In Jan. 1958 the territory of 'Spanish West Africa' was divided into the provinces of Ifní and Spanish Sahara; both are under the jurisdiction of the commanding officer of the Canary Islands.

Trade of the Spanish territories with UK (British Board of Trade returns in £ sterling):

| | Imports to UK | | | Exports from UK | | |
|---|---|---|---|---|---|---|
| | *1961* | *1962* | *1963* | *1961* | *1962* | *1963* |
| Canary Islands . | 13,664,602 | 15.197,746 | 15,494,448 | 5.667.142 | 6,685,460 | 7,672,098 |
| North Africa . | 444 | 14.724 | 3,458 | 199.909 | 272,244 | 269,384 |
| West Africa . | 507.772 | 200,947 | 86,479 | 948.286 | 747,845 | 509,392 |

The establishment of new foreign enterprises of any kind in the territories of Spanish West Africa has been prohibited by a presidential order of 27 Nov. 1950. Foreign enterprises already established may continue their activities, but without the possibility of extending the scope or increasing the capital.

The **Province of Ifní** is situated on the Atlantic coast, 1,300 km from Tetuan. It is bounded to the south by the Asaka River (called Nun by France). Its area is 1,500 sq. km (580 sq. miles), the population (1960), 49,889; the capital is Sidi Ifní. Ifní was ceded to Spain by Morocco in 1860, but the occupation was purely nominal until 6 April 1934, when the Spanish flag was hoisted for the first time.

*Governor-General:* Gen. Adolfo Artalejo Campos.

The **Province of Spanish Sahara** consists of 2 districts: El Aaiún and Villa Cisneros. Area, 266,000 sq. km (102,680 sq. miles). Population (1960), 23,793. The capital is El Aaiún (population, 4,000–5,000). The strip between 27° 40′ N. and Wad Draa was ceded by Spain to Morocco on 10 April 1958.

*Governor-General:* Gen. Pedro Latorre Alcubierre.

The **Equatorial Region** consists of the provinces of Río Muni and Fernando Poo. Río Muni comprises the continental zone (26.000 sq. km, 10,040 sq. miles) and the islands of Corisco, Elobey Grande and Elobey Chico (17·4 sq. km, 6·6 sq. miles); the capital is Bata (3.548 inhabitants); total population (census 1960), 183.377, including 2,864 Europeans. Fernando Poo comprises the islands of Fernando Poo (2,017 sq. km. 778·5 sq. miles; 61,197 inhabitants, including 4,220 Europeans) and Annobón (17 sq. km, 6·5 sq. miles; 1,415 inhabitants); the capital is Santa Isabel (19,869 inhabitants), which is also the capital of the region.

*Governor-General:* Adm. Francisco Núñez Rodríguez.

In 1962 there were 127 elementary schools with 20,093 pupils, 15 primary schools with 1,349 pupils and 3 secondary schools with about 900 pupils.

In 1961 Guinea exported to Spain 202,089 metric quintals of cocoa valued at 722m. pesetas; 58,000 metric quintals of coffee valued at 319m. pesetas; 145,269 metric quintals of fruits and other products valued at 90·3m. pesetas and 2,107,262 metric quintals of wood valued at 219·4m. pesetas. In 1962 exports totalled 1,974m. pesetas, imports 1,151m. pesetas.

The aborigines of Fernando Poo are called Bubis. Those of Elobey and Corisco are mostly of the Benga tribe, but like the people of Annobón they take the names of their respective islands. Most of the aborigines of Río

Muni are called Pamúes of Fang. There are Roman Catholic and American Presbyterian missions at work among the natives.

# THE REPUBLIC OF THE SUDAN

## JAMHURYAT ES-SUDAN

**CONSTITUTION AND GOVERNMENT.** The Sudan was proclaimed a sovereign independent republic on 1 Jan. 1956. On 19 Dec. 1955 the Sudanese parliament passed unanimously a declaration that a fully independent state should be set up forthwith, and that a Council of State of 5 should temporarily assume the duties of Head of State. The Co-domini, the UK and Egypt, gave their assent on 31 Dec. 1955.

For the history of the Condominium and the steps leading to independence, *see* THE STATESMAN'S YEAR-BOOK, 1955, pp. 340–41.

*National flag:* Blue, yellow, green (horizontal).

On 17 Nov. 1958 the Army took over the government. The Council of State and the cabinet were dismissed, parliament and all political parties were declared dissolved, and the provisional constitution was suspended.

The supreme constitutional authority is now vested in the Supreme Council of the Armed Forces. This is composed as follows: Lieut.-Gen. Ibrahim Abboud, *President*; Maj.-Gen. Mohamed Talaat Farid, Maj.-Gen. Ahmed Rida Farid, Maj.-Gen. Hassan Beshir Nasr, Maj.-Gen. Ahmed Magzoub El Bahari, Maj.-Gen. Mohammed Nasr Oman, Maj.-Gen. Mohamed Ahmed Irwa, Maj.-Gen. Magboul El Amin El Hag.

The cabinet, appointed by Gen. Ibrahim Abboud, the C.-in-C., was in March 1964 composed as follows:

*Prime Minister and Defence:* Lieut.-Gen. Ibrahim Abboud.

*Education:* Maj.-Gen. Mohamed Talaat Farid. *Agriculture:* Maj.-Gen. Ahmed Rida Farid. *Cabinet Affairs:* Maj.-Gen. Hassan Beshir Nasr. *Local Government:* Maj.-Gen. Ahmed Magzoub El Bahari. *Information and Labour:* Gen. Mohamed Nasr Oman. *Interior:* Maj.-Gen. Mohamed Ahmed Irwa. *Commerce, Industry and Supply:* Gen. El Magboul El Amin El Hag. *Finance and Economics:* Abdel Magid. *Foreign Affairs and Mineral Resources:* Ahmed Keir. *Works:* Ziada Osman Arbab. *Animal Resources:* Santino Deng Teng. *Irrigation and Hydro-Electric Power:* Mekki El Manna. *Health:* Dr Ahmed Ali Zaki. *Communications:* Suleiman Hussein.

**Local Government.** The Sudan is divided into 9 provinces and 86 local government areas. In each province there is a province administration set up under the Provincial Administration Act, 1960, and in each local government area there is a local government authority set up under the Local Government Act, 1961.

A Province Administration is composed of the government representative, the province council and the province authority. The government representative, appointed by the Supreme Council of the Armed Forces, is the chairman of the province council and the head ot all government officials in the province. The province council, warranted by the Council of Ministers, is composed of *ex-officio* members (of the province authority). members elected by and from local government authority panels and members appointed by the Supreme Council of the Armed Forces. A province council has competence to pass tho province budget and has supervisory powers over local government authorities. The province authority is composed of the head representatives of the various central government ministries in the province. Its main function is the execution of the province council decisions. A local government authority is either a local government council warranted by the Council of Ministers (57 areas) or a government official (29 areas). A local government council is two-thirds elected by residents in the area and one-third appointed by the Minister.

**AREA AND POPULATION.** The Sudan covers an area of 967,500 sq. miles (2·5m. sq. km). The Eritrea–Sudan frontier and the frontier with the Chad and Central African Republics have been delimited and demarcated, as also has the greater part of the frontier with Ethiopia.

The population according to the 1955–56 census was 10,262,674. The estimate on 1 July 1963 was 12,831,000.

The population consists mainly (two-thirds to four-fifths) of Moslem Arabs, and Nubians in the north and Nilotic and Negro tribes in the south.

Area (in sq. miles) and population of provinces, with inhabitants of provincial capitals, were as follows in Jan. 1961 (estimate):

| Province | Area | Population | Capital | Inhabitants |
|---|---|---|---|---|
| Bahr El Ghazal | 82,530 | 1,157,016 | Wau | 9,981 |
| Blue Nile | 54,880 | 2,397,528 | Wad Medani | 53,677 |
| Darfur | 191,650 | 1,538,712 | El Fasher | 28,462 |
| Equatoria | 181,528 | 1,049,664 | Juba | 12,119 |
| Kassala | 76,495 | 1,097,376 | Kassala | 44,182 |
| Khartoum | 8,097 | 584,472 | Khartoum | 117,685 |
| Kordofan | 146,930 | 2,051,616 | El Obeid | 56,970 |
| Northern | 184,200 | 1,013,880 | El Damer | 6,296 |
| Upper Nile | 91,190 | 1,037,736 | Malakal | 10,531 |

The capital is Khartoum; it has, together with the adjoining cities of Omdurman and Khartoum North, an estimated population of 312,465 (Jan. 1961).

**RELIGION.** The population of the 6 northern provinces is almost entirely Moslem (Sunni), the majority of the 3 southern provinces is pagan. There are small Christian communities, with 2 Coptic Bishops, a Greek Orthodox metropolitan, an Anglican bishop and assistant bishop, 4 Roman Catholic bishops and Greek Evangelical, Evangelical and Maronite congregations. In 1962 Protestants numbered about 95,000. All Christian missionaries were expelled in March 1964.

**EDUCATION** (1961–62). Private kindergartens had 2,103 pupils; government elementary schools, 238,399 boys and 96,690 girls; private elementary schools, 5,467 boys and 4,734 girls; government intermediate schools, 26,371 boys and 4,396 girls; private intermediate schools, 20,129 boys and 5,826 girls; government secondary schools, 8,586 boys and 1,211 girls; private secondary schools, 6,815 boys and 1,451 girls. Higher technical training was given to 684 boys and 66 girls, higher vocational training to 420 boys and 29 girls; teachers' training colleges had 201 male and 48 female students. Khartoum University had 1,489 male and 74 female students.

**HEALTH.** The medical services of the Ministry of Health maintain 69 hospitals, 1,092 dispensaries and dressing stations, 44 health centres (with together 12,784 beds), and 413 doctors. Some Christian Missions also maintain local medical services.

**JUSTICE.** The judiciary is a separate and independent department of state directly and solely responsible to the Supreme Council of the Armed Forces. The general administrative supervision and control of the judiciary is vested in the Chief Justice.

*Civil justice* is administered by the courts constituted under the Civil Justice Ordinance, namely the High Court of Justice—consisting of the Court of Appeal and Judges of the High Court, sitting as courts of original jurisdiction—and Province Courts—consisting of the Courts of Province and District Judges. The law administered is 'justice, equity and good conscience' in all cases where there is no special enactment. Procedure is governed by the Civil Justice Ordinance.

Justice in personal matters for the Moslem population is administered by the Mohammedan law courts, which form the Sharia Divisions of the Court of Appeal, High Courts and Kadis Courts: President of the Sharia Division is the Grand Kadi. The religious law of Islam is administered by these courts in the matters of inheritance, marriage, divorce, family relationship and charitable trusts.

*Criminal justice* is administered by the courts constituted under the Code of Criminal Procedure, namely Major Courts, Minor Courts and Magistrates' Courts. Serious crimes are tried by Major Courts which are composed of a President and 2 members and have the power to pass the death sentence. Major Courts are, as a rule, presided over by a Judge of the High Court appointed to a Provincial Circuit or a Province Judge. There is a right of appeal to the Chief Justice against any decision or order of a Major Court, and all its findings and sentences are subject to confirmation by him.

The President of the Supreme Council of the Armed Forces has power to commute a capital sentence. The Chief Justice has power to remit any case subject to confirmation by him to the Court of Criminal Appeal composed of the Chief Justice and 2 Magistrates of the first class one of whom has to be a Judge of the High Court.

Lesser crimes are tried by Minor Courts consisting of 3 Magistrates and presided over by a Second Class Magistrate, and by Magistrates' Courts consisting of a single Magistrate or a bench of lay magistrates. In Provinces in which circuits of the High Court exist the High Court Judge, in other cases the Province Judge, exercises an appellate jurisdiction and a general supervision over these courts. The greater part of the criminal law is codified in the Sudan Penal Code.

*Local courts*, constituted under the Native Courts Ordinance, 1932, and the Chiefs' Courts Ordinance, 1931, administer civil and criminal justice in accordance with the native custom and deal with offences against specific ordinances; they work to some extent parallel with the state courts. Appeals lie to members of the state judiciary and *ex-officio* magistrates. and local courts are subject to supervision by them.

*Juvenile offences* are dealt with by the 2 juvenile delinquent courts, constituted under the Code of Criminal Procedure, at Wad Medani and Omdurman.

All legislative enactments. ordinances and regulations (previously printed in 4 vols.) are being reprinted (in 11 vols.) in English. A committee is undertaking its translation into Arabic.

**FINANCE.** Revenue and expenditure in Sudanese pounds (£S1 = £1 0*s*. 6*d*.) for financial years ending 30 June:

| | *1958–59* | *1959–60* | *1960–61* | *1961–62* | *1962–63*[1] | *1963–64*[1] |

| Expenditure . | 40,639,215 | 44,928,240 | 48,189,128 | 51,601,410 | 52,152,337 | 58,209,328 |

[1] Estimates.

The chief sources of revenue in 1962-63 were indirect taxation from custom duties on imports and royalties on exports (£S28,782,000) and profits on trading concerns, railways, shares on cotton schemes (£S11,132,262). The main items of expenditure were education (£S4,760,998), public works (£S4,200,277), health (£S4,076,823), communications (£S3,944,664), agriculture (£S4,426,432) and defence (£S6,825,075).

The total external debt of the country at the end of 1958 was £S5,390,609.

**DEFENCE.** The Sudanese Armed Forces have a peacetime strength of about 5,000 officers and men.

A Navy was established in 1962 with a nucleus of 4 patrol boats built in Yugoslavia.

The Air Force had, in 1963, 6 Jet Provost trainers, 7 piston-engined Provost and 4 Egyptian-built Gomhouria trainers, 2 C-47s and 3 Pembroke light transports.

**PRODUCTION.** The 10-year plan 1961/62–1970/71 envisages a total expenditure on social and economic development of £S287·3m. Of this sum, 30% is to be spent on agriculture, 30% on social services, 22% on transport and communications, 15% on industry and mining. Projects include the construction of 2 dams (Roseiris and Khasm el Girba) and the extension of the railway network.

*Agriculture.* In the Sudan, a predominently agricultural country, cotton is by far the most important cash crop on which the Sudan depends for earning foreign currency. The two types of cotton grown in the Sudan are: (*a*) long staple sakellaridis confined to the major producing Gezira area, Tokar and Gash; (*b*) short staple, mainly American, in Equatoria and Nuba Mountains, generally by rain cultivation.

Total production in 1960–61 was 214,908,490 lb. from 680,810 feddâns of long staple and 25,102,800 lb. from 225,030 feddâns of short staple.

[1] Of 315 rotls seed cotton.

Other products of the Sudan include groundnuts, sesame, dates, hides and skins, melonseeds, oil-cakes, dura, pulses, seed oil, castor seed, camels, cattle and sheep.

The Rural Water Supplies and Soil Conservation Board, set up in Oct. 1944, was in May 1956 replaced by the Land Use and Rural Water Development Board and an executive department.

*Livestock* (1,000 heads): Cattle, 6,916; sheep, 6,946; goats, 5,788; camels, 1,410; donkeys, 500; horses, 200.

*Forestry.* The forests of the Sudan, their extent and dominant species are approximately as follows: (1) desert, 728,800 sq. km; (2) semi-desert, 491,000 sq. km (*Acacia Tortilis, Maerua crassifolia*); (3) woodland savannah: (*a*) low rain, 691,000 sq. km (*Acacia melifera, Acacia seyal, Acacia senegal, cambretum*), (*b*) high rain, 347,000 sq. km (*Anogeissus, Khaya, Isoberlinia*); (4) flood region, 246,000 sq. km (*Papyrus*); (5) montane vegetation, 6,000 sq. km (*Podocarpus, Olea*).

The types 2 and 3 (*a*) are the only local sources of fuel (firewood and charcoal). More than 20m. cu. metres of firewood are consumed annually.

The average annual production of sawn timber is 1m. cu. ft, which constitutes about 50% of the Sudan requirements of sawn timber and includes all the sleeper requirements of Sudan Railways and the Sudan Gezira Board. Different tree species of softwood are used for afforestation to produce the future demand of the Sudan of softwood. In 1962 nearly 13,000 acres were afforested.

Gum arabic, mainly hashab gum from *Acacia senegal*, is the sole forest produce exported from the Sudan on a major scale. About 50,000 tons (95% of the total world supply) are exported annually fetching about £S6m. It ranks as the second cash crop to cotton. The bulk of gum production originates from Kordofan, Darfur, Kassala and Blue Nile Provinces.

A forest research and education institute has been established by the Sudan Government in co-operation with the United Nations Special Fund.

*Mining.* The following minerals are known to exist in the Sudan: Gold, graphite, sulphur, chromite, iron-ore, manganese-ore, copper-ore, zinc-ore, fluorspar, natron, gypsum and anhydrite, magnesite, asbestos, talc, halite, kaolin, white mica, coal, diatomite (kieselguhr), limestone and dolomite, pumice, lead-ore, wollastonite, black sands, vermiculite pyrites.

Gold is being exploited on a small scale at Deweishat (south of Wadi Halfa) and at Birkateib (in Kassala Province); alluvial gold is occasionally exploited in Southern Fung and Equatoria. Total gold production in 1962, 1,500 troy oz. Iron-ore has been smelted in the past, on a very limited scale and by primitive methods, in the Eastern and Southern Provinces. Copper at Hofrat en Nahas was mined during the 19th century: the mine has been leased to foreign interests for exploitation. A few thousand tons of medium-grade manganese-ore have been shipped annually since 1956. Mining and processing of white mica, as an industry, is beginning to be established. Vermiculites, mined near Sinkat in Kassala Province, is beginning to find its way into foreign markets. Salt pans at Port Sudan supply the whole needs of the country, and considerable quantities of salt are exported annually; output, 1962, 57,870 metric tons. Mining of chromite from the Ingessena Hills, southern Blue Nile Province, commenced in 1962. Quartz and marble for glass and tile manufacture is being quarried in the Red Sea Hills. Marble is quarried for cement manufacture in Atbara (Northern Province) and Rabak on the White Nile.

**COMMERCE.** Total trade for calendar years, in £S:

**COMMUNICATIONS.** *Railways.* The main railway lines run from Khartoum to El Obeid *via* Wad Medani, Sennar Junction, Kosti and Er Rahad (689 km); Er Rahad to Nyala *via* Abu Zabad and Ed-Daein (698 km); Sennar Junction to Kassala *via* Gedaref (455 km) and to Roseires *via* Singa (220 km); Kassala to Port Sudan *via* Haiya Junction and Sinkat (550 km); Khartoum to Wadi Halfa *via* Shendi, El Dammer, Atbara, Berber and Abu Hamad Junction (924 km); Abu Hamad to Karima (248 km); Atbara to Haiya Junction (271 km); Ed-Daein-Wau (630 km). The main flow of exports and imports is to and from Port Sudan *via* Atbara and Kassala. The total length of line open for traffic was 5,225 km as at 30 Sept. 1961. The gauge is 3 ft 6 in.

*Shipping.* Supplementing the railways are regular river steamer services of the Sudan Railways, between Shellal and Wadi Halfa, 338 km (which links the Egyptian state and Sudan Railways systems); from Karima to Kerma, 337 km; from Khartoum to Kosti, 319 km; from Kosti to Wau, 1,127 km; from Kosti to Juba, 1,436 km; and from Kosti to Gambeila, 1,069 km. Port Sudan is the country's only seaport; it is equipped with 13 berths.

*Roads.* Roads in Northern Sudan, other than town roads, are only cleared tracks mostly impassable directly after rain. In Upper Nile Province motor traffic is limited mostly to the months Jan.–May. In Equatoria and Bahr El Ghazal Provinces there are a number of good gravelled roads with permanent bridges which can be used all the year round, though minor roads become impassable after rain.

*Notes on Motoring* in the Sudan is obtainable from the Under Secretary, Ministry of Interior, Khartoum, or the Sudan Embassy in London, to whom application should be made for permission to motor through the Sudan.

*Post and Telecommunication* (1961). There are 115 permanent post and telegraph offices, 27 travelling post and telegraph offices, 3 branch offices and 149 agencies. There are 28 wireless telegraph and 99 radio-telephone stations, 116 telephone exchanges (31 of them automatic) and 311 telephone call boxes; number of telephones (1962), 29,115 (16,437 in Khartoum). There are 2 transmitting stations and 9 radio-beacon stations.

*Aviation.* Sudan Airways is a government-owned airline, with its headquarters in Khartoum, operating domestic and international services. The latter include services to Asmara, Aden, Jiddah, Cairo, Athens, Rome, London, Beirut, Nairobi and Entebbe. In 1962 Sudan Airways carried 64,123 passengers and 1,161·2 metric tons of mail and freight.

**MONEY.** The monetary unit is the Sudanese pound (£S) divided into 100 piastres and 1,000 milliemes. Sudanese bank-notes of £S10, £S5, £S1, 50 piastres and 25 piastres have replaced Egyptian notes. The following Sudanese coins are in circulation: P. 10, 5, 2; m/ms 10, 5, 2, 1. Egyptian and British coins were withdrawn from circulation by the end of June 1958.

Currency in circulation at the end of 1962 totalled £S29,428,868.

**BANKING.** The Bank of Sudan opened in Feb. 1960 with an authorized capital of £S1·5m. as the central bank of the country; it has the sole right to issue currency.

The Bank of Sudan and the Crédit Lyonnais on 20 Jan. 1963 formed a new bank, El Nilein Bank, with an authorized capital of £S4m., of which the Bank of Sudan subscribed 1·8m. and Crédit Lyonnais 1·2m.

Barclays Bank DCO maintains 16 branches in the Sudan; Ottoman Bank, 5 branches; Crédit Lyonnais. 3; Bank Misr, 8; Arab Bank, 3; the State Bank of Ethiopia, 1 branch. The Sudan Commercial Bank, the only commercial bank incorporated in the Sudan, opened in 1960 in Khartoum and has a branch in Port Sudan. The Agricultural Bank of Sudan, which is state-owned, was established in 1958 and the Industrial Bank in 1961.

The post office savings bank had 103,274 depositors each with an average balance of £S41 as at July 1962.

**CONSTITUTION AND GOVERNMENT.** The fundamental laws of the kingdom are: 1, the Constitution (*Regeringsformen*) of 6 June 1809; 2, the Parliament Act (*Riksdagsordningen*) of 22 June 1866 (modified in 1909, 1921 and 1949); 3, the law of Royal Succession of 26 Sept. 1810, and 4, the law on the Freedom of the Press of 5 April 1949 (replacing the Press Act of 1812). The King must be a member of the Lutheran Church.

Parliamentary government was finally established in 1917. The Diet (*Riksdag*) consists of 2 chambers. The First Chamber (*Första Kammaren*) consists of 151 members, indirectly elected in 19 constituencies, for 8 years, one-eighth being renewed every year. Their election takes place by the provincial *Landstings* and the councillors of 6 towns, not represented in the *Landstings*. All candidates for the First Chamber, men or women, must be over 23 years of age, and must have the right to vote in municipal affairs. A candidate to the First Chamber may stand for election in any constituency. The Second Chamber (*Andra Kammaren*) consists of 232 members directly elected for 4 years by universal suffrage, every man and woman over 21 years of age and not under wardship having the right to vote. The country is divided into 28 constituencies, each of which elects from 3 to 25 members according to the size of its population. All voters who are over 23 years of age have the right to stand for election for the Second Chamber, but only in the constituency where they live. The manner of election to both chambers is proportional and regulated by a special law.

The Second Chamber, elected 18 Sept. 1960, has 114 Social Democrats, 40 Liberals, 39 Conservatives, 34 Centre (Peasant) Party and 5 Communists. The Upper Chamber is composed as follows for 1963: 77 Social Democrats, 27 Liberals, 19 Centre (Peasant) Party, 26 Conservatives and 2 Communists. Fourteen members of the Upper Chamber and 34 of the Second Chamber are women.

The executive power is in the hands of the King, who acts under the advice of a Council of State, the head of which is the Prime Minister.

The Social Democrat Cabinet, appointed on 1 Nov. 1957, was composed as follows in March 1963:

*Prime Minister:* Dr Tage Erlander.

*Foreign Affairs:* Torsten Nilsson. *Justice:* Herman Kling. *Defence:* Sven O. M. Andersson. *Social Affairs:* Sven Aspling. *Communications:*

Gösta Skoglund. *Finance:* Gunnar Sträng. *Education and Ecclesiastical Affairs:* Dr R. Edenman. *Agriculture:* Eric Holmquist. *Commerce:* Gunnar Lange. *Interior and Health:* Rune Johansson. *Civil Service:* Sigurd Lindholm. *Without Portfolio:* Mrs Ulla Lindström, Sven af Geijerstam, Rune Hermansson.

All the members of the Council of State are responsible for the acts of the Government.

Public administration in Sweden is characterized by a unique degree of functional decentralization. The Ministries are not really administrative agencies. They prepare bills for the *Riksdag*, issue general directives and make higher appointments, but, as a rule, are not authorized to take individual administrative decisions. The routine administrative work is attended to by the central boards (*centrala ämbetsverk*). Each board's sphere of activity depends partly on its organization and this is ultimately decided by the appropriations granted by the Riksdag. The King-in-Council often asks the boards' opinion before proposed measures are decided upon, but is not bound to follow their advice.

*National flag:* Yellow cross on blue.

*National anthem:* Du gamla, du fria, du fjällhöga nord (words by R. Dybeck, 1844; folk-tune).

LOCAL GOVERNMENT. Local administration is entrusted in Stockholm to a governor, and in each of the 24 counties to a prefect, who is nominated by the King.

Local government is based on the municipal laws of 18 Dec. 1953 and, for the capital, of 1 March 1957; and the levying of local taxes on a special law. Each rural district, each borough and each town forms a commune in which all men and women over 21 years of age, and not under wardship, are entitled to elect the commune or town council. These councils are named *Kommunalfullmäktige* in the rural districts and boroughs, and *Stadsfullmäktige* in the towns. Ecclesiastical affairs in all parishes with more than 1,500 inhabitants are dealt with by councils, named *Kyrkofullmäktige*, and smaller parishes may make the same arrangement. The number of communes has, since 1952, been reduced from 2,500 to 1,006 (Jan. 1963), including 133 towns and cities. Each county has a county council (*Landsting*) elected by men and women who enjoy municipal suffrage. The *Landstings* chiefly administer the health service and regional vocational schools. The largest towns may leave the *Landstings*. Towns which are thus administered separately by their municipal councils are Stockholm, Göteborg, Malmö, Norrköping, Hälsingborg and Gävle. All elections are conducted on the proportional system.

**AREA AND POPULATION.** The first census took place in 1749, and it was repeated at first every third year, and, after 1775, every fifth year. Since 1860 a general census has been taken every 10 years and, in addition, in 1935 and 1945.

Latest census figures: 1940, 6,371,432 (annual increase since 1935: 0·38%); 1945, 6,673,749 (0·94% since 1940); 1950, 7,041,829 (1·10% since 1945); 1960, 7,495,316 (0·64% since 1950).

**RELIGION.** The overwhelming majority of the population belong to the Evangelical Lutheran Church, which is the established national church. There were 13 bishoprics (Uppsala being the metropolitan see) and 2,586 parishes at the beginning of 1963. The clergy are chiefly supported from the parishes and the proceeds of the Church lands. The 354,000 non-conformists mostly still adhere to the National Church. The largest denominations, on 1 Jan. 1963, were: Swedish Mission Covenant Church, 94,800; Pentecost Fellowship, 91,000; National Evangelical Society, 45,000; Salvation Army, 40,400; Baptists, 30.800; Alliance Mission Association, 14,600; Methodists, 10,800; Örebro Mission Society, 20.000. There were also 35,500 Roman Catholics (under a Bishop resident at Stockholm) and some 13,000 Jews.

Parliament and Convocation (*Kyrkömotet*) decided in 1958 to admit women to ordination as priests.

**EDUCATION.** The kingdom has 4 state universities, at Uppsala (founded in 1477), with 9,194 students, Lund (founded in 1668), with 7,068 students, Göteborg (founded as private university in 1889; state university in 1954) with 3,829 students, and Stockholm (founded as private university in 1877; state university in 1960) with 7,932 students in the autumn of 1961. There is also in Stockholm a state faculty of medicine (founded in 1810), with 1,145 students. In 1959 a new state faculty of medicine was founded in Umeå, with 99 students. In Stockholm and Göteborg there are also academies of commerce, with 1,581 students. In 1961 a new institute of technology was founded in Lund, starting with 30 students. The institute of technology in Stockholm had 3.207; that in Göteborg, 2,173, and the institute of agriculture in Uppsala, 344 students. Two dental colleges had 1,166; the college of veterinary medicine, 212; the pharmaceutical institute (higher course), 364; the college of forestry, 145; the institute of gymnastics, 170; two institutes of physiotherapy, 212; the teachers' university colleges in Stockholm, 99, and Malmö (founded in 1960), 79; and the schools of social work and public administration in Stockholm, Göteborg and Lund, 922 students.

In 1962–63 there were 214,500 pupils in secondary schools (including 3,500 on intermediate level in primary schools), 11,000 pupils in secondary technical schools and 6,000 pupils in commercial secondary schools. People's colleges had 12,300 pupils; military, navigation, agricultural and other special schools; besides institutions and schools for the deaf, blind and the mentally deficient. Public elementary instruction is free and compulsory (since 1842), and children not attending schools under the supervision of the authorities must furnish proofs of having been privately educated. School attendance is compulsory for 7 years in many districts, but for most children for 8 to 9 years (school age 7–16 years). There were in the public primary and comprehensive schools, 838,000 pupils (excluding 3,500 on intermediate level). A course in the continuation schools (day or evening) is also compulsory for those not entering the 8th form of an elementary school, or any other school. There were, in Oct. 1962, 140,600 pupils in municipal vocational schools and central workshop schools.

A great number of children in public primary, comprehensive and secondary schools receive one free meal per day.

*Newspapers* (1962). There were 178 daily newspapers with a total circulation of 3,987,900.

*Cinemas* (1963). There were 2,189 cinemas.

**JUSTICE.** The administration of justice is entirely independent of the Government. Two functionaries, the *Justitiekansler*, or Chancellor of Justice, and the *Justitieombudsman*, or Attorney-General, exercise a control over the administration. The former also acted as chief public prosecutor, but this office now is a separate one (the *Riksåklagaren*); both are royal appointments. The *Justitieombudsman*, appointed by the Diet, exerts a general supervision over all the courts of law and the civil service. The *Militieombudsman*, also appointed by the Diet, exercises control over military laws and the military services. The kingdom has a Supreme Court of Judicature and is divided into 6 high court districts and 157 district courts divisions.

These district courts (or courts of first instance) deal with both civil and criminal cases. More serious criminal cases are generally tried by a judge and a jury (*nämnd*) of 7–9 members; in minor criminal cases the jury is reduced to 3; petty cases are tried by the judge alone. In the larger towns civil cases are tried as a rule by 3 to 4 judges or in minor cases by 1 judge. In the rural districts and small towns civil cases are tried in the same way as criminal cases. In trials by jury the judge decides the case except when the whole jury—or at least 7 members if the jury consists of more than 7—differs from him, when the decision of the jury prevails.

Persons of poor or moderate means may be provided with the services of lawyers in civil and criminal proceedings from special state-aided legal aid centres, and may also be granted costs for their proceedings. Moreover, the community may bear the cost of free legal advice to poor persons by private lawyers in cases not brought before a court.

There were 82 penal and correctional institutions for delinquents, with 4,810 male and 91 female inmates on 31 Dec. 1962. Besides, there were 25 institutions with 993 places for children and juveniles in need of care owing to viciousness, maladjustment or delinquency.

**SOCIAL WELFARE.** The social security schemes are greatly expanding. Supported by a referendum, the Diet in 1958 and 1959 decided that the national pensions should be increased successively until 1968 and supplementary pensions paid from 1963. The national and supplementary pensions consist of old-age and family pensions, as well as pensions paid to the disabled. The financing of the supplementary system is based on the current-cost method.

The most important social welfare schemes are described in the conspectus below.

| Type of scheme | Introduced | Scope | Principal benefits |
|---|---|---|---|
| Sickness insurance (compulsory) | 1955 | Nearly all residents | Hospital fees, about 75% of doctors' fees, some reimbursement of cost of transportation as well as costs of physiotherapy, convalescent care, etc., medicines at reduced prices or free of charge. During sickness daily allowance of 5–28 kr. plus children's supplement (1–3 kr. a day). There is generally no maximum benefit period. |
| Employment injury insurance (compulsory) | 1918 | All employed persons | Medical treatment, medicine and medical appliances, hospital care, sickness benefit 3–28 kr. plus children's supplement 1–3 kr. a day (first 90 days covered by sickness insurance), disability annuities, funeral benefit and survivor's pensions. |
| Unemployment insurance | 1934 | Members of recognized unemployment insurance societies (about 50% of all wage-earners) | Up to 20 kr. per day plus 2 kr. for wife or housekeeper and child. |
| Pensions | | | |
| *Old-age* | 1913 | All citizens | 5,330 kr. per annum for married couples, 3,400 kr. for others. All pensioners receive a cost-of-living supplement; about half of them, municipal housing supplement. |
| *Disablement* | 1913 | All citizens | 5,330 kr. and 3,400 kr. respectively plus cost-of-living supplement. Most of them receive municipal housing supplement. |

In addition to old-age pension and disablement pension children's supplement is paid (up to 1,000 kr. for each child), if there is no children's pension.

| | | | |
|---|---|---|---|
| *Widows* | 1948 | All citizens | 3,400 kr. plus cost-of-living supplement; but less for those who have become widows before 50 and have no child below 16. Many of them receive municipal housing supplement. |
| *Supplementary* | 1960 (1963) | All gainfully occupied persons | Old-age pension payable from the age of 67 or, at a reduced rate, from the age of 63; disability pension payable before the age of 67; family pension for survivors of a deceased person who at the time of his death was entitled to old-age pension or disability pension under the supplementary pension scheme or would have been entitled to a disability pension under that scheme in case of invalidity. Old-age pension is, in principle, 60% of the insured person's average annual earnings. |
| Maternity insurance (compulsory) | 1955 | All child-bearing women | Maternity hospital fee and cost of transportation. 900 kr. (1,350 for twins, etc.). Employed women may receive 1–23 kr. a day up to 180 days. |
| Children's allowances | 1948 | All children below 16 | 550 kr. per annum. |
| | | Children at school 16–18 | 50 kr. per month during school-courses. |
| Children's pensions | 1960 | Orphans | 1,400 kr. per annum. |
| | | Fatherless or motherless | 1,000 kr. per annum. |

Total social expenditure, including also hygiene, care of the sick and social assistance, amounted to 8,250m. kr. in 1961, representing about 14% of the national income.

**DEFENCE.** A Supreme Commander is, under the King, in command of the three services. He is assisted by the Defence Staff.

The military forces are recruited on the principle of national service, supplemented by voluntarily enlisted personnel who form the permanent cadres for training purposes.

Liability to service commences at the age of 18, and lasts till the end of the 47th year. Since 1952 the period of training for most conscripts has been 394 days. This duty is performed in a first period of 304 days at a training centre, and later on in 3 periods of a month each in combat units. Some conscripts receive an additional year's training as officers.

ARMY. The C.-in-C. of the Royal Swedish Army has at his disposal an army staff under a chief of staff.

Sweden is divided into 7 military commands, each subordinated to a general officer commanding. There are, in time of peace, 15 infantry, 3 cavalry, 8 armour, 7 artillery, 6 AA, 3 engineer, 3 signal and 4 Army Service Corps units, most of which are called 'regiments' (*regementen*), each usually consisting of several battalions.

The Army is organized and equipped with regard to the geographical and climatic conditions of the country. The Home Guard (*Hemvärnet*) raised during the War continues to be in force.

Sweden's ground forces can be said to consist of a standing Army which for the most part is on indefinite leave, but which on short notice can be ready for action. One of the basic principles of the Swedish system of mobilization is the local recruitment of as many units as possible. Efforts are also made to decentralize as much as possible the storage of equipment and supplies.

The active personnel of the Army comprises about 10,000 officers and n.c.o.s.

NAVY. The principal ships are the cruisers *Tre Kronor* and *Göta Lejon*, both completed in 1947, each with a displacement of 8,200 tons, belt armour of 5 in., 7 6-in. guns, 6 21-in. torpedo tubes, 100,000 shaft h.p. and a speed of 33 knots.

There are 12 destroyers, 9 anti-submarine frigates, 24 submarines, 1 minelayer, 18 coastal and 16 inshore minesweepers, 37 motor torpedo-boats, 1 submarine depot ship, 12 patrol launches, 10 mining tenders, 7 tenders, 12 surveying vessels, 4 ice-breakers, 4 oilers, a communication ship, a salvage vessel, 12 landing craft, 2 sail training ships, a supply ship and 3 water carriers.

There are 4 Naval Commands: those of the northern, southern, eastern and western coats.

The coast artillery defence areas are those of the Stockholm archipelago, Karlskrona, Gothenburg, Gotland and Norrland. There are 5 coastal artillery regiments. The active personnel in 1963 totalled 11,000 officers and men, including the Royal Coast Artillery attached to the Navy.

AIR FORCE. The C.-in-C. of the Royal Swedish Air Force has at his disposal an Air Staff responsible for operational and administrative duties and an Air Board for technical matters. Directly subordinate to the C.-in-C. of the Air Force are also the Inspectors of Air Base Services, of Control and Reporting Services, and of Flying Safety, and the group commanders.

The combat units consist of 9 fighter-interceptor and 4 ground-attack wings (*flottiljer*), each with 3 squadrons of 12–15 aircraft, together with 5 reconnaissance squadrons (*divisioner*). Total peace-time strength of the combat units is 44 squadrons with over 600 first-line aircraft.

The combat units are organized in 4 groups (*eskadrar*). They are equipped mainly with Swedish aircraft; British fighters are also used. Standard types of jet-propelled day-fighters are the Swedish-built Saab J29 and supersonic J35 Draken, and the British Hawker Hunter (J34). The J32B Lansen and J35 are used as night- and all-weather fighters. The ground attack wings are equipped with Swedish-built Saab Lansen (A32) jet airraft. There are also reconnaissance versions of the Saab 35 (S35), 32 S32) and 29 (S29), and large transport, training and helicopter formations.

The active personnel consists of about 2,000 officers and warrant officers, some 3,500 short-service pilots, technicians and other military personnel, about 7,500 civilian employees, and about 6,500 conscripts.

**PRODUCTION.** *Agriculture.* According to the census of agriculture taken in the autumn of 1961, the number of farms in cultivation, of more than 2 hectares of arable land, was 232,900 (268,100 in 1956); of these there were 195,100 of 2–20 hectares; 35,600 of 20–100 hectares; 2,200 of above 100 hectares. Of the total land area of Sweden (41,126,000 hectares), 3,342,000 hectares (except kitchen gardens and fruit gardens) were under cultivation, 525,000 hectares under pastures and 22,505,000 hectares under forests.

[1] Preliminary.

Area of rotation meadows for pasture and green fodder was (in 1,000 hectares): 1960, 312; 1961, 325; 1962, 356.

Total milk production (in 1,000 metric tons): 1960, 3,926; 1961, 3,977; 1962, 4,050. Butter production in the same years was (in 1,000 metric tons): 84, 84, 92; and cheese, 54, 58, 55.

Livestock census of June 1962: Horses, 165,000; cattle, 2,576,000; sheep, 169,000; pigs (April 1962), 2,115,000.

Number of farm tractors in 1962 was estimated at 148,245.

The number of pelts produced in 1961 was as follows: Silver fox and its varieties, 400; blue fox and white fox, 4,000; mink, 1·3m.

*Forestry.* Nearly 23m. hectares or 56% of the total land area are covered with forests. The total amount of wood is estimated at 2,100m. cu. metres with bark or 1,750m. cu. metres without bark; 85% of this volume consists of coniferous wood (pine and spruce). Half of the forest area is privately owned, the other half is equally divided between public authorities (Crown, Church, communities, etc.) and joint-stock companies. The total cut in 1962 was 45·6m. cu. metres solid volume (without bark); of these 15·8m. were coniferous timber, 24·2m. pulpwood, 4·4m. fuel wood. In 1960 the total cut was 44·8m. and in 1961, 45m. cu. metres.

In 1961 there were about 1,200 saw-mills with 5 or more workers, the total production of which—representing some 80% of the country's total production—amounted to 6·6m. cu. metres sawn and planed wood, including box-boards. The production of the 125 pulp-mills in Sweden amounted to 5·3m. metric tons pulp (dry weight). There was an export of approximately 891,000 cu. metres of roundwood; exports of sawn coniferous wood amounted to 981,000 standards and of plywood (including blockboards) to 5,100 metric tons.

*Fisheries.* In 1962 the total value of the catches of the sea fisheries was estimated at 216m. kr.; of this sum, 159m. kr. came from Göteborg, Bohus and Halland.

*Mining.* Mining has from time immemorial been one of the leading industries of Sweden, which was the biggest producer of iron in Europe until the use of coal for the manufacture of pig-iron revolutionized that industry. The lack of fossil fuel is the reason why mining in Lapland is limited to the raw products. Since 1943, however, an increasing part of the Swedish pig-iron is produced by electric methods from Lapland ore, near the town of Luleå. There were raised in 1961, throughout the kingdom, 23,549,900 tons[1] of iron ore and 1,788,200 tons of pig-iron. Of iron ore, in 1959, 15,617,000; in 1960, 19,888,000; in 1961, 20,446,000 tons were exported. There were also produced in 1961, 87,400 tons of silver and lead ore, 73,800 tons of copper ore, 142,500 tons of zinc ore, 16,700 tons of manganese ore, 52,100 tons of auriferous arsenic ore, and 442,500 tons of sulphur pyrites. The gold produced in metal works in 1961 amounted to 5,300 kg, silver to 85,800 kg, copper to 36,600 tons, lead to 39,000 tons and aluminium to 19,300 tons (refined quantities). There are not inconsiderable veins of coal in southern Sweden, giving 200,400 tons of coal in 1961. In 1960 there were 62,877 workers engaged in the mining and metallurgical industries. The port of Luleå is being expanded so as to berth ships up to 35,000 GRT and to permit an annual turnover of 9m. tons of ore.

[1] Ton, here = metric ton.

*Industries.* In 1751 only 9·5% of the population depended for a livelihood on industry and commerce; in 1870 the percentage had advanced to 19·8, in 1900 to 38·2, in 1920 to 50·2 and in 1950 to 65·3.

The industries of Sweden are spread fairly well over the whole country. The mining of iron ore has reached its highest development north of the Polar circle, and the most important saw-mills are located along the shores of the Gulf of Bothnia. The production of iron and steel has taken place in central Sweden since the earliest times in Swedish history; pig-iron is produced chiefly in Domnarvet, Luleå, Oxelösund, Uddenholm and Fagersta. Cream separators, ball-bearings, lighthouse apparatus, telephone supplies, motors, cargo and tank vessels, and many kinds of electrical machinery are among the highly specialized products of the metallurgical industries. The porcelain factories of Gustavsberg, Rörstrand and Uppsala-Ekeby and the glass factories of Kosta and Orrefors produce wares that have achieved a high reputation in the markets of the world.

The following are some data for the most important Swedish industries:

| Branch of industry | No. of establishments | | Average no. of workers | | Value of output, 1m. kr. | |

| Electric power and gas and coke works | 869 | .. | 13,123 | .. | 2,356 | .. |

The total number of industrial factories employing 5 persons or more (excluding electricity, gas, water and sanitary services) was 15,335 in 1960.

In 1960, 569,092 men and 129,588 women (including those under 18 years of age) were employed in factories.

*Electricity.* The production of power is based almost exclusively on water, which normally covers about 95% of the total requirements. The power supply is administered by the State (about 45%), the municipalities and a number of private companies. The total economically available water-power resources are 80,000m. kwh. a year. The installed capacity of water-wheels amounted at the end of 1961 to 7m. kw. with a generator capacity of 8·5m. kva. The power production (in 1m. kwh.) was as follows: 1920, 2,605; 1930, 5,121; 1940, 8,624; 1950, 18,177; 1955, 24,721; 1958, 30,354; 1959, 32,226; 1960, 34,718; 1961, 38,330; 1962 (estimate), 39,900.

The power consumption for various purposes was, in 1961, distributed as follows: Industries, 63%; railways and trams, 6%; domestic, commercial and agricultural, 28%, and exports, 3%.

**COMMUNICATIONS.** *Shipping.* The Swedish mercantile marine consisted on 1 Jan. 1963 of 1,073 vessels of 4,139,000 gross tons (only vessels of at least 100 gross tons, and excluding fishing vessels and tugs). Stockholm and Göteborg, with together 511 vessels of 3,088,000 gross tons in Jan. 1963 are the two largest ports.

Vessels entered from and cleared for foreign countries, exclusive of passenger liners and ferries, with cargoes and in ballast, in 1962, as follows (only vessels of at least 20 net tons included): With cargoes, 39,095 of 22,907,000 net tons; in ballast, 17,652 of 13,093,000 net tons; total, 56,747 of 36m. net tons.

*Roads.* On 1 Jan. 1963 there were 96,027 km of public roads, of which 18,288 km were surfaced. Motor vehicles on 31 Dec. 1962 included 1,424,049 passenger cars, 137,765 buses and lorries and 126,039 heavy motor cycles.

*Railways.* At the end of 1962 the total length of railways was 14,254 km, of which 13,493 km belonged to the State. In 1962 the number of passengers on the railways was 87m.; weight of goods, including Lapland ore, 50m. metric tons. Electrified lines, 1962, 7,550 km, being 53% of the system.

*Post.* The length of telegraph circuits in Jan. 1962 was 556,100 km. The circuits of the telephone had a length of 10,344,000 km. At the end of 1962 there were 3,053,752 instruments employed in the telephone service, coming, with 40·3% per population, next to the USA (43%) and before Canada (33·7%).

Number of wireless licence holders on 30 June 1963 was 2,945,012; television licences, 1,684,494 (on 28 Feb. 1963).

The overseas radio-telegraph and radio-telephone services are conducted by the Swedish Telecommunications Administration.

The number of post offices at the end of 1962 was 3,753. For receipts of the post and telecommunication services see the section on FINANCE.

*Aviation.* Commercial air traffic is maintained in (1) Sweden and other parts of the world by Scandinavian Airlines System (SAS), of which AB Aerotransport (ABA = Swedish Air Lines) is the Swedish partner (DDL = Danish Air Lines and DNL = Norwegian Air Lines being the other two); (2) only within Sweden by Linjeflyg AB. Scandinavian Airlines System have a joint paid-up capital of about Sw. kronor 193·9m. Capitalization of ABA, Sw. kronor 83·1m., of which 50% is owned by the Government and 50% by private enterprises. Capitalization of Linjeflyg, Sw. kronor 1·2m., of which 50% is owned by SAS and 50% by 3 newspaper enterprises.

In scheduled air traffic during 1962 the total number of km flown was 31,275,000; passenger-km, 1,176,611,000; goods, 28,712,000 ton-km; mail, 6,977,000 ton-km. These figures represent the Swedish share of the SAS traffic (Swedish domestic and three-sevenths of international traffic) and the Linjeflyg traffic.

**MONEY.** The Swedish *krona*, of 100 *öre*, was in 1962 of the value of approximately 14·49 kr. to the £ sterling.

Gold coins do not exist as a currency. National bank-notes for 5, 10, 50, 100, 1,000, and 10,000 kr. are legal means of payment, and the bank is formally bound to exchange them for gold on presentation, but the obligation to redemption is suspended.

**BANKING.** The Riksbank, or National Bank of Sweden, belongs entirely to the State and is managed by directors elected for 3 years by the Diet, except the chairman, who is designated by the King. The bank is under the guarantee of the Diet, its capital and reserve capital are fixed by its constitution. The note circulation is fixed at 8,400m. kr. Since 1904, only the Riksbank has the right to issue notes. On 31 Dec. 1962 its note circulation amounted to 7,330m. kr. Its combined gold and net foreign-exchange holdings (including surplus value of gold) on 31 Dec. 1962 totalled 3,869m. kr.

There are 16 commercial banks. On 31 Dec. 1962 their total deposits (including savings accounts but excluding interest) amounted to 22,080m. kr.; domestic bills and loans to 16,196m. kr.

The savings-banks statistics (exclusive of post office) are as follows, in 1,000 units:

| | *1957* | *1958* | *1959* | *1960* | *1961* | *1962* |
|---|---|---|---|---|---|---|
| Accounts at end of year | 6,306 | 6,434 | 6,562 | 6,691 | 6,719 | 6.950 |
| Deposits, kronor[1] | 12,459,000 | 13,442,000 | 14.337,000 | 15,403,000 | 16,391,000 | 17.699.000 |
| Capital and reserve funds, kronor | 483,000 | 507,000 | 539,000 | 585,000 | 638,000 | 696,000 |

[1] Including interest.

At the end of 1962 the post office savings bank had 5·13m. depositors and 5,478,000 kr. of deposits, including interest.

# SWITZERLAND

SCHWEIZ—SUISSE—SVIZZERA

**HISTORY.** On 1 Aug. 1291 the men of Uri, Schwyz and Lower Unterwalden entered into a defensive league. In 1353 the league included 8 members and in 1513, 13. Various territories were acquired either by single cantons or by several in common, and in 1648 the league became formally independent of the Holy Roman Empire, but no addition was made to the number of cantons till 1798. In that year, under the influence of France, the unified Helvetic Republic was formed. This failed to satisfy the Swiss, and in 1803 Napoleon Bonaparte, in the Act of Mediation, gave a new constitution, and out of the lands formerly allied or subject increased the number of cantons to 19. In 1815 the perpetual neutrality of Switzerland and the inviolability of her territory were guaranteed by Austria, France, Great Britain, Portugal, Prussia, Russia, Spain and Sweden, and the Federal Pact which included 3 new cantons, was accepted by the Congress of Vienna. In 1848 a new constitution was passed without foreign interference. This, in turn, was, on 29 May 1874, superseded by the present constitution.

**CONSTITUTION AND GOVERNMENT.** The constitution of 29 May 1874 may be revised either in the ordinary forms of federal legislation with compulsory *referendum*, or by direct popular demand (*popular initiative*), a majority both of the citizens voting and of the cantons being required, and the latter method may be adopted on the demand of 50,000 citizens with the right to vote. The Federal Government (*i.e.*, the Parliament and the Federal Council) is supreme in matters of peace, war and treaties; it regulates the army, the railway, postal and telegraph systems, the coining of money, the issue and repayment of bank-notes and the weights and measures of the republic. The Federal Parliament legislates on matters of copyright, bankruptcy, patents, sanitary police in dangerous epidemics, and it may create and subsidize, besides the Polytechnic School at Zürich, a federal university and other educational institutions. There has also been entrusted to it the authority to decide concerning public works for the whole or great part of Switzerland, such as those relating to rivers, forests and the construction of national highways and railways. By referendum of 13 Nov. 1898 it is also the authority in the entire spheres of common law. In 1957 the Federation was empowered to legislate on atomic energy matters and in 1961 on the construction of pipelines of petroleum and gas.

*National flag:* A white cross on red.

*National anthem:* Trittst im Morgenrot daher (words by Leonard Widmer, 1808–68; tune by Alberik Zwyssig, 1808–54); adopted by the Federal Council in 1962.

The supreme legislative authority is vested in a parliament of 2 chambers, a *Ständerat*, or Council of States, and a *Nationalrat*, or National Council.

The *Ständerat* is composed of 44 members, chosen and paid by the 22 cantons of the Confederation, 2 for each canton. The mode of their election and the term of membership depend entirely on the canton. Three of the cantons are politically divided—Basel into Stadt and Land, Appenzell into Ausser-Rhoden and Inner-Rhoden, and Unterwalden into Obwalden and

Nidwalden. Each of these 'half-cantons' sends one member to the State Council.

The *Nationalrat*—after the referendum taken on 4 Nov. 1962—consists of 200 National Councillors, directly elected for 4 years, in proportion to the population of the cantons, with the proviso that each canton or half-canton is represented by at least one member. The members are paid from federal funds at the rate of 65 francs for each day during the session.

In 1963 the 200 members were distributed among the cantons [1] as follows:

| | | | |
|---|---|---|---|
| Zürich (Zurich) | 35 | Schaffhausen (Schaffhouse) | 2 |
| Bern (Berne) | 33 | Appenzell—Outer- and Inner-Rhoden | 3 |
| Luzern (Lucerne) | 9 | St Gallen (St Gall) | 13 |
| Uri | 1 | Graubünden (Grisons) | 5 |
| Schwyz | 3 | Aargau (Argovie) | 13 |
| Unterwalden—Upper and Lower | 2 | Thurgau (Thurgovie) | 6 |
| Glarus (Glaris) | 2 | Ticino (Tessin) | 7 |
| Zug (Zoug) | 2 | Vaud (Waadt) | 16 |
| Fribourg (Freiburg) | 6 | Valais (Wallis) | 7 |
| Solothurn (Soleure) | 7 | Neuchâtel (Neuenburg) | 5 |
| Basel (Bâle)—town and country | 13 | Genève (Genf) | 10 |

At the elections held on 27 Oct. 1963 the following parties were returned to the National Council: Social Democrats, 53; Radicals, 51; Catholic Conservatives, 48; Peasant Party, 22; Landesring, 10; Democrats and Protestant Party, 6; Liberals, 6; Communists, 4.

Council of States (1963): Catholic Conservatives, 18; Radicals 13; Socialists, 3; Peasant Party, 4; Liberals, 3; Democrats, 1; Independent, 2.

A general election takes place by ballot every 4 years. Every male citizen of the republic who has entered on his 21st year is entitled to a vote, and any voter, not a clergyman, may be elected a deputy. Laws passed by both chambers may be submitted to direct popular vote, when 30,000 citizens or 8 cantons demand it; the vote can be only 'Yes' or 'No'. This principle, called the *referendum*, is frequently acted on.

Women's suffrage, although advocated by the Federal Council and the Federal Assembly, was on 1 Feb. 1959 rejected in a *referendum* by 654,939 votes against 323,727.

The chief executive authority is deputed to the *Bundesrat*, or Federal Council, consisting of 7 members, elected from 7 different cantons for 4 years by the *Vereinigte Bundesversammlung*, *i.e.*, joint session of both chambers. The members of this council must not hold any other office in the Confederation or cantons, nor engage in any calling or business. In the Federal Parliament legislation may be introduced either by a member, or by either House, or by the Federal Council (but not by the people). Every citizen who has a vote for the National Council is eligible for becoming a member of the executive.

The President of the Federal Council (called President of the Confederation) and the Vice-President are the first magistrates of the Confederation. Both are elected by the Federal Assembly for one calendar year and are not re-eligible to the same offices till after the expiration of another year. The Vice-President, however, may be, and usually is, elected to succeed the outgoing President.

*President of the Confederation for 1964.* Ludwig von Moos (Obwalden); born 31 Jan. 1910.

---

[1] The name of the canton is given in German, French or Italian, according to the language most spoken in it, and alternative names are given in brackets.

*Vice-President of the Federal Council for 1964:* Hans Peter Tschudi (Basel); born 22 Oct. 1913.

The 7 members of the Federal Council—each of whom has a salary of 80,000 francs per annum, while the President has 90,000 francs—act as ministers, or chiefs of the 7 administrative departments of the republic. The city of Berne is the seat of the Federal Council and the central administrative authorities.

The Federal Council is composed as follows (1964):

*Foreign Affairs:* Friedrich Traugott Wahlen (Bern), Peasant and Middle Class Party.

*Interior:* Hans Peter Tschudi (Basel), Social Democrat.

*Justice and Police:* Ludwig von Moos (Obwalden), Catholic Conservative.

*Military:* Paul Chaudet (Vaud), Radical.

*Finance:* Roger Bonvin (Valais), Catholic Conservative.

*Agriculture and Industry:* Hans Schaffner (Aargau), Radical.

*Transport, Communications and Energy:* Willy Spühler (Zürich), Social Democrat.

LOCAL GOVERNMENT. Each of the cantons and demi-cantons is sovereign, so far as its independence and legislative powers are not restricted by the federal constitution; all cantonal governments, though different in organization (membership varies from 5 to 11, and terms of office from 1 to 5 years), are based on the principle of sovereignty of the people.

In all cantons, a body chosen by universal suffrage, usually called *der Grosse Rat*, or *Kantonsrat*, exercises the functions of a parliament. In all the cantonal constitutions, however, except those of the cantons which have a *Landsgemeinde*, the *referendum* has a place. By this principle, where it is most fully developed, as in Zürich, all laws and concordats, or agreements with other cantons, and the chief matters of finance, as well as all revisions of the constitution, must be submitted to the popular vote. In Appenzell, Glarus and Unterwalden the people exercise their powers direct in the *Landsgemeinde*, *i.e.*, the assembly in the open air of all male citizens of full age. In all the cantons, the *popular initiative* for constitutional affairs, as well as for legislation, has been introduced, except in Lucerne, where the *initiative* exists only for constitutional affairs. In most cantons there are districts (*Amtsbezirke*) consisting of a number of communes grouped together, each district having a Prefect (*Regierungsstatthalter*) representing the cantonal government. In the larger communes, for local affairs, there is an Assembly (legislative) and a Council (executive) with a president, maire or syndic, and not less than 4 other members. In the smaller communes there is a council only, with its proper officials.

In 1959 the cantons of Vaud and Neuchâtel and in 1960 the canton of Geneva adopted women's suffrage in cantonal and communal affairs.

The German language is spoken by the majority of inhabitants in 19 of the 25 cantons (French names given in brackets), the French in 5 (Fribourg, Vaud, Valais, Neuchâtel and Genève, for which the German names are given in brackets), the Italian in one (Ticino). In 1960, 69·3% spoke German, 18·9% French, 9·5% Italian, 0·9% Romansch and 1·4% other languages; counting only Swiss nationals, the percentages were 74·4, 20·2, 4·1, 1 and 0·3. On 8 July 1937 Romansch was made the fourth national language; it is spoken mostly in Graubünden.

At the end of 1962 the population figures of the principal towns were as follows: Zürich, 440,800; Basel, 208,100; Geneva, 180,400; Bern, 166,900; Lausanne, 130,900; Winterthur, 86,000; St Gallen, 77,100; Luzern, 71,600; Biel, 63,600.

The number of foreigners resident in Switzerland in 1960 was 584,739. The number of Swiss resident outside Switzerland on 31 Dec. 1962 was 157,877 (in France, 40,123; Germany (Federal Republic), 20,584; USA, 14,205; Italy, 13,201; UK, 8,630; Canada, 7,635; Argentina, 5,305; Brazil, 4,646).

**RELIGION.** There is complete and absolute liberty of conscience and of creed. No one is bound to pay taxes specially appropriated to defraying the expenses of a creed to which he does not belong. No bishoprics can be created on Swiss territory without the approbation of the Confederation. The Society of Jesus and its affiliated societies cannot be received in any part of Switzerland; all functions clerical and scholastic are forbidden to its members, and the interdiction can be extended to any other religious order whose action is dangerous to the State, or interferes with the religious peace. The foundation of new convents or religious orders is forbidden.

According to the census of 1 Dec. 1960 Protestants numbered 2,861,522 (52·7% of the population); Roman Catholics, 2,463,214 (45·4%); Old Catholics, 29,754 (0·5%) and Jews, 19,984 (0·4%). In 1960 Protestants were in a majority in 12 of the cantons and Catholics in 10. Of the more populous cantons, Zürich, Bern, Vaud, Neuchâtel and Basel (town and land) were mainly Protestant, while Luzern, Fribourg, Ticino, Valais and the Forest Cantons are mainly Catholic. The Roman Catholics are under 5 bishops, viz., of Basel–Lugano (resident at Solothurn), Chur, St Gallen, Lausanne–Geneva–Fribourg (resident at Fribourg) and Sitten (Sion), all of them immediately subject to the Holy See. The Old Catholics have a theological faculty at the university of Bern.

**EDUCATION.** Education is administered by the cantons. Before the year 1848 most of the cantons had organized a system of primary schools, and since that year elementary education has steadily advanced. In 1874 it was made obligatory for the whole country (the school age varying in the different cantons) and placed under the civil authority. In some cantons the cost falls almost entirely on the communes, in others it is divided between the canton and communes. In all the cantons primary instruction is free. In every district there are primary schools, and secondary schools for youths of from 12 to 15.

Statistics for 1961–62: Primary schools with 17,714 teachers (10,056 men and 7,658 women, excluding women teachers for needlework), and 577,055 pupils; the secondary schools and lower middle schools (progymnasia included) had 61,977 boys and 56,153 girls, with 3,307 men and 518 women teachers. There are also cantonal schools, gymnasia, higher schools for girls (1961–62, 24,837 pupils and 2,240 teachers), complementary schools, teachers' seminaries, commercial and administrative schools, trade schools, art schools, technical schools, schools for the instruction of girls in domestic economy and other subjects, agricultural schools, schools for horticulture, for viticulture, for arboriculture and for dairy management. There are also institutions for the blind, the deaf and dumb and feeble-minded.

There are 7 universities in Switzerland. These universities are organized on the model of those of Germany, governed by a rector and a senate, and divided into 4 faculties of theology, jurisprudence, philosophy, and medicine.

There is a Federal Institute of Technology at Zürich (founded in 1855), with 554 teachers and 4,498 matriculated students in 1962–63. The St Gall School of Economics and Social Sciences, founded in 1899, had 87 teachers and 951 matriculated students in 1962–63.

*Cinemas* (1962). There were 633 cinemas with a seating capacity of 229,832.

*Newspapers* (1962). The number of daily newspapers was estimated to be 120 with a combined circulation of 1·8m.

**SOCIAL INSURANCE.** The Federal Insurance Law against illness and accident, of 13 June 1911, entitles all Swiss citizens to insurance against illness; foreigners may be admitted to the benefits. Compulsory insurance against illness does not exist as yet, but cantons and communities are entitled to declare insurance obligatory for certain classes or to establish public benefit (sick fund) associations, and to make employers responsible for the payment of the premiums of their employees. In 1961 the 1,086 societies insuring against illness had 4,616,053 members.

Unemployment insurance is based upon the federal law of 22 June 1951, which lays down the rules on which public or private insurance organizations have to work, and fixes the subsidies paid by the Federation to these organizations. In a number of cantons unemployment insurance is compulsory for all wage-earners with low incomes; in other cantons the regulation is left to the communes. At 30 Sept. 1962 there existed 185 public and private unemployment insurance organizations with a total membership of 605,011.

Insurance against accident is compulsory for all officials, employees and workmen of all the factories, trades, etc., which are under the federal liability law. The Swiss Accident Insurance Institution commenced operations on 1 April 1918.

On 6 July 1947 a federal law was accepted by a referendum, providing compulsory old age and widows and widowers insurance for the whole population, as from 1 Jan. 1948. In 1961 the number of normal pensioners was 422,646, the number of interim pensioners, 173,668. On 1 Jan. 1960 the old-age insurance scheme was extended to cover invalidity. On 1 July 1961, 48,670 invalids received a regular annuity and 7,676 invalids an interim annuity.

**JUSTICE.** The Federal Tribunal (*Bundes-Gericht*) which sits at Lausanne, consists of 26–28 members, with 11–13 supplementary judges, appointed by the Federal Assembly for 6 years and eligible for re-election; the President and Vice-President serve for 2 years and cannot be re-elected. The President has a salary of 56,900 francs a year, and the other members

53,000 francs. The Tribunal has 8 sections, to each of which is assigned the trial of suits in accordance with regulations framed by the Tribunal itself. It has original and final jurisdiction in suits between the Confederation and cantons; between cantons and cantons; between the Confederation or cantons and corporations or individuals, the value in dispute being not less than 8,000 francs; between parties who refer their case to it, the value in dispute being at least 20,000 francs; and also in such suits as the constitution or legislation of cantons places within its authority. There are also many classes of railway suits which it is called on to decide. It is a court of appeal against decisions of other federal authorities, and of cantonal authorities applying federal laws. The Tribunal also tries persons accused of treason or other offences against the Confederation. For this purpose it is divided into 4 chambers: the Chamber of Accusation, the Criminal Chamber (*Cour d'Assises*), the Federal Penal Court and the Court of Cassation. The jurors who serve in the Assize Courts are elected by the people, and are paid 35 francs a day when serving.

On 3 July 1938 the Swiss electorate accepted a new federal penal code, to take the place of the separate cantonal penal codes. The new code, which abolished capital punishment, came into force on 1 Jan. 1942.

By federal law of 5 Oct. 1950 several articles of the penal code concerning crime against the independence of the state have been amended with a view to reinforcing the security of the state.

**DEFENCE.** There are fortifications in all entrances to the Alps and on the important passes crossing the Alps and the Jura. Large-scale destructions of bridges, tunnels and defiles are prepared for an emergency.

Switzerland depends for defence upon a *national militia.* Service in this force is compulsory and universal, with few exemptions except for physical disability. Those excused or rejected pay certain taxes in lieu. Liability extends from the 20th to the end of the 50th year for soldiers and of the

55th year for officers. The first 12 years are spent in the first line, called the *Auszug*, or *Élite*, the next 10 in the *Landwehr* and 8 in the *Landsturm*. The unarmed *Hilfsdienst* comprises all other males between 20 and 50 whose services can be made available for non-combatant duties of any description.

The initial training of the Swiss militia soldier is carried out in recruits' schools, and the periods are 118 days for infantry, engineers, artillery, etc., and 132 days for cavalry. The subsequent trainings, called 'repetition courses', are 20 days annually; but after going through 8 courses further attendance is excused for all under the rank of sergeant. The *Landwehr* men are called up for training courses of 13 days every 2 years, and the *Landsturm* men have to undergo a refresher course of 13 days.

The army is divided into 3 mobile divisions, 3 infantry divisions, 3 frontier divisions, 3 mountain divisions, 18 horse cavalry squadrons and into frontier-, fortress- and territorial brigades, organized in 4 army corps.

The administration of the Swiss Army is partly in the hands of the Cantonal authorities, who can promote officers up to the rank of captain. But the Federal Government is concerned with all general questions and makes all the higher appointments.

In peace-time the Swiss Army has no general; only in time of war the Federal Assembly in joint session of both Houses appoints a general.

The Swiss infantry are armed with the Swiss automatic rifle and with machine-guns, bazookas and mortars. The field artillery is armed with a Q.F. shielded 10·5 Bofors and field howitzers of 10·5 cm calibre. The heavy artillery is armed with guns of 10·5 cm and howitzers of 15 cm calibre. The armoured troops are equipped with the light French AMX, the British Centurion and a modern Swiss tank.

The Air Force consists of 3 regiments, made up of 21 squadrons with 400 first-line aircraft. The fighter squadrons are equipped mainly with Venom and Hunter jet aircraft. Some are beginning to re-equip with the supersonic Mirage III of French design. Training aircraft are Pilatus PE-2 and PE-3, Harvard and Vampire; there are also a number of communications and transport aircraft.

There are 10 patrol boats on Lake Constance.

**PRODUCTION.** *Agriculture.* Of the total area of the country of 4,128,790 hectares, about 973,420 hectares (23·6%) are unproductive. Of the productive area of 3,155,370 hectares, 980,650 hectares are wooded. The agricultural area, in 1955, consisted of 272,770 hectares arable land (including vineyards), 822,320 hectares permanent meadow and 1,079,630 hectares pasture land. There were 205,997 farms with a total area of 1,067,597 hectares. The gross value of agricultural products was estimated at 3,021m. francs in 1959, 2,970m. in 1960, 3,056m. in 1961.

In 1961, 171,494 hectares were planted with cereals, of which 110,020 hectares were wheat; rye, 12,250; barley, 29,310; potatoes, 48,000; sugar beet, 5,050; vegetables, 8,740; tobacco, 790. Production, 1961 (in 1,000 metric tons): Wheat, 296; rye, 38; barley, 92; potatoes, 1,239; sugar beet, 224; tobacco, 2. Milk production (in 1m. quintals): 1955, 28·3; 1960, 31·1; 1961, 30·9; 1962, 31·4.

The fruit production (in 1,000 metric tons) in 1962 was: Apples, 480; pears, 220; cherries, 55; plums, 33; apricots, 5; nuts, 6.

Wine is produced in 18 of the cantons. In 1962 Swiss vineyards (12,156 hectares) yielded 837,105 hectolitres of wine, valued at 129,154,000 francs.

Livestock, 1963: 82,000 horses, 227,411 sheep, 89,261 goats, 1,716,000 cattle (including 918,000 cows), 1,313,500 pigs, 5·75m. poultry.

*Forestry.* Of the forest area of 960,290 hectares, 47,800 are owned by the Federation or the cantons, 627,641 by communes and 284,848 by private persons or companies in 1962. The utilization of timber, in 1961, was 3,483,338 cu. metres, of which 248,666 in state-owned forests, 2,215,126 in communal and 1,019,546 in private forests.

*Mining.* There are 2 salt-mining districts: that in Bex (Vaud) belongs to the canton, but is worked by a private company, and those at Schweizerhalle, Rheinfelden and Ryburg are worked by a joint-stock company formed by the cantons interested. The output of salt of all kinds in 1962 reached 167,943 metric tons. At Sargans (St Gallen) and Herznach (Aargau) iron ore and manganese ore are mined: output 1960, 125,000 metric tons; 1961, 86,000 metric tons; 1962, 105,000 metric tons.

*Industries.* The chief food producing industries, based on Swiss agriculture, are the manufacture of cheese, butter, sugar and meat. The production in 1962 was (in 1,000 quintals): Cheese, 686; butter, 346; sugar, 266; meat, 2,518. There are 57 breweries, producing, in 1962, 4,004,000 hectolitres of beer. Tobacco products in 1962: Cigars, 605m., cigarettes, 13,479m.

Among the other industries, the manufacture of textiles, wearing apparel and footwear, chemicals and pharmaceutical products, bricks, glass and cement, the manufacture of basic iron and steel and of other metal products, the production of machinery (including electrical machinery and scientific and optical instruments) and watch and clock making are the most important. In 1962 there were 13,737 factories subject to the factory law with 750,453 workers. Of these 70,440 were working in textile industries, 68,324 in the manufacture of textile goods and footwear, 33,114 in chemical works, 26,460 in the manufacture of clay products, glass and glass-products, cement and cement products, 97,277 in manufacture of metal products, 210,375 in the manufacture of machinery and 66,043 in watch and clock making and in the manufacture of jewellery.

Production in 1962 was: Cotton yarn pure and mixed, 37,490 metric tons; woven cotton fabrics pure and mixed, 153·4m. metres; rayon and acetate filament yarn, 13,962 metric tons; rayon and acetate staple, 8,661 metric tons; footwear, 14·3m. pairs; cement, 3,725,863 metric tons; raw aluminium, 49,570 metric tons. 32,138,000 watches and clocks were exported.

Tourism is an important industry. In 1961, 2,900,498 Swiss and 5,353,210 foreigners (including 689,974 British) visited Swiss holiday resorts; in 1962 the corresponding figures were 2,975,220 and 5,584,419 (683,213). The tourist trade earned 1,080m. francs in 1961 and 1,210m. in 1962.

*Power.* In 1962 Switzerland had electrical power-plants with a capacity of 7·1m. kw., of which 200,000 kw. were in thermo-electric plants. The total production of energy amounted to 21,342m. kwh. in 1961–62 (Oct.–Sept.); 21,154m. kwh. were generated by hydro-electric plants. Gas is manufactured in 66 gas-works. The production, in 1962, was 341m. cu. metres; coke production amounted to 496,322 metric tons, and tar production to 27,505 metric tons.

**Labour.** According to the census of 1 Dec. 1960 the total working population amounted to 2,512,411; of these, 2,090,828 were Swiss nationals and 421,583 foreigners. While foreigners form 10·8% of the total population, they form 15·4% of the male and 20% of the female working population.

The main groups show the following numbers of gainfully occupied persons: Agriculture and forestry, 280,191; food processing, 107,210; textile and textile goods manufacture, 171,852; metalwork, engineering and watch-making, 482,589; building, 239,454; trade, banking, insurance, 346,215; catering and transport, 238,634; domestic service, 82,572.

In 1963 the foreign labour force with permit of temporary residence was 512,412 in Feb. and 690,013 in Aug. Of the number recorded in Aug. 472,052 were Italians, 78,389 Germans, 63,653 Spaniards, 27,879 Austrians and 21,166 Frenchmen. 175,126 were construction workers, 133,492 metal-workers and mechanics, 99,851 housekeepers, cooks and waiters and 19,623 agricultural and forestry workers.

The Swiss Federation of Trade Unions had, in 1962, a membership of 451,001. Other organizations of employees had about 429,100 members.

**COMMERCE.** The special commerce, excluding gold (bullion and coins) and silver (coins), was (in 1m. Swiss francs) as follows:

| | *1957* | *1958* | *1959* | *1960* | *1961* | *1962* |

**COMMUNICATIONS.** *Railways.* Railway history in Switzerland begins in 1847. In 1961 the railways (excluding tramways and funiculars) had a length of 5,118 km, of which 5,030 km were electrified. The operating receipts amounted to 1,427,165,000 francs, operating expenses 1,194,571,000 francs. Traffic was 41,148,000 metric tons and 320,493,000 passengers.

The length of the Swiss federal railways at the beginning of 1962 was 2,918 km, of which 2,896 km were electrified. The operating receipts from traffic of the Swiss federal railways amounted in 1962 to 1,242,086,000 francs; operating expenses 919,035,000 francs. Traffic in 1962 was 32,799,000 metric tons and 237,007,000 passengers.

*Roads.* There are 17,489 km of main roads. There is a postal autobus service, which, in 1962, carried 28,668,000 passengers. Motor vehicles, as of 30 Sept. 1962, numbered 1,127,731, including 630,357 private cars, 104,573 trucks, 380,456 motor cycles, 3,459 buses, 51,095 agricultural tractors and 8,886 non-agricultural tractors and special cars.

*Post.* In 1962 there were in Switzerland 4,086 post offices. There were 1,875,225 telephones, all integrated in one dial system.

Wireless communication is furnished by 3 main medium-wave stations and one short-wave station. There are 2 television studios and 27 transmitters. All stations are operated by the Federal Post, Telephone and Telegraph (PTT) services. Radio-telegraph circuits are operated by Radio Suisse SA, radio-telephone circuits by the PTT. Radio licences, 1962, 1,538,283; television licences, 273,894.

The total expenditure of the PTT in 1962 was 1,482m. francs, the total gross receipts 1,553,171,000 francs.

*Shipping.* A merchant marine was created by a decree of the Swiss Government dated 9 April 1941, the place of registry of its vessels being Basel. On 31 Dec. 1962 it consisted of 33 vessels with a total of 175,401 GRT. In 1962, 6,787,580 metric tons of goods entered and 294,000 metric tons left the port of Basel.

*Aviation.* In 1962 civil aviation on domestic and international routes carried 2,942,393 passengers, 71,660 metric tons of mail, freight and luggage, and flew 64,881,000 km.

The air transport organization Swissair (founded in 1931) in 1963 flew 424m. ton-km, carrying 1,801,599 passengers. Swissair is a mixed enterprise with a capital of originally 14m. francs, raised to 105m. in 1959. Its fleet consisted of 29 aircraft in March 1964.

**MONEY.** The *franc* of 100 *Rappen* or *centimes* is the monetary unit. By law of 17 Dec. 1952, which came into force on 20 April 1953, the value of the franc was fixed at 0·20322 gramme of fine gold. The legal gold coins are 50- and 25-franc pieces; silver coins are 5, 2, 1 and ½ franc; cupro-nickel coins, 20, 10 and 4 centimes; bronze, 2 centimes and 1 centime.

On 31 Dec. 1962 the coin in circulation (of nominal value of 1,000 francs) was as follows: 347,826,000 silver coins of 446,654; 683,439,000 nickel coins of 73,438, and 169,397,000 bronze and zinc coins of 2,123; total, 1,200,662,000 coins of 522,215.

**BANKING.** The National Bank, with headquarters divided between Bern and Zürich, opened on 20 June 1907. It has the exclusive right to issue bank-notes. On 31 Dec. 1962 the condition of the bank was as follows (in 1m. francs): Gold, 11,543·3; foreign exchange, 867·4; discounts and advances, 195·3; securities, 42·8; notes in circulation, 8,506·1, and deposits, 3,805.

In 1962 there were 1,553 banking institutions with total assets of 72,074m. Swiss francs. They included 28 cantonal banks (23,967m. francs), 5 big banks (24,275m.), 94 mortgage banks (7,473m.), 74 other local banks (4,275m.), 114 savings banks (4,218m.), 1,101 mutual credit banks (2,439m.) and 137 others (5,427m.).

On 31 Dec. 1962 the total amount of savings deposits in Swiss banks was 22,297m. francs, with 7·7m. depositors.

*National Bank: Bulletin mensuel.—Das schweizerische Bankwesen.* Yearly. From 1920

**WEIGHTS AND MEASURES.** The metric system of weights and measures was made compulsory by the federal law of 3 July 1875 and since 1 Jan. 1887 only metric units have been legal. By the federal law of 24 June 1909 the international electric units were also adopted.

# SYRIA

## AL-JAMHOURIYA AL ARABIA AS-SOURIYA

**HISTORY.** For the history of Syria from 1920 to 1946 *see* THE STATESMAN'S YEAR-BOOK, 1957, pp. 1408 f. For the union with Egypt concluded on 1 Feb. 1958, *see* THE STATESMAN'S YEAR-BOOK, 1961, pp. 1527 ff. On 28 Sept. 1961 a national revolution broke out, and on 5 Oct. President Nasser acknowledged the dissolution of the union. Syria was re-admitted to the United Nations (13 Oct.) and the Arab League. The provisional government, set up by Dr Mamoun Kuzbari on 29 Sept. 1961, had a National Assembly, elected on 2–3 Dec., which elected Dr Nazim Kudsi as President of the Republic (Dec. 14). Further revolts by army officers took place in March and April 1962, but dissensions among the revolutionaries allowed President Kudsi to carry on.

**GOVERNMENT.** On 8 March 1963 a National Council of Revolution seized power, probably in collusion with the revolutionary junta in Iraq and President Nasser of Egypt.

The cabinet, formed on 12 Nov. 1963, is headed by Maj.-Gen. Amin Hafez, president of the Revolutionary Council, as Prime Minister.

**AREA AND POPULATION.** Syria is bounded by the Mediterranean and the Lebanese Republic on the west, by Israel and Jordan on the south, by Iraq on the east and by Turkey on the north. The frontier between Syria and Turkey (Nisibin-Jeziret ibn Omar) was settled by the Franco-Turkish agreement of 22 June 1929.

The administrative districts of Syria consist of the *mohafazets* of Damascus City, Damascus, Hama, Homs, Dera'a, Aleppo, Lattakia, Deir-ez-Zor, Soueida (Jebel Druze), Hassetché, Raqqa and Idlib.

The area of Syria is 184,480 sq. km (71,210 sq. miles), of which 35,000 sq. km have been surveyed. The population was, in 1962, estimated at 5·5m. The principal towns, with population in 1962, are: Damascus, 507,503; Aleppo, 496,231; Homs, 164,362; Hama, 116,098; Lattakia, 68,498; Deir-ez-Zor, 59,757.

In 1958 the crude birth rate was 25·8 per 1,000 population; the crude death rate, 5·5.

Arabic is the prevailing language, with many dialectical varieties, but there is a large influx of foreign elements, including Turks, Turkomans, Kurds, Circassians, Armenians, Persians, Jews and a few Europeans.

**RELIGION.** The population is composed mainly of Moslems, of whom there were 3,286,243 in 1954. The majority are Sunni Moslems (2,702,531); there were also 15,193 Shiites and 38,106 Ismailis. The Druzes number 117,804 and the Alawites, 409,514. Christians number 489,731, of whom 172,873 are Greek Orthodox, 57,344 Greek Catholics, 111,648 Armenian Orthodox, 52,758 Syrian Orthodox, 19,889 Armenian Catholics, 14,393 Protestants, 17,010 Maronites, 20,013 Syrian Catholics, 6,880 Latins, 5,570 Chaldaeans, 11,348 Nestorians and 5 Assyrians. There are also 31,899 Jews and 3,095 Yezides. No later statistics are available.

**EDUCATION.** The Syrian University was founded in 1924, although the faculties of law and of medicine had existed previously. In 1963 the university comprised 13 faculties; students numbered about 16,800. A secondary-teachers' training college is associated with the University. Damascus is also the seat of an Arab Academy, founded in 1919. The Aleppo branch of the Damascus university was raised to university status in 1961, with faculties of engineering, agriculture, law and commerce; students in 1963 numbered about 3,000.

In 1963 there were 3,509 primary schools in Syria, of which 346 were private; 465 secondary schools, of which 291 were private; 42 technical schools, of which 2 were private, and 9 teachers' training colleges.

*Cinemas* (1958). There were 77 cinemas with a seating capacity of 35,488.

*Newspapers* (1960). 16 daily newspapers had a total circulation of 150,000.

**HEALTH.** In 1963 there were 1,248 physicians and 4,307 beds in government hospitals.

**FINANCE.** The budget year has been shifted to coincide with the calendar year. The ordinary budget for the transitional period 1 July 1962–31 Dec. 1963 envisaged revenues of £Syr.832·5m. and expenditures of £Syr.943·4m. The development budget amounted to £Syr.622m.

A 5-year development plan for 1960/61–1964/65 incorporates many of the features in the 7-year expenditure development project of 1955 and the 10-year plan of 1958 (*see* THE STATESMAN'S YEAR-BOOK, 1958, p. 1426, and 1961, p. 1541). The total expenditure is estimated at £Syr.2,720m. About 40% of the total cost is to be spent on irrigation and agriculture, 15% on industrial projects and 20% on transport and communications.

**DEFENCE.** *Army.* The Army is composed of about 45,000 trained men, the gendarmerie of 4,600, the Bedouin Control Force of about 1,000 and the civil police of 1,800. Equipment and technical advisers are being supplied increasingly by the USSR, including (in 1957) 200 T-34 tanks.

*Navy.* The Navy includes 2 minesweepers, 3 patrol vessels and 15 motor torpedo-boats.

*Air Force.* The Air Force has been re-equipped with Russian assistance. It has a nominal first-line strength of 5 day-fighter-bomber and all-weather fighter squadrons, with a total of 60 MiG-17 jets. Training units are re-equipping with Russian Yak-18 and Yak-11 piston-engined primary and intermediate trainers. There are also transport and helicopter units.

**PRODUCTION.** *Agriculture.* Syria is essentially an agricultural country, the bulk of the population being engaged in the cultivation of the soil and in cattle breeding. The cultivated area is 6,381,000 hectares, of which 558,000 are irrigated; in 1962, 1,315,000 hectares were under wheat and 727,000 hectares under barley. The total cultivable area is 18·48m. hectares, including 402,000 hectares of forest and 6,463,000 hectares of pasture.

The Agrarian Reform Law of 1958, as modified by 1963, allows proprietors a maximum of 15 to 44 hectares of irrigated land and 80 hectares of uncultivated land, taking into account irrigation possibilities, rainfall, size of families, etc.

Yield of principal crops, 1961 (in 1,000 metric tons): Wheat, 757; barley, 335; maize, 9·9; millet, 37·9; rice, 5; sugar beet, 85·7; chickpeas, 14·1; lentils, 34·4; grapes, 243; olives, 83; apricots, 18; tomatoes, 93·2.

Area under cotton, 1961, 249,000 hectares; crop, 1962–63, 403,895 tons (unginned; 120,650 tons of fibre).

Livestock, 1961: 3,503,000 sheep, 4,704,000 goats, 17,000 camels, 66,000 horses, 502,000 cattle, 186,000 asses, 72,000 mules.

*Mining.* Syria is poorer in minerals than in other resources, but this may be due to insufficient exploration. Search for petroleum in the Latakia and Deir ez Zor regions continues. A branch of the Iraq Petroleum Company's oil pipeline from Kirkuk crosses Syria between Makaleb in the east and Nahr el Kebir valley in the west. The Iraq Petroleum Company has constructed a new pipeline from Kirkuk to the small Syrian fishing port of Banias (south of Lattakia), which came into use in April 1952; the Trans-Arabian Pipeline Company's line to Sidon crosses southern Syria.

On 8 Dec. 1955 the Syrian Parliament ratified a Supplemental Convention concluded with the Iraq Petroleum Company. By the terms of the Convention, Syria will receive an annual payment of approximately £6·5m. sterling as transit dues and a sum of £8·5m. in settlement of claims for back payment.

There are indications of phosphates, lead, copper, antimony, nickel, chrome; gypsum is widely distributed. Manganese ore was mined before 1914. Sodium chloride and bitumen deposits are being worked. There is abundance of good calcareous building stone and basalt. Deposits of natural gas have been discovered in the Jezireh.

*Industry.* The most important industries are flour, oils, soap, cement, tanning, tobacco, textiles, knitwear, glassware, spinning, sugar, margarine, hosiery, footwear and brassware.

In Feb. 1962 the National Assembly laid down a new basis for industrial and commercial enterprises in place of the nationalization decreed by President Nasser a short time before Syria broke away from the United Arab Republic. Enterprises with a capital of about £230,000 or more are to become joint stock companies and must offer three-fifths of their stock for public subscription. Individual holdings are limited to 7% of the stock in companies whose capital is less than £450,000, and to 5% where the capital is that figure or more. In both cases the value of individual holdings is limited to £16,000. These rules apply only when an enterprise is 10 years old. Half of the stock freed by these limitations is to be offered to the public and half to workers and employees of the enterprise concerned. Where employees have not exercised their options by June 1963 the additional shares are to be offered to the public.

**COMMERCE.** Trade in calendar years in £Syr.1m. was as follows:

An agreement providing for a customs and economic union between Syria and Jordan was signed in Damascus on 5 Aug. 1956; a similar agreement with Egypt, on 3 Sept. 1957.

**COMMUNICATIONS.** *Shipping.* Following the separation of Syria from the common customs union with the Lebanon in March 1950, Syria has made improvements at Lattakia Port and issued regulations providing for the transit through that port of much of Syria's imports and the bulk of her exports. The amount of cargo discharged there in 1959 was 816,006 tons and the amount loaded 214,700 tons. A deep water harbour at Lattakia is being built by a Yugoslav firm. Tartous remains a fishing port and Banias is used as an oil terminal and loading port by the Iraq Petroleum Co., Ltd.

*Railways.* In Syria the following railways are open (in addition to those listed under LEBANON (p. 1208)): Standard gauge from Aleppo to Meidan-Ekbes (Turkish frontier), 72 miles; Aleppo to Tel-Kotchek (Iraq frontier), 325 miles; narrow gauge from Damascus to El Hammé, 120 miles; Damascus to Dera'a (Jordan frontier), 80 miles.

*Roads.* In 1961 there were 4,194 km of asphalted roads and 9,594 km of secondary roads. The first-class roads are capable of carrying all types of modern motor transport and are usable all the year round, while the second-class roads are usable during the dry season only, *i.e.*, for about 9 months. The Nairn Transport Company operate a trans-desert pullman motor coach service between Damascus and Baghdad. The motor vehicles registered at the end of 1961 totalled 29,053, including 2,582 motor cycles.

*Post.* An automatic telephone system has been installed in Damascus, Aleppo, Homs, Hama and Lattakia. Number of telephones (1963), 58,609; of these, 25,335 were in Damascus and 16,937 in Aleppo. Number of wireless sets (1954), 149,000.

**MONEY.** The monetary unit is the Syrian £, divided into 100 piastres. The official rate of exchange, which is only applied to transactions with distributing oil companies and for calculating import statistics, is £Syr.10·75 to the £ sterling.

In Dec. 1963 the notes in circulation amounted to £Syr.870·7m., coins to £Syr.14·34m.

**BANKING.** The Banque de Syrie et du Liban had the sole right of note issue, but on 1 Sept. 1955 this was transferred to the Government. Other banks in operation are the Arab Bank; the Bank Misr Syrie, Liban; Banque Nationale pour le Commerce et l'Industrie; the British Bank of the Middle East; Crédit Foncier d'Algérie et de Tunisie; Société Nouvelle de la Compagnie Algérienne; Crédit Lyonnais; the Rafidain Bank; Bank of the Arab Nation; Arab World Bank; Banque Libanaise du Commerce.

**WEIGHTS AND MEASURES.** A decree dated 22 Aug. 1935 makes the use of the metric system legal and obligatory throughout the whole of the country. In outlying districts the former weights and measures may still be in use. They are: 1 *okiya* = 0·47 lb.; 6 *okiyas* = 1 *oke* = 2·82 lb.; 2 *okes* = 1 *rottol* = 5·64 lb.; 200 *okes* = 1 *kantar.*

## Prades Thai, or Muang-Thai

**REIGNING KING. Bhumibol Adulyadej**, born 5 Dec. 1927, younger brother of King Ananda Mahidol, who died on 9 June 1946. King Bhumibol married on 28 April 1950 Princess Sirikit, and was crowned 5 May 1950. Children: Princess Ubol Ratana (born 5 April 1951), Prince Vajiralongkorn (born 28 July 1952), Princess Sirindhorn (born 2 April 1955), Princess Chulabhorn (born 4 July 1957).

**CONSTITUTION AND GOVERNMENT.** Until 24 June 1932 Siam was an absolute monarchy. On that date a *coup d'état* was effected and a Provisional Constitution Act was promulgated on 27 June. This was replaced by the constitution of 10 Dec. 1932, which in turn was superseded by a new constitution on 10 May 1946. A military *coup d'état* on 8 Nov. 1947, which put Marshal Pibulsonggram into power again, was followed by a revision of the constitution, which was promulgated on 23 March 1949. A *coup d'état*, staged by the Field-Marshal on 29 Nov. 1951, abolished the 1949 and restored the 1932 constitution.

The elections held on 26 Feb. 1957 gave a majority of seats to Field-Marshal Pibulsonggram's Seri Manangasila party. The government of Field-Marshal Pibulsonggram was overthrown on 16 Sept. 1957 by the C.-in-C., Field-Marshal Sarisdi Dhanarajta. A second general election held on 16 Dec. 1957 gave no clear majority to any one party. The cabinet, formed on 1 Jan. 1958 and headed by Gen. Thanom Kittikachorn, was overthrown on 20 Oct. 1958 by Field-Marshal Sarisdi Dhanarajta. The National Assembly was dissolved, the constitution abrogated and the political parties were disbanded.

An interim constitution was decreed on 28 Jan. 1959. It provides for the appointment by the government of a constitutional assembly of 240 members to draft a permanent constitution.

On the death of Field-Marshal Sarisdi Dhanarajta, the King appointed on 9 Dec. 1963 Field Marshal Thanom Kittikachorn as prime minister and minister of defence. *Minister for Foreign Affairs:* Col. Thanat Khoman.

On 1 Jan. 1946 a peace agreement was signed between Britain and India on the one hand and Thailand on the other, bringing to an end the state of war which had lasted since Dec. 1941, when Thailand became an ally of Japan. The new treaty provided for the return to Britain of the 4 Malay and 2 Shan states ceded to Thailand by Japan in July 1945. The peace treaty between Thailand and Australia was signed at Bangkok on 3 April 1946.

France, too, concluded a treaty with Thailand (17 Nov. 1946) by which Thailand restored the Indo-Chinese territories ceded by the Vichy Government in 1941, and annulled the convention of Tokyo of 9 May 1941.

*National flag:* Red, white, blue, white, red (horizontal, the blue band being twice as wide as the white or red ones).

On 24 June 1939 the President of the Council of Ministers issued a declaration that the name of the country, hitherto known as Siam, should henceforward be Thailand, and of the people and nationality, Thai.

LOCAL GOVERNMENT. For purpose of administration Thailand is divided into 71 provinces (*changwads*), each under the control of a *changwad* governor. The *changwads* are subdivided into 489 districts (*amphurs*), 21 subdistricts (*king amphurs*), 4,808 communes (*tambons*) and 40,456 villages (*moobans*). Local legislative and executive bodies with limited powers are being established with functions, procedure and method of election closely modelled on those of the central Assembly.

**AREA AND POPULATION.** The area of Thailand is 514,000 sq. km (198,250 sq. miles). Bangkok is the capital (population 1960, 2·3m.).

The census taken on 25 April 1960 gave a population of 26,257,916 (13,154,149 males, 13,103,767 females), of whom 8,271,302 lived in the Central region, 8,991,543 in the North-east region, 3,271,965 in the South region, 5,723,106 in the North region. Estimate, 1961, 27·18m.

**RELIGION.** The prevailing religion is Buddhism. In 1952 there were 15,581,240 Buddhists, 666,440 Moslems, 78,434 Christians and 18,100 others. The Buddhists had 20,944 temples, 159,648 priests and 73,311 novices in 1958. In 1962 there were 33,600 Protestants.

**EDUCATION.** Primary education is compulsory for children between the ages of 7–14 and free in local and municipal schools. In 1958 there were 353 kindergartens with 929 teachers and 19,450 pupils; 22,754 elementary schools with 94,153 teachers and 3,387,259 pupils; 1,852 secondary schools with 17,576 teachers and 482,923 pupils; 38 teachers' training colleges with 910 teachers and 13,684 students; 5 universities (Chulalonkorn University

(1917), Thammasart University (1934), Universities of Medical Science, Agriculture and Fine Arts; all in Bangkok) with 1,789 lecturers and 46,612 students. There were also 194 vocational and commercial colleges with together 3,487 teachers and 63,992 students.

*Cinemas* (1960). There were 209 cinemas with a seating capacity of 117,369.

**JUSTICE.** The judicial power is exercised in the name of the King, by (*a*) courts of first instance, (*b*) the court of appeal (*Uthorn*) and (*c*) the Supreme Court (*Dika*).

Courts of first instance are subdivided into 20 magistrates' courts (*Kwaeng*) with limited civil and minor criminal jurisdiction; 85 provincial courts (*Changwad*) with unlimited civil and criminal jurisdiction; the criminal and civil courts with exclusive jurisdiction in Bangkok and Dhonburi; the central juvenile court for persons under 18 years of age in Bangkok and Dhonburi.

The court of appeal exercises appellate jurisdiction in civil and criminal cases from all courts of first instance. From it appeals lie to Dika Court on any point of law and, in certain cases, on questions of fact.

The Supreme Court is the supreme tribunal of the land. Besides its normal appellate jurisdiction in civil and criminal matters, it has semi-original jurisdiction over general election petitions. The decisions of Dika Court are final but not binding upon itself.

**FINANCE.** Revenue and expenditure in 1m. baht (calendar years; from 1961, Oct.–Sept.):

| Budget (actual) | *1958* | *1959* | *1960* | *1961*[2] | *1961–62* | *1962–63*[3] | *1963–64*[4] |
|---|---|---|---|---|---|---|---|
| Revenue | 5,618 | 6,055 | 6,786 | 5,690 | 7,986 | 8,660 | 9,120 |
| Expenditure[1] | 6,400 | 6,555 | 6,785 | 5,843 | 8,134 | 9,620 | 11,430 |

[1] Includes both current and capital expenditure.
[2] Jan.–Sept. [3] Revised estimates. [4] Estimates.

Ordinary expenditures in 1962–63 (in 1m. baht) provided 1,640 for defence; 3,410·5 for general administration; 2,164·5 for economic services, 2,405 for social services.

Revenue in 1962–63 derived from income tax, 681; other taxes, 6,939; sales and charges, 232; government enterprises, 211·4; other receipts, 332.

On 30 June 1963 the national debt outstanding was as follows: Conversion loan of 1936, £264,900; Internal loans (including treasury bills 1,607m. baht), 6,597·5m. baht; International Bank loans, (*a*) direct government loans, $12·8m., (*b*) loans to government enterprises, $69·2m.; USA Government loans, (*a*) direct government loans, $27·1m., (*b*) loans to government enterprises, $35m; German Kreditanstalt loan, DM 1·7m.

External loans were for the rehabilitation of highways, the state railways, the development of the port of Bangkok, irrigation, drainage and water communications in the central plain as well as for hydro-electric power.

**DEFENCE.** Under the Ministry of Defence Organization Act of 1960 the Ministry of Defence has assumed the Supreme Command and the control of the Army, Navy and Air Force with the advice of the Defence Council headed by the Minister of Defence. The National Defence College, the Armed Forces Staff College and the Royal Three Arms Pre-Cadet Academy serve the education of officers. Each service has its own C.-in-C., service council, schools of arms and Command and General Staff College.

Under the Military Service Act of 1954 every able-bodied man between the ages of 21 and 30 is liable to serve 2 years with the colours; 7 years in the first reserve; 10 years in the second reserve; 6 years in the third reserve.

ARMY. The Army is organized in 3 infantry divisions and 1 separate regimental combat team; total number of units are 33 infantry battalions, 4 cavalry squadrons, 3 tank battalions, 11 artillery battalions, 3 anti-aircraft battalions, 1 signal battalion, 4 engineer battalions and 1 transport battalion. Peace-time strength is about 50,000.

NAVY. At the end of 1963 the Navy included 5 frigates, 2 armoured gunboats, 1 escort minesweeper, 1 training ship, 2 coastal minelayers, 5 coastal minesweepers, 18 patrol vessels, 8 patrol boats, 5 landing ships, 8 landing craft, 1 transport, 4 oilers, a water carrier and 2 tugs. Naval personnel totalled 2,000 officers and 16,000 men. The Marine Corps numbered 130 officers and 3,200 men. There is a Royal Naval College at Paknam.

There is a small naval air arm, equipped with obsolescent piston-engined Firefly reconnaissance-fighters and Helldiver bombers.

At the mouth of the Chao Praya River are the Paknam forts. The naval dockyard has been reconstructed; a large new graving dock is under consideration.

AIR FORCE. The Royal Thai Air Force has been reorganized with the assistance of a US Military Air Advisory Group. It has 3 combat wings, equipped with F-84G Thunderjet and F-86 Sabre jet-fighters and some obsolescent piston-engined types. There are also transport units equipped with C-54, C-47 and C-45 aircraft, training units with Chipmunk primary, T-6 and T-37 intermediate and T-33A advanced trainers, and helicopters for rescue duties. First-line strength is about 120–150 aircraft.

**PRODUCTION.** A National Economic Council, responsible for planning, was set up by parliament in 1950. This was in 1959 replaced by a new office of the National Economic Development Board.

According to the 1947 census, 85% of the occupied persons (9m.) were engaged in agriculture and in fishery, 2·2% in industrial pursuits.

*Agriculture.* The chief produce of the country is rice, which forms the national food and the staple article of export. The area under paddy is about 16m. acres. With the completion of the Chao Phya dam located near Chai-nat in 1957 the irrigable area in the Central Plain had by 1962 been extended to about 8,409,000 Rai (3,363,600 acres). Additional projects now under construction will bring the irrigable lands to the total of about 11,605,900 Rai (4,642,360 acres). Tank irrigation projects which were designed to ensure water supply for upland crop cultivation, especially in the north-eastern part, irrigate 325,418 Rai (130,167 acres).

Output of the major crops in 1960 (and 1961) was (in 1,000 metric tons): Paddy, 7,035 (7,462; 1962: 8,900; 1963: 9,250); maize, 544, (600); sugarcane, 5,382 (5,450); copra, 281 (299·6); groundnuts, 152 (165); cotton, 45·5 (50); kenaf, 181·3 (150); tobacco, 74·1 (76·5); sesame, 18·6 (19).

Livestock, 1960 (in 1,000 heads): Elephants, 13; horses, 179; buffaloes, 6,666; cattle, 5,265; swine, 4,231.

*Forestry.* About 60% of the land area of Thailand is under forest. In the north, mixed deciduous forests with teak (*Tectona grandis, Linn.*), growing in mixture with several other species, predominate. In the north-eastern section hardwood of the *Dipterocarpus* species, especially *Shorea* *obtusa* and *Pentacme Siamensis, Kurz* exist in most parts. In all other regions of the country tropical evergreen forests are found, with the well-known timber of commerce, Yang (*Dipterocarpus alatus, Roxb* and *Dipterocarpus spp.*) as the outstanding crops. Most of the teak timber exploited in northern Thailand is floated down to Bangkok. Some of them, however, are exported through the Salween into Burma.

About one-third of the teak-forest area is being exploited by the Forest Industry Organization, and the remaining two-thirds is to be worked by timber company lessees and other private enterprises.

Output of main forestry products in 1960 (and 1961) was (in 1,000 cu. metres): Teak, 154 (130); yang, 321 (273); other woods, 791 (852); firewood, 1,191 (1,317); charcoal, 629 (762).

Rubber production (in 1,000 metric tons), 1954, 120; 1955, 133·3; 1956, 136·7; 1957, 136; 1958, 140·6; 1959, 174; 1960, 170·8; 1961, 185·6.

*Fishery.* In 1960 the catch of sea fish was 146,000 metric tons and of fresh-water fish, 73,000 metric tons.

*Mining.* The mineral resources are extensive and varied, including cassiterite (tin ore), wolfram, scheelite, antimony, coal, copper, gold, iron, lead, manganese, molybdenum, rubies, sapphires, silver, zinc and zircons. By far the most important are tin and wolfram. Ore output in 1961 (in metric tons): Tin, 18,402; wolfram, 472 (1962: 420); lead, 5,202; antimony, 45; manganese, 531·7; iron, 55,793; fluorite, 4,755; gypsum, 12,040; lignite, 108,934; lead (1962), 2,360.

*Industry.* Production of manufactured goods in 1961 included 800,284 metric tons of cement, 23·7m. metres of cotton goods, 8·8m. gunny bags, 3,627 metric tons of paper.

**Trade Unions.** The Thai National Trade Union Congress is a member of the International Confederation of Free Trade Unions.

**COMMERCE.** The foreign trade (in 1m. baht) was as follows:

| | *1957* | *1958* | *1959* | *1960* | *1961* | *1962* |
|---|---|---|---|---|---|---|
| Imports (f.o.b.) | 8,537·0 | 8,287·0 | 8,988·3 | 9,622 | 10,287 | 11,430 |
| Exports (c.i.f.) | 7,539·5 | 6,447·0 | 7,560·4 | 8,614 | 9,997 | 9,594 |

In 1962 the main commodities exported were (in 1m. baht): Food, 4,702; beverages and tobacco, 35; manufactured goods, 96; chemicals, 8; crude material, 4,217. The main commodities imported were (in 1m. baht): Manufactured goods, 3,872; machinery, 3,156; mineral fuel and lubricants, 1,224; chemicals, 1,190; food, 765; beverages and tobacco, 147; crude materials, 205.

Distribution of trade by countries in 1962 (in 1m. baht):

| | Imports (c.i.f.) | Exports (f.o.b.) | | Imports (c.i.f.) | Exports (f.o.b.) |
|---|---|---|---|---|---|
| Japan | 3,357 | 1,353 | France | 406 | 66 |
| USA | 1,951 | 827 | Hong Kong | 318 | 1,056 |
| UK | 1,024 | 470 | Switzerland | 301 | 59 |
| West Germany | 828 | 523 | India | 170 | 67 |
| Indonesia | 809 | 562 | Malaya | 49 | 1,385 |
| Netherlands | 570 | 418 | Singapore | 45 | 821 |

In 1962 exports of rice were 1·3m. metric tons (3,300m. baht); rubber 194,180 metric tons (2,110m. baht); maize, 472,355 metric tons (502m. baht); tin, 19,898 metric tons (689m. baht); teak, 39,712 cu. ft (169m. baht); jute, 238,718 metric tons (588m. baht); tapioca products, 378,961 metric tons (403m. baht).

Total trade between Thailand and UK (British Board of Trade returns) in £ sterling:

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK | 2,006,966 | 3,771,249 | 7,233,860 | 8,250,164 | 5,242,216 |
| Exports from UK | 12,480,064 | 12,450,859 | 13,161,680 | 14,493,613 | 14,666,885 |
| Re-exports from UK | 100,423 | 102,319 | 104.282 | 99,633 | 298,664 |

**COMMUNICATIONS.** *Shipping.* In 1962, 1,792 vessels of 5,874,644 NRT entered and 1,815 of 5,874,950 NRT cleared the port of Bangkok.

The port of Bangkok, about 30 km from the mouth of the Chao Phya River, is capable of berthing ocean-going vessels of 10,000 gross tons and 28 ft draught. Bangkok is now a port of entry for Laos, and goods arriving in transit are sent up by rail to Nong Khai and ferried across the river Mekhong to Vientiane.

In 1962 there were 3 Thai steamship companies: Thai Navigation Co. Ltd (4 vessels); Thai Maritime Navigation Co. Ltd (3 vessels); Thai Lines Ltd (10 vessels). There are also 31 foreign steamship lines serving the port.

*Railways.* On 31 Dec. 1960 there were 3,495 km of state railways open to traffic and 530 km were under construction.

The northern line runs from Bangkok to Chiang Mai (751 km), the extreme northern terminus. The southern line (990 km) runs from Bangkok down the Peninsula to the frontier station of Padang Besar, where it connects with the Malayan railway from Penang, and to Singapore. Another line (214 km) branching off from Haad Yai on the southern line runs along the east coast of the peninsula to Su-gnai Kolok, where it connects with the Malayan railway line. There are branch lines (totalling 190 km) to Song Khla, Nakon-Sithamrat, Kan Tang and Tha-Kanon. The extensions of the north-eastern line (264 km) from Nakhon Ratsima (Korat) to Nong Khai (360 km) and from Kaeng Koi to Suranarai (61 km) have been completed. The Nakhon Ratsima–Ubol line (311 km) has been completed as far as Ubol Rat Thani. The eastern line (255 km) runs from Makkasan to Aran Pradet on the Cambodian frontier. The northern and southern railway systems are linked by a railway bridge over the Menam Chao Phya, and both systems terminate in Bangkok. All state railways are under one management. Gross receipts of the state railways in 1960 were 546,108,765 baht. The railways had, in 1960, a passenger traffic of 2,352,847,334 passenger-km.

*Roads.* In 1959 the length of highways open to traffic was 8,285 km, of which 439 km were first-class roads, 4,035 km were second-class and 3,810 km were third-class. In addition there were 2,116 km of provincial highways. Motor vehicles registered in 1959, totalled 83,389.

*Post.* In 1959 there were 165 post offices proper, 447 licensed and Amphur post offices and 349 railway-station post offices. Length of telegraph lines was 13,282 km. There were, in 1962, 49,730 telephones, of which 41,772 were in Bangkok.

In 1959, 51 wireless stations were dealing with inland traffic; 1 high-power transmitting station on telefunken system at Laksi and 1 receiving station at Nondhaburi serve foreign traffic.

*Aviation.* Thai Airways Co. Ltd (TAC), established in 1947, is the sole Thai air transport enterprise, with authorized capital of 300m. baht. The Company operates 11 domestic routes and 3 international routes. On 24 Aug. 1959, Thai Airways and the Scandinavian Airlines System set up a new company, Thai International Airways, to operate the international air services from Thailand.

During 1962 there were 21 foreign scheduled airlines operating through Bangkok: Air France, Air India, Air Vietnam, Alitalia, BOAC, Civil Air Transport, Cathay Pacific Airways, Ltd, Garuda Indonesian Airways, Japan Air Lines Co. Ltd, KLM, Lufthansa, Malayan Airways Ltd, Pan American World Airways Inc., Philippine Air Lines, Qantas Empire Airways Ltd, Royal Air Lao, SAS, Swissair, Union of Burma Airways, United Arab Airlines, Cie de Transports Aériens Intercontinentaux.

**MONEY.** The unit of currency is the *baht*, formerly called in English the *tical*, which is divided into 100 *satang* Silver coins have gone out of circulation. Only nickel, copper, tin and bronze coins are now minted, in denominations of 1 baht, 50, 25, 10, 5 and 1 *satang*. Currency notes, first issued in 1902, now comprise 1, 5, 10, 20, 100 *baht* notes.

The currency law is based on the Currency Act of Aug., B.E. 2501 (1958). Thailand departed from the gold standard on the 11 May 1932, and based the currency on sterling at the rate of 11 baht to £1. In 1963 the gold value of the baht was fixed at 0·0427245 gramme of fine gold, corresponding to the rate of exchange of 60 baht to £1 and 20·8 baht to US$1.

At the end of Dec. 1962, the total amount of coins in circulation was 217m. baht and 7,414m. baht of notes.

**BANKING.** In 1942 the Bank of Thailand was established under the Bank of Thailand Act, B.E. 2485 (1942) and began operations on 10 Dec. 1942, with the functions of a central bank. The Bank was organized on similar lines to the Bank of England, having its banking activities entirely separate from the management of the note issue. The Bank also took over the note issue previously performed by the Treasury Department of the Ministry of Finance. Although the entire capital is owned by the Government, the Bank is an independent body. Its gold holdings, at the end of 1962, amounted to 2,084m. baht.

At the end of 1962 there were 16 banks incorporated under Thai law and 11 branches of foreign banks. The former include the Agriculture Bank Ltd, Bangkok Bank Ltd, the Bangkok Bank of Commerce Ltd, the Bank of Asia for Industry & Commerce Ltd, the Bank of Ayudhya Ltd, Bangkok Metropolitan Bank Ltd, the Laem Thong Bank Ltd, the Provincial Bank Ltd, the Siam City Bank Ltd, the Siam Commercial Bank Ltd, Thai Development Bank Ltd, the Thai Farmers Bank Ltd, Thai Danu Bank Ltd, the Thai Military Bank Ltd, the Union Bank of Bangkok Ltd and the Wang Lee Chan Bank Ltd. The latter include the Chartered Bank, the Hongkong and Shanghai Banking Corporation, the Indian Overseas Bank Ltd, the Mercantile Bank Ltd, Banque de l'Indochine, Sze Hai Tong Bank Ltd, Bank of Canton Ltd, Bank of China Ltd, the National Handelbank N.V., Bank of America, N.T. & S.A., the Mitsui Bank Ltd and the Bank of Tokyo Ltd. Altogether there were 122 commercial bank offices in Bangkok and 302 offices in the other provinces.

The Government Savings Bank, which was established as an independent organization in 1947, originated in 1913 when the Government Savings Office was established.

**WEIGHTS AND MEASURES.** The metric system was made compulsory by a law promulgated on 17 Dec. 1923. The actual weights and measures prescribed by law are: Units of weight: 1 *standard picul* = 60 kg;

1 *standard catty* ($\frac{1}{100}$ picul) = 600 grammes; 1 *standard carat* = 20 centigrammes. Units of length: 1 *sen* = 40 metres; 1 *wah* ($\frac{1}{20}$ sen) = 2 metres; 1 *sauk* ($\frac{1}{4}$ wah) = 0·05 metre; 1 *keup* ($\frac{1}{2}$ sawk) = 0·25 metre. Units of square measure: 1 *rai* (1 sq. sen) = 1,600 sq. metres; 1 *ngan* ($\frac{1}{4}$ rai) = 400 sq. metres; 1 *sq. wah* ($\frac{1}{100}$ ngan) = 4 sq. metres. Units of capacity: 1 *standard kwien* = 2,000 litres; 1 *standard ban* ($\frac{1}{2}$ kwien) = 1,000 litres; 1 *standard sat* ($\frac{1}{50}$ ban) = 20 litres; 1 *standard tanan* ($\frac{1}{20}$ sat) = 1 litre.

Legislation passed in 1940 provided that the calendar year shall coincide with the Christian year, and that the year of the Buddhist era 2484 shall begin on 1 Jan. 1941. (The New Year's Day was previously 3 April.) The year B.E. 2506 therefore corresponds to A.D. 1963.

# TIBET

Pŏ

**HISTORY.** Tibet became a powerful kingdom in the 7th century A.D., and in the 8th century exacted tribute from China. King Song-tsen Gam-po introduced Buddhism from India; an alphabet based on Sanskrit was elaborated, thus making it possible to translate Indian Buddhist sacred books into Tibetan. Some 10 centuries later the Manchu Empire, taking advantage of dissensions between Mongols and Tibetans regarding the succession to the 6th Dalai Lama, sent an army to Lhasa which established, along with the 7th Dalai Lama, effective Chinese rule at Lhasa. From that time until the Chinese revolution in 1912 the Manchu dynasty maintained officers at Lhasa, though their authority decreased to a nominal suzerainty.

In the latter part of the 18th century Warren Hastings established friendly contacts with the then Regent of Tibet. But throughout the 19th century it was impossible to get the Tibetans to come to definite terms. A treaty and trade regulations were concluded with the Chinese in 1890 to regulate the frontier, but the Tibetans had no intention of acknowledging any such agreement, and the Chinese were unable to secure respect for it. At the same time the Dalai Lama was in direct communication with the Tsar of Russia. Eventually the Younghusband expedition of 1904 penetrated to Lhasa to secure a working agreement. The British having secured the Convention of 1904, immediately retired and before long reduced the indemnity imposed and evacuated the territory occupied as a security for its payment. The Manchu Empire immediately proceeded to convert Tibet from a loose form of vassalage into a province of China. Following the Chinese revolution of 1912, the Tibetans evicted all Chinese officials and troops; Great Britain repudiated the claim of the Chinese Republic to regard Tibet as on a footing with other provinces of China.

In 1914 a conference of representatives of Tibet, China and Great Britain at Simla initialled a Convention recognizing the autonomy of Tibet proper (outer Tibet) and created a zone (inner Tibet) under Chinese authority subject to certain existing Tibetan rights. The Chinese were unable to accept the boundaries between inner and outer Tibet laid down, and refrained from ratifying it, though they accepted the terms of the Convention in all other respects; but Great Britain and Tibet accepted the Convention as binding between themselves. Upon this Convention all subsequent intercourse between Britain and Tibet has been based. In 1918 Chinese aggression led to strong and successful Tibetan retaliation. At a time of Chinese weakness Great Britain did its utmost to urge moderation on Tibet, and Mr (afterwards Sir) E. Teichman brought about a truce in Sept. 1918. At the invitation of the Dalai Lama, Sir Charles Bell visited Lhasa in 1920 with a view to assisting in settlement between Tibet and China. However, the British and Indian Governments did not effect a permanent settlement.

In 1933 the 13th Dalai Lama died, and a Regent was appointed. A new Dalai Lama—aged about 5—was discovered in Chinghai and brought to Lhasa in 1939. He was installed in Feb. 1940, and assumed full powers as the temporal and spiritual head of the country on 17 Nov. 1950.

The Kuomintang government of China had a representative at Lhasa from 1934 to 1949, when their mission left Tibet at the request of the Tibetan Government. In Feb. 1950, after the establishment of the Chinese People's Government at Peking, a mission was despatched from Tibet to India with instructions to establish contact with representatives of the new Chinese Government. While arrangements for the mission's journey to China were under way, the Chinese People's Liberation Army invaded Tibetan territory in force in Oct. 1950. The Tibetan Government addressed two appeals to the United Nations, which, however, took no action.

**AREA AND POPULATION.** Tibet, extending from Kashmir in the west to China on the east, forms a narrow enclave, between the Himalayas and the Kunlun mountains to the north. Its area is about 470,000 sq. miles (1·22m. sq. km); its population is estimated at about 6m. The Chinese census of 30 June 1953 gave, 1,273,969 inhabitants in the 'Tibet region and Changtu area', and 2,775,622 Tibetans in the whole of China. However, another 1·4m. Tibetans are said to live in the Kham, Golok, Amdo, Sertha and Minyak areas. The capital is Lhasa.

**GOVERNMENT.** On 23 May 1951 a Sino-Tibetan agreement was signed in Peking which placed foreign affairs and defence under Chinese direction but left Tibet autonomous in internal affairs; a Chinese military area headquarters was established in 1952. In 1953 the Chinese foreign bureau in Lhasa was amalgamated with the Tibetan foreign department and the new bureau was placed under a Chinese official.

In Oct. 1951 the Dalai Lama and the Panchen Lama were appointed members of the Consultative Conference of the Chinese People's Republic. Both attended the first Chinese National Congress in July 1954. A Preparatory Committee of the proposed Tibetan Autonomous Region was established in Lhasa on 22 April 1956, with the Panchen Lama as acting chairman, but under the actual control of the Secretary of the Chinese Communist Party in Tibet. In 1956 the Committee set up 14 new government departments and 8 regional offices (with over 50 sub-regional offices). Its task, to introduce land and other reforms, was in 1957 postponed for 6 years under Chinese orders.

In March 1959 the Chinese suppressed a rebellion against their rule. The Dalai Lama fled to India.

In 1963 all 'Chinese citizens living in Tibet', aged 18 or over, were given the right to vote.

**FOREIGN RELATIONS.** Relations between Tibet and Nepál, which were regulated by a treaty of 1856 since which date Nepál has maintained a representative at Lhasa, underwent a change after the arrival of the Chinese. The Tibetan Government discontinued the annual subsidy for Rs 10,000 to Nepál and abrogated some of the privileges enjoyed by the Nepalese officers and the Nepáli residents in Tibet. A Sino-Nepalese agreement, signed in Káthmándu on 20 Sept. 1956, now regulates Nepalese–Tibetan relations. Nepál has given up the privileges her nationals enjoyed in Tibet and recognizes the 'Tibet Region' as an integral part of China: a Nepalese consulate-general may be established in Lhasa and a Chinese one in Káthmándu. The Nepali armed escort withdrew from Tibet in March 1957.

The conduct of British relations with Tibet is the responsibility of the High Commissioner for the UK in India. An Indian Mission, established in Lhasa in 1936, was redesignated a Consulate-General in 1952: there are also 3 Indian Trade Agents at Gyantse, Yatung and Gartok. A Sino-Indian agreement on trade and intercourse between Tibet and India was signed in Peking on 29 April 1954, providing for the continuance of the customary trade between Tibet and India, and pilgrimage. On 1 April 1955 the Government of India handed over their rest houses and post and telegraph services in Tibet to the People's Republic of China.

**EDUCATION.** Tibet has a middle school in Lhasa and 78 primary schools. Some 10,000 Tibetans of both sexes are receiving education.

**POWER.** The Chinese have installed a new hydro-electric power plant in Lhasa and a thermal power plant in Shigatse.

**COMMUNICATIONS.** The main trade route between India and Tibet lies from Bengal through Sikkim. There is a trade route linking Gartok and Lhasa. A motor road from Lhasa to Yatung *via* Shigatse and Gyantse and a rough motorable highway between Nagchukna in northern Tibet and Gartok in western Tibet were completed in 1956. A 1,000-mile road linking Sinkiang with Gartok was completed in Oct. 1957. A road from Lhasa to Káthmándu is being built. Lhasa and Shigatse have public telephones. An air service between central Tibet and China was inaugurated in 1957.

**MONEY.** The annual value of the trade between India and Tibet now averages Rs 3·3 crores. The Tibetan *sang* (paper, copper and silver currency) is valued at about 6½ *sangs* to the Indian rupee; there is considerable fluctuation.

# TUNISIA

## AL-DJOUMHOURIA ATTUNUSIA

**CONSTITUTION AND GOVERNMENT.** Tunisia is a sovereign independent republic. The monarchy was abolished by the Constituent Assembly on 25 July 1957. The National Assembly was elected on 8 Nov. 1959 when all 90 seats were won by the National Front.

The constitution of the republic was promulgated on 1 June 1959. The President and the National Assembly are elected simultaneously by direct universal suffrage for a period of 5 years. The President cannot be re-elected more than 3 times consecutively.

*President of the Republic and Head of Government:* Habib Bourguiba (elected 25 July 1957, re-elected 8 Nov. 1959).

The Ministry consists of 12 Secretaries of State.

*Secretary of State for the Presidency and Defence:* Bahi Ladgham.
*Foreign Affairs:* Mongi Slim.

By decree of 21 July 1959 the country was divided into 13 *gouvernorats*, each subdivided into *délégations*, *cheikhats* and *communes*.

The official language is Arabic.

**AREA AND POPULATION.** The boundaries are on the north and east the Mediterranean Sea, on the west the Algerian province of Constantine, and on the south the Sahara and Libya. The area is about 164,150 sq. km (63,362 sq. miles), including that portion of the Sahara which is to the east of the Djerid, extending towards Ghadamès.

At the census of 1 Feb. 1956 there were 3,383,904 Moslem Tunisians, 57,792 Israelite Tunisians, 255,324 Europeans (including 180,440 French and 66,910 Italians) and 86,149 others; total population, 3,783,169. Estimated population, 1 Jan. 1961, 4m., including 60,000 French and 40,000 Italians; density, 24·1 per sq. km.

The *gouvernorats* (as from 1959) and their populations (as at 1 Feb. 1956) are as follows: Tunis (747,967), Bizerta (258,544), Béja (248,525), Souk-el-Arba (196,113), Le Kef (265,502), Kassérine (164,395), Gafsa (259,266), Médénine (236,220), Gabès (175,884), Sfax (338,268), Kairouan (205,039), Sousse (447,093), Cap-Bon (240,353).

Tunis, the capital, had, in 1956, 410,000 inhabitants (1960: 680,000); Sfax, 65,635; Sousse, 48,172; Bizerta, 46,681; Kairouan, a holy city of the Moslems, 39,968; Menzel-Bourguiba, 34,732; La Goulette, 26,323; M'Saken, 26,142; Gabès, 24,420; Gafsa, 24,345; Béja, 22,668; Hammam-Lif, 22,161.

VITAL STATISTICS (1960). Births, 182,193; deaths, 42,042; (1959) marriages, 20,621; divorces, 1,257; infant mortality (1963), 87 per 1,000 live births.

**RELIGION.** The constitution recognizes Islam as the state religion. There are about 160,000 Roman Catholics, under the Archbishop of Carthage.

The Greek Church, the French Protestants and the English Church are also represented.

**EDUCATION.** All education was in 1956 made dependent on the Ministry of National Education. The 208 independent koranic schools have been nationalized and the distinction between religious and public schools has been abolished. Primary education is free. A teachers' training college (*école normale supérieure*) was established in 1955. There are also a high school of law and a centre of economic studies.

In 1960–61, 1,108 primary schools had 408,758 pupils; 57 secondary schools had 28,305 pupils; 63 technical schools had 4,078 pupils; 6 high schools had 3,360 students.

*Cinemas* (1959). There were 101 cinemas with a seating capacity of 38,819.

**SOCIAL WELFARE.** In 1960 there were 67 hospitals (12,050 beds) and 528 dispensaries, served by 471 doctors and 198 pharmacists. The registered medical personnel in Tunisia comprised, in 1959, 714 doctors, 181 pharmacists, 81 dentists and 18 veterinaries.

**JUSTICE.** The Government has abolished the multiple jurisdictions of religious (shara'ic and rabbinic) tribunals. These have been integrated into the secular courts so as to form a single three-level jurisdiction (courts of primary jurisdiction, courts of appeal and the High Court).

A Personal Status Code was promulgated on 17 Aug. 1956 and applied to Moslem Tunisians from 1 Jan. 1957. This raised the status of women, made divorce subject to a court decision, abolished polygamy and decreed a minimum marriage age.

**FINANCE.** Ordinary receipts and expenditure (in 1,000 dinars) for years ending 31 March and for calendar years from 1961:

| | *1957–58* | *1958–59* | *1959–60* | *1961* | *1962* | *1963*[1] |
|---|---|---|---|---|---|---|
| Revenue . . . | 46,464·5 | 46,845 | 48,600 | 55,800 | 56,800 | 60,000 |
| Expenditure . . . | 68,361·3 | 46,845 | 48,600 | 55,800 | 56,800 | 60,000 |

[1] Estimates.

At 31 Dec. 1960 the public debt amounted to 77,023,900 dinars.

**DEFENCE.** A Tunisian National Army was created in 1956. It consisted in 1960 of about 20,000 officers and men. Officer-cadets are being trained in France and England (Sandhurst).

The nucleus of a navy was formed late in 1959 with 1 corvette and 1 patrol craft bought from the French navy. The French forces finally withdrew from the Bizerta naval base in Oct. 1963.

The nucleus of an air force is formed by 15 Saab-91D Safir primary trainers, delivered by Sweden in 1960–61, 12 T-6 Texan advanced trainers, supplied by France in 1963, and 2 French-built Alouette helicopters.

**PRODUCTION.** Tunisia may be divided into 5 districts—the north, characterized by its mountainous formation, having large and fertile valleys (*e.g.*, the valley of the Medjerdah and the plains of Mornag, Mateur and Béja); the north-east, with the peninsula of Cap Bon, the soil being specially suited for the cultivation of oranges, lemons and citrus fruits; the Sahel, where olive trees abound; the centre, the region of high table lands and pastures, and the south, famous for its oases and gardens, where dates grow in profusion.

*Agriculture.* The chief industry is agriculture, and large estates predominate. Of the total area of 15,583,000 hectares, about 9m. hectares are productive, including 2m. under cereals, 3·6m. used as pasturage, 900,000 forests, and 1·3m. uncultivated.

| Products (in 1,000 metric tons) | *1957* | *1958* | *1959* | *1960* | *1961* | *1962* |

Other products are almonds, shaddocks, pistachios, alfa grass, henna and cork. Agricultural tractors numbered 17,333 in 1962.

Livestock in 1961 (in 1,000): Horses, 70; asses, 140; mules, 50; cattle, 400; sheep, 4,000; goats, 1,001; camels, 100; pigs, 10.

*Fishing.* In 1959, 4,133 boats with 13,807 men were engaged in fishing. In 1960, the catch amounted to 16,177 metric tons, and sponge fishing yielded 116 metric tons. In 1962 the catch amounted to 23,000 metric tons of fish.

In Oct. 1962 territorial waters were extended from 3 to 6 miles and fishing limits to 12 miles offshore.

*Mining.* Mineral production (in 1,000 metric tons) in 1962 (and 1961): Phosphate, 2,097 (1,981); iron ore, 761 (837); lead ore, 13·5 (17). Silver production, 1962, was 24,325 troy oz.; 1961, 69,767 troy oz.

*Industry.* Local and cottage industries are the spinning and weaving of wool for garments, carpet weaving, leather embroidery, saddle making, the manufacture of slippers, pottery and copper ware; tanning and silk weaving are declining.

*Power.* The electricity, gas and water services, formerly run by a French company, were nationalized on 26 Nov. 1959 and are now run by the Société Tunisienne d'Electricité et du Gaz.

Electrical energy generated was 274m. kwh. in 1960; 282m. kwh. in 1961.

**COMMERCE.** The customs union with France was repealed on 5 Sept. 1959. The imports and exports for calendar years (in 1m. francs and, from 1958, dinars) were as follows:

| | *1956* | *1957* | *1958* | *1959* | *1960* | *1961* | *1962* |
|---|---|---|---|---|---|---|---|
| Imports | 68,000 | 63,352·7 | 64,885·7 | 64,202 | 80,092 | 88,447 | 46,345 |
| Exports | 39,297 | 54,187·1 | 64,405·3 | 59,585 | 50,267 | 90,890 | 48,685 |

In 1961 imports totalled 1·3m. metric tons (1962: 1·25m.); exports totalled 3,482,000 metric tons (1962: 3·24m.).

Exports of phosphate rock (in 1,000 metric tons), 1939, 1,816; 1950, 1,688; 1955, 1,919; 1956, 1,776; 1957, 1,693·2; 1958, 1,966·8; 1959, 1,857.

Total trade between Tunis and UK (British Board of Trade returns, in £ sterling) was:

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK . . | 4,291,081 | 5,235,778 | 6,234,847 | 2,916,921 | 2,692,200 |
| Exports from UK . . | 2,374,484 | 2,597,401 | 2,045,003 | 2,723,261 | 2,805,106 |
| Re-exports from UK . . | 103,079 | 36,913 | 54,980 | 6,783 | 69,919 |

**COMMUNICATIONS.** *Shipping.* In the year 1959 there entered the ports of Tunisia, 4,057 vessels of 5,025,000 tons: of these 176 vessels of 379,000 tons were British. Tunis is directly accessible to ocean-going vessels.

*Roads.* In 1961 there were 15,470 km. of roads, of which 6,048 km were main roads.

Number of motor vehicles, 31 Dec. 1962, included 48,756 private cars, 27,649 commercial cars, 9,404 motor cycles and 12,923 tractors.

*Railways.* In 1960 there were 2,038 km of railways, of which 1,583 belonged to the State and 455 km to the Cie des Phosphates (Sfax–Gafsa). Passenger traffic was 3·1m. in 1960, goods traffic, 2·65m. metric tons.

*Post.* There were, in 1948, 3,747 km of telegraphs. The telephone systems had 91,000 km of inter-urban lines in 1953; telephones numbered 30,223 in 1962. There were, in 1959, 284 post offices, and a wireless transmitting station. Wireless sets in use at 31 Dec. 1954 were 92,987.

*Aviation.* The national airline is 'Tunis-Air'. The main airport is at El Aouina, where in 1962, 6,969 planes with 82,800 passengers arrived and 88,400 departed.

**MONEY.** On 1 Nov. 1958 a new currency, the *dinar*, divided into 1,000 *millimes*, was established; it is equivalent to 11·75 French new francs (£1 = 1 *dinar*, 176 *millimes*). The Central Bank of Tunisia is the note-issuing agency. Note circulation, 30 Nov. 1959, was 334,203 *dinars*.

The issue consists of coins of 1, 2, 5, 20, 50 and 100 millimes, and notes of 500 millimes, 1 dinar and 5 dinars.

**BANKING.** In 1960 there were 28 banks operating in Tunisia.

There are 157,000 savings accounts in the savings bank, deposits standing at 2,926m. francs at 31 Dec. 1960.

**WEIGHTS AND MEASURES.** The metric system of weights and measures has almost entirely taken the place of those of Tunisia, but corn is still sold in *kaffis* and *wibas*. The *kfiz* (of 16 *wiba*, each of 12 *sa'*) = 16 bushels. The *ounce* = 31·487 grammes; the multiples of the ounce are the various denominations of the *Rottolo*, which contains from 16 to 42 oz.

The principal measure of length is the *pik*: the *pik Arbi* for linen = 0·5392 yd; the *pik Turki* for silk = 0·7058 yd; the *pik Andoulsi* for cloth = 0·7094 yd.

## TÜRKIYE CUMHURIYETI

**HISTORY.** On 1 Nov. 1922 the Grand National Assembly at Ankara, convened on 23 April 1920, abolished the office of Sultan and provided that the office of Caliph, hitherto vested in the person of the Sultan, should be filled by election from among the Princes of the House of Osman. On 4 Nov. 1922 the administration of Istanbul passed into the hands of the Ankara Government. On 3 March 1924 the Grand National Assembly abolished the Caliphate and expelled from Turkey all the members of the House of Osman, depriving them of their Turkish citizenship.

The Grand National Assembly of Ankara voted, on 20 Jan. 1921, a constitution which declared that all sovereignty belonged to the people, and that all power, both executive and legislative, was vested in the Grand National Assembly. The old name 'Ottoman Empire' was discarded in favour of the designation 'Turkey'. A revision of the constitution was effected by the law of 20 April 1924, which declared the Turkish State to be a republic, the religion of which was Islam, the official language Turkish and the capital Ankara.

Women were granted the franchise on 5 Dec. 1934. Turkish men and women are entitled to vote at the age of 21 and to become deputies at the age of 30. Secret ballot was introduced by law on 10 July 1948.

On 19 March 1945 the Soviet Government denounced with effect from 7 Nov. 1945 the Treaty of Neutrality, Non-Aggression and International Co-operation which was signed on 17 Dec. 1925 to operate for 10 years and was later extended till 1945. No fresh instrument has been signed. In 1953 the USSR renounced all claims to the eastern Turkish provinces of Kars, Ardahan and Artvin.

A treaty of alliance with Great Britain and France was signed at Ankara on 19 Oct. 1939.

A treaty of financial assistance to be provided by the USA was signed in Ankara on 12 July 1947. Turkey became a full partner in NATO on 18 Feb. 1952 and in the Central Treaty Organization on 24 Feb. 1955.

**CONSTITUTION AND GOVERNMENT.** On 27 May 1960 the Turkish Army, directed by a National Unity Committee under the leadership of Gen. Cemal Gürsel, overthrew the Menderes government and assumed the administration of the country. The Grand National Assembly was dissolved and party activities were suspended. A new government, with Gen. Gürsel as Prime Minister, was formed on 28 May 1960. Party activities were legally resumed on 12 Jan. 1961, and about a dozen new parties were established early in 1961.

After a mock-trial at Yassıada, lasting from 14 Oct. 1960 to 15 Sept. 1961, 15 members of the former government were condemned to death, 31 to life imprisonment, 418 to imprisonment from 2 to 15 years; 12 of those sentenced to death were reprieved (including President Bayar), but Menderes, Zorlu and Polatkan were hanged.

A new constitution was approved at a referendum on 9 July 1961, by 6,348,191 against 3,934,370 votes, 39,608 ballot papers being invalid. The constitution declares Turkey 'a nationalistic, democratic, secular and social republic'. Legislative power is vested in the Grand National Assembly, executive power in the President of the Republic and the Council of Ministers, judicial power in independent courts. The President of the Republic is elected by the Grand National Assembly and the Senate in joint session for a 7-year term; he is not re-eligible.

*National flag:* A white crescent and star on red.

*National anthem:* Korkma! Sönmez bu şafaklarda yüzen al sancak (words by Mehmed Akif Ersoy; tune by Zeki; adopted 12 March 1921).

Elections held on 15 Oct. 1961 resulted in the following composition of the 2 chambers: *Grand National Assembly* (450 members elected by direct vote): 173 Republican People's Party, 158 Justice Party, 65 New Turkey

Party, 54 Republican Peasants' Nation Party. *Senate* (150 members elected by direct vote, 15 appointed by the President of the Republic, and (*ex officio*) the members of the National Unity Committee): 70 Justice Party, 36 Republican People's Party, 28 New Turkey Party, 16 Republican Peasants' Nation Party.

Past Presidents of the Republic: Mustafa Kemal Atatürk (29 Oct. 1923–10 Nov. 1938), İsmet İnönü (11 Nov. 1938–21 May 1950), Celâl Bayar (22 May 1950–27 May 1960).

*President of the Republic:* Gen. Cemal Gürsel (elected 26 Oct. 1961).

The Cabinet, a coalition of the Republican Party and Independents, was in March 1964 constituted as follows:

*Prime Minister:* İsmet İnönü (R).

*Deputy Prime Minister:* Kemal Satır (R). *Ministers of State:* Vefik Pirinççioğlu (R), Malik Yolaç (I), İbrahim Saffet Omay.

*Justice:* Sedat Cumralı (R). *Defence:* Ilhami Sancar (R). *Interior:* Orhan Öztrak (R). *Foreign Affairs:* Feridun Cemal Erkin (R). *Finance:* Ferit Melen (R). *Education:* Dr İbrahim Öktem (R). *Public Works:* Arif Hikmet Onat (R). *Commerce:* Fenni Islimiyeli (R). *Health and Social Welfare:* Kemal Demir (R). *Customs and Monopolies:* Mehmet Yücelen (I). *Agriculture:* Turhan Şahin (R). *Communications:* Ferit Alpiskender (I). *Labour:* Bülent Eçevit (R). *Industry:* Muammer Erten (R). *Tourism and Information:* Ali İhsan Göğüş. *Reconstruction and Resettlement:* Celalettin Uzer (I). *Rural Affairs:* Dr Lebit Yurdoğlu (R). *Power and Fuel:* Hüdai Oral (R).

LOCAL GOVERNMENT. The constitution of 1921 provided for the administrative division of the country into İl (now 67 in number), divided into İlçe, subdivided in their turn into Bucak. At the head of each İl is a Vali representing the Government. Each İl has its own elective council.

The İlçe is regarded as a mere grouping of Bucaks for certain purposes of general administration. The Bucak or commune is an autonomous entity and possesses an elective council charged with the administration of such matters as are not reserved to the State.

According to the municipal law passed in 1930, Turkish women have the right to be electors and to be elected at municipal elections.

**AREA AND POPULATION.** The Treaty of Peace between the Allied Powers and Turkey, which was signed at Lausanne on 24 July 1923, defined the European frontier of the new Turkey and to some extent her Asiatic frontiers. This treaty was ratified by the Grand National Assembly in Ankara on 23 Aug. 1923 and entered into force 6 Aug. 1924.

The Treaty of Lausanne and the conventions attached to it provided for the demilitarization of zones adjoining the European frontier, the Dardanelles and the Bosphorus, subject to the right to maintain a garrison at Istanbul, for the demilitarization of Imroz, Bozcaada (Tenedos) and Tavşan Islands, as well as the islands in the Sea of Marmara with one exception and for a special administrative regime in Imroz and Tenedos.

On 10 July 1936 a new Straits Convention was signed at Montreux (ratified on 9 Nov. 1936) to take the place of the 1923 Convention, whereby Turkey obtained the right of re-militarizing the zone of the Straits, and this area was re-occupied by Turkish troops on 21 July 1936. The International Commission of the Straits ceased to function on 30 Sept. 1936.

By an agreement between the Turkish and French Governments concluded at Ankara on 23 June 1939, the Sanjak of Alexandretta (the Hatay) was incorporated in the Turkish Republic.

The area of the Republic of Turkey is 780,576 sq. km (301,302 sq. miles). Area in Europe (Trakya), 23,623 sq. km; population, 1960, 2,294,625. Area in Asia (Anadolu), 756,953 sq. km; population, 1960, 25,470,195.

The census population of Turkey is given as follows:

| | Males | Females | Total | Increase % |
|---|---|---|---|---|
| 28 Oct. 1927 | 6,563,879 | 7,084,391 | 13,648,270 | — |
| 20 Oct. 1935 | 7,936,770 | 8,221,248 | 16,158,018 | 21·2 |
| 20 Oct. 1940 | 8,898,912 | 8,922,038 | 17,820,950 | 17·3 |
| 21 Oct. 1945 | 9,446,580 | 9,343,594 | 18,790,174 | 10·5 |
| 22 Oct. 1950 | 10,527,085 | 10,420,163 | 20,947,188 | 22·8 |

| 23 Oct. 1960 | 14,163,888 | 13,590,932 | 27,754,828 | 28·9 |

The population of the İls, at the census of 23 Oct. 1960, was as follows:

| | | | | | |
|---|---|---|---|---|---|
| Adana | 760,803 | Elâzığ | 278,332 | Maraş | 389,857 |
| Adıyaman | 233,717 | Erzincan | 243,005 | Mardin | 353,411 |

| Edirne (Adrianople) | 276,479 | Malatya | 394,172 | Zonguldak | 569,059 |
| | | Manisa | 657,104 | | |

Uşak was raised to the status of an İl on 11 July 1953. Adıyaman and Sakarya were established as İls in 1954; Kırşehir was in 1957 carved out of Nevşehir and Niğde.

The population of towns of over 50,000 inhabitants was as follows at the census of 23 Oct. 1960:

| | | | | | |
|---|---|---|---|---|---|
| İstanbul (Constantinople) | 1,466,535 | Sıvas | 93,368 | Elâziğ | 60,289 |
| Ankara | 650,067 | Erzurum | 90,069 | Urfa | 59,863 |
| İzmir (Smyrna) | 360,829 | Samsun | 87,688 | Manisa | 59,675 |
| Adana | 231,548 | Malatya | 83,692 | Maraş | 54,447 |
| Bursa | 153,866 | Diyarbakır | 79,888 | Zonguldak | 54,010 |

| Kayseri | 102,596 | İskenderun | 62,061 | | |
| | | Balıkesir | 61,145 | | |

The population of Turkey comprises besides the Turks proper (according to the criterion of 'mother tongue', 1960 census) 1,679,265 Kurds (in the eastern provinces), 79,837 Circassians, 300,583 Arabs, 56,242 Armenians, 51,982 Georgians, 79,691 Greeks, 5,432 Bulgarians, 32,975 Jews, 30,566 Lazes.

In June 1934 a law made it obligatory for every family to adopt a distinct family name. The titles Pasha, Bey, Efendi, Hazretleri (Excellency), etc., were abolished about the same time.

**RELIGION.** Although Islam is no longer recognized as the religion of the State, Moslems form 98.92% of the population. Turkish has been to some extent substituted for Arabic as the liturgical language. Under the imperial system the non-Moslem communities were recognized as organized communities or *millets*, the heads of which exercised spiritual as well as civil functions. The Treaty of Lausanne has restricted the administrative prerogatives of the spiritual heads of the communities, and their authority is now purely ecclesiastical.

Istanbul is the seat of the Œcumenical Patriarch, who is the head of the Orthodox Church in Turkey. The Armenian Church (Gregorian) is ruled by a Patriarch in İstanbul who is subordinate to the Katholikos of Etchmiadzin. The Uniat Armenian Church is ruled by the Patriarch of Cilicia. The Chaldaeans (Nestorian Uniats) have a Bishop at Mardin. The Syrian Uniats have a See of Mardin and Amida, but it is united with their Patriarchate of Antioch, whose incumbent resides in Damascus. The Greek Uniats (Byzantine Rite) have as their Ordinary in İstanbul the Titular Bishop of Gratianopolis. The Latins have an Apostolic Delegate in İstanbul and an Archbishop in İzmir, but their Patriarch of İstanbul is titular and non resident. There is a Grand Rabbi (Hahambaşı) in İstanbul for the Jews, who are nearly all Sephardim.

At the census of 23 Oct. 1960 there were in Turkey 27,476,539 Moslems, 106,611 Orthodox, 70,953 Gregorians, 24,774 Roman Catholics, 17,396 Protestants, 10,456 other Christians (unspecified), 43,926 Jews, 2,567 adherents of other religions, 416 without religion and 1,182 undeclared or unknown.

On 10 April 1928 the Grand National Assembly passed a law abolishing Islam as the State religion. An oath of allegiance to the Republic, taken by the President and Deputies, took the place of the former religious formula.

A law passed in Dec. 1934 forbids the wearing of clerical garb except in places of worship and during divine service. An exception is made for one representative of each religion or sect. This law applies to foreigners as well as to Turkish citizens.

**EDUCATION.** Elementary education is compulsory and co-educational and, in state schools, free. All children from 7 to 12 are to receive primary instruction, which may be given in state schools, schools maintained by communities, or private schools, or, subject to certain tests, at home. The state schools are under the direct control of the Ministry of Education. They include primary schools, secondary schools, 'preparatory' schools (for students intending to enter higher schools) and a certain number of *lycées* or secondary schools of a superior kind. There are also training schools for male and female teachers, and a certain number of higher technical schools. There are 2 universities in İstanbul, 2 in Ankara (including the newly formed Middle East Technical University designed to meet the technical needs of the whole Middle East), the Aegean University in İzmir, and Atatürk University in Erzurum (opened in Nov. 1957). The important non-Moslem communities in İstanbul maintain their own schools, which, like all 'private' schools, are subject to the supervision of the Ministry of Education. There are 116 Turkish, 144 minority and 58 foreign private schools, the total enrolment in 1958–59 being 41,545.

Literacy of the population of 6 years and over was 10·6%, in 1927, 19·2% in 1935, 29% in 1945, 33·6% in 1950, 40·9% in 1955 and 39·5 in 1960.

Religious instruction in schools, hitherto prohibited, was made optional in May 1948.

| Statistics for 1962–63 | Number | Teachers | Students |
|---|---|---|---|
| Primary schools (state and private) | 26,307 | 75,884 | 3,426,982 |
| Secondary schools (state and private) | 814 | 15,449 | 354,904 |
| *Lycées* (state and private) | 217 | 5,963 | 104,085 |
| Professional schools | 483 | 9,371 | 129,155 |
| Teachers' training colleges | 84 | 1,549 | 37,089 |
| Universities | 7 | 3,042 | 47,979 |

On 1 Nov. 1928 the Grand National Assembly voted a law for the adoption of Latin characters as from 1 Dec. 1928. The publication of books in Arabic characters was forbidden after 1 Jan. 1929.

*Newspapers* (1963). Of the 372 daily newspapers in the Turkish language 28 appear in Istanbul and 15 in Ankara. There are also 2 dailies published in Greek, 1 in French, 2 in Armenian and 1 in English.

*Cinemas* (1960). There were about 800 cinemas.

**HEALTH.** Public health is the responsibility of the Ministry of Health and Social Welfare, established in 1920; social insurance for workers comes under the Workers' Insurance Institution attached to the Ministry of Labour.

In 1962 there were 9,911 doctors and 613 hospitals (50,135 beds).

The counterpart of the Red Cross in Turkey is the Red Crescent Society founded in 1877.

**JUSTICE.** The Ottoman laws based on the religious principles have been abolished. The religious courts (Sheri) were suppressed in 1924. The system which was thus unified consists of: (1) justices of the peace (single judges with limited but summary penal and civil jurisdiction); (2) courts of first instance (single judges, dealing with cases outside the jurisdiction of (3) and (4)); (3) central criminal courts (a president and 2 judges, dealing with cases where the crime is punishable by imprisonment over 5 years); (4) commercial courts (3 judges).

The Court of Cassation sits at Ankara.

A High Tribunal may be constituted by the Grand National Assembly to try members of the Cabinet, the Council of State and the Court of Cassation.

The Council of State is the highest administrative tribunal; it consists of 5 chambers. Its 31 judges are nominated from among high-ranking personalities in politics, economy, law, the army, etc.

The Civil Code and the Code of Obligations have been adapted from the corresponding Swiss codes. The Penal Code is largely based upon the Italian Penal Code, and the Code of Civil Procedure closely resembles that of the Canton of Neuchâtel. The Commercial Code is based on the German.

A law passed on 2 Sept. 1961 prescribes the death penalty for all 'offences against the revolutions [*i.e.*, of Atatürk and Gürsel], the head of state, the National Unity Committee and the council of ministers'.

A Constitutional Court was set up in 1962.

**FINANCE.** Estimates of revenue and expenditure (in £T1,000) for financial years 1 March–28/29 Feb. balanced as follows: 1958–59, 4,475,552; 1959–60, 5,980,630; 1960–61, 7,281,695; 1961–62, 8,678,703; 1962–63, 10,114,861; 1963–64, 12,101,600.

The budget estimates (in £T1,000) for the financial year ending 29 Feb. 1964 are as follows:

At 30 Sept. 1963 the public debt totalled £T14,538m., consisting of £T9,071m. internal and £T5,467m. external debts.

**DEFENCE.** Several bills for the reorganization of the armed forces were passed in June 1949 by the Grand National Assembly. One of these placed all organizations connected with national defence under the authority of the Minister of National Defence. Another created a Supreme Council of National Defence, under the chairmanship of the Prime Minister, with the object of co-ordinating the resources of the country in case of war. Besides the Minister of National Defence and the Chief of the General Staff, the heads of economic Ministries are members of this council.

Military service in all forces is 2 years; in extraordinary conditions this term may be increased to 3 or 4 years. Men are called up when they reach the age of 20. The average number of men liable to be called up is 175,000 every year. The strength of the forces in 1957 was about 22,000 officers and 350,000 men. The total number that could be mobilized is estimated at over 2m.

Army. The land forces contain 16 infantry, 6 armoured and 3 cavalry units. There are 6 fortified places. The land forces are divided into 6 army and 9 army-corps regions. Infantry retains the most important place in the Army; it is equipped with up-to-date arms. Cavalry is being equipped with modern arms and partly motorized. Artillery is being motorized to a large extent. The units are largely equipped with 10·5 cm howitzer guns. A Turkish brigade took part in the United Nations campaign in Korea. Ground forces have been assigned to the South-Eastern Command of NATO of which İzmir is the headquarters.

NAVY. The Navy includes 9 destroyers, 10 submarines, 11 escort minesweepers, 9 coastal escorts, 6 coastal minelayers, 16 coastal minesweepers, 30 coastal craft, 2 repair ships, a large training ship (*ex*-yacht), a submarine rescue ship, 4 oilers, 5 boom defence vessels and 1 tender. Four large British destroyers of the 'M' Class were transferred to Turkey on 16 Aug. 1957. Ten 'Banger' class fleet minesweepers (redesignated coastal escorts) and 4 coastal minesweepers were acquired from Canada in 1957–58. The battle cruiser *Yavuz*, formerly the German *Goeben*, launched in 1911, displacing 22,734 tons, and armed with ten 11-in. guns was decommissioned in 1960.

The naval bases are at Göcülk in the Gulf of İzmit, at İskenderun and at İzmir.

Personnel strength in 1963 was 2,100 officers and 35,000 men.

AIR FORCE. The Air Force is under the control of the General Staff and, operationally, under 6 ATAF.

It has 12 fighter-bomber squadrons, each equipped with 25 F-100 Super Sabres, 3 interceptor squadrons equipped with Canadian-built Sabres. 2 reconnaissance squadrons of RF-84F Thunderflash aircraft and Nike surface-to-air missile units. Re-equipment of some squadrons with F-104G Starfighters began in 1963. The transport units are equipped with C-47 and C-45 twin-engined transports and C-54s. Training types include T-33A jet advanced trainers, T-6 Texan intermediate and T-34 Mentor primary trainers. Personnel strength is about 30,000.

**PRODUCTION.** The first 5-year development plan, beginning in Jan. 1963, provides for investments of about £T60.000m., of which between 20–25% is expected to be supplied by foreign aid.

*Agriculture.* The number of people engaged in agriculture was in 1960 (census), 9,696,535.

In 1962, of the total land area of 77,698,000 hectares, 15,099,000 were under crops, 28,666,000 were meadows and pastures, 800,000 were fruit and vegetable gardens and orchards, 802,000 were vineyards, 599,000 were olive groves, 10,584,000 were forests, 8,048,000 were fallow and 13·1m. were unproductive.

The soil for the most part is very fertile; the principal products are cotton, tobacco, cereals (especially wheat), figs, silk, olives and olive oil, dried fruits, liquorice root, nuts, almonds, mohair, skins and hides, furs, wool, gums, canary seed, linseed and sesame. Opium is an important crop in Konya and Afyonkarahisar. The principal tobacco districts are Samsun (the most important), Bafra, Çarsamba, İsmit and İzmir. Half of the exports of leaf tobacco goes to the USA. The principal centre for silk production is Bursa. The production of olive oil, mainly confined to the İl of Aydın, is very important (56,370 metric tons in 1962). Sugar production (refined) in

1962 was 429,693 metric tons. Fruit production in 1962 included 3,382,270 metric tons of grapes, 210,040 metric tons of fresh figs, 1,316m. oranges, 669,745 lemons, 122,380 metric tons of hazelnuts, 321,990 metric tons of apples, 329,423 mandarins and 132,660 metric tons of pears.

Turkey produced 6,750 metric tons of flax fibre and 10,700 tons of hemp fibre in 1961.

Cotton production in 1960 was 195,000 metric tons (1962: 245,000) from 626,000 hectares (1962: 660,000). Raw-cotton exports (1962), 115,658 metric tons.

Agricultural tractors numbered 43,747 in 1962.

Area (in 1,000 hectares) and yield (in 1,000 metric tons) of principal crops:

| | 1960 | | 1961 | | 1962 | |
|---|---|---|---|---|---|---|
| | *Area* | *Yield* | *Area* | *Yield* | *Area* | *Yield* |

On 7 June 1945 the Grand National Assembly passed the Land Reform Bill under which large tracts of agricultural land are being distributed to peasants without land or with insufficient for their subsistence.

Livestock, 1962: 31,614,000 sheep, 16·42m. ordinary goats, 5,655,000 mohair goats, 12,662,000 cattle, 1,880,400 asses, 207,800 mules, 1,238,500 horses, 1,159,900 buffaloes, 52,680 camels.

In 1962 Turkey produced 42,710 metric tons of wool, 8,340 tons of mohair and 9,280 tons of goats' hair.

*Forestry.* On 8 Feb. 1937 a new forest law was voted, providing for state control of all forests, including those under private ownership. It contains measures for planting, protection against fire, marauders and insects, and lays down penalties for infringements of its clauses. The most wooded İls are Kastamonu, Aydın, Bursa, Bolu, Trabzon, Konya and Balıkesir. Of the forest land, 10,417,560 hectares belonged to the State in 1951. In 1955 the value of forest products was £T191,953,000.

*Mining.* The Turkish provinces, especially those in Asia, are reported rich in minerals, which are little worked. In 1936 the Government acquired the Zonguldak coalmines. Turkey is one of the four principal producers of chrome in the world; other important minerals are copper, sulphur, antimony, manganese and wolfram.

Oil is being produced in Garzan and Raman. Under the oil law of 14 Oct. 1954, 18 Turkish and foreign companies have obtained permits to explore for oil. An agreement has been signed between Turkey and Iran for the construction of an oil pipeline from Kum to the Mediterranean.

Production of principal minerals (in 1,000 metric tons) was:

| | *1959* | *1960* | *1961* | *1962* |
|---|---|---|---|---|
| Coal[1] | 6,524·0 | 6,318·0 | 6,387·0 | 6,492·0 |

| Iron ore | 872·9 | 796·3 | 764·5 | 814·3 |

[1] The figures given for coal refer to unwashed and unscreened coal.

*Industry.* Production in 1962 included: 25·9m. metres of cotton fabrics, 4·24m. metres of woollen fabrics, 28,104 metric tons of cotton yarns, 2,700 metric tons of woollen yarns, 2·39m. metric tons of cement, 81,744 metric tons of paper. Industrial plants number about 30,000.

Output of the Karabük iron and steel plant (180,000 tons capacity) in 1962 (in metric tons): Pig-iron, 151,368; ingots and steel for casting, 241,536; sheet, 14,856; pipes, 17,424; coke, 744,000.

*Power.* The undeveloped hydro-electric power in Turkey is estimated at 2·2m. kw. In 1962 the electrical power plants (hydro-electric or thermal) had a total installed capacity of 1·33m. kw. The most important power stations include: İstanbul (capacity, 127,925 kw.), Çatalağzı (129,500 kw.) Seyhan (36,000 kw.), Sarıyar (80,000 kw.), Hirfanlı (128,000 kw.), Demirköprü (69,000 kw.) and Tunçbilek (64,992 kw.).

*Tourism.* A tourist industry is developing. The number of foreign tourists is over 200,000 annually.

**LABOUR AND SOCIAL SECURITY.** On 27 June 1945 a Ministry of Labour was set up, superseding the Department of Labour under the control of the Ministry of Economic Affairs. Strikes and lock-outs are prohibited. An attempt must be made in the first instance to settle industrial disputes, collective or individual, by conciliation. In individual disputes, if the conciliation proceedings are fruitless, the dispute may be made the subject of legal proceedings. A collective industrial dispute which has been found impossible to settle by conciliation must be submitted to arbitration by tripartite arbitration boards.

Children under 12 must not be employed in industry; boys under 18 and girls and women irrespective of age not underground and on night shifts.

Free public employment exchanges began to operate, under the general control of the Ministry of Labour, from 25 Jan. 1946; there are 58 regional employment offices. Establishments subject to the Labour Act numbered 23,702 at 30 June 1959.

In 1963 Turkey's labour force numbered 13·12m., of which 76·2% were engaged in agriculture and 10·2% in manufacturing industries.

The trade-union movement began in 1947. Employers and employees may form unions, but these must not engage in political activities. There is a national confederation (Türk-İş) and 27 federations. The number of local trade unions is 383, with a total membership of 244,000. There are also 25 employers' unions, with a total membership of about 1,060.

**COMMUNICATIONS.** *Shipping.* In 1959 the merchant marine had a gross tonnage of 798,912 (2,679 vessels), of which the Maritime Bank owned 404,126 tons (1,041 vessels). Of the total, 2,505 vessels (528,195 tons) were cargo vessels, 147 (214,453) were passenger ships and 27 (56,264) were tankers.

In 1962, 4,167 vessels of 6,358,036 tons entered and 5,127 vessels of 6,234,899 tons cleared Turkish ports under foreign flags, and 28,384 vessels of 16,839,033 tons entered under the Turkish flag.

Ports built or extended since 1950 are Iskenderun, Ereğli, Trabzon, Samsun and Mersin; new facilities have been provided at Haydarpaşa and Salipazarı. Work is going on to extend the port of Giresun, and a port is being constructed at Alsancak.

*Roads.* Turkey had, 1962, 26,695 km of national highways and 34,831 km of provincial roads. In 1962 there were registered 114,300 motor vehicles.

*Railways.* The total length of railway lines in 1962 was 7,882 km, all state-owned; 28 km are electrified. In 1962 Turkish railways carried 15,057m. ton-km and 83,527,000 passengers.

*Post.* In 1955 there were 132,295 km of telephone lines. Number of post and telegraph offices, 1,847. Number of telephones (1962), 263,802; of these, 95,000 were in İstanbul, 48,600 in Ankara and 17,000 in İzmir. In 1962 there were 1,707,257 wireless sets.

*Aviation.* The State Airways Administration, formed in 1938, has been converted into the mixed company Turkish Airlines (Türk Havayolları Anonim Ortaklığı); BOAC became a partner in July 1957. It uses 22 domestic airports and conducts foreign services to Athens, Beirut, Nicosia, Rome, Frankfurt and London. In 1962 Turkish Airlines carried 262.920 passengers. 432 metric tons of mail and 4,344 metric tons of freight. Istanbul is connected with all the principal countries by BEA, Pan American Airways, KLM, Swissair, Air France, etc.; Cyprus Airways connects Ankara with Cyprus.

**MONEY.** The Turkish pound is divided into 100 piastres (*kuruş*) and contains 6·615 grammes of fine gold. The piastre pieces are of nickel. Silver is legal tender up to £T20 and nickel up to 500 *kuruş*.

The only money in general circulation, apart from a 2·5-*kuruş* brass coin and coins for 1, 5, 10, 25 and 100 piastres, are notes of the Central Bank. The Turkish gold *lira*, at 2 June 1963, was worth 3.390 *kuruş*.

The Turkish pound was revalued on 22 Aug. 1960 at 25·32 to £1 and 9·00 to US$1.

**BANKING.** In Jan. 1927 the Turkish Government issued a charter for a new national bank, the Central Bank of the Turkish Republic (Merkez Bankası). Its capital is £T15m., which has been fully subscribed. Its status was determined by a law passed by the Grand National Assembly on 11 June 1930. It began its activities on 3 Oct. 1931. The original concession for 30 years has been extended to 1999. It is the sole bank of issue. In Nov. 1963 the amount of currency in circulation was £T5,575·4m. and the Bank's gold holdings was valued at £T1,225m.

There are 13 other banks established by special laws. These include the Halk Bankasi (People's Bank), a popular savings bank, capital £T100m.; the Sümer Bank (industrial), capital £T500m.; the Ziraat Bankası (agriculture), capital £T750m.; the Eti Bank (development of mines and marketing of minerals), capital £T500m.; the Emlâk Kredi Bankası (real property and mortgages), capital £T300m.; İller Bankası (Provincial Bank), capital £T600m.; Denizcilik Bankası (shipping), capital £T500m. The principal foreign bank is the Ottoman Bank, founded in 1863 with 44 branches or agencies. There are also 26 national commercial banks and 13 regional banks.

Bank deposits amounted to £T9,852m. in Nov. 1963.

The Post Office opened savings bank accounts in 1953.

**WEIGHTS AND MEASURES.** The metric system came into force on 1 Jan. 1934. On 24 May 1928 the Grand National Assembly made European numerals obligatory as from 1 June 1929.

On 1 March 1917 the Gregorian calendar was introduced into Turkey, to be used side by side with the Hegıra calendar, while as from 26 Dec.

1925 it was decided finally to adopt the Gregorian calendar alone, the Turkish civil year 1342 becoming 1926.

# UNION OF SOVIET SOCIALIST REPUBLICS

### SOYUZ SOVYETSKIKH SOTSIALISTICHESKIKH RESPUBLIK

**POST-REVOLUTION HISTORY.** Up to 12 March 1917 the territory now forming the USSR (together with that of Finland, Poland and certain tracts ceded in 1918 to Turkey, but less the territories then forming part of the German, Austro-Hungarian and Japanese empires—East Prussia, Eastern Galicia, Transcarpathia, Bukovina, South Sakhalin and Kurile Islands—which were acquired during and after the Second World War) was constituted as the Russian Empire. It was governed as an autocracy under the Tsar, with the aid of Ministers responsible to himself and a State Duma with limited legislative powers, elected by provincial assemblies chosen by indirect elections on a restricted franchise.

On 12 March 1917 a revolution broke out. The Duma parties, the same day, set up a Provisional Committee of the State Duma, while the factory workmen and the insurgent garrison of Petrograd elected a Council (Soviet) of Workers' and Soldiers' Deputies. Soviets were also elected by the workmen in other towns, in the Army and Navy and, as time went on, by the peasantry. On 15 March 1917 the Tsar abdicated, and the Provisional Committee, by agreement with the Petrograd Soviet, appointed a Provisional Government and, on 14 Sept., proclaimed a republic. However, a political struggle went on between the supporters of the Provisional Government—the Mensheviks and the Socialist-Revolutionaries—and the Bolsheviks, who advocated the assumption of power by the Soviets. When they had won majorities in the Soviets of the principal cities and of the armed forces on several fronts, the Bolsheviks organized an insurrection through a Military-Revolutionary Committee of the Petrograd Soviet. On 7 Nov. 1917 the Committee arrested the Provisional Government and transferred power to the second All-Russian Congress of Soviets. This elected a new government, the Council of People's Commissars, headed by Lenin.

On 31 Jan. 1918 the third All Russian Congress of Soviets issued a Declaration of Rights of the Toiling and Exploited Masses, which proclaimed Russia a Republic of Soviets of Workers', Soldiers' and Peasants' Deputies; and on 10 July 1918 the fifth Congress adopted a Constitution for the Russian Socialist Federal Soviet Republic. In the course of the civil war other Soviet Republics were set up in the Ukraine, Byelorussia and Transcaucasia. These first entered into treaty relations with the RSFSR and then, in 1922, joined with it in a closely integrated Union.

**CONSTITUTION.** *Constituent Republics.* The Union of Soviet Socialist Republics was formed by the union of the RSFSR, the Ukrainian Soviet Socialist Republic, the Byelorussian Soviet Socialist Republic and the Transcaucasian Soviet Socialist Republic; the Treaty of Union was adopted by the first Soviet Congress of the USSR on 30 Dec. 1922. In May 1925 the Uzbek and Turkmen Autonomous Soviet Socialist Republics and in Dec. 1929 the Tadzhik Autonomous Soviet Socialist Republic were declared constituent members of the USSR, becoming Union Republics.

At the 8th Congress of the Soviets, on 5 Dec. 1936, a new constitution of the USSR was adopted. The Transcaucasian Republic was split up into the Armenian Soviet Socialist Republic, the Azerbaijan Soviet Socialist Republic and the Georgian Soviet Socialist Republic, each of which became constituent republics of the Union. At the same time the Kazakh Soviet Socialist Republic and the Kirghiz Soviet Socialist Republic were proclaimed constituent republics of the USSR.

In Sept. 1939 Soviet troops occupied eastern Poland as far as the 'Curzon line', which in 1919 had been drawn on ethnographical grounds as the eastern frontier of Poland, and incorporated it into the Ukrainian and Byelorussian Soviet Socialist Republics. In Feb. 1951 some districts of the Drogobych Region of the Ukraine and the Lublin Voivodship of Poland were exchanged.

On 31 March 1940 territory ceded by Finland was joined to that of the Autonomous Soviet Socialist Republic of Karelia to form the Karelo-Finnish Soviet Socialist Republic, which was admitted into the Union as the 12th Union Republic. On 16 July 1956 the Supreme Soviet of the USSR adopted a law altering the status of the Karelo-Finnish Republic from that of a Union (constituent) Republic of the USSR to that of an Autonomous (Karelian) Republic within the RSFSR.

On 2 Aug. 1940 the Moldavian Soviet Socialist Republic was constituted as the 13th Union Republic. It comprised the former Moldavian Autonomous Soviet Socialist Republic and Bessarabia (44,290 sq. km, ceded by Rumania on 28 June 1940), except for the districts of Khotin, Akerman and Ismail, which, together with Northern Bukovina (10,440 sq. km), were incorporated in the Ukrainian Soviet Republic. The Soviet–Rumanian frontier thus constituted was confirmed by the peace treaty with Rumania, signed on 10 Feb. 1947. On 29 June 1945 Ruthenia (Sub-Carpathian Russia, 12,742 sq. km) was by treaty with Czechoslovakia embodied in the Ukrainian Soviet Socialist Republic.

On 3 Aug. 1940 Estonia, Latvia and Lithuania were incorporated in the

Soviet Union as the 14th, 15th and 16th Union Republics. The change in the status of the Karelo-Finnish Republic has reduced the number of Union Republics to 15.

After the defeat of Germany it was agreed by the governments of the UK, the USA and the USSR (by the Potsdam declaration) that part of East Prussia should be embodied in the USSR. The area (11,655 sq. km), which includes the towns of Königsberg (renamed Kaliningrad), Tilsit (renamed Sovietsk) and Insterburg (renamed Chernyakhovsk), was joined to the Russian Soviet Federal Socialist Republic by decree of 7 April 1946.

By the peace treaty with Finland, signed on 10 Feb. 1947, the province of Petsamo (Pechenga), ceded to Finland on 14 Oct. 1920 and 12 March 1940, was returned to the Soviet Union. On 19 Sept. 1955 the Soviet Union renounced its treaty rights to the naval base of Porkkala-Udd and on 26 Jan. 1956 completed the withdrawal of its forces from Finnish territory.

In 1945, after the defeat of Japan, the southern half of Sakhalin (36,000 sq. km) and the Kurile Islands (10,200 sq. km) were, by agreement with the Allies, incorporated in the USSR.

**GOVERNMENT.** The Soviet Union is a socialist state of workers and peasants, the political units of which are the Soviets of Working People's Deputies. All central and local authority is vested in these Soviets.

The economic foundation of the USSR is the socialist system of economy and the socialist ownership of the means of production. There are two forms of socialist property: (1) state property (property of the whole people); (2) co-operative and collective farm (*Kolkhoz*) property (property of individual collective farms and property of co-operative associations). The land, mineral deposits, waters, forests, mills, factories, mines, railways, water and air transport, banks, means of communication, large state-organized agricultural enterprises, such as state farms (*Sovkhozy*), machine-repair stations and the like, as well as municipal enterprises and the principal dwelling-house properties in the cities and industrial localities, are state property, but the land occupied by collective farmers is secured to them in perpetuity so long as they use it in accordance with the laws of the country. The members of the *Kolkhozy* may have small plots of land attached to their dwellings for their own use. Peasants unwilling to enter a Kolhoz may retain their individual farms, but they are not allowed to employ hired labour. The right of personal property of citizens in their income from work and in their savings, in their dwelling-houses and auxiliary household economy, their domestic furniture and utensils and objects of personal use and comfort, as well as the right of inheritance of personal property of citizens, are protected by law. The constitution recognizes the right of all citizens to work, rest, leisure, education and maintenance in old age, sickness or incapacity, without distinction of sex, race or nationality, and lays down that any direct or indirect restriction of the rights of, or conversely, the establishment of direct or indirect privileges for, citizens on account of their race or nationality, as well as the advocacy of racial or national exclusiveness or hatred and contempt, is punishable by law. The franchise is enjoyed by all citizens of the USSR including members of the Armed Forces, who have reached the age of 18, irrespective of sex, with the exception of the insane and of persons convicted by court of law to sentences including deprivation of rights. Candidates for election to the Supreme Soviet of the USSR must be 23 years of age, and to the Supreme Soviets of the Union Republics and Autonomous Republics 21; for all regional and other local authorities the minimum age for candidates is 18. A member of any Soviet may be recalled by a decision of a majority of his or her electors if he or she fails to give satisfaction (law on procedure for this, 30 Oct. 1959).

The USSR consists of 15 Union Republics, each inhabited by a major nationality which gives its name to the Republic. These are divided into 113 territories and regions, and these again into 1,833 districts and 1,763 towns and 3,261 urban settlements (a number of smaller districts were amalgamated in 1962–63). Within the districts there are 39,893 rural districts (usually each including a number of villages). The territories and regions also include a number of smaller nationalities, forming their own self-governing units—20 Autonomous Republics, 8 Autonomous Regions and 10 National Areas.

The highest legislative organ is the Supreme Soviet of the USSR. It consists of 2 chambers with equal legislative rights, elected for a term of 4 years: the Soviet of the Union and the Soviet of Nationalities.

The Soviet of the Union is elected by the citizens of the USSR on the basis of 1 deputy for every 300,000 of the population. The Chamber elected on 18 March 1962 consists of 791 members (*Chairman*, I. V. Spiridonov).

The Soviet of Nationalities is elected by the citizens of the USSR, voting by Union and Autonomous Republics, Autonomous Regions and National Areas on the basis of 25 deputies from each Union Republic, 11 deputies from each Autonomous Republic, 5 deputies from each Autonomous Region and 1 deputy from each National Area. The Chamber elected on 18 March 1962 consists of 625 members (*Chairman*, Y. V. Peive).

The highest executive and administrative organ is the Council of Ministers (called People's Commissars before 16 March 1946); they are appointed by the Supreme Soviet.

The Presidium of the Supreme Soviet of the USSR is elected at a joint session of both chambers of the Supreme Soviet and consists of the chairman, 15 vice-chairmen (one from each of the Union republics), 16 members and the secretary. It acts as the supreme state authority between sessions of the Supreme Soviet and is accountable to the latter for all its activities.

Deputies are elected by the voters on the basis of universal, equal and direct suffrage by secret ballot. The only legal political party is the Communist Party; non-members are classed as non-party citizens. Candidates up to the present have been selected at a preliminary 'constituency electoral consultation' (selection conference), to which organizations which have put forward nominations send delegates, who discuss the various nominees. As a consequence, so far, a single candidate has been arrived at in each constituency, whose name has appeared on the ballot paper, to be struck out or approved by a cross as the voter desires. This procedure, however, is not laid down by the constitution, and may be altered. At the election held on 18 March 1962, 139,957,809 electors voted. The Supreme Soviet elected on that day consists of 1,094 Communist and 349 non-party deputies; 390 were women.

On 1 Feb. 1944 each of the constituent republics of the Union was given the right to have separate Commissariats (now Ministries) for Defence and Foreign Affairs. After the death of Stalin, 5 March 1953, a number of Ministries comprising different branches of trade, engineering, transport and electricity were merged into single ministries. In 1957, with the transfer of greater responsibility to the Union Republics, the number of Ministries in the central government was reduced from 52 to 19, and in Dec. 1959 to 15.

The Council of Ministers, in Dec. 1963, included 11 vice-chairmen, the Premiers of the 15 Union Republics, the head of the Central Statistical

Department, the chairmen of 3 commissions of the Presidium of the Council of Ministers, of the Committee for Party and State Control, of the Supreme Economic Council, State Planning Committee (with vice-chairman), Economic Council (with 2 vice-chairmen) and of 26 other State Committees; 11 Ministers; and the chairman of the Agricultural Machinery Supply Agency.

Soon after the adoption of the 1936 constitution all the constituent republics of the Union held their Soviet congresses, at which they adopted their own constitutions based in all essentials on the constitution of the Union, but adapted where necessary to national and local requirements. Article 14 of the constitution reserves to the central government the spheres of war and peace, diplomatic relations, defence, foreign trade, state security, economic planning, education, criminal and civil codes, etc. The right of the constituent republics to withdraw from the Union is expressly recognized.

Within the Union Republics there are 20 Autonomous Republics, composed of smaller nationalities—16 in the RSFSR, 1 in Azerbaidjan, 2 in Georgia and 1 in Uzbekistan. There are 8 Autonomous (national) Regions.

The Autonomous Republics are governed by their own Supreme Soviet and Council of Ministers: the regions and territories, districts, towns and rural areas have their own Soviets, elected for a term of 2 years. In March 1961, 1,821,772 members were elected, 741,125 of them women, 1,124,548 workmen and collective farmers, 827,896 Communists.

*State flag:* Red, with sickle and hammer in gold in the upper corner near the staff, and above them a 5-pointed star bordered in gold.

*National anthem:* Soyuz nerushimy respublik svobodnykh (words by S. Mikhalkov and El-Registan; music by A. V. Alexandrov; 1944).

The Presidium of the Supreme Soviet may, within the framework of the constitution, issue edicts (*ukaz*) interpreting existing legislation or amending it, subject to ratification subsequently by the Supreme Soviet.

Legislation by decree and executive authority is vested in the Council of Ministers. The Council of Ministers is responsible to the Supreme Soviet of the USSR and in the intervals between sessions to the Presidium of the Supreme Soviet.

*President of the Presidium of the Supreme Soviet of the USSR:* Leonid I. Brezhnyov (7 May 1960).

*Secretary of the Presidium:* M. P. Georgadze.

**Communist Party.** According to the rules adopted by the 22nd Congress of the Party on 31 Oct. 1961, the Communist Party of the Soviet Union 'unites, on a voluntary basis, the more advanced, politically more conscious section of the working class, collective-farm peasantry and intelligentsia of the USSR', whose principal objects are to build a Communist society by means of gradual transition from Socialism to Communism, to raise the material and cultural level of the people, to organize the defence of the country and to strengthen ties with the workers of other countries.

The Party is built on the territorial-industrial principle. The supreme organ is the Party Congress. Ordinary congresses are convened not less than once in 4 years. The Congress elects a Central Committee which meets at least every 6 months, carries on the work of the Party between congresses, and guides the work of central Soviet and public organizations through Party groups within them.

The Central Committee forms a Presidium to direct the work of the Central Committee between plenary meetings, a Secretariat to direct current work, and a Party Commission working under the direction of the Central Committee to consider appeals against decisions about expulsion. Similar rules hold for the Regional, Territorial and Republican Party organizations.

Primary Party organizations exist in mills, factories, state machine and tractor stations and other economic establishments, in collective farms, units of the Soviet Army and Navy, in villages, offices, educational establishments, etc., where there are at least 3 Party members.

The Central Committee elected by the 22nd Congress in Oct. 1961 consists of 175 members and 155 candidate members.

In Dec. 1963 the Presidium of the Central Committee consisted of the following members: L. I. Brezhnyov, A. P. Kirilenko, A. N. Kosygin, F. R. Kozlov, O. V. Kuusinen, A. I. Mikoyan, N. V. Podgorny, D. S. Polyansky, M. A. Suslov, N. S. Khrushchov, N. M. Shvernik, G. I. Voronov; and the following alternate members: V. V. Grishin, K. T. Mazurov, V. P. Mzhavanadze, P. E. Shelest, L. N. Yefremov.

*Secretariat:* N. S. Khrushchov (*First Secretary*); L. I. Brezhnyov; F. R. Kozlov; M. A. Suslov; O. V. Kuusinen; P. N. Demichev; L. F. Ilyichov; B. N. Ponomaryov; A. N. Shelepin; Y. V. Andropov; N. V. Podgorny; V. I. Polyakov; A. P. Rudakov; V. N. Titov.

*Chairman of the Party Commission:* N. M. Shvernik.
*Vice-Chairman:* Z. T. Serdyuk.

In Nov. 1962 a Committee of joint Party and State control was set up to organize mass supervision of fulfilment of the Party programme, directives of the Party and State and socialist legislation. *Chairman:* A. N. Shelepin.

In Aug. 1963 the Communist Party had over 10m. members. Membership of the Young Communist League was 21m. in June 1963.

The Communist International (the Comintern), founded on the initiative of the Russian Communist Party in 1919, was dissolved on 15 May 1943. In Oct. 1947 a Communist Information Bureau (Cominform) was set up in Belgrade to serve the Communist parties of Bulgaria, Czechoslovakia, France, Hungary, Italy, Poland, Rumania, USSR and Yugoslavia. On 28 June 1948 Yugoslavia was expelled from the Cominform and the bureau was transferred to Bucharest. The Cominform was on 17 April 1956 declared dissolved.

**AREA AND POPULATION.** The total area of the Soviet Union in April 1956 was 22·4m. sq. km (8·65m. sq. miles). The census population on 15 Jan. 1959 was 208·8m. (94m. males and 114·8m. females; 99·8m.

urban, 109m. rural). Estimated population on 1 Jan. 1960 was 212·3m. (95·9m. males, 116·4m. females; 103·7m. urban, 108·6 rural); on 1 Jan. 1961, 216·2m. (108·3m. urban, 107·9m. rural); on 1 Jan. 1962, 219·7m. (111·8m. urban, 107·9m. rural); on 1 Jan. 1963, 223m. (115m. urban, 108m. rural); on 1 Jan. 1964, over 226m.

Regions, towns, streets, factories, schools, etc., named after Stalin were renamed in Nov. 1961 when Stalin's body was removed from the Lenin–Stalin tomb in Red Square in Moscow. Similarly, in Jan. 1962 the names of Molotov, Voroshilov, Kaganovich and Malenkov were obliterated.

The areas (in 1,000 sq. km) and approximate population (in 1m., in Jan. 1963) of the constituent republics are as follows (capitals in brackets):

| Constituent Republics | Area | Population |
|---|---|---|
| RSFSR (Moscow) | 17,075 | 123·4 |
| Ukraine (Kiev) | 601 | 44·1 |
| Kazakhstan (Alma-Ata) | 2,756 | 11·3 |
| Uzbekistan (Tashkent) | 409 | 9·5 |
| Byelorussia (Minsk) | 208 | 8·4 |
| Georgia (Tbilisi) | 70 | 4·3 |
| Azerbaidjan (Baku) | 87 | 4·2 |
| Moldavia (Kishinev) | 34 | 3·2 |
| Lithuania (Vilnius) | 64 | 2·9 |
| Kirgizia (Frunze) | 198 | 2·4 |
| Tadzhikistan (Dushanbe) | 143 | 2·3 |

| Armenia (Yerevan) | 30 | 2·0 |
| Turkmenistan (Ashkhabad) | 488 | 1·7 |
| Estonia (Tallin) | 45 | 1·2 |

*Nationalities.* The most numerous nationalities at the 1959 census were: 114·1m. Russians, 37·3m. Ukrainians, 7m. Byelorussians, 6m. Uzbeks, 5m. Tatars, 3·6m. Kazakhs, 2·9m. Azerbaidjanians, 2·8m. Armenians, 2·7m. Georgians, 2·3m. Lithuanians, 2·3m. Jews, 2·2m. Moldavians, 1·6m. Germans, 1·5m. Chuvashes, 1·4m. Latvians, 1·4m. Tadzhiks, 1·4m. Poles, 1·3m. Mordovians, 1m. Turkmenians, 989,000 Bashkirs, 989,000 Estonians, 969,000 Kirgiz. The great majority (in each case 84–99%) indicated the language of their nationality as their native tongue; exceptions were the Bashkirs (62%), Poles (46%) and Jews (21%).

Estimated losses of population in the Second World War, 20m., of which 7m. were military losses.

The following tables show the growth of the population in Russia:

| | |
|---|---|
| 1897 (Russian Empire) | 126,900,000 |
| 1913 (Russian Empire) | 170,900,000 |

**RELIGION.** With the Revolution the Orthodox Church lost its position as the dominant religion and all religions were placed on an equal footing. Article 124 of the 1936 constitution of the USSR reads as follows: 'With the aim of ensuring freedom of conscience for the citizens, the Church in the USSR is separated from the State and the school from the Church, and freedom of religious worship and anti-religious propaganda is permitted to all citizens.'

By decree of 23 Jan. 1918 the Orthodox Church was disestablished; its property, together with that of all other denominations, was nationalized. The congregations themselves have to maintain their churches and clergy. regardless of confession or denomination, may organize a nucleus of a minimum of 20 persons, which may request and receive the use of a church building, free of charge, except for maintenance, insurance, land taxes, etc. Over two-thirds of all the churches have been closed. Religious instruction may be given in private, but otherwise only in church schools. The income of religious communities is not subject to taxation.

Relations between the Orthodox Church and the Government are maintained through a Council for the Affairs of the Russian Orthodox Church set up on 11 Oct. 1943. A similar council was later set up to deal with the affairs of all other religious communities; both function under the Council of Ministers.

The Russian Orthodox Church, represented by the Patriarchate of Moscow, had in 1962 an estimated membership of 50m. There are still many Old Believers, whose schism from the Orthodox Church dates from the 17th century. The Russian Church is headed by the Patriarch of Moscow and All Russia, assisted by the Holy Synod, which has 6 members—the Patriarch himself and the Metropolitans of Krutitsy (Moscow), Leningrad and Kiev *ex officio*, and 3 bishops alternating for 6 months in order of seniority from the 3 regions forming the Moscow Patriarchate. In 1956 there were 22,000 Orthodox congregations in the USSR, 32,000 priests and 100 bishops; 2 theological academies, 8 seminaries and 69 monasteries. Formal religious instruction for persons under 18 is forbidden. The Patriarchate of Moscow maintains jurisdiction over a few parishes of Russian Orthodox abroad, at Tehran, Jerusalem, East Germany, France (1 archbishop), England, North and South America (2 bishops). There are 1,500 theological students.

After the Russian Orthodox Church the next Christian community in importance are the Armenians: their Catholicos (Patriarch), whose seat is at Etchmiadzin, is head of all the Armenian (Gregorian) communities throughout the world.

The Georgian Church has its own organization under a Catholicos (Patriarch).

Protestantism is represented chiefly by the Evangelical Christian Baptists, with over 512,000 baptized adult members and some 5,000 churches: the Lutherans (350,000 in Estonia, 600,000 in Latvia) are concentrated mainly in the Baltic States, the Reformed in the Transcarpathian Region of the Ukraine (70,000).

The Roman Catholics are most numerous in Lithuania and the western Ukraine. There are only 4 bishops now in office. In 1946 some 3·5m. Uniates in the USSR withdrew their allegiance to Rome and came under the jurisdiction of the Orthodox Patriarchate in Moscow.

The Moslems, mainly Sunnis, are divided into 4 administrative regions; 3 of them (Central Asia, European Russia and Siberia, Northern Caucasus) headed by a Mufti; the largest (Transcaucasia, with its centre at Baku) by a Shaikh-ul-Islam.

The Armenian-Gregorian and the Roman-Catholic churches and the Moslems of Central Asia maintain theological colleges.

There are various Jewish communities, the chief being in Moscow and Kiev. The Central Buddhist Council of the USSR is headed by a Lama with communities in Buryatia, Tuva, Kalmykia and in the national (minority) areas of the Chita and Irkutsk regions.

**EDUCATION.** Education is free and compulsory from 7 to 15/16. Co-education was reintroduced in all schools on 1 Sept. 1954. There are 3 types of schools—those with a 4-year, a 8-year and an 11-year curriculum; the school-leaving age had been raised to 17 in all large towns and industrial settlements by the end of 1955. Under a law of 24 Dec. 1958 general polytechnical education is to last 8 years (*i.e.*, until the age of 15 or 16) and thereafter is to be combined for 3 years with work in production (except for the specially artistically gifted who go to art schools). Instruction is given in more than 100 languages.

In 1962–63 there were 227,000 primary and secondary schools. Pupils in primary, secondary, technical, etc., schools numbered 42·4m. (4,596,000 of them in the 16–18 age-groups) and the teachers 2·2m. There were 29,100 schools providing a 10-year secondary education for 3·9m. workers and peasants who had already begun earning their living.

At the end of 1940 labour reserve schools (both vocational and industrial) were organized, admitting applicants from 14 to 17 years of age. From 1946 to 1961 about 9·8m. pupils had graduated as skilled workers from these schools. In 1962, 888,000 graduated from such schools, including 361,000 for agriculture: another 296,000 agricultural mechanics were trained in state and collective farms.

In 1962, 4·1m. children of from 3 to 7 years of age attended 52,700 kindergartens. Children in boarding schools numbered 700,000 in 1961–62.

In 1962–63 there were 3,521 technical colleges with 2·67m. students, and 738 universities, institutes and other places of higher education, with 2·94m. students (including 1,657,000 taking correspondence or evening courses).

Among the university towns are: Moscow, Leningrad, Kharkov, Odessa, Tartu, Kazan, Saratov, Tomsk, Kiev, Sverdlovsk, Tbilisi, Alma-Ata, Tashkent, Minsk, Gorky and Vladivostok. On 1 Jan. 1963 there were 1,911 scientific research institutes and branches, with 299,000 scientific staff.

The Academy of Sciences of the USSR has 536 members and corresponding members. Total learned institutions under the USSR Academy of Sciences number 166, with 20,029 scientific staff. Fourteen of the Union Republics have their own Academies of Sciences, with scientific staff numbering over 24,000.

In Dec. 1962, there were employed in the national economy 1·9m. men and 2·1m. women with a completed higher education and 2·2m. men and 3·7m. women with a completed secondary technical education.

In Dec. 1963 about 64m. people were studying at schools, colleges and training or correspondence courses.

*Newspapers.* In 1962, 6,712 newspapers with a total circulation of 78m. copies were published in 56 languages of the Soviet Union.

*Cinemas* (1962). There were 99,000 permanent and 21,500 mobile cinemas.

**HEALTH.** All health services are free of charge; but private practice exists. Health is administered by the Ministry of Health of the USSR, which supervises the work of the Health Ministries of the Union Republics and the Autonomous Republics. At the end of 1960 there were 80 medical higher institutes and 11 further-training institutions for doctors.

In 1944 an Academy of Medical Sciences was formed; it has under its direct control 33 research institutes. In all, there were, in 1960, 283 medical research institutions. Smallpox and malaria have been virtually eliminated.

In 1962–63 institutes and medical faculties had a total of 206,000 students taking a 6-year course (nearly 31,000 graduated in 1962).

In 1962 there were 26,766 civil hospitals with 1,941,500 beds. Children's nurseries accommodated 1,372,000 babies in permanent crèches and over 3m. in seasonal summer establishments. Some 445,000 doctors (excluding dentists) were engaged in the health service. All confinements in towns and 75% in the country were in hospital.

The death rate in the USSR in 1962 was 7·5 per 1,000, and the birth rate 24·4 per 1,000. Infant death rate was 30 (per 1,000 live births) in 1963, compared with 273 in 1913, 184 in 1940 and 81 in 1950.

Social insurance is administered by the trade unions, through social insurance councils elected in places of work and social insurance sub-committees of factory committees: about 2m. volunteers are engaged in this work. 5m. people were sent to sanatoria or rest homes by the unions in 1962. There were 26m. pensioners in 1963.

Total number of sanatoria in 1962 was 2,124, with 350,000 beds: in addition, there were 1,171 'one-night' or 'one-day' sanatoria, with 56,000 beds. There were 888 rest homes with 197,000 beds.

State expenditure (in 1m. new roubles) on health services proper, 1957, 3,800; 1958, 4,100; 1959, 4,500; 1960, 4,800; 1961, 4,988; 1962, 4,945.

New dwellings built during 1947–63 in urban areas total over 14m. apartments, and 4·2m. houses were built in rural areas, but the housing shortage is still acute in the larger towns. In 1963 over 77m. sq. metres of urban houses were completed (2m. apartments) and 400,000 new houses in rural areas.

**JUSTICE.** The basis of the judiciary system is the same throughout the Soviet Union, but the constituent republics have the right to introduce modifications and to make their own rules for the application of the code of laws. The Supreme Court of the USSR is the chief court and supervising organ for all constituent republics and is elected by the Supreme Soviet of the USSR for 5 years. Supreme Courts of the Union and Autonomous Republics are elected by the Supreme Soviets of these republics, and Territorial, Regional and Area Courts by the respective Soviets, each for a term of 5 years.

Court proceedings are conducted in the local language with full interpreting facilities as required. All cases are heard in public, unless otherwise provided for by law, and the accused is guaranteed the right of defence.

Laws establishing common principles of criminal legislation, criminal responsibility for state and military crimes, judicial and criminal procedure and military tribunals were adopted by the Supreme Soviet on 25 Dec. 1958 for the courts both of the USSR and the constituent Republics.

The Law Courts are divided into People's Courts and higher courts. The People's Courts consist of the People's Judge and 2 Assessors, and their function is to examine, as the first instance, most of the civil and criminal cases, except the more important ones, some of which are tried at the Regional Court, and those of the highest importance at the Supreme

Court. The Regional Courts supervise the activities of the People's Courts and also act as Courts of Appeal from the decisions of the People's Court. Special chambers of the higher courts deal with offences committed in the Army and the public transport services.

People's Judges and rota-lists of Assessors are elected directly by the citizens of each constituency: judges for 5 years, assessors for 2; they must be over 25 years of age. Should a judge be found not to perform his duties conscientiously and in accordance with the mandate of the people, he may be recalled by his electors.

The People's Assessors are called upon for duty for 2 weeks in a year. The People's Assessors for the Regional Court must have had at least 2 years' experience in public or trade-union work. The list of Assessors for the Supreme Court is drawn up by the Supreme Soviet of the republic.

The Labour Session of the People's Court supervises the regulations relating to the working conditions and the protection of labour and gives decisions on conflicts arising between managements and employees, or the violation of regulations.

Disputes between State institutions must be referred to an arbitration commission. Disputes between Soviet State institutions and foreign business firms may be referred by agreement to a Foreign Trade Arbitration Commission of the All-Union Chamber of Commerce.

The Procurator-General of the USSR is appointed for 7 years by the Supreme Soviet. All procurators of the republics, autonomous republics and autonomous regions are appointed by the Procurator-General of the USSR for a term of 5 years. The procurators supervise the correct application of the law by all state organs, and have special responsibility for the observance of the law in places of detention. The procurators of the Union republics are subordinate to the Procurator-General of the USSR, whose duty it is to see that acts of all institutions of the USSR are legal, that the law is correctly interpreted and uniformly applied; he has to participate in important cases in the capacity of State Prosecutor.

Capital punishment was abolished on 26 May 1947, but was restored on 12 Jan. 1950 for treason, espionage and sabotage, on 7 May 1954 for certain categories of murder, in Dec. 1958 for terrorism and banditry, on 7 May 1961 for embezzlement of public property, counterfeiting and attack on prison warders and, in particular circumstances, for attacks on the police and public order volunteers and for rape (15 Feb. 1962) and for accepting bribes (20 Feb. 1962).

In view of criminal abuses, extending over many years, discovered in the security system, the powers of administrative trial and exile previously vested in the security authorities (M.V.D.) were abolished in 1953; accelerated procedures for trial on charges of high treason, espionage, wrecking, etc., by the Supreme Court were abolished in 1955; and extensive powers of protection of persons under arrest or serving prison terms were vested in the Procurator-General's Office (1955). Supervisory commissions, composed of representatives of trade unions, youth organizations and local authorities, were set up in 1956 to inspect places of detention.

Further reforms of the civil and criminal codes were decreed on 25 Dec. 1958. Thereby the age of criminal responsibility has been raised from 14 to 16 years; deportation, banishment and deprivation of citizenship have been abolished; a presumption of innocence is not accepted, but the burden of proof of guilt has been placed upon the prosecutor; secret trials and the charge of 'enemy of the people' have been abolished.

**FINANCE.** Revenue and expenditure in 1m. roubles (from 1961, 1m. new roubles) for calendar years:

| | *1959* | *1960* | *1961* | *1962* | *1963*[1] | *1964*[2] |
|---|---|---|---|---|---|---|
| Revenue | 740,145 | 770,784 | 78,054 | 84,300 | 87,300 | 91,900 |
| Expenditure | 703,991 | 731,262 | 76,309 | 82,200 | 86,600 | 91,400 |

[1] Preliminary returns. [2] Estimates.

The 1964 budget allotted 38,746m. roubles to the national economy, 13,289m. to defence and 32,800m. to social and cultural services. Turnover tax was to furnish 35,100m.; taxed profits of public enterprises, 29,500m.; revenue from contributions by State enterprise for social insurance, collective farm and co-operative tax, customs, etc., 20,000m.

The social insurance budget, which is controlled by the Central Council of Trade Unions and its affiliated bodies, envisaged 9,855m. roubles for 1964.

The national income was assessed (in 1961 roubles) at 135,000m. in 1959, 146,000m. in 1960, 153,000m. in 1961, 165,100m. in 1962.

Income tax was abolished on 1 Oct. 1961 for earnings up to 600 roubles per month and reduced for earnings between 601 and 700 roubles. All income tax is to be abolished by 1 Oct. 1965.

Davies, R. W., *The Development of the Soviet Budgetary System.* CUP, 1958

*Investments and Credits.* Capital investment (1962) was 42,200m. roubles. This total included 30,800m. allocated under the State plans, the balance coming from local sources. Taking 1913 as 100, the physical volume of industrial production within the present territory of the USSR was 769 in 1940 and 4,816 in 1962.

The debts contracted by the tsarist régime, *i.e.*, before 1917, have been repudiated by the Soviet Government.

After the Second World War the USSR has become one of the biggest creditor countries in the world. Between 1955 and Jan. 1964 economic aid in the form of 2% or 2½% loans to be repaid, as a rule, over 12 years has been advanced for over 520 industrial and agricultural enterprises in Socialist countries and about 500 enterprises in under-developed countries; the latter amount to a total of 3,000m. new roubles, including (loans in 1m. old roubles): India, 2,500m.; Egypt, 2,300m.; Iraq, 550m.; Afghánistán, 480m.; Indonesia, 443m.; Argentina, 400m.; Ethiopia, 400m.; Guinea, 140m.; Cuba, US$100m.

**DEFENCE.** On 26 Feb. 1946 the control of the Soviet Armed Forces was unified under a single Ministry of the Armed Forces. On 25 Feb. 1950 the Defence Ministry was divided into a War Ministry and a Navy Ministry; on 15 March 1953 a single Ministry of Defence was reconstituted.

The direction of Party and political work in the Armed Forces is exercised by the Central Committee of the Communist Party of the Soviet Union through the chief political directorate of the Ministry of Defence. The chiefs of the political departments of military commands, fleets and armies must be Party members of 5 years' standing and the chiefs of political departments of divisions and regiments Party members of 3 years' standing.

The political organs of the Armed Forces maintain close contact with the local Party organs. Periodical reports are made to the Party committees by the chiefs of the political organs on the progress of political work in the military units. Nearly 90% of the officers are members of the Communist Party or Young Communist League.

Military service begins at the age of 19 (or 18 for graduates of secondary schools). Active service lasts 2 years for privates in the Army and M.V.D. troops, 3 years for n.c.o.s in the Army and M.V.D. troops and for privates and n.c.o.s in the Air Force, 4 years for privates and n.c.o.s in the Coastal Defence, 5 years for ratings in the Navy. Reserve service lasts up to the ages of 35, 45 or 50 years according to fitness, family status and other considerations. Conscientious objection is treated as a criminal offence. Students in places of higher education are freed from military service, but receive military instruction.

In Jan. 1960 Prime Minister Khrushchov quoted the following figures of the armed forces of the Soviet Union: 1927, 586,000; 1937, 1,433,000; 1941, 4,207,000; May 1945, 11,365,000; 1948, 2,874,000; 1955, 5,763,000; 1959, 3,623,000; 1960, 2,423,000. The reduction, according to Krushchov, was mainly due to the switch-over to rocket and nuclear weapons.

The estimated expenditure on defence (in 1m. roubles) for 1957 was 96,700; 1958, 93,600; 1959, 96,121; 1960, 93,654; 1961 (new roubles), 9,255; 1962, 13,410; 1963 (estimate), 13,888; 1964 (estimate), 13,289.

*Eastern Security Treaty.* On 14 May 1955 the USSR, Albania, Bulgaria, Czechoslovakia, the German Democratic Republic, Hungary, Poland and Rumania signed in Warsaw a 20-year treaty of friendship and collaboration, after the USSR had (on 7 May) annulled the 20-year treaties of alliance with the UK (1942) and France (1944).

The main provisions of the treaty are as follows:

ARTICLE 4. In case of armed aggression in Europe against one or several States party to the pact by a State or group of States, each State member of the pact . . . will afford to the State or States which are the object of such aggression immediate assistance . . . with all means which appear necessary, including the use of armed force. . . . These measures will cease as soon as the Security Council takes measures necessary for establishing and preserving international peace and security.

ARTICLE 5. The contracting Powers agree to set up a joint command of their armed forces to be allotted by agreement between the Powers, at the disposal of this command and used on the basis of jointly established principles. They will also take over agreed measures necessary to strengthen their defences.

ARTICLE 9. The present treaty is open to other States, irrespective of their social or Government regime, who declare their readiness to abide by the terms of the treaty in order to safeguard peace and security of the peoples.

ARTICLE 11. In the event of a system of collective security being set up in Europe and a pact to this effect being signed—to which each party to this treaty will direct its efforts—the present treaty will lapse from the day such a collective security treaty comes into force.

The USA Secretary of Defence in 1963 estimated the armed forces of the Warsaw pact countries to total 4·5m., including 3·3m. Russians, compared with 5m. Nato forces.

Marshal Grechko was on 24 July 1960 appointed successor of Marshal Koniev as C.-in-C. of the united Armed Forces, with headquarters in Moscow.

In 1962 Albania was no longer invited to the Warsaw Pact meetings, without being formally expelled.

Two (or 3) Soviet divisions are stationed in Poland, 22 divisions in East Germany, 2 divisions and 2 air divisions in Hungary.

ARMY. The Army was, in 1963, thought to consist of about 80–90 divisions of combat readiness, numbering about 2m. men

The mechanized and tank divisions are equipped with the T34 medium tank, mounting an 85-mm gun, and with the Stalin III heavy tank, mounting a 122-mm gun. It is believed that the T34 is being replaced by a new medium tank of post-war design. The number of modern tanks is believed to be 35,000. Rocket units are stated to be 'the main force' of the Army.

In addition to the Soviet Army, there are some 350,000 security and border troops.

NAVY. There are 5 shipyards in and near Leningrad; Black Sea yards are at Nikolaiev and Sevastopol, new shipyards are at Molotovsk in the White Sea region and at Komsomolsk on the Amur.

The completion of a through canal system between the Baltic and White Seas and the opening of regular traffic *via* the North-East Passage (during the ice-free season) have enabled the Soviet Government to transfer tonnage between the Baltic and Far East.

The principal ships of the Soviet Navy are as follows:

| Completed | Name | Standard displacement Tons | Armour | | Principal armament | Shaft horsepower | Speed Knots |
|---|---|---|---|---|---|---|---|
| | | | *Belt* In. | *Guns* In. | | | |

There are also 127 destroyers, 76 frigates, 431 submarines, 1,000 motor torpedo-boats and fast patrol boats, 245 escort and patrol vessels, 900 minesweepers, 120 landing craft and 200 auxiliaries.

The Minister of Defence stated on 23 Dec. 1961 that the main force of the navy consists of submarines, primarily atomic-powered and armed with nuclear rockets.

Estimated number of personnel (1963), 750,000 officers and men.

The Naval Air Force is under the various naval commands, *i.e.*, Baltic, Black Sea and Pacific; it comprises nearly 4,000 bombers and jet fighters.

AIR FORCE. The Soviet Air Force was believed to consist, in 1963, of about 20,000 first-line aircraft and an equal number of second-line, cargo and training planes. Its DA strategic bomber force is equipped with Tupolev 4-turboprop and twin-jet bombers, with intercontinental range, through flight refuelling, and a Tupolev twin-jet supersonic bomber is entering service. All these aircraft can carry air-to-surface guided, self-propelled missiles.

The FA army air force has several thousands of Il-28 jet bombers and twin-jet swept-wing fighter-bombers developed from the Yak-25 fighter. This command also has many MiG and Sukhoi delta-wing and swept-wing jet fighters of the kind which, with the Yak-25 all-weather fighter and its developments, form the main equipment of the PVO defence command.

Air force transport squadrons are equipped mainly with An-12 4-turboprop transports and piston-engined Il-14s and helicopters.

**PLANNING.** Planning is based on public ownership in industry and trade, and on mixed public and collective (co-operative) ownership in agriculture. The first plan drawn up by Gosplan (the State Planning Commission) was the 'Goelro' drawn up in 1920. This was to be the basis for the economic development of the country and for the construction of a system of electrical power plants with an aggregate capacity of 1·75m. kw., in the course of 15 years. By 1927–28, the capacity of the electrical stations in operation was already 1,792,000 kw. with an output of 5,160m. kwh.

In 1925 Gosplan started to draw up annual plans for the national economy, and in 1927–29 undertook to draw up the first 5-year plan, which was to have run from 1 Oct. 1928 to 30 Sept. 1933. It was considered completed in Dec. 1932, when 93·7% of the planned industrial output for the 5 years had been carried out. Stress was laid on the development of the heavy industries, particularly in the outlying areas rich in natural resources and inhabited by the national minorities.

The second 5-year plan ran from 1933 to 1937. It aimed at strengthening the defensive capacity of the Soviet Union, and more stress was laid than in the first 5-year plan on increasing the output and improving the quality of consumer goods. About one-half of the total investments in new heavy industrial constructions was allocated to the eastern areas. By the end of 1937 the plan for large-scale industry was overfulfilled by 4%, but the target for the light industries and consumer goods was not reached.

The third 5-year plan, 1938–42, envisaged an average annual increase in output of 13·5%, but that of the means of production was to be 15·2% and the means of consumption 11%; stress was to be laid on war industry. During the first 3½ years, industrial output was increasing annually by an average of 13%. In the Urals, the Volga area, Siberia and Central Asia industrial output increased during 1938–40 by about 50%. One of the richest grain-growing areas of the Soviet Union was created in the eastern part of the country. Capital construction amounted in value to a total of 130,000m. roubles; more than one-third fell to the eastern areas. The plan was interrupted in June 1941, when Hitler attacked the USSR. The whole of the national economy was switched to help the war effort, and whole industries were shifted from the western areas to the east.

For details of the fourth 5-year plan, 1946–50, *see* THE STATESMAN'S YEAR-BOOK, 1952, pp. 1424 f. The 1950 target of the gross output of industry was exceeded by 2%.

On 10 Oct. 1952 the 19th Congress of the Communist Party issued directives for the fifth 5-year plan, 1951–55; for details *see* THE STATESMAN'S YEAR-BOOK, 1953, pp. 1435–36. During Sept. and Oct. 1953 the Government issued a number of decrees to stimulate the development of agriculture the output of consumer goods and the expansion of the home trade. For details of these decrees, *see* THE STATESMAN'S YEAR-BOOK, 1955, pp. 1448–50

The directive for the sixth 5-year plan, 1956–60, was adopted by the 20th Congress of the Communist Party on 25 Feb. 1956; for details *see* THE STATESMAN'S YEAR-BOOK, 1958, p. 1472.

In May 1955 Gosplan was reorganized to consist of 2 state commissions for long-term planning (Gosplan) and for current planning (Goseconom commissya); at the same time a committee was set up to improve the application to industry of advance science and technology (Gostekhnika).

Between 1954 and 1956 considerable changes were made in planning methods. In March 1954 collective farms were given greater authority over planning their own output, only the quantities required by the State in fixed deliveries being determined beforehand, and voluntary sales by contract. In 1955 they were authorized to make changes in their statutes which had followed a fixed model since 1935. In 1955–57 over 15,000 industrial establishments in various basic industries, previously controlled by the Union Government, were turned over to the Constituent (Union Republics, and later in 1956 a number of entire light industries were turned over to them. In 1962 they controlled from 95 to 100% of all industrial output.

In 1957 a comprehensive plan for decentralization of management of industry was initiated. Industrial establishments responsible for about 71% of all Soviet industrial output were turned over to Economic Councils set up in 104 (in 1963: 47) economic administrative areas. These in 1962 controlled 73% of all industrial production. The Ministries previously responsible for the industries concerned were either abolished or transformed into purely planning and supervisory bodies. The State Committee for current planning was abolished, and Gosplan was given wider powers. The Economic Councils are now grouped in 18 major economic regions.

In consequence of this change a 7-year plan for 1959–65 was adopted by the 21st Congress of the Communist Party in Feb. 1959. Industrial output is to increase by 80% (consumer goods, 62–65%), labour productivity per industrial worker 45–50%, gross agricultural output 70%. Capital investments will roughly equal the total for 1917–58; special attention is to be given to mechanization of agriculture and arduous industrial labour, automation and new technological processes, and housing. Diesel or electric traction of railway freight is to rise to 85%. Real incomes are to rise 40%, the 7-hour day (6 hours for miners) became general in 1960 and the 40-hour week in 1961, and introduction of the 35-hour week (30 hours for miners) will begin in 1964.

In Dec. 1963 the chairman of the State Planning Committee stated that principal targets of the 7-year plan were being overfulfilled (for the years 1959–63) by a number of industries.

A 20-year plan was adopted by the 22nd Congress of the Communist Party on 31 Oct. 1961. Compared with 1960, by 1980 the output is to be increased as follows: Electric power, ninefold; steel, fourfold; oil, fivefold; coal, double; machinery, tenfold; fertilizers, ninefold; cement, fivefold; textiles, treble; leather footwear, double; grain, double; milk, treble; meat, fourfold. Two new iron and steel centres are to be developed in Kazakhstan and in Kursk region. A single deepwater system is to link the main inland waterways in the European USSR. Some rivers in northern Asia are to be diverted south for irrigation purposes. A 6-hour day for a 6-day week or 35 hours for a 5-day week are to be achieved by 1970. Housing, water, gas, heating, public urban transport and school meals are to be free by 1980. These and cognate measures are to provide 'the material and technical basis of communism'.

*Council for Mutual Economic Aid* (SEV: Soviet Ekonomicheskoy Vzaimopomoshchi), known in the West as COMECON, was founded in Moscow on 25 Jan. 1949, 'to strengthen the economic collaboration of the socialist countries and to co-ordinate their economic development on the basis of equal rights of all member states by organizing the exchange of economic and technical experience and rendering mutual aid'. Founding members were Albania, Bulgaria, Czechoslovakia, Hungary, Poland, Rumania and USSR. The German Democratic Republic was admitted in 1950, Mongolia in 1962; Albania left Comecon in Oct. 1961. China, North Korea and North Vietnam are represented by observers.

The Council is the supreme body; its recommendations must be unanimous and can be put into effect only by inter-governmental agreements. The Executive Committee, set up in June 1962, is composed of permanent delegates from each member country; its functions are the co-ordination of national economic development plans, investments and policy on trade with, and payments to, capitalist countries and supervision of collaboration on scientific and technical research. The Executive Committee has a Planning Bureau (set up in 1962) and Standing Committees (first created in 1956, numbering 17 in 1962). A joint Bank for Economic Co-operation was established on 1 Jan. 1964 with a capital of 300m. convertible roubles.

The Secretariat is in Moscow; *Secretary-General:* N. V. Fadeyev (USSR).

**AGRICULTURE.** The Soviet Union, up to about 1928 predominantly agricultural in character, has become an industrial–agricultural country. Of the combined value of industrial and agricultural production, industry and transport accounted for 42·1% in 1913 and 77·1% in 1962; agriculture for 57·9% in 1913 and 16% in 1962. Of the total state land fund of 2,227·2m. hectares, agricultural land in use in 1962 amounted to 528m., state forests and state reserves to 1,112m. hectares.

The total area under cultivation (including single-owner peasant farms, state farms and collective farms) was (in the same territory) 118·2m. hectares in 1913, 129·7m. in 1933, 195·6m. in 1958 and 223·5m. in 1962.

Collective farms on 1 Nov. 1962 possessed 523·3m. hectares, of which 122·4m. were under crops of various kinds; state farms and other state agricultural undertakings possessed 529·3m. hectares, of which 99·4m. were under crops; manual and clerical workers held 2·3m. hectares as allotments.

Virgin soil broken up, and long-fallow land reploughed, since 1954, reached 42m. hectares by the end of 1961.

Produce marketed (after consumption by collective farmers) was, in 1m. metric tons, for the present area of the USSR (annual average):

In 1963–64, the USSR bought and imported over 8m. tons of wheat from Australia, Canada and USA.

Since 1954 grain crops have been measured in 'barn crop' (*i.e.*, net quantities delivered to barns) and not in 'gross harvest' or 'biological yield' (*i.e.*, calculated as growing crops) as previously. Barn crop (in 1m. tons) in 1910–14 (average), 70·6; 1949–53 (average), 80·9; 1960, 133·2; 1961, 138; 1962, 148·2. Other produce (in 1m. tons) in 1962: Raw cotton, 4·3; sunflower, 4·8; meat (slaughter weight), 9·4; milk, 63·9; 30,087m. eggs; sugar beet, 47·4. Tea, net harvest 178,900 metric tons.

In Dec. 1962 there were 40,500 collective farms and 8,570 state farms (425 grain-producing state farms on virgin soil). Collective farms comprised 99·7% of all peasant holdings and produced 58% of all grain, 82% of all cotton, 93% of all sugar beet, potatoes 20%, vegetables 28%, meat 30%, milk 34%, eggs 11%.

Between 1953 and 1 Jan. 1963 the number of collective farms was reduced, mainly by amalgamation and partly by transformation into state farms, from 93,300 to 40,500, their cultivated area falling from 132m. hectares to 114m. The number of state farms rose in the same period from 4,857 to 8,570, their cultivated area from 15·2m. hectares to 86·7m.

Adverse climatic conditions in 1963, and consequent poorer harvests in many areas, led to reduction of state purchases in 1963 as follows (in 1m. tons; 1962 figures in brackets): grain, 44·8 (56·6); sugar-beet, 41·4 (43·9), milk, 28·5 (29·2). Cotton harvested, however, increased to 5·2 (4·3); potatoes, vegetables, fruit and tea harvested also increased.

In 1962 agricultural management boards, supervising the work of all collective and state farms in their territory, were set up in 961 agricultural areas: these are to be increased to about 1,500.

By 1961, in the collective farms 99% of the ploughing of the areas under grain, cotton and sugar beet and 97–98% of the sowing under these crops (57% under potatoes) were mechanized; 94% of their areas under grain and 49% under sugar beet were harvested by combines.

Rural electrical stations in 1940 had a capacity of 265,000 kw.; in 1961, 4·1m. kw. The number of collective farms using electric power was 18,500 in 1950 and 32,800 in 1962 (between these years the number of collective farms was reduced by amalgamation from 123,700 to 40,500). The capacity of electric motors in use rose as follows over the same years: Collective farms, from 352,700 to 3,473,000 kw.; state farms, from 223,000 to 2,681,000 kw.

The area under cotton in 1962 was 2·39m. hectares; under flax, 1·7m.; sunflower, 4·4m.; sugar beet (for industry), 3·2m.

Investments in agriculture in 1962 were 7,511m. roubles (of which 3,274m. were by the collective farms).

In 1913 the total of irrigated land was 4m. hectares; in 1953, 11m.; in 1962, 11·9m. About 5m. hectares of present desert in Central Asia are to be irrigated by 1965, another 15m. in the following 20 years, and a further 10m. by turning southward some of the western Siberian rivers.

In 1913 there were used 188,000 tons of mineral fertilizers; in 1950, 5·3m tons, and in 1962, 13·6m. On 1 Jan. 1963 there were 1·3m. tractors, 520,000 grain combine harvesters and 875,000 lorries in the countryside; under the 7-year plan (1959–65) agriculture is to receive over 1m. tractors and 400,000 grain combines.

*Livestock.* Livestock (1 Jan. 1963). in 1m. heads: Cattle, 87 (including 38 milch cows); pigs, 70; sheep, 139·7; goats, 6·7; horses, 9·1. Beginning 1957, the enumeration of livestock is being made on 1 Jan. instead of 1 Oct., *i.e.*, after the winter sales and slaughtering for the market.

**Forestry.** Of the 738m. hectares of forest land of the USSR, a large portion is administered and worked by the State, and the other, about 39m. hectares in extent, is granted for use to the peasantry free of charge.

The largest forest areas are 515m. hectares in the Asiatic part of the USSR, 51·4m. along the northern seaboard, 25·4m. in the Urals and 17·95m. in the north-west. The average annual increase of exploitable timber in north Russia is approximately 51m. cu metres, of which approximately 42–45m. cu. metres are utilized; in the Urals the average increase is about the same; in Siberia utilization has increased from 5·5m. cu. metres per annum in 1913 to about 70m. cu. metres in 1958, but this represents only a small percentageof the annual increase.

On 24 Oct. 1948 a plan was published for planting crop-protecting forest belts, introducing crop rotation with grasses and building of ponds and water reservoirs in the steppe and forest-steppe areas of the European part of the USSR. By the middle of 1952 some 2·6m. hectares had been planted with shelter-belt trees and 13,500 ponds and reservoirs had been built. The planting of the shelter belts in the Kamyshin–Volgograd and Byelgorod–Don areas has in the main been completed. A forest belt has been planted along 1,200 km of railway in the Volga.

Under the sixth 5-year plan (1956–60) 3·9m. hectares of trees were planted. The 7-year plan (1959–65) provides for afforestation over an area of 262m. hectares and planting 11m. hectares of trees.

**MINING AND INDUSTRY.** The organization of industry in Soviet Russia is based on state ownership and control, administered, up to 1957, by a separate Ministry for each large industry and since then mainly by the Councils of National Economy (*see* p. 1506).

Under the successive 5-year plans, large-scale modern industrial works have been constructed, namely: 1st, over 1,500; 2nd, 4,500; 3rd (up to

June 1941), 3,000; war-time, 3,500 (apart from reconstruction of destroyed plants); 4th, 6,200; 5th, 3,200; 6th (1956–58), 2,700; 7-year plan (1959–63), 4,400.

*Mining.* Miners are trained in 6 mining, 3 oil and 1 peat institutes, the mining faculties of 17 higher educational establishments, oil faculties of 2 industrial institutes and a peat faculty at the Byelorussian Polytechnical Institute.

The Soviet Union is rich in minerals. Soviet scientists claim that it contains 58% of the world's coal deposits, 58·7% of its oil, 41% of its iron ore, 76·7% of its apatite, 25% of all timber land, 88% of its manganese, 54% of its potassium salts and nearly one-third of its phosphates.

Estimated output (in metric tons) in 1962: Iron ore, 128·1m.; copper 634,900; zinc, 399,000; barite, 181,400; magnesium (1958), 39,500 aluminium, 898,000; lead, 363,000; cadmium (1956), 160; tungsten 10,500; manganese ore, 6·35m.; graphite, 54,000; bauxite, 4m.; phosphat rock, 8·71m.; chromite, 1·15m.; antimony, 5,980; asbestos, 997,000; gold 12·2m. fine oz.; silver, 27m. fine oz.

Output of iron and steel in the USSR (in 1m. tons):

| | Pig-iron | Ingot steel | Rolled steel | | Pig-iron | Ingot steel | Rolled steel |
|---|---|---|---|---|---|---|---|
| 1913 | 4·2 | 4·2 | 3·5 | 1950 | 19·2 | 27·3 | 20·9 |
| 1928–29 | 4·0 | 4·8 | 3·9 | 1955 | 33·3 | 45·3 | 35·3 |
| 1932 | 6·2 | 5·9 | 4·4 | 1959 | 43·0 | 59·9 | 47·0 |
| 1940 | 14·9 | 18·3 | 13·1 | 1960 | 46·8 | 65·3 | 50·9 |
| 1946 | 10·0 | 13·4 | 9·6 | 1961 | 50·9 | 70·8 | 55·3 |
| 1948 | 13·9 | 18·7 | 14·1 | 1962 | 55·3 | 76·3 | 59·3 |
| 1949 | 16·5 | 23·3 | 17·9 | 1963 | 58·7 | 80·2 | 62·4 |

Coal production (in 1m. metric tons) was 29·1 in 1913, 64·4 in 1932 165·9 in 1940, 261·1 in 1950, 513 in 1960, 517 in 1962, 532 in 1963.

The main centre of the atomic industry is at Ust-Kamenogorsk in th Altai mountains. Uranium deposits are being worked near Tabosha (south-east of Tashkent), Adizhan (in the Tynya-Muyan Mountains) Slyudianka (near Lake Baikal), on the Kolyma River and in souther Armenia.

*Oil.* In the 1930s practically all Soviet oil came from the Caucasian fields of which the Baku fields yielded 75–80% and the Grozny and Maiko fields between them 15%. Since then, the distribution has considerabl changed. The Ural–Volga area, the 'Second Baku', has 4 large centres i operation, at Samarska Luka (Kuibyshev), Tuimazy (Bashkiria), Ishimbae (Bashkiria) and Perm. A large new oilfield has been developed in th Trans-Volga area of the Saratov region. The USSR is now the secon largest oil-producer in the world after the USA (*see* p. xxxiv f.).

The total length of pipeline on 1 Jan. 1939 was 4,212 km, divided follows: Baku–Batumi, 1,717 km; Grozny–Mahach-Kala, 150 km; Grozny Armavir–Tuapse, 618 km; Armavir–Trudovaya, 488 km; Guriev–Ors 845 km, and other, 394 km. The largest pipeline in the USSR (1,700 k was completed in 1955, connecting Tuimazy in Bashkiria with the refineri of Omsk. In 1957 the Almetyevsk–Gorky pipeline (580 km) and 479 km the Stavropol–Moscow pipeline were completed. At the end of 1962 the were 21,700 km of pipeline.

The construction of a pipeline of about 5,000 km from the oilfields ne Kuibyshev to Poland and the German Democratic Republic (norther branch) and to Czechoslovakia and Hungary (southern branch)—separati in Byelorussia—was begun in 1960.

In 1962 the USSR exported 33·2m. metric tons of crude oil and oil pro- ucts (23m. in 1960). The biggest customers were Italy (7·3m.), Cuba 4·6m.), West Germany (4·3m.), Japan (2·9m.), Finland (2·9m.), Sweden 2·7m.) and Egypt (1·6m.); the UK imported 215,000 tons. Rumanian xports are probably and Albanian exports possibly included in these figures.

*leavy Industry.* Output of some heavy industries was as follows:

[1] Excluding collective farm production.

The process of industrial mechanization and the installation of automatic emote control is being pushed ahead. About 90% of Soviet pig-iron and 7% of the steel is produced in fully automatic furnaces. All hydro- ectric plants (in terms of capacity) are fully automatic. Coal production open-cast mines has been completely mechanized; hydraulic mining is oming into general use. Coal-cutting and underground haulage had been ver 99% mechanized by the end of 1962 (loading on inclined seams 56%); eat-cutting, 100%, and loading nearly 80%; timber-cutting, 98%; haulage loading centres, 93%, and despatch 97%.

Since 1945 the cotton industry has expanded, especially in the Urals, entral Asia and Siberia. Large mills have been built at Kamyshin, herson, Barnaul and Engels.

In 1963, 14 new chemical works began production, including a synthetic bber factory (Omsk), potassium combined mills (Soligorsk), nitrogen rtiliser works (Grodno), artificial fibre works (Daugavpils) and phosphor- works (Kingisepp). There were completed among metallurgical works an ore-enriching combine in the Urals and a coking-chemical works at Avdeyevo (Ukraine); in the power industry 33 turbine units of 100,000–300,000 kw. capacity, at Tashkent, Tbilisi, Zainsk and elsewhere, and the Trans-Siberian 500,000 voltage line connecting the Irkutsk, Krasnoyarsk and West-Siberian networks; new oil and gas pipelines totalling 7,000 km; an oil-cracking works at Polotsk; new textile factories at Chernigov, Frunze and Baranovichi; 7 new sugar-refineries; grain elevators of 7m. tons capacity; irrigation networks covering 233,000 hectares.

In 1962 the eastern regions (Urals, Siberia, Far East and Central Asian Republics) accounted for nearly half of the coal output, over 27% of the oil, 38% of the pig-iron, 42% of the steel and over 41% of electric power.

In 1962 about 800 new large industrial enterprises began production, including synthetic fibre, rubber and other chemical factories at Chernigov, Kirovakan, Kuibyshev and elsewhere.

*Electricity.* Many hydro-electrical power stations are being constructed. The Irkutsk station (4,500m. kwh. output per annum) is in operation; Bratsk (3·6m. kw. capacity) and Votkinsk (1m. kw. capacity) have beer completed; Krasnoyarsk (6m. kw. capacity) is under construction.

The Kremenchug power station on the Volga (625,000 kw. capacity was completed in Nov. 1960, rendering the Dnieper navigable for large vessels from Kanev to the Black Sea (over 800 km).

The high-voltage transmission line from the Kuibyshev hydro-electric station to Moscow (1,000 km), completed in 1955, was the first instalment of a national high-tension network. The Volgograd–Donbass 800,000-volt cable and the Votkinsk–Sverdlovsk 500,000-volt cable were opened in 1962.

Total installed capacity of electrical plants in 1938 was 8·7m. kw. and 82m. kw. in 1962. Industry consumes about 70% of the total electricity.

An atom-driven power-station, with a capacity of 5,000 kw., was put into operation on 27 June 1954; in 1958 the first section of another atom-driver station with a capacity of 100,000 kw. went into service (ultimate capacity 600,000 kw.). Other stations are under construction. By 1960, the tota capacity of the atomic stations was to be 2–2·5m. kw.

The 7-year plan (1959–65) envisages completion of the Bukhtarma and other hydro-electric stations with a total capacity of about 10–11m. kw and also the construction of coal-, gas- and oil-fired power stations, with a total capacity of 47–50m. kw.

In July 1962 the Soviet electric power grid was linked up with that o Hungary.

**Trade Unions and Labour.** Trade unions are organized on an industria basis, all workers, whether manual or brain, in every branch of a giver industry being eligible for membership of the same union.

Since 1933 the trade unions have carried out the functions of the forme Labour Commissariat; they control and supervise the application of labou laws, introduce new labour laws for approval by the Government anc administer social insurance and factory inspection. Social insurance is non contributory. The All-Union Congress has met at irregular intervals; th 9th Congress met in 1932, the 10th in 1949, the 11th in 1954, the 12th i 1959, the 13th in 1963.

In 1944 there were 176 unions. This number was reduced by amalgama tion of unions to 43 in 1954 and 22 in 1958: membership in 1963, 68m. Contributions range from 0·5 to 1% of wages.

The number of industrial and clerical workers engaged in the whole national economy of the Soviet Union was 70·5m. in 1963. The 7-hour day (6 hours for miners underground and other heavy trades) was generally in operation by the end of 1960. The average working week on 1 Jan. 1963 was 39·4 hours and the working day in industry 6·93 hours. There is an unstated amount of convict labour, used on large-scale construction projects, such as the building of canals and roads.

**COMMERCE.** Retail home trade takes three forms—state, co-operative and the free market, *i.e.*, sales by individual collective-farm members and by the collective farms of their surplus products, after having fulfilled their statutory deliveries and made their regular allocations to their members.

In 1963 the co-operatives (*Centrosoyus*) had a membership of 47m. and did nearly 30% of the total retail trade of the USSR. They were organized in 17,500 societies, employing 2m. workers, and controlled 330,000 shops and 47,000 catering establishments. Centrosyus is affiliated to the International Co-operative Alliance.

Foreign trade is organized as a state monopoly. Importation and exportation of goods are effected under licences issued by the Ministry for Foreign Trade and its respective departments in pursuance of a plan annually sanctioned by the Government. The right of purchasing goods for importation, and that of selling Soviet exports abroad, is vested in Trade Delegations and representatives of the appropriate state corporations in foreign countries.

There are 29 state import and export organizations, including chartering and tourist corporations (one, Vostokintorg, dealing with Mongolia, Sinkiang and Afghánistán). The Central Union of Consumers' Societies (Centrosoyuz) is also authorized to conduct foreign trade operations.

For foreign trade up to 1938 *see* THE STATESMAN'S YEAR-BOOK, 1951, p. 1465. The Central Statistical Department of the USSR estimates that, in comparable prices, the volume of foreign trade in 1938 was less than one-third that of 1913, but was by 1962 three times as large as in 1913. Exports in 1962 were valued at 6,331m. roubles (4,419m. to the Socialist countries), and imports at 5,805m. roubles (4,106m. from the Socialist countries).

Whereas in 1913 Russia's exports could be divided as follows—fuel and raw materials, 64% (including grain, 9·1m. tons); consumer goods, 23·6%, and machinery and equipment, 0·3%—in 1962 the distribution was: fuel and raw materials, 47·6% (including grain, 7·8m. tons); consumer goods, 7·7%, and machinery and equipment, 16·6%.

Russia's imports of fuel and raw materials, during the same years, declined from 50·8% to 28·5%, of machinery and equipment increased from 15·9% to 34·7%; imports of consumer goods increased from 20·8% to 23·9%.

**COMMUNICATIONS.** *Railways.* The length of railways in 1963 was 128,300 km (1913: 58,500). By the end of 1963, 62,900 km of main-line railways had changed to electric and diesel traction, and 71% of railway freights went by these means. In 1962 nearly 78% of all goods traffic and 64% of passenger transport went by rail (in 1913, 57% and 91% respectively). The Moscow–Donetz, Leningrad–Leninakan and Moscow–Baikal lines have been electrified.

There are 43 main railway systems which may be grouped as follows:

In the west: Estonian (1,388 km), Latvian (3,100 km) and Lithuanian (2,100 km), Kalinin (2,064 km, Moscow–Orsha and Moscow–Zilupe, centre at Smolensk), Belorussian (5,800 km), October (Moscow–Leningrad, centre Leningrad, 3,857 km), Lvov (south-western Ukraine, 4,257 km), South-western (centre Kiev–western Ukraine and southern Belorussia, 3,888 km), Moscow–Kiev (centre Kaluga–western Russia, eastern Belorussia, north-Ukraine, western 3,821 km).

In the north: Northern (Moscow and north European Russia, centre Yaroslavl, 3,750 km), Pechora (centre Kotlas: north-eastern European Russia, 1,953 km), Kirov (Murmansk–Petrozavodsk–Volhovstroi, centre Petrozavodsk, 3,587 km).

In the European south: Moscow–Kursk–Donbass (centre Moscow, 3,027 km), Southern (centre Kharkov: eastern Ukraine, south-eastern Russia, 3,304 km), South-Eastern (centre Voronezh: Ukraine–Urals, Rostov–Penza regions, 2,579 km), Odessa (south-eastern Ukraine–south-western Moldavia, centre Odessa, 3,839 km), Moldavian (Kishinev, 1,200 km), Stalin (centre Dnepropetrovsk, links this heavy-industry area with the Black Sea coast, 3,298 km), North Caucasus (centre Rostov-on-Don, 3,391km), Ordzhonikidze (links northern Caucasus Autonomous Republics with Caspian coast, centre Ordzhonikidze, 1,708 km), Donetz (centre Donetsk, served the Donetz coalfield, 2,862 km).

In eastern European Russia: Moscow–Ryazan (centre Moscow, 2,089 km), Kazan (centre Kazan, links Volga with Urals, 2,783 km), Gorky (Moscow–Ryazan–north-eastern Russia, centre Gorky, 1,543 km), Ufa (links Bashkir and Tartar Republics and northern Volga regions, centre Ufa, 1,866 km), Kuibyshev (centre Kuibyshev, links Volga regions with Urals, 2,012 km), Volga (centre Saratov, links it with Volgograd and Astrakhan, 3,149 km).

In the Urals and western Asia: Sverdlovsk (centre Sverdlovsk, links northern Urals with western Siberia, 4,000 km), South Urals (centre Chelyabinsk, links eastern regions of Russia in Europe with northern Kazakhstan, 2,875 km), Orenburg (centre Orenburg, links southern Urals with Siberia, 3,150 km), Omsk (centre Omsk, links western Siberia with northern Kazakhstan and Altai, 2,050 km), Tomsk (centre Novosibirsk, links western Siberia, Kemerovo coalfield and Altai, 3,039 km).

In south-western Asia: Transcaucasian (centre Tbilisi, links Black Sea coast with Erevan, 1,887 km), Azerbaidjan (centre Baku, 1,650 km).

In Central Asia: Tashkent (centre Tashkent, links Tadjik, Uzbek, Kirgiz and Kazakh republics with Orenburg, 2,420 km), Ashkhabad (centre Ashkhabad, links Caspian coast and Turkmen Republic with Uzbekistan, 2,647 km), Kazakh (centre Alma-Ata, 9,000 km).

In central and eastern Siberia: Krasnoyarsk (centre Krasnoyarsk, a part of Trans-Siberian line but with new branches serving the Khakass and Tuva republics, 1,279 km), East Siberia (centre Irkutsk, serves Irkutsk region and Buryat Republic with link to Mongolian People's Republic, 1,696 km), Transbaikal (centre Chita, part of Trans-Siberian line but serving Buryatia and linked with China and Mongolia, 3,320 km).

In the Far East: Far Eastern (centre Habarovsk, serves Maritime regions, 1,712 km), Amur (centre Blagoveshchensk, part of Trans-Siberian line, serves the Amur valley, 2,468 km), South Sahalin (centre Yuzhno-Sahalinsk, 752 km).

*Shipping.* In 1954 the Soviet mercantile marine comprised 1,113 vessels of 2,380,573 gross tons, including 12 sailing ships of 10,084 gross tons and 62 oil tankers of 191,920 gross tons. Under the sixth 5-year plan (1956–60), 1·14m. tons of dry-cargo vessels and 460,000 tons of oil tankers were to be added.

Freights carried were: In 1913 (present frontiers), 15·1m. tons; in 1940, 31·2m. tons; in 1950, 33·7m. tons, and in 1962, 83·6m. tons.

The North Sea route affords convenient communication between the European USSR and the Far East along the Soviet coast, for the produce of the basins of the Obi, Enissei, Lena and Kolyma rivers.

The length of navigable rivers and canals in exploitation was (1962) 139,800 km, in addition to which the length of floatable rivers is 73,000 km. There are several thousand miles of canals and other artificial waterways; among them the Baltic and White Sea Canal (235 km), the Moscow–Volga Canal (130 km). Goods turnover on inland waterways was 28,900m. ton-km in 1913, 35,900m. in 1940, 45,900m. in 1950 and 109,900m. in 1962; freight carried rose from 35·1m. tons in 1913 to 230m. tons in 1962.

The Volga–Don Shipping Canal was opened for traffic in 1952. The Volga–Don waterway from Volgograd to Rostov is 540 km long, of which the Volga–Don canal comprises 101 km. The canal has transformed the section of the river from Kalach, where the Don is joined by the Volga–Don canal, to Rostov into a deep-water highway suitable for big Volga shipping. The canal links the White, Baltic, Caspian, Azov and Black Seas into a single water transport system. Work has begun on a 2,430-km canal linking Klaipeda on the Baltic to Kahovka at the mouth of the Dnieper, suitable for 5,000-ton vessels.

The 18th-century Mariinsky canal system in north-west Russia is under reconstruction, to provide a through waterway from Leningrad to Rybinsk (on the Upper Volga) by 1964, cutting the passage of freight from 18 days to 2½ days.

In 1953 a plan was published for a canal across the Kara-Kum desert in southern Turkmenistan (replacing an earlier project for a more costly scheme across the north of the republic). The canal, from Bussag on the river Amu-Darya to Archnan, north-west of Ashkhabad, through the Murgab oasis, 820 km long, supplies water to an area exceeding 200,000 hectares, suitable for cotton, fruit, vineyards and livestock. It was completed in May 1962. An extension to the Caspian (500 km) is under construction.

Irrigation canals are also under construction (1962) in northern Caucasus and northern Crimea. Work on diverting water from the Pechora and Vychegda rivers (flowing into the White Sea) south to the Volga is in progress. Work has begun on a 300-mile canal which will supply water from the Irtysh to Karaganda in Central Kazakhstan, irrigating over 150,000 acres.

*Roads.* By 1941 there were over 1·5m. km of constructed roads, of which 143,000 km were suitable for motor traffic. The total length of motor roads in 1962 was 311,000 km. Road freights by lorry amounted to 859m. tons in 1940 and 9,122m. tons in 1962. Passengers carried were 590m.

in 1940 and 13,478 in 1962: of these, 12,634m. were on urban bus routes. In 1962, 9,867 inter-urban bus routes had a total length of 972,000 km.

*Post.* In 1962 the number of post, telegraph and telephone offices was 66,000. Number of telephones in 1962, 3·2m.

The international radio-telecommunications services are operated by the Ministry of Communications of the USSR. The Great Northern Telegraph Co., Ltd, of Denmark, operate cables connecting Denmark with Leningrad, whence connexion is made by means of a trans-Siberian landline with Vladivostok. From the latter place the Great Northern Telegraph Co. owns cables connecting with Japan, China and Hong Kong. Direct radio and telephone communication with India is provided for in an agreement concluded in 1955.

In 1962 there were 130 television and rediffusion centres, and 8·3m. television sets.

*Aviation.* In 1962 the total length of the airlines in the USSR was approximately 400,000 km. The principal airlines were Moscow–Vladivostok and Moscow–Tbilisi. The Central Asiatic airways in some instances provide the only means of communication across the desert and mountainous regions of the local republics. An 8,500-km air service was opened in Feb. 1941 between Moscow and Anadyr (Eastern Siberia), through Archangel, Igarka, Khatanga, Tixie Bay and Cape Schmidt, *i.e.*, along the entire course of the Northern Sea Route. There are also other Arctic airlines, *e.g.*, Igarka–Gulf of Kozhevnikov; Igarka–Dickson Island; Yakutsk–Tiksi Bay; Yakutsk–Vilinsk; Yakutsk–Verkhoiansk. In 1962, 27m. passengers were carried; in 1961, 647,000 tons of freight.

Regular air-services are maintained throughout the year between Moscow and the capitals of all Soviet republics as well as Peking, Pyongyang, Ulan Bator, Kabul, Tirana, Paris, Warsaw, Prague, Budapest, Bucharest, Sofia, Vienna, Berlin, Helsinki, Stockholm and, from 1960, London.

Air agreements with Austria, China, Finland, India, UK and Yugoslavia were concluded in 1955.

**MONEY.** As from 1 Jan. 1961 the gold content of the rouble was raised from 0·222 168 to 0·987 412 gramme, and its official exchange rates increased from 4 roubles to 90 kopeks = US$1, and from 11·2 to 2·52 roubles = £1. At the same date a new currency was issued for internal purposes, equating 1 new rouble with 10 old roubles.

The gold holdings of the USSR were, in Dec. 1955, estimated at about 200m. fine oz. (US$7,000m.), or about 20% of the world total of monetary gold.

The currency in circulation is: (1) State Bank notes in denominations of 10, 25, 50 and 100 roubles; (2) Treasury notes in denominations of 1, 3 and 5 roubles; (3) cupro-nickel coins in denominations of 10, 15, 20 and 50 kopeks and 1 rouble; (4) cupro-zinc coins in denominations of 1, 2, 3 and 5 kopeks.

**BANKING.** The State Bank began operations on 16 Nov. 1921. By an edict of 7 April 1959 a number of specialized banks for planned long-term investments, which had existed since 1932, were abolished. The State Bank, in addition to short-term credits, effects long-term investments in agriculture and in individual rural house-building. The Bank for Financing

Capital Investments (*Stroibank*) covers industry, transport, urban housing schemes and public utilities and individual house-building in towns.

Deposits in 69,000 savings banks exceeded 12,7000m. new roubles to the credit of 53m. depositors at 1 Jan. 1963.

**WEIGHTS AND MEASURES.** The metric system has been in use since 1 Jan. 1927. The Gregorian Calendar was adopted as from 14 Feb. 1918.

# RUSSIAN SOVIET FEDERAL SOCIALIST REPUBLIC (RSFSR)

ROSSISKAYA SOVIETSKAYA FEDERATIVNAYA SOTSIALISTICHESKAYA RESPUBLIKA

The RSFSR adopted its present constitution at the 17th Extraordinary All-Russian Congress of Soviets in Jan. 1937. Since then slight alterations have been introduced in the constitution from time to time.

*President, Presidium of the Supreme Soviet:* N. G. Ignatov.
*Chairman, Council of Ministers:* G. I. Voronov.
*Foreign Minister:* M. A. Menshikov.

A special bureau of the Central Committee of the Communist Party of the USSR has been set up for the RSFSR.

*Chairman:* N. S. Khrushchov. *Vice-Chairman:* G. I. Voronov.

The RSFSR consists of:

(1) *Territories:* Altai, Khabarovsk, Krasnodar, Krasnoyarsk, Primorye, Stavropol.

(2) *Regions:* Amur, Archangel, Astrakhan, Belgorod, Briansk, Chelyabinsk, Chita, Gorki, Irkutsk, Ivanovo, Kaluga, Kalinin, Kaliningrad, Kamchatka, Kemerovo, Kirov, Kostroma, Kuibyshev, Kurgan, Kursk, Leningrad, Lipetsk, Magadan, Moscow, Murmansk, Novgorod, Novosibirsk, Omsk, Orel, Orenburg, Penza, Perm, Pskov, Rostov, Ryazan, Sakhalin, Saratov, Smolensk, Volgograd, Sverdlovsk, Tambov, Tomsk, Tula, Tyumen, Ulyanovsk, Vladimir, Vologda, Voronezh, Yaroslavl.

(3) *Autonomous Soviet Socialist Republics:* Bashkir, Buriat, Chuvash, Daghestan, Kabardino-Balkar, Kalmyk, Karelian, Komi, Mari, Mordovian, North Ossetia, Tatar, Tuva, Checheno-Ingush, Udmurt, Yakut.

(4) *Autonomous Regions:* Adygei, Karachayevo-Cherkess, Gorno-Altai, Jewish, Khakass.

(5) *National Areas:* Aginsky Buryat, Chukot, Evenki, Khanty-Mansi, Komi-Permyak, Koryak, Nenetz, Taimyr (Dolgano-Nenetz), Ust-Ordynsky Buryat, Yamalo-Nenetz.

The Supreme Soviet, elected in March 1963, consists of 884 deputies (1 per 150,000 population); 594 are Communists and 295 women.

The RSFSR occupies over 76% of the total area of the USSR stretching from the Far North to the Black Sea in the south and from the Far East to Kaliningrad in the west. Its population in Jan. 1963 (estimate) was 123·4m., of whom four-fifths are Russians, the rest being 38 national minorities such as the Tatars, Jews, Mordovians, Chuvashis, Bashkirs, Poles, Germans, Udmurts, Buryats, Mari, Yakuts and Ossetians. The 2 principal towns are Moscow, the capital, with a population (est. Jan. 1963) of 6,354,000. and Leningrad, the second capital, 3·5m. Among other important large towns are Gorki, Rostov-on-Don, Volgograd, Sverdlovsk, Novosibirsk, Chelyabinsk, Kazan, Omsk and Kuibyshev.

The RSFSR has a variety of climates (ranging from arctic to sub-tropical) and of geographical conditions (tundra, forest lands, steppes and rich agricultural soil). It also contains great mineral resources: Iron ore in the Urals, the Kerch Peninsula and Siberia; coal in the Kuznetz Basin, Eastern Siberia, Urals and the sub-Moscow Basin; oil in the Urals, Azov–Black Sea area and Bashkiria. It also has abundant deposits of gold, platinum, copper, zinc, lead, tin and rare metals.

The RSFSR produces about 70% of the total industrial and agricultural output of the Soviet Union. Specialists with a higher education engaged in the national economy numbered 2,355,000 in Dec. 1962, industrial and office workers numbered 43·1m.

In Dec. 1962, the number of economic districts, each with its own Council of National Economy for management of industry, was reduced from 67 to 24.

**EDUCATION.** In 1962–63 there were 23,687,000 pupils in 127,500 primary 7-year and secondary schools, technical schools and other secondary educational establishments; 1,827,000 students in 426 higher educational establishments (including correspondence students) and 1,641,000 students in 2,078 technical colleges of all kinds (including correspondence students). There were 2,775,000 children attending 35,040 kindergartens. There were, on 1 Jan. 1963, 362,500 scientific staff in 2,340 learned and scientific institutions (about 70% of the total for the USSR).

In 1957 a Siberian branch of the Academy of Science was organized, in charge of all scientific research institutions from the Urals to the Pacific.

There is an Academy of Pedagogical Sciences (with 19 research institutions and a staff of 704) and an Academy of Municipal Economy (with 4 research institutions and a staff of 418).

*Newspapers.* In 1962 there were 2,923 newspapers, 2,777 of them in Russian, with a circulation of 53,349,000 and 52,065,000 respectively.

**HEALTH.** Doctors at the end of 1962 numbered 256,157, and hospital beds 1,097,800 (133,400 in 1913 and 482,000 in 1940).

**FINANCE.** Revenue and expenditure balanced as follows (in 1m. roubles): 1958, 190,523; 1959, 205,927; 1960, 239,303; 1961, 25,488[1]; 1962, 26,412[1]; 1963, 27,862[1]; 1964, 29,293.[1]

[1] Estimates (in new roubles).

Annual planned investments in the national economy rose from 14,762m. roubles in 1956 to 24,267m. in 1962.

**COMMUNICATIONS.** Length of railways, on 1 Jan. 1963, was 72,800 km, inland waterways 118,800 km, hard-surface motor roads 140,800 km. By the beginning of 1962 the Trans-Siberian line was electrified along all its length to Lake Baikal.

## BASHKIRIAN AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area 143,600 sq. km (55,430 sq. miles), population (est. Jan. 1963) 3,603,000. Capital, Ufa. The republic has its own Council of National Economy.

Bashkiria was annexed to Russia in 1557. It was constituted as an Autonomous Soviet Republic on 23 March 1919.

Of 220 deputies elected on 1 March 1959, 79 are women and 146 Communists.

There are expanding oil, chemical, coal, steel, electrical and light industries. There were 1,138 collective farms and 66 state farms in 1958.

In 1963 there were over 5,000 schools with 725,000 pupils. There is a state university and a branch of the USSR Academy of Sciences. There were 35,400 students in technical colleges and 22,300 receiving higher education.

In Jan. 1959 there were 3,460 doctors and 19,100 hospital beds.

## BURIAT AUTONOMOUS SOVIET SOCIALIST REPUBLIC

The Buriat Republic, situated to the south of the Yakut Republic, adopted the Soviet system on 1 March 1920. This area was penetrated by the Russians in the 17th century and finally annexed from China by the treaties of Nerchinsk (1689) and Kyakhta (1727).

The area is 351,690 sq. km (135,650 sq. miles). The population (est. Jan. 1963) was 737,000. Capital, Ulan-Udé. The republic has its own Council of National Economy. The name of the republic was changed from 'Buriat-Mongol' on 7 July 1958.

Of 111 deputies elected on 1 March 1959, 30 were women and 79 Communists.

The main industries are coal, timber, building materials, fisheries, sheep and cattle farming. There are also fox-breeding farms, poultry farms and apiaries. Two-thirds of the collective farms have been electrified. Gold, molybdenum and wolfram are mined.

In 1963 there were over 700 schools with 166,900 pupils, 16 technical colleges with 10,600 students and 2 higher educational institutions with 7,600 students.

At the end of 1959 there were 981 doctors and 5,800 hospital beds.

## CHECHENO-INGUSH AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area 19,300 sq. km (7,350 sq. miles), population (est. Jan. 1963) 922,000. Capital, Grozny. The Republic has its own Council of National Economy. After 70 years of almost continuous fighting the Chechens and Ingushes were conquered by Russia in the late 1850s. In 1918 each nationality separately established its 'National Soviet' within the Terek Autonomous Republic, and in 1920 (after the Civil War) were constituted areas within the Mountain Republic. The Chechens separated out as an Autonomous Region on 30 Nov. 1922 and the Ingushes on 7 July 1924. In Jan. 1934 the two regions were united, and on 5 Dec. 1936 constituted as an Autonomous Republic. This was dissolved in 1944, but reconstituted on 9 Jan. 1957: 232,000 Chechens and Ingushes returned to their homes in the next 2 years.

Of 115 deputies elected on 1 March 1959, 31 were women and 82 Communists.

The republic has one of the major Soviet oilfields: also a number of large engineering works, chemical factories, building materials works and food canneries. There is an expanding timber, woodworking and furniture industry. In 1960 there were 4,600 tractors and 1,000 combines.

There were, in 1963, 461 schools with 190,000 pupils, 10 technical colleges with 10,000 students and 2 places of higher education with 8,700 students.

In 1963 there were 1,500 doctors and 4,300 hospital beds.

## CHUVASH AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area 18,300 sq. km (7,064 sq. miles), population (est. Jan. 1963) 1,143,000. Capital, Cheboksary. The republic has its own Council of National Economy. The territory was annexed by Russia in the middle of the 16th century. On 24 June 1920 it was constituted as an Autonomous Region, and on 21 April 1925 as an Autonomous Republic.

Of 140 deputies elected on 1 March 1959, 54 were women and 88 Communists.

Like most of the Autonomous Republics, Chuvashia before 1914 was a region of primitive agriculture, with a certain development of the timber industry. Today it has several big railway repair works, an expanding electrical and other engineering industry, building materials, chemicals, textiles and food industries; timber felling and haulage are largely mechanized. There were 94 collective farms, 26 state farms and 13 machine and tractor stations. Grain crops account for nearly two-thirds of all sowings and fodder crops for nearly a quarter. Fruit and wine-growing are a developing branch of agriculture.

In 1963 there were 868 schools attended by 232,000 children, 21 technical colleges with over 11,400 students and 3 places of higher education with 6,000 students.

There were 1,200 doctors and 7,100 hospital beds.

## DAGESTAN AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area 50,300 sq. km (19,416 sq. miles), population (est. Jan. 1963) 1,222,000. Capital, Mahachkala. The republic has its own Council of National Economy. Not less than 15 distinct peoples inhabit this republic apart from Russians; the most numerous are the Avartsy, Dargintsy, Lezgins, Kumyks, Laki, Tabasarans and Azerbaidjanis. Annexed from Persia in 1723, Dagestan was constituted an Autonomous Republic on 20 Jan. 1921.

Of 152 deputies elected on 1 March 1959, 49 were women and 105 Communists.

There are large engineering, oil, chemical, woodworking, textile, food and other light industries. Agriculture is very varied, ranging from wheat to grapes, with sheep farming and cattle breeding; in 1958 there were 222 collective farms and 25 state farms.

In 1963 there were 1,415 schools with 237,500 pupils, 26 technical colleges with 14,300 students and 4 higher educational establishments with 8,000 students; and a branch of the USSR Academy of Sciences. Doctors numbered 1,400 and hospital beds 6,400.

## KABARDINO-BALKAR AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area 12,500 sq. km (4,825 sq. miles), population (est. Jan. 1963) 485,000. Capital, Nalchik. The republic has its own Council of National Economy. Kabarda was annexed to Russia in 1557. The Republic was constituted on 5 Dec. 1936.

Of 119 deputies elected on 1 March 1959, 40 were women and 85 Communists.

Main industries are ore-mining, timber, engineering, coal, food processing, timber and light industries, building materials. Grain, livestock breeding, dairy farming and wine-growing are the principal branches of agriculture.

In 1963 there were 296 schools with 97,800 pupils, 6,600 students in technical colleges and 3,300 students receiving higher education; 625 doctors and 2,712 hospital beds.

## KALMYK AUTONOMOUS SOVIET SOCIALIST REPUBLIC

The Kalmyks migrated from western China to Russia (Nogai Steppe) in the early 17th century. The territory was constituted an Autonomous Region on 4 Nov. 1920, and an Autonomous Republic on 22 Oct. 1935; this was dissolved in 1943. On 9 Jan. 1957 it was reconstituted as an Autonomous Region and on 29 July 1958 as an Autonomous Republic once more.

Of 95 deputies elected on 19 Oct. 1958, 35 were women.

Area 75,900 sq. km (29,300 sq. miles), population (est. Jan. 1963) 219,000. Capital, Elista (34,000).

Main industries are fishing, canning and building materials. Cattle breeding and irrigated farming (mainly fodder crops) are the principal branches of agriculture.

In 1963 there were 42,300 pupils in 242 schools and 1,900 students in technical colleges; 287 doctors and 1,350 hospital beds.

## KARELIAN AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Before 1917, Karelia (then known as the Olonetz Province) was noted chiefly as a place of exile for political and other prisoners.

After the November Revolution of 1917, Karelia formed part of the RSFSR. In June 1920 a Karelian Labour Commune was formed and in July 1923 this was transformed into the Karelian Autonomous Soviet Socialist Republic (one of the autonomous republics of the RSFSR). On 31 March 1940, after the Soviet–Finnish war, practically all the territory (with the exception of a small section in the neighbourhood of the Leningrad area) which had been ceded by Finland to the USSR was added to Karelia and the Karelian Autonomous Republic was transformed into the Karelo-Finnish Soviet Socialist Republic as the 12th republic of the USSR. In 1946, however, the southern part of the republic, including its whole seaboard and the town of Viipuri (Vyborg) and Keksholm, was attached to the RSFSR. In 1956 the status of the republic was changed (*see* p. 1492).

Karelia is chiefly noted for its wealth of timber, some 70% of its territory being forest land. It is also rich in other natural resources, having large deposits of diabase, spar, quartz, marble, mica, granite, zinc, lead, silver, copper, molybdenum, tin, baryta, iron ore, etc. Karelia takes first place in the USSR for the production of mica. It has 43,643 lakes, which, as well as its rivers, are rich in fish.

*Area and Population.* The Karelian Autonomous Republic, capital Petrozavodsk, covers an area of 172,400 sq. km, with a population of 673,000 (est. Jan. 1963). It has its own Council of National Economy.

Of the 133 deputies elected on 1 March 1959, 41 were women and 80 Communists.

*Education.* In 1963 there were 140,500 pupils in 209 8-year and 80 11-year schools. There were 6,600 students in places of higher education and 8,900 in technical colleges.

There are in Petrozavodsk a university (2,499 students in 1961), 2 other higher institutes and a teachers' training college. A branch of the Academy of Sciences was set up in 1949.

*Health.* There were 960 doctors in 1959, and 6,675 hospital beds.

*Agriculture.* There were 13 collective farms and 52 state farms in 1961. Livestock on 1 Jan. 1963 included 113,000 cattle, 60,000 pigs, 62,000 sheep and goats.

*Industry.* The republic has some 20 large-scale enterprises, such as timber-mills, paper-cellulose works, mica, chemical plants, electrical stations and furniture factories. Output, 1962: Timber, 16·8m. cu. metres; paper and cellulose, 611,000 tons; power, 1,689m. kwh.; canned fish, 3·9m. tins.

The construction of the White Sea–Baltic Canal had a powerful influence on the economic development of Karelia. A new power station (Vygostrovo), new paper-making and chemical works, etc., began operating in 1961.

*Communications.* A railway between Petrozavodsk and Suoyarvi connects the capital and the Murmansk Railway with the main railway line Sortavala–Vyborg. A railway line was also laid between Kandalaksha and Kuolayarvi. Length of track, 1,600 km.

There is regular passenger, postal and goods air transport between Petrozavodsk and Leningrad, Vyborg, Sortavala and Kakisalmi.

## KOMI AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area 415,900 sq. km (160,540 sq. miles), population (est. Jan. 1963) 903,000. Capital, Syktyvkar (84,000). The republic has its own Council of National Economy. Annexed by the princes of Moscow in the 14th century and occupied by British and American forces in 1918–19, the territory was constituted as an Autonomous Region on 22 Aug. 1921 and as an Autonomous Republic on 5 Dec. 1936.

Of 128 deputies elected on 1 March 1959, 38 were women and 82 Communists.

There are large coal, oil, timber, gas, asphalt and building materials industries; light industry is expanding. Livestock breeding (including dairy farming) is the main branch of agriculture.

In 1963 there were 158,000 children in over 700 schools, 2,000 students at a pedagogical institute, 8,000 students in 13 technical colleges; and a branch of the Academy of Sciences.

There were 1,100 doctors and 7,000 hospital beds.

## MARI AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area 23,200 sq. km (8,955 sq. miles), population (est. Jan. 1963) 657,000. Capital, Yoshkar-Ola. The republic has its own Council of National Economy. The Mari people were annexed to Russia, with other people of the Kazan Tartar Khanate, when the latter was overthrown in 1552. On 25 Nov. 1920 the territory was constituted as an Autonomous Region, and on 5 Dec. 1936 as an Autonomous Republic.

Of 111 deputies elected on 1 March 1959, 34 were women and 76 Communists.

There are over 300 modern factories. The main industries are metalworking, timber, paper, woodworking and food processing. There are 165 collective farms and 7 state farms. Over 69% of cultivated land is under grain, but flax, potatoes, fruit and vegetables are also expanding branches of agriculture, as is also livestock farming.

Estimated reserves of the Pechora coalfield are 262,000m. tons.

In 1963 there were 776 schools with 141,000 pupils, 12 technical colleges and institutes with over 4,900 students and 2 higher educational establishments with 7,600 students; also 760 doctors and 5,400 hospital beds.

## MORDOVIAN AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area 26,200 sq. km (10,110 sq. miles), population (est. Jan. 1963) 1,007,000. Capital, Saransk. The republic has its own Council of National Economy. By the 13th century the Mordovian tribes had been subjugated by the Russian princes of Ryazan and Nizhni-Novgorod. In 1928 the territory was constituted as a Mordovian Area within the Middle-Volga Territory, on 10 Jan. 1930 as an Autonomous Region and on 20 Dec. 1934 as an Autonomous Republic.

Of 128 deputies elected on 1 March 1959, 45 were women and 88 Communists.

The republic has a wide range of industries: electrical, timber, cable, building materials, furniture, textile, leather and other light industries. Agriculture is devoted chiefly to grain, sugar beet, sheep and dairy farming.

There were 213,500 children at school, 6,900 students in technical colleges and 7,100 at the State University and institutes, in 1963. There were 700 doctors and 5,140 hospital beds.

## NORTH OSSETIAN AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area 8,000 sq. km (3,088 sq. miles), population (est. Jan. 1963) 487,000. Capital, Ordzhonikidze (formerly Vladikavkaz). The republic has its own Council of National Economy. The Ossetians, known to antiquity as Alans (who were also called by their immediate neighbours 'Ossi' or 'Yassi'), were annexed to Russia after the latter's treaty of Kuchuk-Kainardji with Turkey, and in 1784 the key fortress of Vladikavkaz was founded on their territory (given the name of Terek region in 1861). On 4 March 1918 the latter was proclaimed an Autonomous Soviet Republic, and after the Civil War this territory with others was set up as the Mountain Autonomous Republic (20 Jan. 1921), with North Ossetia as the Ossetian (Vladikavkaz) Area within it. On 7 July 1924 the latter was constituted as an Autonomous Region, and on 5 Dec. 1936 as an Autonomous Republic.

Of 110 deputies elected on 1 March 1959, 33 were women and 81 Communists.

The main industries are: non-ferrous metals (mining and metallurgy), maize-processing (at the Beslan Works, the largest in Europe), timber and woodworking, textiles, building materials, distilleries and food processing. There is also a prosperous and varied agriculture.

There were in 1963, 93,500 children in over 300 schools, 10,400 students in technical colleges and 11,600 students in 4 higher educational establishments (pedagogical, agriculture, medical and mining-metallurgical institutes). There were 1,200 doctors and 3,915 hospital beds in 1963.

## TARTAR AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area 68,000 sq. km (26,250 sq. miles), population (est. Jan. 1963) 3,011,000. Capital, Kazan. The republic has its own Council of National Economy. From the 10th to the 13th centuries this was the territory of the flourishing Volga-Kama Bulgar State; conquered by the Mongols, it became the seat of the Kazan (Tartar) Khans when the Mongol Empire broke up in the 15th century, and in 1552 was conquered again by Russia. On 27 May 1920 it was constituted as an Autonomous Republic.

Of 194 deputies elected on 1 March 1959, 68 were women and 135 Communists.

The republic has highly developed engineering, oil and chemical industries, while timber, building materials, textiles, clothing and food industries are also expanding. In 1962 collective and state farms served a total area under crops of 3,684,000 hectares.

In 1963 there were 3,492 schools with 603,000 pupils, 39 technical colleges with 26,500 students and 12 higher educational establishments with 43,800 students (including a state university). There is a branch of the USSR Academy of Sciences and a total of 39 scientific research institutions.

Doctors at the end of 1962 numbered 4,500 and hospital beds 23,330.

## TUVA AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area 170,500 sq. km (65,810 sq. miles), population (est. Jan. 1963), 198,000. Capital, Kizyl (40,000). Tuva was incorporated in the USSR as an autonomous region on 13 Oct. 1944 and elevated to an Autonomous Republic on 10 Oct. 1961. It is situtated to the north-west of Mongolia, between 50° and 53° N. lat. and between 90° and 100° E. long. It is bounded to the east, west and north by Siberia, and to the south by the Republic of Mongolia. The Tuvans are a Turki people, formerly ruled by hereditary or elective tribal chiefs. (For the earlier history of the former Tannu-Tuva Republic, *see* THE STATESMAN'S YEAR-BOOK, 1946, p. 798.)

Of the 100 deputies elected to its Supreme Soviet on 17 Dec. 1961, 31 were women and 71 Communists.

Tuva is well-watered and has much good pastoral land; 47 hydro-electric stations have been set into operation. The Tuvans are mainly herdsmen and cattle farmers, but in 1963 over 400,000 hectares were under crops. There are deposits of gold, cobalt and asbestos. The main exports are hair, hides and wool, and the imports manufactured goods and iron. There are 41 collective farms and 5 state farms. Mining, woodworking, garment, leather, food and other industries are rapidly developing.

In 1963 there were 192 schools with 43,800 pupils; 3 technical coleges with 1,200 students, a pedagogical institute and an Institute of Linguistics, Literature and History with 1,200 students; 11 newspapers (2 in Russian).

A Soviet steamer-service along the river Yenisei maintains communication with Minussinsk, in Central Siberia. Internal transport is chiefly by lorry and motor coach. There is an air service from Kizyl to Krasnoyarsk.

## UDMURT AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area 42,100 sq. km (16,250 sq. miles), population (est. Jan. 1963) 1,377,000. Capital, Izhevsk. The republic has its own Council of National Economy. The Udmurts (formerly known as 'Votyaks') were annexed by the Russians in the 15th and 16th centuries. On 4 Nov. 1920 the Votyak Autonomous Region was constituted (the name was changed to Udmurt—used by the people themselves—in 1932), and on 28 Dec. 1934 it was raised to the status of an Autonomous Republic.

Of 168 deputies elected on 1 March 1959, 57 were women and 111 Communists.

Heavy industry includes the manufacture of locomotives, machine tools and other engineering products, timber and building materials. There are also light industries—clothing, leather, furniture, food, etc.

In 1963 there were 1,519 schools with 287,000 pupils, 21 technical colleges with 12,500 students and 5 places of higher education with 13,800 students.

There were 1,860 doctors and 13,400 hospital beds on 1 Jan. 1963.

## YAKUT AUTONOMOUS SOVIET SOCIALIST REPUBLIC

The area is 3,103,000 sq. km (1,197,760 sq. miles), population (est. Jan. 1963) 577,000. Capital, Yakutsk (population, 82,000). The republic has its own Council of National Economy. The Yakuts were subjugated by the Russians in the 17th century. The territory was constituted an Autonomous Republic on 27 April 1922.

Of 165 deputies elected on 1 March 1959, 45 were women and 124 Communists.

The principal industries are mining (gold, tin, mica, coal) and livestock-breeding. The Soviet Trust Soyuz-Zoloto and a number of individual prospectors are working the fields. Silver- and lead-bearing ores and coal are worked; large diamond fields have been opened up. Timber and food industries are developing. There were 64 collective farms in 1963 with an area under grain of 80,000 hectares, and 28 state farms. Trapping and breeding of fur-bearing animals (sable, squirrel, silver fox, etc.) are an important source of income. A severe climate and lack of railways are serious obstacles to the economic development of the republic. There are, however, 10,000 km of roads and internal airlines totalling 10,000 km. There is an air service between Irkutsk and Yakutsk.

In 1963 there were 618 schools with 118,400 pupils; 70 were secondary schools. There are 16 technical colleges with 6,200 students, a state university and a pedagogical institute with 3,190 students and a branch of the Academy of Sciences with 15 research institutes and 532 scientific staff.

## ADYGEI AUTONOMOUS REGION

Part of Krasnodar Territory. Area, 4,500 sq. km (1,737 sq. miles), population (est. Jan. 1963), 343,000. Capital, Maikop (95,000). Established 27 July 1922.

Chief industries are timber, woodworking, food processing; but engineering is rapidly expanding. Cattle breeding predominates in agriculture.

In 1963 there were 245 schools with 64,000 pupils, 5 technical colleges with 2,800 students and a pedagogical institute with 2,000 students. Regional newspapers are in Adygei and Russian.

## GORNO-ALTAI AUTONOMOUS REGION

Part of Altai Territory. Area, 92,600 sq. km (35,740 sq. miles), population (est. Jan. 1963), 166,000. Capital, Gorno-Altaisk (30,000). Established 1 June 1922 as Oirot Autonomous Region; renamed 7 Jan. 1948.

Chief industries are gold, mercury and brown coal mining, timber, chemicals and dairying. Cattle breeding predominates: pasturages and hay meadows cover over 1m. hectares, but 131,000 hectares are under crops.

There are 259 primary and secondary schools with 35,000 pupils; technical colleges have 1,800 students and 3,100 students are receiving higher education. There are 154 doctors, 34 hospitals and over 100 crèches and kindergartens (3,500 children).

## JEWISH AUTONOMOUS REGION

Part of Habarovsk Territory. Area, 36,000 sq. km (13,895 sq. miles), population (est. Jan. 1963), 163,800 (Russians, 127,000; Ukrainians, 14,000; Jews, 14,000). Capital, Birobidjan (42,000). Established as Jewish National District in 1928, became an autonomous region 7 May 1934.

Chief industries are non-ferrous metallurgy, building materials, timber, engineering, textiles, paper and food processing. There are 50 factories, 107,000 hectares under crops, 36,000 cattle and 29,000 pigs.

In 1963 there were 39,000 schoolchildren; students in technical colleges numbered 3,200. There are a Yiddish national theatre, a Yiddish weekly paper and a Yiddish broadcasting service. Doctors number 181.

## KARACHAYEVO-CHERKESS AUTONOMOUS REGION

Part of Stavropol Territory. Area, 14,100 sq. km (5,442 sq. miles), population (est. Jan. 1963), 308,000. Capital, Cherkessk (49,000). A Karachai Autonomous Region was established on 26 April 1926 (out of a previously united Karachayevo–Cherkess Autonomous Region created in 1922), and dissolved in 1943. A Cherkess Autonomous Region was established on 30 April 1928. The present Autonomous Region was re-established on 9 Jan. 1957.

Ore-mining, engineering, chemical and woodworking industries have been built up since 1917. There are 70 large factories, and a copper works and sugar factory are under construction. A large irrigation scheme, Kuban–Kalaussi, is being developed, to irrigate 200,000 hectares. Livestock breeding and grain growing predominate in agriculture.

There are 62,000 pupils in 200 schools, 5 technical colleges with 1,800 students and 2 institutes with 1,600 students; 295 doctors and 2,115 hospital beds.

## KHAKASS AUTONOMOUS REGION

Part of Krasnoyarsk Territory. Area, 61,800 sq. km (23,855 sq. miles), population (est. Jan. 1963), 442,000. Capital, Abakan (66,000). Established 20 Oct. 1930.

Coal- and ore-mining, timber and woodworking industries have been highly developed since 1917. The region is linked by rail with the Trans-Siberian line. Large textile and sugar factories are being built.

In 1963 about 815,000 hectares were under crops. Livestock breeding, dairy and vegetable farming are developed. There are 32 state farms and 16 collective farms.

There are 94,000 pupils in 437 schools, 6 technical colleges with 4,400 students and a pedagogical institute with 2,060 students. A Khakass alphabet was created after the revolution.

# UKRAINE

## UKRAINSKA RADYANSKA SOTSIALISTICHNA RESPUBLIKA

The Ukrainian Soviet Socialist Republic was proclaimed on 27 Dec. 1917 and was finally established in Dec. 1919. In Dec. 1920 it concluded a military and economic alliance with the Russian Soviet Federal Socialist Republic and on 6 July 1923 formed, together with the other Soviet Socialist Republics, the Union of Soviet Socialist Republics. On 1 Nov. 1939 Western Ukraine (about 88,000 sq. km) was incorporated in the Ukrainian SSR. On 2 Aug. 1940 Northern Bukovina (about 6,000 sq. km) ceded to the USSR by Rumania 28 June 1940, and the Khotin, Akkerman and Izmail provinces of Bessarabia were included in the Ukrainian SSR, and on 29 June 1945 Ruthenia (sub-Carpathian Russian), about 7,000 sq. km, was also incorporated. From the new territories 2 new regions (provinces) were formed, Chernovitz and Izmail.

The Ukrainian Soviet Socialist Republic consists of the following regions: Cherkassy, Chernigov, Chernovtzy, Crimea (transferred from the RSFSR on 19 Feb. 1954), Dniepropetrovsk, Donetsk, Ivan Franko, Khmelnitsky (formerly Kamenetz-Podolsk), Kharkov, Kherson, Kiev, Kirovograd, Lugansk, Lvov, Nikolaiev, Odessa, Poltava, Rovno, Sumy, Ternopol, Vinnitza, Volhynia, Zakarpatskaya (Transcarpathia), Zaporozhye, Zhitomir.

The Supreme Soviet, elected in 1963, consists of 469 deputies (1 per 90,000 population); 319 are Communists and 160 women.

At elections to regional, district, urban and rural Soviets (5 March 1961), out of 392,000 deputies returned, 148,500 were women and 179,000 Communists.

*President, Presidium of the Supreme Soviet:* D. S. Korotchenko.
*Chairman, Council of Ministers:* I. P. Kazanets.
***Foreign Minister:*** **L. F. Palamarchuk.**
*First Secretary, Communist Party:* P. E. Shelest.

**AREA AND POPULATION.** In 1938 the Ukrainian SSR covered an area of 445,000 sq. km (171,770 sq. miles); in 1962 it covered 601,000 sq. km (231,990 sq. miles).

The population in Jan. 1959 was 41,869,000 (77% Ukrainians, 17% Russians). Estimated population, 1 Jan. 1963, 44,054,000.

The principal towns are the capital, Kiev, Kharkov, Donetsk, Odessa, Dniepropetrovsk, Lvov, Zaporozhye and Krivoi Rog.

Several Christian Churches have their adherents in the Ukraine, the chief being the Orthodox Greek Church and the Catholic Church. The

Western Ukraine Uniate Church, which in 1596 had been forced by the Poles to establish unity with the Roman Church, severed this connexion in March 1946 and joined the Orthodox Church. There are also some Protestants as well as Jews and others.

**EDUCATION.** In 1963 the number of pupils in over 39,600 primary, secondary and special schools was 7,964,000; 133 higher educational establishments had 517,600 students, and 641 technical colleges 501,800 students; 573,600 children were attending 6,498 kindergartens; 3,700 crèches accommodated 208,000 infants.

The Ukrainian Academy of Sciences was established in 1919; in 1963 it had 71 institutions with 5,491 scientific staff. There is an academy of building and architecture. Total scientific staff in 852 learned institutions numbered 71,035 in 1962.

*Newspapers* (1962). Out of 2,596 newspapers, 2,132 were in Ukrainian, with a circulation of 11,199,000 and 7,903,000 respectively.

**HEALTH.** In 1955 there were 600 sanatoria and rest houses in the Ukraine. Doctors numbered 88,888 in 1962, and hospital beds, 382,300.

**FINANCE.** Budget estimates (in 1m. new roubles), 1961, 7,482; 1962, 7,616; 1963, 7,887; 1964, 8,292. About one-third is allocated to the national economy and 60% to education, health and social services.

**AGRICULTURE.** The Ukraine contains some of the richest land in the USSR. It raises wheat, buckwheat, beet, sunflower, cotton, flax, tobacco, soya, hops, the rubber plant kok-sagyz, fruit and vegetables, and in 1962 provided nearly a quarter of the grain production in the USSR and one-half of the sugar beet. Nine-tenths of the grain exported from Russia came from the Ukraine. The area under cultivation was 27·9m. hectares in 1913, 27m. in 1939 before the new territories were added, and 34·3m. in 1962.

Output (in 1m. tons) in 1962 (1913 figures in brackets): Wheat, 10·2 (8); maize, 14·7 (0·87); other grains, 7·5 (14·3); sugar beet, 35·6 (9·3); sunflower seed, 2·1 (0·07); flax, 0·8 (0·004); potatoes, 17·4 (8·5); meat and fats, 2·3 (1·1); milk, 14·8 (4·7); wool, 0·025 (0·015); 8,058m. eggs (3,005m.).

On 1 Jan. 1963 there were 20,543,000 cattle, 21,636,000 pigs, 10,101,000 sheep, 626,000 goats. In 1949 silver-fox breeding farms were started.

On 1 Jan. 1963 there were 994 state farms and 9,920 collective farms.

Irrigation networks supplied 343,000 hectares of land.

**INDUSTRY.** In Dec. 1962 the 14 economic administrative districts, each with its Council of National Economy responsible for industry, were reduced to 7.

Coal in the Donetz field (area, 25,900 sq. km stretching from Donetsk to Rostov), estimated in 1938 to contain 60·8% of the bituminous and anthracite-coal reserves of the Union, yielded an output in 1961 of 186·1m. metric tons—about 36% of the Union production. Large new seams have been found near Novo-Moskovsk (Dniepropetrovsk region), Kharkov, Lugansk (beyond the Don) and on the left bank of the Dnieper. Within the present frontiers of the Ukraine, coal output was 22·8m. tons in 1913, 83·8m. tons in 1940, 78m. tons in 1950 and 175·2m. tons in 1962.

Combining coal from the Donetz field with the iron-ore from the mines in Krivoi Rog has made possible the development of a large ferrous metallurgical industry in the Ukraine. Output of iron ore was 6·9m. tons in 1913, 18·9m. tons in 1940 and 70·9m. tons in 1962.

Manganese is also available at Nikopol; the mines there produced 957,000 tons of ore in 1937, of a total of 2,752,000 tons for the whole USSR.

Pig-iron output was 2·9m. tons in 1913, 9·6m. tons in 1940, 9·2m. tons in 1950 and 28·1m. tons in 1962. Steel output (in the present frontiers) was 2·4m. tons in 1913, 8·9m. in 1940, 8·4m. in 1950 and 30·6m. in 1962.

The Ukraine also contains oil, rich deposits of salt and various important chemicals. Oil output was 1m. tons in 1913 (in present frontiers), 353,000 tons in 1940 and 3,785,000 tons in 1962.

The Ukraine has highly developed chemical and machine-construction industries producing one-fifth of the total output of machinery and chemicals in the Soviet Union, 105,000 tractors and 1,332 main-line diesel locomotives were produced in 1962.

In Northern Bukovina there are deposits of gypsum, oil, alabaster, brown coal and timber. Output of mineral fertilizers were 36,000 tons in 1913 and 4·8m. tons in 1962; cement output increased in the same years from 269,000 to 9·9m. tons (in present frontiers in both cases). Paper output in 1962 was 158,100 tons (1913: 26,900).

Consumer goods and food industries are important. Output of cotton fabrics was (in present frontiers) 4·7m. metres in 1913, 13·8m. in 1940, 20·6m. in 1950 and 133·4m. in 1962. Granulated sugar output in the same years was 1·1m. tons, 1·6m. tons, 1·8m. tons and 4·5m. tons. Leather footwear manufactured in 1940 totalled 40·8m. pairs; 1962, 84·2m.

The number of industrial and office workers at the end of 1950 was 6·9m., and the average in 1962, 11,692,000. There were 789,800 specialists with a higher education.

During the first 5-year plan (1929–32) the Dnieper power-station was built; destroyed during the War, it was restored during the fourth plan (1946–50). Another large hydro-electric station at Kahovka began operations during the fifth plan (1951–55). Power output (in 1,000m. kwh.) increased as follows: 1913, 0·5; 1940, 12·4; 1950, 14·7; 1962, 69·5.

**COMMUNICATIONS.** The total length of railways of the Ukrainian SSR in 1962 was 21,350 km, and the navigable rivers, 4,700 km. Length of hard-surface motor roads was 54,800 km.

Airlines connect Kiev, Lvov, Chernovtsy and Odessa with Crimean and Caucasian spas, Kiev with Tbilisi, Odessa with Riga and Donetsk.

# BYELORUSSIA

BYELARUSKAYA SOVIETSKAYA SOTSYIALISTYCHNAYA RESPUBLIKA

The Byelorussian Soviet Socialist Republic was set up on 1 Jan. 1919. It forms one of the constituent republics of the USSR.

Byelorussia is situated along the Western Dvina and Dnieper; it is hilly, with a general slope towards the south. It contains large tracts of marsh land, particularly to the south-west, and valuable forest land wooded with oak, elm, maple and white beech.

The Supreme Soviet, elected in 1963, consists of 421 deputies (1 per 20,000 population); 292 are Communists and 151 women.

At elections to regional, district, urban and rural Soviets (19 March 1961), of 78,000 deputies returned 31,200 were women and 33,930 Communists.

*President, Presidium of the Supreme Soviet:* V. I. Kozlov.
*Chairman, Council of Ministers:* T. Y. Kiselyov.
*Foreign Minister:* K. V. Kiselyov.
*First Secretary, Communist Party:* K. T. Mazurov.

**AREA AND POPULATION.** The area is 207,600 sq. km (80,134 sq. miles). The capital is Minsk. Other important towns are Gomel, Vitebsk, Mogilev, Bobruisk, Grodno (88,000) and Brest (82,000). In Jan. 1959 the population numbered 8·1m. On 2 Nov. 1939 western Byelorussia was incorporated with an area of over 108,000 sq. km and a population of 4·8m. About 81% of the population are Byelorussians, 8% Russians, 7% Poles, 2% Ukrainians and 2% Jews. Estimated population, Jan. 1963. 8·4m.

Byelorussia now comprises the following regions: Brest, Gomel, Grodno, Mogilev, Minsk, Vitebsk.

A single Council of National Economy for the whole republic was set up in May 1958.

**EDUCATION.** In 1963 there were 75,700 students in 25 places of higher education and 83,000 students in 105 technical colleges. There were 7,648 scientific personnel in 143 institutions, and 119,000 specialists with a higher education employed in the national economy. The Byelorussian Academy of Sciences controlled 32 learned institutions with 1,967 scientific staff. The number of children in primary, secondary and special schools was 489,000 in 1914–15, and 1,577,000 in 1963. 102,100 children were attending 1,120 kindergartens in Jan. 1963.

*Newspapers* (1962). Of 133 newspapers 98 were published in Byelorussian, with a circulation of 2·64m. and 1,383,000 respectively.

**HEALTH.** In 1962 there were 13,390 doctors (900 in 1913, within present frontiers), 66,900 hospital beds (6,400 in 1913) and 27,800 cots in crèches.

**FINANCE** (in 1m. new roubles). Estimates for 1961, 1,283; 1962. 1,345; 1963, 1,474; 1964, 1,532.

**AGRICULTURE.** The area under cultivation (in hectares) was 4·5m. in 1913, 5·2m. in 1940 and 5·9m. in 1962. There were 4,123,000 cattle, 3,213,000 pigs, 1,066,000 sheep on 1 Jan. 1963.

Output of main agricultural products (1,000 tons) in 1962 (1913 figures in brackets): Flax, 93 (33); sugar beet, 1,327 (0); potatoes, 17,118 (4,024); meat, 452 (219); milk, 3,360 (1,429); wool, 2·1 (2·3); 959m. eggs (413m.).

Agriculturally, Byelorussia may be divided into three main sections: Northern: growing flax, fodder, grasses and breeding cattle for meat and dairy product; Central: potato growing and pig breeding; Southern: good natural pasture land, hemp cultivation and cattle breeding for meat and dairy produce.

At the end of 1962 there were 2,325 collective farms and 371 state farms. By the end of 1957 about 791,000 hectares of the marsh land had been drained for agricultural use, 290,000 of these for crops. This land has been found to be as rich as the soil of the Black Earth zone, and yields rich harvests of grain, fodder, potatoes, kok-sagyz and other crops.

In Jan. 1963 there were 73,000 tractors and 11,700 grain combine harvesters.

**INDUSTRY.** Industry in this republic was almost completely destroyed during the years 1941–45. By 1956, aggregate industrial output was three times what it had been in 1940. Plants producing tip-lorries, machine-tools and agricultural machinery are prominent.

The republic also contains timber works; a match factory in Borisov; building materials, machine, pre-fabricated house construction, glass-blowing and other factories; canneries, creameries and other food industries; chemical, textiles, artificial-silk, flax-spinning and leather works.

An automobile and tractor industry, non-existent before the Second World War, produced 22,400 lorries and 45,000 trailers in 1962. Cement output, 33,000 tons in 1913, was 1,039,000 tons in 1962. Leather footwear output, 9·8m. pairs in 1940, was 23·2m. pairs in 1962. Linen fabrics, 13,000 metres in 1913, 55·6m. in 1962; woollens, 37,000 metres in 1913, 17·4m. in 1962.

Particular attention has been paid to the development of the peat industry with a view to making Byelorussia as far as possible self-supporting in fuel, and in 1939 local peat provided 67·5% of her total requirements of fuel. Total output in 1962 was 7m. tons.

There are also rich deposits of rock salt. In 1951 the first sugar refinery in Byelorussia was opened in Grodno.

Output of electricity in 1962 was 4,600m. kwh. (508m. in 1940). New power-plants have been built in Baranovichi, Grodno, Molodechno and Lida.

The number of industrial and office workers at the end of 1962 was 2·1m. and 126,600 specialists with a higher education in the national economy.

**COMMUNICATIONS.** There are 5,400 km of railways, 65,100 km of motor roads (16,200 km hard-surface) and 3,800 km of navigable waterways.

## AZERBAIJAN

Azarbaijchan Soviet Sotsialistik Respublikasy

The 'Mussavat' (Nationalist) party, which dominated the National Council or Constituent Assembly of the Tartars, declared the independence of Azerbaijan on 28 May 1918, with a capital, first at Ganja (Elizavetpol) and later at Baku. On 28 April 1920 Azerbaijan was proclaimed a Soviet Socialist Republic. With Georgia and Armenia it formed the Transcaucasian Soviet Federal Socialist Republic. In 1936 it assumed the status of one of the Union (constituent) republics of the USSR.

The Supreme Soviet, elected in 1963, consists of 345 deputies (1 per 10,000 population); 269 are Communists and 110 women.

At elections to the Nagorno-Karabagh regional Soviet and the district, urban and rural Soviets (19 March 1961), of 33,800 deputies returned, 13,000 were women and 17,600 Communists.

*President, Presidium of the Supreme Soviet:* M. A. Iskenderov.
*Chairman, Council of Ministers:* E. N. Alikhanov.
*First Secretary, Communist Party:* V. Y. Ahundov.

**AREA AND POPULATION.** Azerbaijan covers an area of 86,600 sq. km (33,430 sq. miles) and has a population (Jan. 1963) of 4,232,000. Its capital is Baku. Other important towns are Kirovabad and Sumgait (68,000). Nahichevan (27,000) is the capital of the Autonomous Republic of the same name. The republic has a single Council of National Economy for its whole territory.

Azerbaijan includes the Nahichevan Autonomous Republic and the Nagorno-Karabagh Autonomous Region. Situated in the eastern area of Transcaucasia, it is protected by mountains in the west and north and washed by the Caspian Sea in the south and east. Its climate is inclined to drought.

About two-thirds of the population are Azerbaijan Tiurks. Other nationalities are Russians (14%), Armenians (12%) and Georgians (2·7%).

**EDUCATION.** In 1962 there were 868,000 pupils in 4,855 elementary and secondary schools and 50,900 children attending 741 kindergartens. There were 69 technical colleges with 36,800 students, 12 higher educational institutions with 45,100 students (including correspondence students) and a state university at Baku.

The Azerbaijan Academy of Sciences has 31 research institutions with 2,598 research workers. There are 115 learned and scientific institutions, with 9,889 research workers.

*Newspapers* (1962). There were 71 newspapers, 49 of them in the Azerbaidjani language, with a circulation of 785,000 and 518,000 respectively.

**HEALTH.** In 1962 there were 9,378 doctors and 32,800 hospital beds. There were also 235 maternity and infant welfare centres and 300 permanent crèches for 12,700 children.

**FINANCE** (in 1m. new roubles). Estimate, 1961, 670; 1962, 706; 1963, 761; 1964, 820.

**AGRICULTURE.** The chief agricultural products are grain, cotton, rice, vine, fruit, vegetables, tobacco and silk. The Mexican rubber plant *grayule* has been acclimatized. A new kind of high-yielding winter wheat has been produced for use in mountainous parts of the republic.

Livestock on 1 Jan. 1963: Cattle, 1,424,000; pigs, 181,000; sheep, 4,904,000; goats, 206,000. Azerbaijan has a valuable breed of saddle horses. Camels, mules, donkeys and buffaloes are used as draft animals.

Output of main agricultural products (1,000 tons) in 1962 (1913 figures in brackets): Wheat, 462 (315); maize, 106 (4); cotton, 277 (4); potatoes, 128 (38); tea, 6·2 (0); meat, 83 (40); milk, 401 (203); wool, 9·4 (4·1); grapes, 114; fruit, 70; 340m. eggs (94m.).

Azerbaijan has become an important cotton-growing and sub-tropical base. About 1·6m. hectares have an irrigation network. On the irrigated land crops of Egyptian and Sea Island cotton are obtained. Here, too, rice and lucerne are cultivated, and in the mountain valleys there are also orchards, vineyards and silk cultures.

In the south along the coast of the Caspian, where the climate is more moist, there are tea plantations, and citrous fruits and other sub-tropical plants are grown.

In 1941 a scientific research institute for sub-tropical research was opened to develop the culture of sub-tropical plants in Azerbaijan and other parts of Transcaucasia. A forestry research institute was opened in 1949.

There were at the end of 1962, 983 collective farms. There were 118 state farms, 26,700 tractors and 3,400 grain combine harvesters.

**INDUSTRY.** The republic is rich in natural resources: Oil, iron, aluminium, copper, lead, zinc, precious metals, sulphur pyrites, limestone and salt. Iron and steel and aluminium works have been built at Sumgait.

The most important industry is the oil industry, especially in the Baku region. The output of oil was 7·7m. tons in 1913, 22·2m. tons in 1940 and 19·7m. tons in 1962. The largest producing area lies along the western shore of the Caspian Sea, north and south of Baku, where the largest refineries are located. Other wells lie west of Baku, and some have been drilled in the Caspian itself, off the Apsheron Peninsula. Baku is connected by a double pipeline with Batum on the Black Sea. All the oilfields have been electrified and are connected with Baku.

Azerbaijan has also copper, chemical, cement and building material, food, timber, salt, textiles and fishing industries. 743,000 tons of steel were produced in 1962, 950,000 tons of cement, 116m. metres of cotton fabrics, 7·9m. pairs of leather footwear, 9m. metres of silk fabrics.

In addition to Baku, among the important industrial centres are Kirovabad, Nukha, Stepanakert, Nahichevan, Lenkoran.

In 1962 electric power output was 8,335m. kwh. Output of gas, which began in 1928 with 176m. cu. metres, reached 6,605m. in 1962. Pipelines from Karadag to Baku and Sumgait supply gas fuel for all oil-cracking factories and most engineering works.

Synthetic rubber works (Sumgait), tyre works and a worsted combine (Baku) and a large textile combine (Mingechaur) have been built.

The number of industrial and office workers in 1962 (average for year) was 840,000, and specialists with a higher education employed in the national economy numbered 87,700.

**COMMUNICATIONS.** Railway lines, apart from narrow gauge, 1,690 km. The first electrical railway (42 km) in the USSR was constructed in Azerbaijan in 1924; in 1949, 27 km was added, and the line now runs Baku–Surakhany–Sabunchi–Buzovny–Baku. The capital is also linked by rail with Tbilisi, Erevan, Derbent, Julfa and Astara. There were, in 1962, 17,800 km of motor roads (9,600 km hard-surface) and 500 km of inland waterways.

## NAHICHEVAN AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area 5,500 sq. km (2,120 sq. miles), population (est. Jan. 1963) 162,000. Capital, Nahichevan. This territory, on the borders of Turkey and Iran, forms part of the Azerbaijan SSR although separated from it by the territory of Soviet Armenia. Its population, mainly Azerbaijanis, had a chequered history for 1,500 years under the ancient Persians, Arabs, Seljuk Turks, Mongols, Ottoman Turks and modern Persians before being annexed by Russia in 1828. On 9 Feb. 1924 it was constituted as an Autonomous Republic within Azerbaijan. Its Supreme Soviet, elected 15 March 1959, has 66 members (28 women, 40 communists).

The republic has silk, clothing, cotton, canning, meat-packing and other factories. Nearly 70% of the people are engaged in agriculture, of which the main branches are cotton and tobacco growing. Fruit and grapes are also produced in increasing quantity.

In 1963 there were 195 primary, 8-year and 11-year schools with 35,000 pupils. There were 400 pupils in technical colleges.

Doctors numbered 178, and hospital beds 1,080.

## NAGORNO-KARABAGH AUTONOMOUS REGION

Populated by Armenians and Azerbaijanis, a separate khanate in the 18th century, it was established on 7 July 1923 as an autonomous region within Azerbaijan. Area, 4,400 sq. km (1,700 sq. miles); population (est. Jan. 1963), 143,000. Capital, Stepanakert (24,000).

Main industries are silk, wine, dairying and building materials. Crop area is 95,000 hectares; cotton, grapes and winter wheat are grown.

In 1963 there were 212 8-, 10- and 11-year schools and 47 schools for working youth, with a total of 32,400 pupils. There are a medical school, a teachers' training college and 2 agricultural schools with a total of 1,000 students; 197 doctors and 1,125 hospital beds.

## GEORGIA

### SAKARTVELOS SABCHOTA SOTSIALISTURI RESPUBLICA

The independence of the Georgian Social Democratic Republic was declared at Tiflis on 26 May 1918 by the National Council, elected by the National Assembly of Georgia on 22 Nov. 1917. The independence of Georgia was recognized by the Soviet Union on 7 May 1920. On 12 Feb. 1921 a rising broke out in Mingrelia, Abhazia and Adjaria, and Soviet troops invaded the country, which, on 25 Feb. 1921, was proclaimed the Georgian Soviet Socialist Republic. At the first Transcaucasian Soviet Congress, 15 Dec. 1922, Georgia, together with Armenia and Azerbaijan, united to form the Transcaucasian Soviet Federal Socialist Republic, and a federal constitution was adopted and published 16 Jan. 1923. In 1936 the Georgian Soviet Socialist Republic became one of the constituent republics of the USSR and, like other republics of the Union, adopted a new constitution.

The Georgian Soviet Socialist Republic includes the Abhazian ASSR, the Adjarian ASSR and the South Ossetian Autonomous Region.

There is a single Council of National Economy for the whole republic.

The Supreme Soviet, elected in 1963, consists of 400 deputies (1 per 10,000 population); 285 are Communists and 125 women.

At elections to the district, rural and urban Soviets, and that of the

South Ossetian region (19 March 1961), of 41,000 deputies returned 18,400 were women and 18,000 Communists.

*President, Presidium of the Supreme Soviet:* G. S. Dzotsenidze.
*Chairman, Council of Ministers:* G. D. Djavakhishvili.
*First Secretary, Communist Party:* V. P. Mzhavanadze.

**AREA AND POPULATION.** Georgia occupies the whole of the western part of Transcaucasia and covers an area of 69,700 sq. km (26,900 sq. miles). Its population in Jan. 1963 was 4,342,000. The capital is Tbilisi (Tiflis). Other important towns are Kutaisi, Batoumi (91,000), Sukhumi (81,000), Rustavi (72,000), Poti (42,500), Gori (33,100).

Protected from the north by the Caucasian mountains, and receiving in the west the warm, moist winds from the Black Sea, into which most of its rivers flow, Georgia is outstanding for its fine, warm climate and its natural wealth, variety and beauty. It has the highest snow-capped peaks of the Caucasian mountains. Georgia contains valuable sulphur and other medicinal springs. Georgians, an ancient highly-cultured people, form 64% of the population; Armenians, 11%; Russians, 10%; Azerbaidjanis, 4%.

**EDUCATION.** In 1963 there were 804,000 pupils in 4,634 primary and secondary schools, 30,100 in 86 technical colleges and 66,000 students in 18 higher educational institutions. In 1951, 8-year school attendance was made compulsory in all rural areas; in towns, 11 years' education is usual. In Abastuman there is an astro-physical observatory. In 1936 a branch of the Academy of Sciences of the USSR was formed in Tbilisi, and in Feb. 1941 a Georgian Academy of Sciences was opened, which in 1962 had 49 institutions with scientific staff totalling 2,765. There were in all 186 research institutions with 12,146 scientific staffs.

In 1962, 56,700 children were attending 761 kindergartens.

*Newspapers* (1962). Out of 86 newspapers, 66 were in Georgian, with a circulation of 1,129,000 and 889,000 respectively.

**HEALTH.** There were 14,068 doctors and 33,500 hospital beds in 1962. Permanent crèches had 14,700 cots.

**FINANCE** (in 1m. new roubles). Budget estimates, 1961, 719; 1962, 749; 1963, 804; 1964, 837.

**AGRICULTURE.** There are 3 main agricultural areas: (1) The moist sub-tropical area along the Black Sea coast, where are cultivated tea, citrus fruits (lemons, oranges, mandarins, etc.), the tung tree (which yields special industrial oils), eucalyptus, bamboo, high-quality tobacco; (2) Imeretia (the Kutais region), where the chief cultures are grapes and silk, and (3) Kakhetia, along the Alazani (a tributary of the Kura River), famed for its orchards and wines. Land (in hectares) under cultivation was 748,000 in 1913, 896,000 in 1940, 778,000 in 1961, 804,000 in 1962.

Output of main agricultural products (1,000 tons) in 1962 (1913 figures in brackets): Wheat, 157 (158); maize, 373 (184); sugar beet, 132 (0); fruit, 261; grapes, 401; tea in leaf, 171; meat, 92 (49); wool, 4·5 (3·4); milk, 467 (222); silk, 396; 270m. eggs (119m.); wine, 4·2m. decalitres.

In 1962 there were 1,510 collective farms working over 77% of all agricultural land, 159 state farms working nearly 23% of such land. In the Colchis area 115,000 hectares of extremely rich land have been reclaimed. There are 351,000 hectares of irrigated land. Over 100,000 hectares of marshland have been drained. Tractors numbered 17,800; grain combines, 1,700.

Livestock on 1 Jan. 1963: Cattle, 1,471,000; pigs, 547,000; sheep, 2,015,000; goats, 174,000.

In 1961, 214 rural hydro-electric stations were in operation, serving about 61% of the collective farms and 91% of the state farms.

Georgia is rich in forest lands where fine varieties of timber are grown. Area covered by forests, 2·4m. hectares.

**INDUSTRY.** The most important mining industry of Georgia is the exploitation of the manganese deposits, the richest of which lie in the Chiatura region. Manganese deposits in Georgia are calculated at 250m. tons, distributed over an area of 140 sq. km. There are also coal seams, the most important of which are at Tkvarcheli (deposits estimated at 250m. tons) and Tkibuli (deposits of 80m. tons). Other important minerals are baryta, the best in the USSR, fire-resisting and other clays, diatomite shale, oil, agate, marble, cement, alabaster, iron and other ores, building stone, arsenic, molybdenum, tungsten and mercury. In 1941 a goldfield was discovered. Output of coal in 1962 was 2·8m. tons (625,000 in 1940).

Since the Second World War the Transcaucasian Metallurgical Plant has been built at Rustavi (near Tbilisi) and a motor works at Kutaisi. There are modern factories for processing green tea-leaves, creameries and breweries; Georgia has also textile and silk industries.

In 1962, 787,000 tons of pig-iron, 1,246,000 tons of steel, 944,000 tons of rolled metal were produced; also 1,303,000 tons of cement, 343,000 tons of mineral fertilizer, 55m. metres of cotton fabrics, 20·9m. metres of silk fabrics, 10·4m. pairs of leather footwear and 37,000 tons of granulated sugar.

Georgia's fast flowing rivers form an abundant source of energy. The most powerful electric station in Transcaucasia is in Georgia on the river Kura, the Zemo-Avachal hydro-electric station of 36,000 h.p. Power output in 1962 was 3,840m. kwh. (742m. in 1940).

There were 1,044,000 industrial and office workers in 1962, and 117,800 specialists with a higher education in the national economy.

**COMMUNICATIONS.** Length of railways in 1962 was 1,330 km. The trunk line leading from Batum through Tbilisi to Baku on the Caspian Sea has several narrow-gauge branches on Georgian territory to the coalmines of Tkibuli, to the port of Poti, to the manganese mines of Chiaturi, to the mineral springs of Borjom and the health resort Bakuriani, to the towns Signakh and Telavi, in Kakhetia, and to the Armenian frontier, across the coalmine district of Alaverdi. The last branch divides in Armenia, going on the one side to Tabriz in Iran, and on the other to Erzerum in Anatolia. A railway line from Akhal-Senaki along the Black Sea coast, through Sukhum to Tuapse, was completed in 1946. Over two thirds of the lines are electrified. In 1962 there were 18,600 km of motor roads, 13,800 km of them hard-surfaced.

The Tbilisi airport has been reconstructed and is now used for scheduled jet aircraft (TU-104) services.

## ABHAZIAN AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area 8,600 km (3,320 sq. miles), population (est. Jan. 1963) 442,000. Capital, Sukhumi. This area, the ancient Colchis, had a number of Greek city-colonies from the 6th century B.C. onwards. From the 2nd century B.C.

onwards, it was a prey to many invaders—Romans, Byzantines, Arabs, Ottoman Turks—before accepting a Russian protectorate in 1810. However, from the 4th century A.D. a West Georgian kingdom was established by the Lazi princes in the territory (known to the Romans as 'Lazica') and by the 8th century the prevailing language was Georgian and the name Abhazia. On 4 March 1921 a congress of local Soviets proclaimed it a Soviet Republic, and its status as an Autonomous Republic, within Georgia, was confirmed on 17 April 1930.

Of the 112 deputies elected on 15 March 1959, 39 were women and 73 Communists.

The Abhazian coast (along the Black Sea) possesses a famous chain of health resorts—Gagra, Sukhumi, Akhali-Antoni, Gulripsha and Gudanta—sheltered by thickly forested mountains.

The republic has coal, electric power, building materials and light industries. In 1959 there were 215 collective farms and 15 state farms; main crops are tobacco, tea, grapes, citrus fruit, oranges, tangerines and lemons. Livestock, 1 Jan. 1963: 146,000 cattle, 52,900 pigs, 27,300 sheep and goats, and 14,000 horses.

84,000 pupils were attending 460 schools in 1963. There were 7 technical colleges with 1,100 students; 6,500 students were receiving higher education (including correspondence courses).

Doctors numbered 1,100 and hospital beds 2,600; cots in crèches, 2,300.

## ADJARIAN AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area 3,000 sq. km (1,160 sq. miles). Population (est. Jan. 1963), 273,000. Capital, Batumi. After a history similar to that of Abhazia, the Adjars fell under Turkish rule in the 17th century, and were annexed to Russia (rejoining Georgia) after the Berlin Treaty of 1878. On 16 June 1921 the territory was constituted as an Autonomous Republic within the Georgian SSR.

Of the 74 deputies elected on 15 March 1959, 21 were women and 57 Communists.

The republic specializes in subtropical agricultural products. These include tea, mandarines and lemons, grapes, bamboo, eucalyptus, etc. Livestock breeding for meat and milk is expanding. In 1960 there were 166 collective farms and 16 state farms.

There are shipyards at Batumi, modern oil-refining plant (the pipeline from the Baku oilfields ends at Batumi), food-processing and canning factories, clothing, building materials, drug factories, etc.

Health resorts are: Kobuleti, Tsihis-Dari, Batumi on the coast and Beshumi in the hills. The subtropical climate and flora, and the combination of mountains and sea, make this republic (like Abhazia) a favourite holiday country.

In 1963 there were 426 schools with over 53,000 pupils, several technical colleges with 1,800 students, a pedagogical institute and several research institutions. 1,600 students were receiving a higher education.

There were 900 doctors and 2,100 hospital beds in 1960.

## SOUTH OSSETIAN AUTONOMOUS REGION

This area was populated by Ossetians from across the Caucasus (North Ossetia), driven out by the Mongols in the 13th century. The region was set up within the Georgian SSR on 20 April 1922. Area, 3,900 sq. km

(1,505 sq. miles); population (est. Jan. 1963), 101,000. Capital, Tskhinvali (28,000).

Main industries are mining, timber, electrical engineering and building materials. Crop area, chiefly grains, was 28,000 hectares in 1962; other pursuits are sheep-farming and vine-growing.

There are a pedagogical institute (1,090 students) and several technical colleges (430 students). In 1963 there were 20,000 pupils in elementary and secondary schools. Hospital beds in 1960 numbered 875; cots in crèches, 225.

# ARMENIA

## KHAISTAKAN SOVIETAKAN SOTSIALISTIKA RESPUBLIKA

On 29 Nov. 1920 Armenia was proclaimed a Soviet Socialist Republic. The Armenian Soviet Government, with the Russian Soviet Government, was a party to the Treaty of Kars (March 1921), which confirmed the Turkish possession of the former Government of Kars and of the Surmali District of the Government of Erivan. From 1922 to 1936 it formed part of the Transcaucasian Soviet Federal Socialist Republic. In 1936 Armenia was proclaimed a constituent republic of the USSR.

The Supreme Soviet, elected in 1963, consists of 300 deputies (1 per 5,000 population); 204 are Communists and 96 women.

At elections to the district, urban and rural Soviets (19 March 1961), of 18,100 deputies returned 6,700 were women and 9,700 Communists.

*President, Presidium of the Supreme Soviet:* N. H. Arutiunian.
*Chairman, Council of Ministers:* A. E. Kochinyan.
*First Secretary, Communist Party:* Y. N. Zarobyan.

**AREA AND POPULATION.** Armenia covers an area of 29,800 sq. km (11,490 sq. miles). It is bounded in the north by Georgia, in the east by Azerbaijan and in the south and east by Turkey and Iran. It is a very mountainous country with but little forest land, has many turbulent rivers and a highly fertile soil, but subject to drought. In Jan. 1963 the population was 2,007,000. About 88% of the population are Armenians, the rest are Georgians, Russians (3%), Kurds (1·5%), Azerbaijanians (6%), Persians and Jews. The capital is Erevan. Other large towns are Leninakan and Kirovakan.

There is a single Council of National Economy for the whole republic.

**EDUCATION.** In 1963 there were 411,000 pupils in 1,590 primary, secondary and special schools; 42 technical colleges with 20,100 students; 11 higher educational institutions with 25,900 students (including correspondence students). Erevan houses the Armenian Academy of Sciences, 43 scientific institutes, a medical institute and other technical colleges, and a state university. Thirty-six learned institutions with 1,575 scientific staff are under the Academy of Sciences; scientific workers totalled 6,189 in 86 institutions in 1962.

In 1962 there were 551 kindergartens with 41,300 children.

*Newspapers* (1962). Sixty-five out of 73 newspapers appeared in Armenian, with a circulation of 361,000 and 422,000 respectively.

**HEALTH.** In 1962 there were 4,746 doctors and 15,200 hospital beds; 2,200 cots in crèches.

**FINANCE.** Budget estimates (in 1m. new roubles), 1961, 367; 1962, 398; 1963, 471; 1964, 533.

**AGRICULTURE.** The chief agricultural area is the valley of the Arax and the area around Erevan. Here there are considerable cotton plantations as well as orchards and vineries. Sub-tropical plants, such as almonds and figs, are also grown. Olive groves and pomegranate plantations occupy large areas; experiments are being made to naturalize cork oak. In the mountainous areas the chief pursuit is livestock raising. In 1913 the total cultivated area of Armenia amounted to 346,000 hectares; in 1940, 434,000; in 1961, 411,000; in 1962, 433,000.

Output of main agricultural products (1,000 tons) in 1962 (1913 figures in brackets): Wheat, 136 (110); maize, 15 (1); cotton, 28 (14); sugar beet, 130 (0); potatoes, 178 (47); fruit, 46; grapes, 192; meat, 36 (19); milk, 318 (129); wool, 3·8 (2·3); and 174m. eggs (54m.).

Area of irrigated land in Armenia in 1962 was about 229,000 hectares, and the total length of canals and irrigation systems is over 10,000 km.

There were in 1962, 630 collective farms, and these together with the 124 state farms tilled 99·9% of the total cultivated area. Livestock on 1 Jan. 1963 included 109,000 pigs, 597,000 cattle and 2,063,000 sheep. All the state farms and collective farms had been electrified by the end of 1960. There were 9,500 tractors and 1,300 grain and cotton combines in 1962.

**INDUSTRY.** Armenia contains large deposits of copper, zinc, aluminium, molybdenum and other metals. It is also rich in marble, granite, cement and other building materials. The mining of these minerals is becoming more and more important. Among other industries are the chemical, producing chiefly synthetic rubber and fertilizers and the extraction and processing of building materials such as cement, pumice-stone, tuffs, marble, volcanic basalt and fireproof clay, ginning- and textile-mills, carpet weaving, food, including wine-making, fruit, meat-canning and creameries. Machine-tool and electrical engineering works have also been established. Among the industrial centres are Erevan, Leninakan, Alaverdi, Kafan, Kirovakan, Daval, Megri and Oktemberyan. Output of electricity in 1962 was 2,649m. kwh. A chain ('cascade') of 8 hydro-electric stations on the river Razdan, as it falls about 3,300 ft from the mountain lake Sevan to its junction with the Arax has been completed.

In 1962 there were produced 522,000 tons of cement, 208,000 tons of mineral fertilizers, 66·7m. metres of cotton fabrics, 7·3m. metres of silk fabrics, 5·7m. pairs of leather footwear, 27,900 tons of granulated sugar and 4m. decalitres of wine.

There were 498,000 industrial and office workers and 47,000 specialists with a higher education working in the national economy.

**COMMUNICATIONS.** Length of railways in 1962, 550 km; motor roads, 8,000 km (hard surface, 4,500); airlines, 570 km.

# MOLDAVIAN SOVIET SOCIALIST REPUBLIC

## RESPUBLIKA SOVIETIKE SOCHIALISTE MOLDOVENYASKE

The Moldavian Soviet Socialist Republic, capital Kishinev, was formed by the union of part of the former Moldavian Autonomous Soviet Socialist Republic (organized 12 Oct. 1924), formerly included in the Ukrainian Soviet Socialist Republic, and the areas of Bessarabia (ceded by Rumania to the USSR, 28 June 1940) with a mainly Moldavian population. As from 2 Aug. 1940 the MSSR includes the following regions of the former Moldavian Autonomous Soviet Socialist Republic: Grigoriopol, Dubossarsk, Kamensk, Rybnitz, Slobedzeisk and Tiraspol, and the following districts of Bessarabia: Beltsk, Bender, Kagulsk, Kishinev, Orgeev and Sorok. The republic, however, is divided not into regions but into 18 rural districts, 8 cities and 25 urban settlements.

The Supreme Soviet, elected in 1963, consists of 312 deputies (1 per 10,000 population); 200 are Communists and 118 women.

At elections to the district, urban and rural Soviets (5 March 1961), of 27,100 deputies returned, 12,300 were women and 11,355 Communists.

*President, Presidium of the Supreme Soviet:* K. F. I. Pyashenko.
*Chairman, Council of Ministers:* A. F. Diorditsa.
*First Secretary, Communist Party:* I. I. Bodyul.

**AREA AND POPULATION.** The area is 33,700 sq. km (13,000 sq. miles). In Jan. 1963 the population was 3·2m., of whom 65% are Moldavians. Others include Ukrainians (15%), Russians (10%), Jews (3·3%), Bulgarians (2%). Apart from Kishinev, larger towns (with population in 1961) are Tiraspol (75,000), Beltsy (73,000) and Bendery.

There is a single Council of National Economy for the whole republic.

**EDUCATION.** In 1963 there were 656,000 pupils in 2,576 primary, secondary and special schools, 22,000 students in 31 technical colleges and 24,800 students in 6 higher educational institutions including the state university. A Moldavian Academy of Sciences was established in 1961: it has 16 research institutions and a staff of 404. In all, there are 54 learned institutions with 2,734 scientific staff. In 1962 there were 34,800 children attending 433 kindergartens.

*Newspapers* (1962). There were 133 newspapers, of which 75 were in the Moldavian language, with a circulation of 659,000, and 523,000 respectively.

**HEALTH.** Moldavia has 800 medical centres, many district hospitals, a state medical institute and 9 medical schools with over 2,500 students. Doctors in 1962 numbered 15,100: hospital beds 25,200: 8,700 cots in crèches.

**FINANCE.** Budget estimates (in 1m. new roubles), 1961, 329; 1962, 352; 1963, 393; 1964, 435.

**AGRICULTURE.** On 1 Jan. 1963 there were 528 collective farms and 64 state farms. All ploughing and sowing is mechanized. Livestock included (1 Jan. 1963) 806,000 cattle, 1,483,000 pigs and 1,745,000 sheep. There were 27,200 tractors and 3,500 combine harvesters.

Output of main agricultural products (1,000 tons) in 1962 (1913 figures in brackets): Wheat, 541 (526); maize, 1,996 (639); sugar beet, 2,343 (15); sunflower seed, 369 (9); potatoes, 276 (119); vegetables, 401; fruit, 190; grapes, 772; meat, 139 (53); milk, 616 (210); wool, 3·5 (3); 410m. eggs (275m.).

After the cession of Bessarabia to the USSR, the landless Bessarabian peasants and those with very little land were granted over 250,000 hectares (about 625,000 acres) of land, mainly the former property of the big landed estate owners.

Bessarabia has an equable climate and very fertile soil. It contains nearly one-third of the vineyards of the USSR. Bessarabia is also rich in fish in the south: sturgeon, mackerel, brill.

**INDUSTRY.** There are canning plants, wine-making plants, woodworking and metallurgical factories, a factory of ferro-concrete building materials, and footwear and textile plants. Moldavia takes second place in the USSR in the production of wine and tobacco, third in food-canning. Power output in 1962 was 851m. kwh. Production in 1962 included 6·9m. metres of silk fabrics, 6·2m. pairs of leather footwear, 275,000 tons of granulated sugar, 471m. tins of preserves and 18·1m. decalitres of wine. Meat and dairy produce are rapidly expanding food industries.

There are lignite, phosphorites, gypsum and valuable building materials.

In 1962 there were 533,000 industrial and office workers and 39,300 specialists with a higher education working in the national economy.

**COMMUNICATIONS.** Length of railways, 1,000 km. There is direct air communication with Leningrad, Moscow, Kiev, Lvov and across the Black Sea. There are 13,200 km of motor roads (4,200 hard surface), and 700 km of inland waterways.

# ESTONIA

## EESTI NÕUKOGUDE SOTSIALISTLIK VABARIIK

The workers' and soldiers' Soviets in Estonia took over power on 8 Nov. 1917, were overthrown by the German occupying forces in March 1918, and were restored to power as the Germans withdrew in Nov. 1918, establishing the 'Estland Labour Commune'. It was overthrown with the assistance of British naval forces in May 1919, and a democratic republic proclaimed.

The secret protocol of the Soviet–German agreement of 23 Aug. 1939 assigned Estonia to the Soviet sphere of interest. An ultimatum (16 June 1940) led to the formation of a government acceptable to the USSR, which applied for Estonia's admission to the Soviet Union; this was effected by decree of the Supreme Soviet on 6 Aug. The incorporation has been accorded *de facto* recognition by the British Government, but not by the US Government, which continues to recognize an Estonian consul-general in New York.

The Supreme Soviet, elected in 1963, consists of 178 deputies (1 per 10,000 population); 115 are Communists and 61 women.

At elections to district, urban and rural Soviets (19 March 1961), out of 11,700 deputies returned, 4,900 were women and 4,500 Communists.

*President, Presidium of the Supreme Soviet:* A. A. Müürisepp.
*Chairman, Council of Ministers:* V. I. Klauson.
*First Secretary, Communist Party:* I. G. Kebin.

**AREA AND POPULATION.** Area, 45,100 sq. km (17,410 sq. miles); population, 1,244.000 (Jan. 1963). 74·6% are Estonians, 20·1% Russians, 1·4% Finns. The capital is Tallinn. Other large towns (with population in 1962) are Tartu (77,000), Parnu (36,300), Narva (21,300). In the shale mining and refining districts some new towns have been built, including Kohtla-Järve (60,000), Jõhvi, Ahtme and Sompa. There is a single Council of National Economy for the whole Republic.

The Estonian Lutheran Church had 350,000 members in 1956.

**EDUCATION.** In 1963 pupils in 1,267 primary, secondary and special schools numbered 203,000. There were 16,600 students in 6 higher educational establishments, including Tartu (Dorpat) University, founded in 1632, and 21,300 students in 34 technical colleges.

The Estonian Academy of Sciences, founded in 1946, has 19 institutions with 638 scientific staff; in all, 2,901 scientists are working in 79 institutions.

In 1962 there were 22,300 children attending 313 kindergartens.

*Newspapers* (1962). There were 43 newspapers, 32 of them in Estonian, with a circulation of 654,000 and 569,000 respectively.

**HEALTH.** In 1962 there were 3,100 doctors and 13,300 hospital beds; 5,000 cots in crèches.

**FINANCE.** Budget estimates (in 1m. new roubles), 1961, 321; 1962, 341; 1963, 351; 1964, 374.

**PRODUCTION.** Agriculture and dairy farming are the chief occupations. Area under cultivation was 697,000 hectares in 1913, 918,000 hectares in 1940 and 789,000 hectares in 1962. There were 584 agricultural and 45 fishery collectives and 145 state farms in 1962, using 13,800 tractors and 2,200 grain combines. 97% of state farms and 70% of collective farms were receiving electric power.

On 1 Jan. 1963 there were 532,000 head of cattle, 244,000 sheep, 570,000 pigs and 2·7m. poultry.

Output of main agricultural products (1,000 tons) in 1962 (1913 figures in brackets): Potatoes, 877 (689); grains, 366 (428); vegetables, 73; meat (slaughter weight), 99 (60); milk, 807 (415); wool, 0·6 (0·7); 233m. eggs (67m.).

Some 22% of the territory is covered by forests which provide good material for its sawmills, furniture, match and pulp industries, as well as wood fuel. Since the end of the war, 80,000 hectares have been newly afforested. 11,500 hectares of marsh land were reclaimed in 1961.

Estonia has rich high-quality shale deposits (particularly in the north-east) which are estimated at 3,700m. tons. Shale output was 1·9m. tons in 1940 and 11·3m. in 1962. Gas output (from shale and coal) increased in the same years from 1·7m. cu. metres to 469m. A factory for the production of gas from shale and a pipeline (208 km long) from Kokhtla-Järve supplies shale gas to Leningrad and Tallinn. Estonian factories are now turning out agricultural and peat-digging machines, complex control and measuring instruments. The 'Volta' factory in Tallinn produces electric motors.

In the neighbourhood of Tallinn, phosphorites have been found, and in 1947 a plant for refining and for the production of superphosphates was started. Estonia also contains valuable peat deposits, and some of her electrical stations work on peat. A hydro-electric station was erected in 1955 on the Narva. There are 350 rural electric stations. Output of mineral fertilizers in 1962 was 539,000 tons; cement, 484,000 tons; paper, 98,900 tons; peat, 467,000 tons; electric power, 4,230m. kwh.; cotton fabrics, 124m. metres; linen fabrics, 8·5m. metres; leather footwear, 4·9m. pairs; bricks, 289m.; sawn timber, 770,000 cu. metres.

In 1962 there were 491,000 industrial and office workers and 27,700 specialists with a higher education engaged in the national economy.

**COMMUNICATIONS.** Length of main railways 1,410 km, of secondary lines 693 km. Estonia has 20 ports, but Tallinn handles four-fifths of the total sea-going transport. Inland waterways total 600 km; motor roads 20,900 km (hard surface, 12,400 km). Airlines link Tallinn with Moscow, Leningrad, Riga and the Estonian islands.

# LATVIA

### LATVIJAS PADOMJU SOCIALISTISKA REPUBLIKA

In the part of Latvia unoccupied by the Germans, the Bolsheviks won 72% of the votes in the Constituent Assembly elections (Nov. 1917). Soviet power was proclaimed in Dec. 1917, but was overthrown when the Germans occupied all Latvia (Feb. 1918). Restored when they withdrew (Dec. 1918), it was overthrown once more by combined British naval and German military forces (May–Dec. 1919), and a democratic government set up.

The secret protocol of the Soviet–German agreement of 23 Aug. 1939 assigned Latvia to the Soviet sphere of interest. An ultimatum (16 June 1940) led to the formation of a government acceptable to the USSR, which applied for Latvia's admission to the Soviet Union on 22 July; this was effected by decree of the Supreme Soviet on 5 Aug. The incorporation has been accorded *de facto* recognition by the British Government, but not by the US Government, which continues to recognize the Latvian Minister, Dr Arnolds Spekke, in Washington, D.C.

The Supreme Soviet, elected in 1963, consists of 310 deputies (1 per 10,000 population); 197 are Communists and 102 women.

At elections to district, urban and rural Soviets (19 March 1961), of 21,000 deputies returned, 8,820 were women and 8,736 Communists.

*President, Presidium of the Supreme Soviet:* Y. E. Kalnberzin.
*Chairman, Council of Ministers:* V. P. Ruben.
*First Secretary, Communist Party:* A. Y. Pelshe.

**AREA AND POPULATION.** Latvia has a total area of 63,700 sq. km (25,590 sq. miles). Population, Jan. 1963, 2·19m., of whom 62% are Letts and 27% Russians. There is a single Council of National Economy for the whole republic.

The chief town is Riga (the capital); other principal towns: Leipāja (Libau), 77,000; Daugavpils (Dvinsk), 74,000; Jelgava (Mitau), and Ventspils (Windau).

The Latvian Lutheran Church numbered 600,000 members in 1956.

**EDUCATION.** In 1963 there were 1,550 primary, continuation and secondary schools, with a total of 324,000 pupils; 28,600 children attended 380 kindergartens. Ten places of higher education had 27,400 students, 54 technical colleges had 30,500 students; there were also 21 music and arts schools, 3 teachers' training colleges and an agricultural academy. In 1946 an Academy of Sciences was opened which in 1962 had 22 research institutes and a staff of 1,136 scientific workers; there were 5,000 scientific workers in 108 research institutions.

*Newspapers* (1962). There were 70 newspapers (46 in Lettish), with a circulation of 896,000 (667,000).

**HEALTH.** There were 6,061 doctors, 24,600 hospital beds and 6,200 cots in crèches in 1962.

**FINANCE.** Budget estimates (in 1m. new roubles), 1961, 476; 1962, 497; 1963, 525; 1964, 553.

**AGRICULTURE.** Latvia is now no longer mainly an agricultural country. The urban population, 35% of the total in 1939, was 60% in Jan. 1963.

Latvian forest lands, state and private (1,727,000 hectares), produced in 1937–38, 3,439.256 cu. metres of timber; 1962 output, 4·4m. cu. metres.

Area under cultivation was 1·4m. hectares in 1913, 2m. in 1940, 1·6m. in 1962. 500,000 hectares of marshland have been drained.

Cattle breeding and dairy farming are the chief agricultural occupations. Oats, barley, rye, potatoes and flax are the main crops. Butter and timber were the chief exports before the war.

After the establishment of the Soviet regime, about 960,000 hectares were distributed among the landless peasants or those with very small holdings. In 1962 there were 161 state farms. In 1952 about 98% of peasant farms had combined to form 1,500 collective farms (reduced by amalgamation to 976 by 1962), many of which had ancillaries for breeding sheep, pigs and poultry. By the end of 1956, about 75% of agricultural work had been mechanized. In 1962 there were 22,000 tractors and 2,400 grain combine harvesters. By 1 Jan. 1960, 138 state farms and 762 collective farms were using electric power.

Livestock (1 Jan. 1963): Cattle, 994,000 (1939: 1·3m.); sheep, 429,000 (1939: 1·5m.); pigs, 830,000 (1939: 891,500).

Output of main agricultural products (1,000 tons) in 1962 (1913 figures in brackets): Sugar beet, 351 (0); potatotes, 979 (645); all grains, 407 (880); vegetables, 123; fruit, 26; meat and fats, 158 (122); milk, 1,400 (673); wool, 1·1 (1·4); 372m. eggs (136m.).

**INDUSTRY.** Latvia is the main producer of electric railway passenger cars and long-distance telephone exchanges in the USSR, fourth in output of paper and woollen goods, fifth of sawn timber, sixth of mineral fertilizers.

Industrial output in 1962 included 122,000 tons of steel, 210,000 tons of rolled metal, 528,000 tons of cement, 323,000 tons of mineral fertilizers, 50·2m. metres of cotton fabrics, 11·3m. metres of linen fabrics, 8·6m. pairs of leather footwear; 177,000 tons of granulated sugar; woollens, 9·4m. metres; silks, 10·5m. metres; fish catch, 172,000 tons (1940: 12,400 tons).

Electric power output in 1962 was 1,586m. kwh.; radio sets, 712,000; paper, 82,700 tons.

The peat deposits extend over 645,000 hectares or about 10% of the total area, and it is estimated that the total deposits of peat are 3,000–4,000m. tons; output, 1960, 1·8m. tons. There are also gypsum deposits; amber is frequently found in the coastal districts.

In 1962 industrial and office workers numbered 810,000; 48,000 specialists with a higher education were employed in the national economy.

**COMMUNICATIONS.** In 1962 the length of railways was 2,940 km, and motor roads, 25,300 km (hard surface, 5,900 km). In 1959 there were 351 bus lines, covering 23,000 km. Riga is the largest port in the Baltic after Leningrad. Leipāja has been converted into a naval base; commercial shipping is excluded from the port.

# LITHUANIA

## Lietuvas Taryu Socialistine Respublika

In 1914–15 the German army occupied the whole of Lithuania. On its withdrawal (Dec. 1918) Soviets were elected in all towns and a Soviet republic was proclaimed. In the summer of 1919 it was overthrown by Polish, German and nationalist Lithuanian forces, and a democratic republic established.

The secret protocol of the Soviet–German frontier treaty of 28 Sept. 1939 assigned the greater part of Lithuania to the Soviet sphere of influence. In Oct. 1939 the province and city of Vilnius (in Polish occupation 1920–39) were ceded by the USSR. An ultimatum (16 June 1940) led to the formation of a government acceptable to the USSR. A 'people's diet', elected on 14–15 July, applied for Lithuania's admission to the Soviet Union on 22 July, which was effected by decree of the Supreme Soviet on 3 Aug. and included also those parts of Lithuania which had been reserved for inclusion in Germany. This incorporation has been accorded *de facto* recognition by the British Government, but not by the US Government, which continues to recognize a Lithuanian *Chargé d'Affaires* in Washington, D.C.

The Supreme Soviet, elected in 1963, consists of 290 deputies (1 per 15,000 population); 189 are Communists and 96 women.

At elections to district, urban and rural Soviets (5 March 1961), of 32,800 deputies returned, 12,260 were women and 12,060 Communists.

*President, Presidium of the Supreme Soviet:* Y. I. Paletskis.
*Chairman, Council of Ministers:* M. Y. Shumauskas.
*First Secretary, Communist Party:* A. Y. Snechkus.

**AREA AND POPULATION.** The total area of Lithuania is 65,200 sq. km (25,170 sq. miles) and the population (Jan. 1963) 2·88m., of whom 79% were Lithuanians, 8·5% Russians and 8·5% Poles. The capital is Vilnius (Vilna). Other large towns are Káunas (Kovno), Klaipéda (Memel), Šauliai (68,000) and Panevėžys (37,000). There is a single Council of National Economy for the whole republic.

In 1956, the Lithuanian Lutheran Church had 215,000 members; Roman Catholics, including those in Estonia and Latvia, numbered 2·5m.

**EDUCATION.** In 1963 there were 509,000 pupils in 5,007 primary, secondary and special schools; there were also 41 technical, 9 teachers' training and 3 commercial schools, and 2 pedagogical, 2 music and 2 art institutes. The University of Vytautas the Great, at Káunas, was opened on 16 Feb. 1922. On 15 Jan. 1940 certain faculties were transferred to Vilnius as an independent institution to form the University of Vilnius. In 1963 there were 11 higher educational institutions with 33,300 students: in 75 technical colleges of all kinds there were 43,600 students. The Lithuanian Academy of Sciences, founded in 1941, had 15 institutions with a total scientific staff of 601; there were 81 scientific institutions with 5,017 research personnel. 24,300 children in 1962 were attending 376 kindergartens.

*Newspapers* (1962). Of 70 newspapers, 54 were in Lithuanian, with a circulation of 1,078,000 and 956,000 respectively.

**HEALTH.** In 1962 there were 5,400 doctors, 23,700 hospital beds, and 5,300 cots in crèches.

**FINANCE.** Budget estimates (in 1m. new roubles), 1961, 546; 1962, 580; 1963, 630; 1964, 693.

**AGRICULTURE.** Lithuania before 1940 was a mainly agricultural country, but has since been considerably industrialized. The urban population was 23% of the total in 1937 and 42% in Jan. 1963. The resources of the country consist of timber and agricultural produce. Of the total area, 49·1% is arable land, 22·2% meadow and pasture land, 16·3% forests and 12·4% unproductive lands.

Area under cultivation in 1913 was 1·9m.; in 1938, 2·7m.; in 1962, 2·5m. hectares. By 1962 over 700,000 hectares of swamps had been drained.

Output of main agricultural products (1,000 tons) in 1962 (1913 figures in brackets): All grains, 723 (1,449); sugar beet, 420 (0); flax, 15 (17); potatoes, 1,663 (1,375); vegetables, 230; fruit, 37; meat and fats, 225 (159); milk, 1,780 (832); wool, 1 (1·5); 444m. eggs (264m.).

On 1 Jan. 1963 there were 1,328,000 cattle, 1,489,000 pigs, 312,000 sheep.

Forests cover 1,554,000 hectares; 70% of the forests consist of conifers, mostly pines. Peat reserves total 4,000m. cu. metres.

Between 1940 and 1947, about 575,500 hectares (about 1·4m. acres) were distributed among the landless and poor peasant farmers. In 1962 there were 39,300 tractors and 1,600 grain combines serving 1,829 collective farms and 231 state farms. 1,058 collective farms and 223 state farms received electric power in 1962.

**INDUSTRY.** Heavy engineering, shipbuilding and building material industries are developing. Industrial output included, in 1962, 728,000 tons of cement, 18·9m. metres of cotton fabrics, 8·3m. pairs of leather footwear, 142,500 tons of granulated sugar, 14m. metres of linens, 7·5m. metres of woollens, 579m. bricks and 275,000 bicycles. Output of electric power was 1,396m. kwh. and peat 2,082,000 tons. 929,000 cu. metres of sawn timber and 51,800 tons of paper were produced.

In 1962 there were 773,000 industrial and office workers and 44,000 specialists with a higher education employed in the national economy.

**COMMUNICATIONS.** Length of railways, 2,000 km. Vilnius has one of the largest airports of the USSR. There are 33,100 km of motor roads (10,500 km hard surface and 600 km of inland waterways).

# SOVIET CENTRAL ASIA

Soviet Central Asia embraces the Kazakh Soviet Socialist Republic, the Uzbek Soviet Socialist Republic, the Turkmen Soviet Socialist Republic, the Tadzhik Soviet Socialist Republic and the Kirghiz Soviet Socialist Republic.

Turkestan (by which name part of this territory was then known) was conquered by the Russians in the 1860s. In 1866 Tashkent was occupied and in 1868 Samarkand, and subsequently further territory was conquered and united with Russian Turkestan. In the 1870s Bokhara was subjugated, the emir, by the agreement of 1873, recognizing the suzerainty of Russia. In the same year Khiva became a vassal state to Russia. Until 1917 Russian Central Asia was divided politically into the Khanate of Khiva, the Emirate of Bokhara and the Governor-Generalship of Turkestan.

In the summer of 1919 the authority of the Soviet Government became definitely established in these regions. The Khan of Khiva was deposed in Feb. 1920, and a People's Soviet Republic was set up, the medieval name of Khorezm being revived. In Aug. 1920 the Emir of Bokhara suffered the same fate, and a similar regime was set up in Bokhara. The former Governor-Generalship of Turkestan was constituted an Autonomous Soviet Socialist Republic within the RSFSR on 11 April 1921.

In the autumn of 1924 the Soviets of the Turkestan, Bokhara and Khiva Republics decided to redistribute the territories of these republics on a nationality basis; at the same time Bokhara and Khiva became Socialist Republics. The redistribution was completed in May 1925, when the new states of Uzbekistan, Turkmenistan and Tadzhikistan and several autonomous regions were established. The remaining districts of Turkestan populated by Kazakhs were united with Kazakhstan.

# KAZAKHSTAN

## KAZAK SOVIETTIK SOTZIALISTIK RESPUBLIKASY

On 26 Aug. 1920 Uralsk, Turgai, Akmolinsk and Semipalatinsk provinces formed the Kazakh Soviet Socialist Republic within the RSFSR. It was made a constituent republic of the USSR on 5 Dec. 1936. To this republic were added the parts of the former Governorship of Turkestan inhabited by a majority of Kazakhs. It consists of the following regions: Aktyubinsk, Alma-Ata, Chimkent, Dzhambul, East Kazakhstan, Guryev, Karaganda, Kokchetav, Kustanai, Kzyl-Orda, North Kazakhstan, Pavlodar, Semipalatinsk, Tselinograd, Uralsk. The capital is Alma-Ata, formerly Verny.

On 26 Dec. 1960 the Kokchetav, Kustanai, North Kazakhstan and Pavlodar regions, together with the territory of the former Akmolinsk region, were united to constitute the Virgin Land (Tselinny) Territory, with its administrative centre at Akmolinsk (renamed Tselinograd in March 1961, and a new region, Tselinograd, was formed. The Aktyubinsk, Guryev and Uralsk regions were constituted in May 1962 as the West-Kazakhstan Territory; and the Dzhambul, Kzyl-Orda and Chimkent regions as the South-Kazakhstan Territory.

Kazakhstan is bounded on the west by the Caspian Sea and the RSFSR, on the east by China, on the north by the RSFSR and on the south by Uzbekistan and Kirghizia.

The Supreme Soviet, elected in 1963, consists of 473 deputies (1 per 20,000 population); 313 were Communists and 158 women.

At elections to the regional, district, urban and rural Soviets (5 March 1961), out of 84,000 deputies returned, 28,200 were women and 41,500 Communists.

*President, Presidium of the Supreme Soviet:* Isagali Sharipov.
*Chairman, Council of Ministers:* D. A. Kunayev.
*First Secretary, Communist Party:* Ismail Yusupov.

**AREA AND POPULATION.** The area of the republic is 2,715,200 sq. km (1,048,070 sq. miles). It is the next in size to the RSFSR, is far larger than all the other Central Asian Soviet Republics combined and stretches nearly 3,000 km from west to east and over 1,500 km from north to south. Population (Jan. 1963) 11·3m., of whom 45% live in urban areas. The Kazakhs form nearly 30%, and Russians and Ukrainians together about 51% (owing to the industrialization of the country since 1941 and the opening of virgin lands since 1945). The population includes over 100 nationalities.

The capital is Alma-Ata; other large towns are Karaganda, Semipalatinsk, Chimkent and Petropavlovsk. In all there are 55 towns, 142 urban settlements and 120 rural districts.

Since Dec. 1962 there are 3 Councils of National Economy in the republic.

**EDUCATION.** Nearly the whole population is literate. In 1963 there were 2,248,000 pupils at 10,504 elementary and secondary schools; 144

technical colleges with 112,500 students, 32 higher educational institutions with 98,000 students, and 134 research institutes with 13,996 scientific personnel. The Kazakh Academy of Sciences, founded in 1945, had, in 1962, 37 institutions, the scientific staff of which numbered 1,993. 185,100 children were attending 2,832 kindergartens.

*Newspapers* (1962). Of 218 newspapers, 71 were in the Kazakh language, with a circulation of 2,545,000 and 835,000 respectively.

**HEALTH.** In 1962 there were 15,363 doctors and 96,400 hospital beds; cots in crèches, 59,000.

**FINANCE** (in 1m. new roubles). The budget balanced as follows: 1961, 3,096; 1962, 3,379; 1963, 3,566; 1964, 3,913.

**AGRICULTURE.** Kazakh agriculture has changed from primarily nomad cattle breeding to production of grain, cotton and other industrial crops. In 1962 the crop area was 31·1m. hectares—over 14% of the total cultivated area of the USSR (1913, 4·2m.; 1940, 6·8m.).

Nearly 2m. hectares of land have an irrigation network.

The 'Ukrainka' winter wheat has been transformed into a spring wheat suitable for cultivation in Kazakhstan. Tobacco, rubber plants and mustard are also cultivated. Kazakhstan has rich orchards and vineyards; 13,000 hectares were under vines and 54,000 under orchards in 1962. Between 1954 and 1959, over 23m. hectares of virgin and long fallow land were opened up, 544 new state grain farms being organized for the purpose. Grain deliveries to the state were 10·5m. tons in 1960, 7·5m. in 1961, 8·2m. in 1962.

Kazakhstan is noted for its livestock, particularly its sheep from which excellent quality wool is obtained. The Akharomerino is a newly developed crossbreed of merino sheep and the wild Akhar mountain ram. Livestock on 1 Jan. 1963 included 6,108,000 cattle, 29·5m. sheep, 484,000 goats and 2,267,000 pigs.

There were, in 1962, 708 collective farms and 1,221 state farms with 400,000 tractors and 108,000 grain combine harvesters. There were 5,293 rural power stations of 307,800 kwh. capacity.

Output of main agricultural products (1m. tons) in 1962 (1913 figures in brackets): Wheat, 12·5 (1·3); other grains, 3·5 (0·9); cotton, 0·55 (0·015); sugar beet, 1·7 (0; potatoes, 0·8 (0·18); vegetables, 0·5; meat, 0·65 (0·44); milk, 2·69 (0·857); 978m. eggs (233m.).

**INDUSTRY.** Kazakhstan is extremely rich in mineral resources. Coal and tungsten in Karaganda (in the centre), oil along the river Emba (in the west), copper, lead and zinc—Kazakhstan contains about one-half of the total deposits of these three metals contained in the USSR—Iceland spar (in the south), nickel and chromium in the Kustanai and Semipalatinsk regions, molybdenum and other minerals. In 1943 big deposits of manganese were found in Eastern Kazakhstan; new coal seams were also discovered here. In South Kazakhstan new copper and bauxite deposits have been found.

Coal, oil, non-ferrous metallurgy, heavy engineering and chemical industries have brought Kazakhstan to the third place among the industrial republics of the USSR.

Coal output in 1962 was 37·1m. tons; oil output, 1·6m. tons; steel, 392,000 tons; rolled metal, 342,000 tons; cement, 3,223,000 tons; mineral fertilizers, 524,000 tons; cotton fabrics, 20·7m. metres; leather footwear, 13·7m. pairs; woollen fabrics, 4·6m. metres; granulated sugar, 178,900 tons. The Leninogorsk and Chimkent lead plants, the Balkhash, Irtysh and Karaskpai copper-smelting works and others supply the country with non-ferrous metals. A meat-packing plant has been built in Semipalatinsk, a fish cannery in Guryev, a chemical plant in Aktyubinsk and a superphosphate plant in Dzhambul. About 100 new industrial plants began operating in 1962, including a new open-hearth furnace at the Kazakh metallurgical works, a coking battery at Karaganda metallurgical works, a new coalmine, prefabricated-house factories at Petropavlovsk and Dzhambul. The oil industry in Emba and Aktyubinsk yields high-quality aviation oil. Iron ores began to be extracted in 1953: the output in 1962 was 10·4m. tons.

Aviation plays an important part in agriculture. About 1m. hectares have in recent years been treated from the air (destruction of pests, surface feeding of sugar-beet plantations, pollination of orchards, etc.).

Among recent enterprises are a champagne combine in Alma-Ata, a canning works for tinned milk in Pavlodar, meat-packing plants in Tselinograd, Aktiubinsk and Pavlodar, a tea-packing factory in Alma-Ata. A cement works (annual capacity, 1·8m. tons) was opened in 1961 at Chimkent. Wind-driven power stations are also coming into use; 6 were operating in 1953. Electric power output in 1962 was 13,400m. kwh.

There were, in 1962, 3,502,000 (average for year) industrial and office workers in the national economy and 153,000 specialists with a higher education.

**COMMUNICATIONS.** *Railways.* A 430-km railway line between the settlements of Mointi and Chu in Kazakhstan to complete the Transkazakh Trunk Line, connecting Petropavlovsk, Akmolinsk, Karaganda and Balkhash, was opened in 1953. The new line links the Transkazakh trunk line with the Turkestan–Siberian railway carrying Karaganda coal to South Kazakhstan. The Akmolinsk–Pavlodar railway (438 km), a section of the South-Siberian line, was opened in Dec. 1953. Other lines in operation are Dzhambul–Chalaktan, Akmolinsk–Kartaly, Uralsk–Iletsk, Guriev–Kandagach. In 1962 the total length of railways in operation was 11,810 km. Over 600 km of narrow-gauge line and 700 km. of broad-gauge line were built in the virgin lands area in 1951–57.

*Roads.* In 1962 there were 107,400 km of motor roads (16,500 km hard surface).

*Inland Waterways.* 6,500 km. A 500-km canal to bring water from the Irtysh at Yermak, below Pavlodar, along the Shiderta, Tuzda and Nura rivers to the new industrial centre of Karaganda was begun in 1960. It is to irrigate in all 60,000 hectares and provide water for a number of new industrial towns.

# TURKMENISTAN

## Tjurkmenostan Soviet Sotsialistik Respublikasy

The Turkmen Soviet Socialist Republic was formed on 27 Oct. 1924 and covers the territory of the former Trans-Caspian Region of Turkestan, the Charjiui vilayet of Bokhara and a part of Khiva situated on the right bank of the Oxus. In May 1925 the Turkmen Republic entered the Soviet Union as one of its constituent republics. It is bounded on the north by the Autonomous Kara-Kalpak Republic, a constituent of Uzbekistan, by Iran and Afghánistán on the south, by the Uzbek Republic on the east and the Caspian Sea on the west.

The Supreme Soviet, elected in 1963, consists of 282 deputies (1 per 5,000 population); 190 are Communists and 99 women.

At elections to regional, district, urban and rural Soviets (5 March 1961), of 14,500 deputies returned, 5,600 were women and 6,900 Communists.

*President, Presidium of the Supreme Soviet:* A. Klychev.
*Chairman, Council of Ministers:* M. N. Gafurov.
*First Secretary, Communist Party:* B. O. Ovezov.

**AREA AND POPULATION.** The principal Turkmen tribes are the Tekkés of Merv, and the Tekkés of the Attok, the Ersaris, Yomuds and Goklans. All speak closely related varieties of a Turkoman language (of the south-western group of Turk languages); many are Sunni Mohammedans. The country passed under Russian control in 1881, after the fall of the Turkoman stronghold of Gök-Tépé. Over 60% of the population are Turkmenians, most of whom were nomads before the First World War. Over 17% are Russians living mostly in urban areas, and 8·3% Uzbeks. There are also Kazakhs, Tatars, Ukrainians, Armenians and others.

The area of Turkmenistan is 488,100 sq. km (188,400 sq. miles), and its population in Jan. 1963 was 1,743,000.

The country comprises 21 rural districts, 13 towns and 65 urban settlements; Maruy, Chardzhou and Tashauz regions were abolished on 10 Jan. 1963.

The capital is Ashkhabad (Poltoratsk); other large towns are Chardzhou (75,000), Maruy (Merv, 54,000), Krasnovodsk and Nebit-Dag.

The industry of this republic, together with that of Uzbekistan, Kirgizia and Tadjikistan, is now administered by a Central Asian Council of National Economy (Dec. 1962).

**EDUCATION.** In 1963 the public educational system comprised 1,535 primary and secondary schools with 339,000 pupils. There were 4 higher educational institutions, 23 technical schools and 11 music and art schools; students in higher education numbered 14,800, and those in the technical colleges, 15,100. The Turkmen Academy of Sciences direct the work of 25 learned institutions with a staff of 696 scientists; there were 52 research institutions in all, with 2,313 research workers, in 1962. A Turkmenian State University was opened in 1951; in 1961 it had 4,180 students.

In 1962, 43,900 children were attending 673 kindergartens.

*Newspapers* (1962). Of 39 newspapers, 23 were in the Turkmen language, with a circulation of 382,000 and 281,000 respectively.

**HEALTH.** In 1962 there were 3,300 doctors, 15,000 hospital beds and 12,200 cots in crèches.

**FINANCE.** Budget estimates (in 1m. new roubles), 1961, 363; 1962, 379; 1963, 416; 1964, 422.

**AGRICULTURE.** The main occupation of the people is agriculture, based on irrigation. Turkmenistan produces cotton, wool, Astrakhan fur, etc. It is also famous for its carpets, and produces a special breed of Turkoman horses and the famous Karakul sheep.

There were 335 collective farms and 49 state farms in 1962, with 15,800 tractors and 400 grain combines. There were 493 rural power stations.

A considerable area is under Egyptian cotton, and from it has been evolved an original Soviet long-fibred cotton.

The main grain grown is maize. Sericulture, fruit and vegetable growing are also important; dates, olives, figs, sesame and other southern plants are grown. There is fishing in the Caspian. 460,000 hectares were under cultivation in 1962 (1913, 318,000; 1940, 411,000). Wine production in 1962 was 70,400 hectolitres.

In 1940 the building of a number of hydro-technical constructions was started to supply water to the Kara-Kum Desert, which covers about 350,000 sq. km of Turkmenistan, the waters from the Amu-Darya River being utilized. The Kara-Kum canal, from the Tedjen oases to the Amu-Darya, was completed in 1954–60. It was extended to Ashkhabad (340 km) in 1961–62. 'Helioboilers' are used to distil the brackish subsoil water. Geological researches have revealed extensive zones of subterranean waters in the Kara-Kum Desert, and wells and water reservoirs have been and are being constructed. Over 780,000 hectares of land have an irrigation network.

Livestock on 1 Jan. 1963: Cattle, 373,000; pigs, 64,000; sheep, 4m.; goats, 223,000.

Output of main agricultural products (1,000 tons) in 1962 (1913 figures in brackets): Maize, 24 (1); wheat, 20 (113); cotton, 378 (69); vegetables, 91; grapes, 36; fruit, 13; meat, 51 (58); milk, 129 (63); wool, 14·3 (9·7); 55m. eggs (18m.).

**INDUSTRY.** Turkmenistan is rich in minerals, such as ozocerite, oil, coal, sulphur and salt. The republic is being industrialized, and there are now chemical, tailoring, textile, light, food, agricultural implements, cement and other factories, oil refineries, as well as ore-mining.

In the Kara-Kum Desert deposits of magnesium, minerals and coal were discovered, as well as some 50 new saltmines. Here a new oil town, Nebit-Dag, has sprung up. On the Kara–Bogaz gulf a sulphate industry has been developed. Industrial output in 1962 included 6·9m. tons of oil, 249,000 tons of cement, 22·5m. metres of cotton fabrics, 1·6m. pairs of leather footwear. Electric power output was 1,023m. kwh. (in 1940: 83·5m.). 254m. cu. metres of gas and 248m. bricks were produced.

In 1957 there were over 600 modern industrial enterprises, 180 of them built since the war. In 1962 there were 342,000 industrial and office workers in the national economy; specialists with a higher education numbered 26,000.

**COMMUNICATIONS.** Length of motor roads, 7,200 km (2,000 km hard surface). Motor communication exists between Ashkhabad and Meshed (Iran).

Length of railways, 2,100 km. The line Chardzhou–Kungrad crosses the Chardzhou and Tashauz regions of Turkmenia and runs across Uzbekistan. Another line connects Chardzhou and Urgench. Inland waterways, 1,000 km.

Airlines connect Leninsk and Tashauz, and Ashkhabad and remote areas in the west, north and east.

# UZBEKISTAN

### Ozbekiston Soviet Sotsialistik Respublikasy

In Oct. 1917 the Tashkent Soviet assumed authority, and in the following years established its power throughout Turkestan. The semi-independent Khanates of Khiva and Bokhara were first (1920) transformed into 'People's Republics', then (1923–24) into Soviet Socialist Republics and finally merged in the Uzbek SSR and other republics.

The Uzbek Soviet Socialist Republic was formed on 5 Dec. 1924 from lands formerly included in Turkestan. It includes a large part of the Samarkand region, the southern part of the Syr Darya, Western Ferghana, the western plains of Bukhara, the Kara-Kalpak ASSR and the Uzbek regions of Khorezm. In May 1925 Uzbekistan, by the decision of the Congress of Soviets of the USSR, was accepted as one of the constituent republics in the Soviet Union.

Uzbekistan is bordered on the north by the Kazakh Soviet Socialist Republic, on the east by the Kirghiz Soviet Socialist Republic and the Tadzhik Soviet Socialist Republic, on the south by Afghánistán and on the west by the Turkmen Soviet Socialist Republic.

The Supreme Soviet, elected in 1963, consists of 458 deputies (1 per 15,000 population): 329 are Communists and 139 women.

At elections to the regional, district, urban and rural Soviets (5 March 1961), of nearly 63,000 deputies returned, 31,900 were women and 25,200 Communists.

*President, Presidium of the Supreme Soviet:* Mme Yadgar Nasriddinova.
*Chairman, Council of Ministers:* Rakhmankul Kurbanov.
*First Secretary, Communist Party:* S. R. Rashidov.

**AREA AND POPULATION.** The Uzbeks, who form 62% of the population, were the ruling race in Central Asia, until the arrival of the Russians during the third quarter of the 19th century. The several native states over which Uzbek dynasties formerly ruled were founded in the 15th century upon the ruins of Tamerlane's empire. The Uzbek speak Jagatai Turk, which is related to Osmanli and Azerbaijan Turk; many are Sunni Mohammedans. Russians number 13·5%, other Central Asians 11·8%, Tatars 5·5%.

The area of Uzbekistan is 445,300 sq. km (171,886 sq. miles). The population in Jan. 1963 was 9,492,000 (35% urban). The country comprises the following regions: Andijan, Bukhara, Ferghana, Khorezm, Samarkand, Surkhan-Darya, Syr-Darya (formed 16 Feb. 1963), Tashkent and the Autonomous Soviet Republic of Kara-Kalpakia. The capital of the republic is Tashkent; other large towns are Samarkand, Andizhan, Namangan.

On 19 Sept. 1963 the Supreme Soviet of the USSR confirmed decisions of the Supreme Soviets of Kazakhstan and Uzbekistan, transferring over 40,000 sq. km from the former to the latter to ensure more efficient use of the Hungry Steppe.

The industry of this republic, together with that of Turkmenistan, Kirgizia and Tadjikistan, is now administered by a Central Asian Council of National Economy (Dec. 1962).

**EDUCATION.** In 1963 there were 8,248 elementary and secondary schools with 1,909,000 pupils, 29 higher educational establishments with 126,500 students and 85 technical colleges with a total of 73,300 students. Uzbekistan has an Academy of Sciences and 130 research institutes with 14,514 scientific staff, 3,184 of them in 34 institutions of the Uzbek Academy of Sciences. There are universities and medical schools in Tashkent and Samarkand. In 1962, 167,900 children were attending 2,228 kindergartens.

The Uzbek Arabic alphabet was in 1929 replaced by the Latin alphabet which in 1940 was superseded by one based on the Cyrillic alphabet.

*Newspapers* (1962). There were 77 newspapers in the Uzbek and Kara-Kalpak languages out of a total of 141, with a circulation of 1,044,000 and 1,582,000 respectively.

**HEALTH.** In 1962 there were 14,400 doctors and 78,500 hospital beds; with 57,900 cots in crèches.

**FINANCE.** Budget estimates (in 1m. new roubles), 1961, 1,149; 1962, 1,240; 1963, 1,364; 1964, 1,599.

**AGRICULTURE.** Uzbekistan is a land of intensive farming, based on artificial irrigation. It is the chief cotton-growing area in the USSR and the third in the world. In 1956 there were 830 irrigation systems in operation, with a total length of 160,000 km. About 3m. hectares of land have irrigation networks, but only 2·3m. are making full use of it.

In 1939 the Ferghana Canal (270 km) was built. During 1940, among the irrigation canals completed were: the North Ferghana Canal (165 km), and Andreev South Ferghana Canal (108 km) and the first section of the Tashkent Canal (63 km). The Katta-Kurgan—the largest water reservoir in the USSR—the Hissar Canal and reservoirs at Tyaya–Bugaz, Kuya–Mazar, Urta–Sarai and Uch–Kzynsk are under construction. A 200-km canal joining the river Zeravshan with the Kashka Darya at the village of Paruz was completed in Aug. 1955; it is part of the Iski–Angara Canal. The first section (93 km) of a canal irrigating the southern 'Hungry Steppe' was opened in 1960. In 1961 a new reservoir was opened at Tashkent and underground waters were tapped by over 6,000 pumps during the severe drought.

Agriculture flourishes, particularly in the well-watered, warm, rich oases areas, such as the Ferghana valley, Zeravshan, Tashkent and Khorezm, where cotton, fruit, silk and rice are cultivated. In the higher lying plains grain is grown; the wide desert and semi-desert area of Western Uzbekistan is mainly given to pasture land and the breeding of the Karakul sheep; there is a Karakul institute at Samarkand.

Orchards occupied 124,000 hectares and vineyards 48,000 hectares in 1962. The Central Asian Branch of the Scientific Research Institute of Viticulture in Tashkent has produced new frost resistant grapes by crossing the wild Amur grape with Central Asian and European types. In 1962 there were 971 collective farms and 215 state farms, with 89,700 tractors and 3,100 grain combines. Ploughing, cotton-sowing and cultivation are completely mechanized.

Uzbekistan provides 67% of the total cotton, 50% of the total rice and 60% of the total lucerne grown in the USSR. The area under crops was 2,189,000 hectares in 1913, 3,036,000 hectares in 1940 and 3,096,000 hectares in 1962.

Livestock on 1 Jan. 1963: 2,417,000 cattle, 8,757,000 sheep, 404,000 goats and 475,000 pigs.

Output of main agricultural products (1,000 tons) in 1962 (1913 figures in brackets): Wheat, 240 (513); maize, 215 (39); cotton, 3,006 (517);

potatoes, 163 (46); fruit, 133; grapes, 172; meat 155 (89); milk, 833 (231); wool, 23·9 (5·3); 540m. eggs (87m.).

In 1948 scientists of the Central Asian Experimental Station of the USSR Institute of Plant-breeding produced 5 new varieties of jute, which are said to thrive on the soil and dry climate of Central Asia.

Afforestation over an area of 50,000 hectares has been carried out to protect the Bokhara and Karakul oases from the advancing Kzyl-Kum sands and to stop the sand-drifts in a number of districts of Central Ferghana. In 1949, 17,800 hectares of the Kzyl-Kum Desert were afforested by means of sowing from aeroplanes.

Fish abound in the mouth of the Amu-Darya.

**INDUSTRY.** Of its mineral resources, in addition to oil and coal, copper and building materials and ozocerite deposits are now also exploited. New very rich coal deposits were discovered in 1944 and 1947 near Tashkent.

There are about 1,400 factories and mills. They include a factory of agricultural machinery (in Tashkent), a cement factory, a sulphur-mine, an oxygen factory, a paper-mill, a leather factory, textile-mills, clothing factories, iron and steel works, the Chirchik electro-chemical plant, a superphosphate plant in Kokand and oil refineries, coalmines, etc. Output in 1962 included 4·8m. tons of coal, 325,000 tons of steel, 1,752,000 tons of oil, 1,688,000 tons of cement, 1·2m. tons of mineral fertilizers, 244m. metres of cotton fabrics, 28m. metres of silk fabrics, 13m. pairs of leather footwear, 346,000 hectolitres of wine (apart from collective farm output).

There are some 800 electrical power stations in the republic. Power output in 1962 was 7,520m. kwh. (481m. kwh. in 1940). Two natural-gas pipelines (Djarkak–Tashkent, Ferghana–Kokand) began operating in 1960, and a third, from Bukhara to the Urals, is nearing completion.

In 1962 there were 1,757,000 industrial and office workers in the national economy and 130,400 specialists with a higher education.

**COMMUNICATIONS.** The total length of railway in 1962 was 2,680 km. Branches lead to Karshe-Kitab, Kerki-Termez, Jalal-Abad, Namangan, Andijan and other centres. In 1947–55 a new line was built from Chardzhou to Kungrad.

The Great Uzbek Highway was completed in April 1941. Total length of motor roads in 1962 was 28,600 km (hard surface, 11,200 km). Inland waterways, 1,200 km.

An airline, which serves all of Central Asia, is most developed in Uzbekistan.

# KARA-KALPAK AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area 165,600 sq. km (63,920 sq. miles), population (Jan. 1963) 573,000. Capital, Nukus (46,000). The Karakalpaks are first mentioned in written records in the 16th century as tributary to Bokhara, and later to the Kazakh Khanate. In the second half of the 19th century, as a result of the Russian conquest of Central Asia, they came under Russian rule. On 11 May 1925 the territory was constituted within the then Kazakh Autonomous Republic (of the Russian Federation) as an Autonomous Region. On 20 March 1932 it became an Autonomous Republic within the Russian Federation, and on 5 Dec. 1936 it became part of the Uzbek SSR.

Of 164 deputies elected on 31 March 1963, 57 were women and 113 Communists.

Its manufactures are in the field of light industry—bricks, leather goods, furniture, canning, wine. Output of cotton in 1962 was 210,000 tons (in 1913: 8,000 tons). There were 4,217 tractors. Cattle numbered 215,000 and sheep 470,500.

In 1963 there were 117,500 pupils in 638 schools; there are also a pedagogical institute, a teachers' training college and a national research institute with 6,800 students in all.

There were 370 doctors and 6,800 hospital beds.

# TADZHIKISTAN

RESPUBLIKAI SOVIETII SOTSIALISTII TOJIKISTON

The Tadzhik Soviet Socialist Republic was formed from those regions of Bokhara and Turkestan where the population consisted mainly of Tadzhiks. It was admitted as a constituent republic of the Soviet Union on 5 Dec. 1929.

Tadzhikistan is situated between 39° 40′ and 36° 40′ N. lat. and 67° 20′ and 75° E. long., north of the Oxus (Amu-Darya). On the west and north it is bordered by Uzbekistan and by the Kirghiz Soviet Socialist Republic; on the east by Chinese Turkestan and on the south by Afghánistán. It consists of 25 rural districts, 15 towns and 28 urban settlements, and includes the Gorno-Badakhshan Autonomous Region. Its highest mountains are Communism Peak (7,495 metres) and Lenin Peak (7,127 metres). Even the lowest valleys in the Pamirs are not below 3,500 metres above sea-level. The huge mountain glaciers are the source of many rapid rivers—the tributaries of the Amu-Darya, which flows from east to west along the southern border of Tadzhikistan.

The Supreme Soviet, elected in 1963, consists of 300 deputies (1 per 5,000 population); 208 are Communists and 99 women.

At elections to the district, urban and rural Soviets and the regional Soviet of Gorno-Badakhshan (5 March 1961), out of 15,500 deputies returned, 6,360 were women and 7,800 Communists.

*President, Presidium of the Supreme Soviet:* Makhmadullo Kholov.
*Chairman, Council of Ministers:* Abdulahad Kakharov.
*First Secretary, Communist Party:* D. Rasulov.

**AREA AND POPULATION.** About 53% of the population are Tadzhiks. They speak an Iranian dialect, little different from Persian, and they are considered to be the descendants of the original Aryan population of Turkestan. Unlike the Persians, the Tadzhiks are mostly Sunnis. Of the rest, 23% are Uzbeks living in the north-west of the republic. Russians and Ukrainians number 14·7%.

The area of the territory is 143,100 sq. km (55,240 sq. miles). Population Jan. 1963), 2,267,000. The capital is Dushanbe. Other large towns are Leninabad (86,000 population in 1961), Kurgan-Tyube, Kulyab.

The industry of this republic, together with that of Kirgizia, Uzbekistan and Turkmenistan, is now (since Dec. 1962) administered by a Central Asian Council of National Economy.

**EDUCATION.** In 1963 there were 2,864 primary and secondary schools with 457,000 pupils, 7 higher educational institutions with 21,000 students and 24 technical colleges with 14,900 students; the Tadzhik state university had 4,350 students. In 1962, 30,700 children were attending 306 kindergartens. In 1951 an Academy of Sciences was established; it has 17 institutions, the scientific staff of which numbers 690; there are 50 research institutions in all, with 2,897 scientific personnel. The Pamir research station is the highest altitude meteorological observatory in the world.

In 1940 a new alphabet based on Russian was introduced.

*Newspapers* (1962). Forty newspapers had a total circulation of 543,000. Of these 31, with 379,000 circulation, were in Tadzhik.

**HEALTH.** There are 120 hospitals as well as maternity homes, clinics and special institutes to combat tropical diseases. There were 2,836 doctors in 1962 and 16,800 hospital beds; 8,200 cots in crèches.

**FINANCE.** Budget estimates (in 1m. new roubles), 1961, 332; 1962, 360; 1963, 389; 1964, 435.

**AGRICULTURE.** The occupations of the population are mainly farming, horticulture and cattle breeding. Area under crops in 1962 was 757,000 hectares (1913, 494,000 hectares; 1940, 807,000). Wine production, 1962, was 139,000 hectolitres.

There are 43,000 km of irrigation canals: the irrigation networks cover about 450,000 hectares of land.

Tadzhikistan grows many varieties of fruit, including apricots, figs, olives, pomegranates, a local variety of lemons and oranges, and in the south sugar cane has been grown. Even on the highest mountain plateaux of the Pamirs, the roof of the world, the biological station of Tadzhikistan (3,860 metres above sea-level) has succeeded in raising crops of 60 varieties of barley, 10 varieties of oats, 4 of wheat, as well as vegetables. Eucalyptus and geranium are grown for the perfumery industry. Jute, rice and millet are also grown.

Tadzhikistan contains rich pasture lands, and cattle breeding is a very important branch of its agriculture. Livestock on 1 Jan. 1963: 798,000 cattle, 2,369,000 sheep, 426,000 goats and 115,000 pigs.

The Gissar sheep is famous for its meat and fat in the south: the Karakul sheep is widely bred for its wool.

There were 346 collective farms (208 with electric power) and 45 state farms in 1962; with 17,300 tractors and 1,000 grain combine harvesters.

Output of main agricultural products (1,000 tons) in 1962 (1913 figures in brackets): Wheat, 146 (133); maize, 37 (2); cotton, 435 (32); potatoes, 44 (10); vegetables, 54; fruit, 89; grapes, 35; meat, 44 (48); milk, 207 (102); wool, 4·7 (2·1); 90m. eggs (20m.).

**INDUSTRY.** The original small-scale handicraft industries have been replaced by big industrial enterprises, including mining, engineering, food, textile, clothing and silk factories.

There are rich deposits of brown coal, lead, zinc and oil (in the north of the republic), rare elements, such as uranium, radium, arsenic and bismuth. Asbestos, mica, corundum and emery, lapis lazuli, potassium salts, sulphur and other minerals have been found in other parts of the republic. Of 270 known deposits, 60 are being exploited.

Industrial output in 1962 included: 846,000 tons of coal, 17,000 tons of oil, 708,000 tons of cement, 69m. metres of cotton fabrics, 27m. metres of silk fabrics; leather footwear, 3·1m. pairs; bricks, 247m.

There are 80 big electrical stations. The hydro-electric Varzob station began to work in 1954, another at Kairak-Kum on the Syr Darya River was completed in 1957. Output in 1962 was 1,141m. kwh. (in 1940: 62m. kwh.).

In 1962 there were 364,000 industrial and office workers in the national economy, and 28,800 specialists with a higher education.

**COMMUNICATIONS.** *Roads.* There are 14,100 km of motor roads. Of these, 3,300 km are hard surface, including the Osh–Khorog (700 km), Yasui–Bazar–Charm (107 km) and Dushanbe–Khorog in the Pamirs (557 km) roads.

*Railways.* A railway line between Termez and Dushanbe (258 km) connects the republic with the railway system of the USSR. The mountainous nature of the republic makes ordinary railway construction difficult: accordingly 345 km of narrow gauge railways have been constructed (Kurgan–Tiube–Piandzh and Dushanbe–Kurgan–Tyube, connecting Dushanbe with the cotton-growing Vakhsh valley and particularly important).

*Shipping.* A steamship line on the Amu-Darya runs between Termez Saraya and Jilikulam on the river Vakhsh (300 km).

*Aviation.* Dushanbe is connected by air with Moscow, Tashkent, Baku and the regional and district centres of the republic.

## GORNO-BADAKHSHAN AUTONOMOUS REGION

Comprising the Pamir massif along the borders of Afghánistán and China, the region was set up on 2 Jan. 1925. Area, 63,700 sq. km (24,590 sq. miles); population (est. Jan. 1963), 83,000 (83% Tadjiks, 11% Kirghiz). Capital, Khorog (10,000).

There were 17,800 pupils in 132 4-year, 107 8-year, 28 11-year and 3 boarding schools in 1963.

Mining industries are developed (gold, rock-crystal, mica, coal, salt). Wheat, fruit and fodder crops are grown and cattle and sheep are bred in the western parts. In 1962 there were 41,000 cattle, 212,000 sheep and goats.

# KIRGHIZIA

### KYRGYZ SOVIETIK SOTSIALISTIK RESPUBLIKASY

After the establishment of the Soviet regime in Russia, Kirghizia was part of Soviet Turkestan, which itself became an Autonomous Soviet Socialist Republic within the RSFSR in April 1921. In 1924, when Central Asia was reorganized territorially on a national basis, Kirghizia was separated from Turkestan and formed into an autonomous region within the RSFSR. On 1 Feb. 1926 the Government of the RSFSR transformed Kirghizia into an Autonomous Soviet Socialist Republic within the RSFSR and finally in Dec. 1936 Kirghizia was proclaimed one of the constituent Soviet Socialist Republics of the USSR.

The Supreme Soviet, elected in 1963, consists of 339 deputies (1 per 5,000 population); 229 are Communists and 118 women.

At elections to the regional, district, urban and rural Soviets (5 March 1961), of the 17,700 deputies returned, 6,900 were women and 8,150 Communists.

*President, Presidium of the Supreme Soviet:* Turabay Kulatov.
*Chairman, Council of Ministers:* Bolot Mambetov.
*First Secretary, Communist Party:* T. U. Usubaliev.

**AREA AND POPULATION.** The territory of Kirghizia covers 198,500 sq. km (76,460 sq. miles), and its population in Jan. 1963 was 2·4m. The republic comprises one region, Osh, with 10 districts, and another 11 rural districts directly under the Government. There are 15 towns and 29 urban settlements. Its capital is Frunze (formerly Pishpek). Other large towns are Osh (90,000), Przhevalsk, Kyzyl-Kia, Tokmak.

The industry of the republic, together with that of Tadzhikistan, Turkmenistan and Uzbekistan, has, since Dec. 1962, been administered by a single Central Asian Council of National Economy.

Kirghizia is situated on the Tian-Shan mountains and bordered on the east by China, on the west by Kazakhstan and Uzbekistan, on the north by Kazakhstan and in the south by Tadzhikistan. The Kirghizians are of Turk origin and form 40% of the population; the rest are Russians (30%), Ukrainians (6·6%), Uzbeks (10·6%) and others.

**EDUCATION.** Kirghizia had 2,074 primary, continuation (8-year) and secondary schools with 489,000 pupils in 1962. In Sept. 1940 a new alphabet based on Russian was introduced in the Kirghiz schools. In 1962, 35,200 children attended 410 kindergartens. There were also 8 higher educational institutions with 23,100 students, 29 technical and teachers' training colleges with 21,500 students, as well as music and art schools. The Kirghizian Academy of Sciences was established in 1954. In 1962 there were 42 research institutes, 17 of them, with 736 scientific staff, under the Kirghiz Academy of Sciences: the other 25 have scientist staffs of 2,257. A university was opened in 1951.

*Newspapers* (1962). Of 76 newspapers with 424,000 circulation, 39 with 228,000 circulation are in the Kirghiz language.

**HEALTH.** In 1962 there were 3,800 doctors and 19,800 hospital beds; cots in crèches, 11,000.

**FINANCE.** Budget estimates (in 1m. new roubles), 1961. 396; 1962, 422; 1963, 454; 1964, 474.

**AGRICULTURE.** Kirghizia is famed for its livestock breeding. On 1 Jan. 1963 there were 791,000 cattle, 254,000 pigs, 6·8m. sheep and 215,000 goats. Yaks are bred as meat and dairy cattle, and graze on high altitudes unsuitable for other cattle. Crossed with domestic cattle, hybrids are produced much heavier than ordinary Kirghiz cattle and giving twice the yield of milk. The Kirghizian horse is famed for its endurance, but it is of small stature; it has in recent years been crossed with Don. Arab and other breeds.

In 1962 there were 292 collective farms, covering 173,000 households, and

67 state farms. By 1941, 99·9% of all peasant farms in Kirghizia had joined collective farms. Area under crops (1962), 1,227,000 hectares (1913, 640,000 hectares; 1940, 1,056,000). There were 22,600 tractors and 3,300 grain combine harvesters in 1962: 82% of the collective farms and 97% of the state farms received electric power.

Kirghizia raises wheat sufficient for its own use and other grains and fodder, particularly lucerne; also sugar beet, hemp, kenaf, kendyr, tobacco, medicinal plants and rice. Sericulture, orchards, vineries, vegetables and apiary are also important branches of Kirghiz agriculture. Agriculture is highly mechanized; over two-thirds of the area under crops is worked by tractors. In 1962 irrigation network covered 1,146,000 hectares, but only 949,000 hectares were in use. A canal in the western Tien-Shan ranges and a reservoir in the Urto-Tokoi mountains are being constructed.

In 1955 an area of 172,000 hectares covered with wild fruit and nut trees and 10 different kinds of wild rose-bushes, rich in vitamin C, was discovered. The health resorts of Jety-Oguz (7,200 ft high) and Jalal-Abad are famous for their mild alpine climate and mineral springs.

Output of main agricultural products (1,000 tons) in 1962 (1913 figures in brackets): Wheat, 305 (250); maize, 244 (37); cotton, 125 (28); sugar beet, 1,604 (0); potatoes, 143 (19); vegetables, 98; fruit, 30; grapes, 8; meat, 93 (39); milk, 408 (91); wool, 17·6 (4·7); 188m. eggs (19m.).

**INDUSTRY.** Kirghizia contains about 500 large modern industrial enterprises, including sugar refineries, tanneries, cotton and wool-cleansing works, flour-mills, a tobacco factory, food, timber, textile, engineering, metallurgical, oil and mining enterprises.

The output of coal in 1962 was 3·4m. tons; oil, 346,000 tons; cotton fabrics, 1·6m. metres; leather footwear, 3·6m. pairs; granulated sugar, 170,000 tons; silk fabrics, 5·8m. metres; bricks, 420m.

Hydro-electric power stations are being built in the Central Tien-Shans and the cotton-growing districts in the Osh Region, the Chui valley and on the shore of Lake Issyk-Kul. Power output (1962) was 1,550m. kwh.

There were, in 1962, 498,000 industrial and office workers in the national economy, and 36,000 specialists with a higher education.

**COMMUNICATIONS.** In the north a railway runs from Lugovaya through Frunze to Rybachi on Lake Issyk-Kul. Towns in the southern valleys are linked by short lines with the Ursatyevskaya–Andizhan railway in Uzbekistan. Total length of railway lines is 376 km. Most of the traffic is by road; there were 15,000 km. of motor roads (5,400 hard surface) in 1962. Inland waterways, 600 km. Airlines link Frunze with Moscow and Tashkent.

# UNITED ARAB REPUBLIC

## AL-JUMHURIA AL-ARABIA AL-MUTTAHIDA

**HISTORY.** On 1 Feb. 1958 President Nasser of Egypt and President Kuwatly of Syria proclaimed in Cairo the union of their countries, under one head of state, with a common legislature, a unified army and one flag.

On 8 March the Kingdom of Yemen federated with the United Arab Republic under the name of the United Arab States.

On 26–28 Sept. 1961 Syria broke away and resumed its independence. President Nasser accepted the situation by recalling Egyptian paratroops (whom the Syrians had already disarmed) on 29 Sept.

On 26 Dec. 1961 Egypt also declared the union with Yemen terminated; but in Nov. 1962 concluded a defence pact with the republican régime.

**GOVERNMENT.** On 30 Sept. 1962 President Nasser reorganized the government of the UAR (as Egypt continues to be called), by forming an Executive Council of 25 Ministers and a Defence Council of 20 members.

*President of the Republic:* Gamal Abdel Nasser.

*Vice-Presidents:* Field Marshal Abdel Hakim Amr; Abdel Latif Boghdady; Zakaria Mohieddin; Hussein El-Shafei; Kamal Ed-Din Hussein; Hassan Ibrahim; Anwar El-Sadat.

The Executive Council includes: *Chairman:* Aly Sabry. *Foreign Affairs:* Mahmoud Fawzi. *Treasury and Planning:* Abdul Moneim Kaissouny. *Culture, National Guidance and Information:* Abdul Kader Hatem. *Interior:* Abdel Azim Fahmy. *High Dam:* Sedki Soliman.

The Defence Council, under the chairmanship of President Nasser, includes Gen. Ali Amer, Chief of Staff of the Armed Forces; Gen. Muhammad Sedki Mahmoud, Commander of the Air Force; Adm. Soliman Ezzat, Commander of the Navy; Salah Muhammad Nassr, Chief of Military Intelligence; Abdel Wahab El-Bishri, Minister of War.

*National flag:* Red, white, black (horizontal), with 2 green 5-pointed stars in the white stripe.

The official language is Arabic.

**Administration.** By law 124 of 1960 the UAR is administratively organized in provinces, towns and villages, each of them having a representative council. The councils consist of *ex-officio* members, nominated representatives of the National Union and elected members, the last always forming the majority. These councils have the right to impose local taxes. This law supersedes all previous laws concerning local administration.

**AREA AND POPULATION.** The total area of Egypt is about 386,198 sq. miles (1m. sq. km), but the cultivated and settled area, that is, the Nile valley, delta and oases, covers only about 13,500 sq. miles (35,000 sq. km). Canals, roads, date plantations, etc., cover 1,900 sq. miles; 2,850 sq. miles constitute the surface of the Nile, marshes and lakes. Egypt is divided into two districts—'Wagh-el-Bahari', or Lower Egypt, and 'El-Saïd', or Upper Egypt.

For the frontier between Egypt and Libya, *see* MAP in THE STATESMAN'S YEAR-BOOK, 1952.

In accordance with the armistice concluded with Israel on 24 Feb. 1949 the Egyptian Forces hold a coastal strip in south-west Palestine, covering an area of 258 sq. km and including the town of Gaza and the railway junction of Rafah.

The following tables gives the area of the settled land surface, and the results of the census taken in 1947 and the preliminary figures of the 1960 census:

The principal towns, with their populations (in 1,000), according t census of 1960, are: Cairo, 3,346; Alexandria, 1,513; Port Said, 244; Giza 250; Tanta, 184; Mahalla el Kubra, 178; Suez, 203; Mansûra, 152; Damanhûr, 126; Zagazig, 124; Asyût, 122; Ismailia, 111; Faiyûm, 102 Imbaba, 136; Minya, 94; Beni Suef, 79; Damietta, 72; Sohag, 62; Shibîn el-Kôm, 55; Aswan, 48; Qena, 58.

VITAL STATISTICS for 1956: Births, 958,880; marriages, 222,011; divorces 57,187; deaths, 384,974.

Crude birth rate (1956), 40·6 per 1,000 population; crude death rate 16·3 infantile mortality rate, 124.

**RELIGION.** In 1947 the population (excluding Nomads) consisted o 17,397,946 Moslems (91·46%); 1,186,353 Orthodox Copts; 86,918 Protestant Copts; 72,764 Roman Catholic Copts; 89,062 other Orthodox 50,200 other Roman Catholics; 16,338 other Protestants; 65,639 Jews 1,547 other and unknown.

There are in Egypt large numbers of native Christians connected with the various Oriental Churches; of these, the largest and most influential are the Copts, the descendants of those ancient Egyptians who adopted Christianity n the 1st century of the Christian era. Their head is the Coptic Patriarch. There are 25 metropolitans and bishops in Egypt; 4 metropolitans for Ethiopia, Jerusalem, Khartoum and Omdurman, and 12 bishops in Ethiopia. Priests must be married before ordination, but celibacy is imposed on monks and high dignitaries. The Copts use the Diocletian (or Martyrs') calendar, which begins in A.D. 284.

**EDUCATION.** Education was made compulsory for all children between the ages of 6 and 12 in 1933; primary education (6 years) was made free in 1944, secondary and technical education in 1950. Compulsory education is provided in primary schools (6 years).

Statistics for the school year 1959–60: Nursery schools, 127 with 8,418 children, including 3,253 girls; primary schools (state and private), 7,347 with 2,458,402 pupils, including 931,461 girls; preparatory schools (state and private), 921 with 250,903 pupils, including 69,170 girls; secondary schools (state and private), 291 with 120,767 pupils, including 23,471 girls.

Technical primary education (commercial, agricultural, industrial) was given in 131 schools with 34,600 pupils, including 7,561 girls. Technical secondary education (commercial, agricultural, industrial, domestic) was given in 183 schools with 60,347 students, including 12,498 girls.

Teachers' training colleges numbered 73 with 14,546 students, including 7,699 women.

There are 4 universities in Egypt. Cairo University, founded in 1908 as a private institution and taken over by the Government in 1925, had, in 1959–60, 34,587 students (5,113 women); Alexandria University, founded by the Government in 1942, had 20,772 students (2,111 women); the Ein Shamse University, founded by the Government in Cairo in 1950, had 25,803 students (4,330 women); Asyût University, opened in 1957, had 1,979 students (112 women).

The principal seat of Koranic learning is the Mosque and University of El-Azhar at Cairo, founded in the year 361 of the Hegira (A.D. 972). The main centres of Higher Islamic learning under the supervision of the Council and the University of El-Azhar are the Faculty of Theology (1,222 students in 1959–60), the Faculty of Islamic Law (1,483 students), the Faculty of Arabic Language (2,265 students), together with 42 other institutions (with together 34,580 students). In Oct. 1962 women were admitted as students.

In 1959 some 3,100 Egyptian teachers were operating in Saudi Arabia, Sudan, Libya, Kuwait and other Arab countries.

*Cinemas* (1955). There were 355 cinemas with a seating capacity of 343,000.

*Newspapers.* On 23 May 1960 all newspapers were nationalized.

**HEALTH.** In 1958 there were 8,854 physicians and, in 1956, 42,743 state hospital beds (of which 6,566 for tuberculosis patients).

**JUSTICE.** The national courts, established in 1883, consist of 165 summary tribunals and of 14 judicial delegations, each presided over by a single judge, with civil jurisdiction in matters up to £E250 in value, and criminal jurisdiction in offences punishable by fine or by imprisonment up to 3 years (*i.e.*, police offences and misdemeanours), except in cases relating to the trafficking in narcotics, where the period rises up to perpetual hard labour and a fine not exceeding £E10,000. There are also 19 central tribunals, each of the chambers of which is also (since 1959) presided over by a single judge; and 5 courts of appeal each consisting of 3 judges. Civil cases not within the competence of the summary tribunals are heard in first instance by the central tribunals, with an appeal to one of the courts of appeal. The central tribunals also hear civil and criminal appeals from the summary tribunals. Serious crimes, trafficking in narcotics and Press offences are tried at the central tribunals by 3 judges of the court of appeal sitting as an assize court, assizes being held monthly.

In 1931 a court of cassation above the courts of appeal was set up. It is composed of a president, 4 deputy presidents and 36 judges and divided into 3 chambers, one for criminal, one for civil and commercial and one for personal law.

There is also an administrative court, created in 1946 at the Conseil d'Etat; it is composed of 3 judges, or of 5 in cases when the validity of administrative regulations is contested.

All religious courts, Moslem as well as non-Moslem, were abolished by decree of 21 Sept. 1955, effective from Jan. 1956.

**FINANCE.** Ordinary revenue and expenditure for fiscal years ending 30 June balanced, in £E1,000, as follows: 1957–58, 300,500; 1958–59, 366,865; 1959–60, 345,959; 1960–61, 370,880; 1962–63, 970,000; 1963–64, 1,079,000.

The budgets for the years 1959 and 1960 are as follows (in £E1,000):

The development budget amounting to £E46m. for 1958–59, was increased to £E98·1m. in 1959–60 and to £E285·8m. for 1960–61.

The national loans into which the state foreign debts had been converted in Sept. 1943 totalled £E78m. on 30 June 1957 and were reduced to £E67m at the end of 1959. The appropriations in the 1959–60 budget for the payment of interest and redemption thereof amounted to £E3·5m.

At the end of Dec. 1959 the public debt amounted to £E394·4m., including, in addition to the 1943 loan, two Palestinian loans of £E5m. each, development loans of £E85m. in total as well as the Agrarian Reform Bonds and Treasury Bills.

The General Reserve Fund amounted to £E47,529,143 on 30 June 1956.

In Nov. 1957 the USSR announced economic aid to Egypt amounting to 700m. roubles, to be repaid after 5 years in 12 yearly instalments.

**DEFENCE.** The total strength of the defence forces is about 100,000. There is also a national guard of about 50,000.

ARMY. Service in the Army is compulsory for all male citizens at the age of 18. The Army comprises several divisional headquarters, 7 infantry brigades and some armoured formations with about 32 Mark III Centurion, 50 Joseph Stalin IIIs, 250 T34s, 40 light French tanks and 350 Soviet Bloc armoured troop carriers.

NAVY. There are 6 destroyers, 4 frigates, 9 submarines, 2 corvettes (*ex*-fleet minesweepers), 6 fleet minesweepers, 6 coastal minesweepers, 42 motor torpedo-boats, 3 motor launches, 20 landing craft, 2 yachts and a transport. Naval personnel in 1963: 8,000 officers and men.

AIR FORCE. The Air Force is equipped largely with aircraft supplied by the USSR and Czechoslovakia. Current strength is believed to be about 350 combat aircraft, including 12 squadrons (4 wings) of supersonic MiG-21 and MiG-19 fighters and MiG-17 and MiG-15 fighter-bombers, 2 squadrons (1 wing) of Tu-16 medium jet-bombers and 3 squadrons (1 wing) of Il-28 light jet-bombers. There is 1 heavy transport squadron with 4-turboprop An-12s. Two transport squadrons have piston-engined Il-14s, another has a variety of types, including C-47s, C-45s, Doves and helicopters. Training units are equipped mainly with Yak-11 and Yak-18 aircraft of Soviet design, but have a number of nationally-built Gomhouria (German Bucker Bu 181D) primary trainers. The Spanish Hispano Ha 200 jet trainer is being built under licence at Helwan. Soviet ‘Guideline’ surface-to-air missiles are operational in the UAR.

**PRODUCTION.** A ‘permanent council of national production’ was established in 1952.

The 5-year development plan 1960–65 envisages an average annual investment by the public and private sectors of £E315m.

In 1961–62 a number of sweeping socialist measures were carried out, which contributed largely to the Syrian defection in Sept. 1961. In addition to the nationalization of banks, insurance companies, etc. (*see* below under BANKING), about 1,000 private businessmen had their property confiscated by Jan. 1962. In 1963 complete nationalization was enforced of all cotton exporting and ginning firms, pharmaceutical factories and some 400 other companies in which the state had previously held a half-share. Share owners were compensated by government bonds redeemable over 15 years at 4% interest.

*Agriculture.* Rain seldom falls in Upper Egypt, and only at irregular intervals in Cairo, where the average for the year is no more than 1·2 in. At Alexandria the average is 8 in.

The cultivable area of Egypt proper was estimated in 1957 at 8,428,159 feddâns (1 feddân = 1·038 acres), and of this 995,569 were taken up for public untility purposes and 1,466,688 were owned by the Government.

The following table shows the number of owners and their holdings (both in 1,000) in 1957:

| Size in feddâns[1] | Owners[3] |  | Area |  |
|---|---|---|---|---|
|  | *Number* | % | *Feddâns* | % |
| 1 and under | 2,058·2 | 71·3 | 826·6 | 13·9 |
| 1–5 | 659·5 | 22·9 | 1,446·6 | 24·3 |

| Over 200[2] | 1·5 | 0·1 | 790·5 | 13·3 |
| Total | 2,885·3 | 100·0 | 5,944·9 | 100·0 |

[1] 1 Feddân = 1·038 acres.

[2] Holdings exceeding 200 feddâns are temporarily considered as owned by the Government according to the law of Agricultural Reform of 1952.

[3] Of the total, 2·9m. owners are Egyptians (5·8m. feddâns) and 2,769 are foreigners (137,279 feddâns).

The Agricultural Reform Decree of Sept. 1952 limits agricultural ownership to 200 feddâns. Holdings in excess of this limit will be redistributed; compensation, equivalent to 10 times the rental value of the land, will take the form of 3% (from 1958: 1½%) bonds redeemable within 30 years (from 1958: 40) years. All national *waqfs* are to be dissolved. By 1959, 295,000 feddâns plus 51,000 feddâns of waqf lands had been distributed among 111,000 farmers.

Irrigation occupies a predominant place in the economic development of the country. The Aswân reservoir can now hold up to 5,500m. cu. metres of water, and the Gebel Aulia reservoir, completed in 1937, holds 2,000m. cu. metres. Barrages have been erected at Esna, Nag' Hammâdi, Asyût and Zifta, and at the bifurcation of the Nile below Cairo. Nag' Hammâdi barrage, completed in 1930, ensures full basin supplies even in low flood to Girga province, and will facilitate perennial irrigation when basin lands are converted. Asyût barrage, having been remodelled, will meet the greater demands of the area it now commands. The Esna barrage now secures basin irrigation to lands in Qena province. New barrages (Mohamed Ali barrages) have been completed at the bifurcation of the Nile below Cairo to replace the existing structures which, built in 1861, are now unable to meet the conditions following the increase in summer supplies, the reclamation of large areas of waste lands and the earlier watering of food crops. Expenditure on irrigation amounted to £E4,252,100 in 1960–61.

On 8 Nov. 1959 the United Arab Republic and Sudan concluded agreements on the sharing of the Nile waters (after construction of the Aswân High Dam), and trade, payments and Customs dues. The agreement provides that from the time the High Dam starts to store water (expected to be about 1964) Sudan will be entitled to 18,500m. cu metres of the total annual flow, instead of 4,000m., and Egypt to 55,500m., compared with the present 48,000m. Egypt is to pay £E15m. to meet the cost of providing new homes and lands for between 60,000 and 70,000 Sudanese living in Wadi Halfa and other areas which will be inundated by the waters.

The area and production of cotton for crop years ending 31 Aug. were:

| | Area in feddâns | Crop in qantârs | | Area in feddâns | Crop in qantârs |
|---|---|---|---|---|---|
| 1955 | 1,815,697 | 7,437,255 | 1958 | 1,904,949 | 9,924,685 |
| 1956 | 1,652,635 | 7,230,279 | 1959 | 1,760,256 | 10,175,318 |
| 1957 | 1,819,295 | 9,021,003 | 1963 [1] | 1,725,000 | 9,641,000 |

[1] Estimate.

In 1958–59 the area and yield (both in 1,000) of wheat were 1,475 feddâns and 9,621 ardebs; barley, 141 feddâns and 1,179 ardebs; beans, 354 feddâns and 1,342 ardebs; lentils, 79 feddâns and 300 ardebs; onions, 49 feddâns and 6,541 qantârs; maize, 1,859 feddâns and 10,711 ardebs; millet, 467 feddâns and 4,503 ardebs; rice, undecorticated, 729 feddâns and 1,625 daribas (1 dariba = 945 kg); groundnuts, 40 feddâns and 450 ardebs; sugar-cane, 112 feddâns and 96,913 qantârs.

Livestock, 1958: 45,000 horses, 950,000 donkeys, 11,000 mules, 1·39m. cows, 1,395,000 buffaloes, 1,259,000 sheep, 723,000 goats, 157,000 camels and 17,000 pigs.

*Fisheries.* The catch of the Egyptian sea, Nile and lake fisheries in 1957 amounted to 102,600 metric tons. In 1952 there were 48,947 men and 16,347 boys engaged in fishing and 11,739 boats used for fishing.

*Mining.* Production (in metric tons, except for gold, which is in ounces and for gypsum, which is in cu. metres):

Petroleum in commercial quantities was first discovered at Gemsah in 1908. Production is now obtained from fields at Ras Gharib, Asl, Sudr, Ghardaka, Ras Matarma, Firan, Balaim and Abu Kodis. Operations are carried on by Anglo-Egyptian Oilfields. A US company is jointly concerned in production in the Asl and Sudr fields.

In Sept. 1963 oil concessions were granted to Phillips Petroleum (37,500 sq. miles between Rosetta and the Libyan frontier) and Ente Nazionale Idrocarburi (in the Delta and along the Gulf of Suez); in Oct. 1963 the American International Oil Co. received a 30-year concession to explore 28,000 sq. miles south of Cairo and west of the Nile.

There are 4 oil refineries, at Suez (2), Mostorod and Alexandria. Crude oil production (in metric tons) was 2,352,172 in 1952; 2,351,246 in 1953; 1,970,093 in 1954; 1,821,407 in 1955; 1,723,102 in 1956; 2,361,853 in 1957; 3,479,612 in 1958; 3,398,775 in 1959.

*Industry.* The census of industrial production (1957) showed 278,070 persons engaged in 3,554 industrial establishments employing 10 or more persons, earning £E40m. The largest groups were textile workers (113,241), food manufacturers (49,592), cement, stone and glass workers (14,749) and metal workers (11,231).

Production in 1962 of pig-iron was 99,770 metric tons; of steel ingots and castings, 149,655 metric tons.

**Labour.** A comprehensive labour code was issued in April 1959. It applies to all categories of workers, including agricultural workers, encourages the formation of trade unions, organizes conciliation and arbitration procedures (strikes and lock-outs being forbidden) and provides for an 8-hour working day and paid holidays.

In 1959 a Labour Stability and Social Insurance Code revised the legislation of 1955 and set up a Social Insurance Institution with regional and local branch offices. It covers employment injuries, old age, invalidity benefits.

Trade unions were first recognized in 1942. In 1952 the acts concerning trade unions, individual contracts, and conciliation and arbitration were recast. Employment exchanges and unemployment statistics were introduced in 1953. Social insurance was enacted in 1955.

**COMMERCE.** Imports and exports for 6 calendar years (in £E):

[1] Exports of products and manufactures of Egypt.

[2] Adjusted figures to include trade with the Sudan.

[3] From 1 Jan. 1958 trade between the Egyptian and Syrian Regions is excluded.

In 1959 the principal imports were: Machinery (93,716 metric tons, £E40,026,290), iron and steel (192,895 metric tons, £E13,986,947), wheat, spelt and meslin (730,426 metric tons, £E16,884,707), flour of wheat (423,725 metric tons, £E10,581,605), petroleum and mineral oils (1,539,202 metric tons, £E9,875,649), motor cars, buses and lorries (8,027, £E6,216,669), fertilizers (355,274 metric tons, £E6,713,239). Principal exports: Raw cotton (1958), £E109·9m. (1959), £E110·2m.; pure cotton yarn (1958), £E7·1m. (1959), £E5·9m.

Exports of cotton (in 1,000 qantârs) during the marketing year 1958–59 (ended 31 Aug.) to principal export markets: USSR, 2,176; China, 893; Czechoslovakia, 766; UK, 396; East Germany, 353; India, 298; West Germany, 294; Japan, 291; Poland, 285; Spain, 232; Italy, 189.

Raw cotton accounted for 67·6% of the total agricultural exports in 1958 (72% in 1959). The main buyers in 1959 were: USSR, 24·2% (1958, 26·8%); Czechoslovakia, 12·7% (12·1%); China, 10·2% (11·2%); India, 6·4% (3·8%); East Germany, 5·7% (3·7%); West Germany, 5·4% (0·6%). In 1959, the Soviet bloc countries took 63·7% of the cotton exports, Western Europe, 5·4% and USA, 0·6%.

**COMMUNICATIONS.** *Shipping.* The Egyptian merchant navy in 1958 consisted of 27 steamers of 220,467 tons and 1 sailing ship of 930 tons.

In 1959, excluding warships and vessels requisitioned by the military authorities, 38,998 steamers of 249,217 NRT entered at, and 38,993 steamers of 249,073 NRT departed from, all the Egyptian ports.

**Suez Canal.** The Suez Canal was opened for navigation on 17 Nov. 1869. By the convention of Constantinople of 29 Oct. 1888 the canal is open to vessels of all nations and is free from blockade, but the UAR Government does not allow Israeli ships to use the canal. It is 101 miles long (excluding 7 miles of approach channels to the harbours), connecting the Mediterranean with the Red Sea. Its minimum width is 197 ft at a depth of 33 ft, and its depth permits the passage of vessels up to 35 ft draught (to be increased to 37 ft).

On 26 July 1956 President Nasser proclaimed the nationalization of the Suez Canal Company, the concession of which was to expire on 17 Nov. 1968. In July 1958 the shareholders of the Suez Canal Company accepted an agreement which provides for the payment by the United Arab Republic of £28m. compensation; the final instalment was paid in Jan. 1963. The Company has changed its name to Suez Financial Company and continues as an investment trust.

On 22 Dec. 1959 the World Bank granted the United Arab Republic a loan of US$56·5m. for the deepening, widening and general improvement of the Canal and Port Said harbour. The interest of the loan is 6%; amortization will extend over 15 years.

The following table shows the number and (1,000) net tonnage of vessels of the principal nationalities that passed through the canal in 1958:

| Nationality | No. of transits | Suez Canal net tonnage | Nationality | No. of transits | Suez Canal net tonnage |
|---|---|---|---|---|---|
| British | 3,993 | 33,010 | Liberian | 1,685 | 23,369 |
| Norwegian | 2,496 | 24,479 | Danish | 654 | 5,410 |

| Dutch | 831 | 6,408 | Japanese | 266 | 1,854 |

The number and net tonnage of vessels that have passed through the Suez Canal (including warships), and the transit receipts (in £E), have been as follows:

| | No. of transits | Suez net tonnage | Receipts | | No. of transits | Suez net tonnage | Receipts |
|---|---|---|---|---|---|---|---|
| 1953 | 12,731 | 92,905,439 | 28,901,200 | 1956 [1] | 13,291 | 107,005,000 | 29,396,000 |

The number of passengers (civil and military) who went through the canal was, in 1952, 571,416; 1953, 554,093; 1954, 537,976; 1955, 520,774; 1956 (Jan.–Oct.), 319,798; 1957 (April–Dec.), 188,361; 1958, 342,404.

Lauterpacht, E. (ed.), *The Suez Canal Settlement, 1956–59.* London, 1960

*Railways.* In 1957–58 there were 4,343 km of state railways and 1,327 km of agricultural light railways owned by private companies. The state railways have a gauge of 4ft 8½ in. inside rails, except that to the Western Oases, which is 2 ft 5½ in.

Total receipts of Egyptian State Railways in 1957–58 were £E20,731,000; total expenditures, £E19,567,000.

*Roads.* Egypt had 2,621 km of macadamized surface roads in 1958–59; non-macadamized surface roads totalled 12,860 km and desert roads, 4,040 km. Motor vehicles, as at 31 Dec. 1959: 57,296 private cars, 10,143 taxis, 16,225 trucks, 3,894 buses.

*Post.* The telephone service was taken over by the Egyptian Government in April 1918. In 1958–59 the state telegraphs had a length of 15,381 km of wire, and telephones, 1,076,159 km. There were, in 1959, 6,977 post offices and stations. Number of telephones in 1963, 250,158, of which 143,368 are in Cairo and 48,896 in Alexandria. Number of wireless licences in 1959, 853,259.

The internal telecommunications system is owned and operated by the Telecommunications Organization. Government landlines connect with those of the Gaza sector and the Sudan.

*Aviation.* There are 4 international aerodromes: Cairo, Alexandria, Luxor and Mersa Matruh. The national airline 'The United Arab Airlines' has a fleet of 20 aircraft. The UAA operates scheduled flights connecting Cairo with Athens, Rome, Frankfurt, Geneva, Zürich, London, Khartoum, Asmara, Aden, Jeddah, Doha, Dharan, Kuwait, Beirut, Jerusalem, Baghdad and Tripoli. In addition, the United Arab Airlines operates scheduled flights on a widespread domestic network connecting Cairo with Port Said, Mersa Matruh, Assiout, Luxor, Aswân.

**MONEY.** By decree of 18 Oct. 1916 (20 Zi-El-Higga 1934), the monetary unit of Egypt is the gold Egyptian pound of 100 piastres of 1,000 millièmes. Coins in circulation are 20, 10, 5, 2 piastres (silver): 1, $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{5}$, $\frac{1}{10}$ piastre (nickel); 1, $\frac{1}{2}$, $\frac{1}{10}$, $\frac{1}{20}$ piastre (bronze). Gold coins are no longer in circulation. Silver coin is legal tender only up to £E2, and nickel or bronze coins up to 10 piastres. The Treasury issues 5- and 10-piastre currency notes.

In 1953 the weights of the 20-, 10- and 5-piastre coins were reduced by 50% and their silver content was also reduced from 833⅓ per mille to 625 per mille. The 10-, 5- and 1-millième coins are now issued in bronze.

Bank-notes are issued by the National Bank in various denominations: P.T. (= piastre tariffe, or legal piastre) 25 and 50, £E1, 5 and 10. The £E10 and £E100 notes were withdrawn in 1959. The amount of notes in circulation on 8 Sept. 1960 was £E204m.

**BANKING.** On 18 Aug. 1960 a Central Bank of Egypt was established by decree. It manages the note issue, the Government's banking operations and the control of commercial banks. At the same date the National Bank founded in 1898 ceased to be the central bank and became a purely commercial bank. The position of the bank on 8 Sept. 1960 was (in £E1m.): Issue Department, gold, 60·6; foreign government treasury bills and securities, 1·9; government securities and treasury bills, 141·6; notes issued, 204. Banking department, assets, government bills, 42·6; government securities, 89·3; advances and bills discounted, 71·8; clearing and other accounts (payment agreements), 34·1; gold and foreign bankers, 8·5; cash, 15. Liabilities, capital and reserve, 6·2; deposits, 86·8; bankers' deposits, 60·5; clearing and other accounts (payments agreements), 83·9. Egypt's foreign exchange reserves declined from £E210·4m. at the end of 1956 to £E149·5m. at the end of 1959.

In 1901 a post office savings bank was opened; on 31 Dec. 1959 the total deposits amounted to £E38·6m.

Commercial banks in Egypt numbered 27 in Dec. 1959, including 16 Egyptian joint-stock companies (of which by far the most important is Bank Misr), the rest being branches of foreign banks. On 15 Jan. 1957 all English and French banks and insurance companies were nationalized. All banks and insurance companies must now be limited-liability companies with a paid-up capital of not less than £E500,000 for banks and £E100,000 for insurance companies; all shareholders, directors and managers must be Egyptian nationals.

The Bank el Goumhouria subsequently took over the Ottoman Bank and the Ionian Bank; the Bank of Cairo took control of the Crédit Lyonnais and the Comptoir National d'Escompte de Paris; the Bank of Alexandria was established to take over the 40 branches of Barclays Bank DCO, and the Banque de l'Union Commerciale took over the Crédit d'Orient.

Other banks in Egypt include the Crédit Foncier Egyptien (founded in 1880) and the Land Bank of Egypt (1905), both for mortgage lending, the Crédit Agricole et Cooperarif (1931), the Crédit Hypothécaire d'Egypte (1932) and the Industrial Bank (1949). The National Bank and the Bank Misr were nationalized on 11 Feb. 1960.

**WEIGHTS AND MEASURES.** In March 1939 a law was passed establishing the metre, the kilogramme and the litre as the weights and measures legal in Egypt. In 1951 the metric system was made official with the exception of the feddân and its subdivisions.

**CAPACITY.** *Kadah* = 1/96th ardeb = 3·63 pints. *Rob* = 4 kadahs = 1·815 gallons. *Keila* = 8 kadahs = 3·63 gallons. *Ardeb* = 96 kadahs = 43·555 gallons, or 5·44439 bu.

**WEIGHTS.** *Rotl* = 144 dirhems = 0·9905 lb. *Oke* = 400 dirhems = 2·75137 lb. *Heml* = 200 okes = 550·274 lb. *Qantâr* or 100 rotls or 36 okes = 99·0493 lb. 1 *Qantâr* of unginned cotton = 315 lb. 1 *Qantâr* of ginned cotton = 100 *Rotls* = 99·05 lb. The approximate weight of the ardeb is as follows: Wheat, 150 kg; beans, 155 kg; barley, 120 kg; maize, 140 kg; cotton seed, 121 kg.

SURFACE. *Feddân*, the unit of measure for land = 4,200⅚ sq. metres = 7,468·148 sq. pics = 1·03805 acres. 1 sq. pic = 6·0547 sq. ft = 0·5625 sq. metre.

# URUGUAY

## REPÚBLICA ORIENTAL DEL URUGUAY

**HISTORY.** The Republic of Uruguay, formerly a part of the Spanish Viceroyalty of Río de la Plata and subsequently a province of Brazil, declared its independence 25 Aug. 1825 which was recognized by the treaty between Argentina, Brazil and Uruguay signed at Rio de Janeiro 27 Aug. 1828. The first constitution was adopted 18 July 1830.

**CONSTITUTION AND GOVERNMENT.** Since 1900 Uruguay has been unique in her constitutional innovations, all designed to protect her from the emergence of a dictatorship. The favourite device of the majority group known as the 'Batllistas' (a *Colorado* faction) which, until defeated at the 1958 elections, held the majority for over 90 years, has been the collegiate system of government, in which the two largest political parties would be represented.

One such pattern lasted from 1917 to 1933, when it was abolished by a dictator who re-established the system of an individual President. Until 1951 Presidents were elected every 4 years and they selected their own Cabinet Ministers (*see* list of Presidents in THE STATESMAN'S YEAR-BOOK, 1956, p. 1493). In 1951, on the initiative of the 'Batllistas', the Constitution was amended: the individual presidency was abolished and the executive power vested in a National Council of Government of 9 members.

The elections of 25 Nov. 1962 were again won by the Blanco party (Partido Nacional). The Council of Government which assumed office on 1 March 1963 to serve until 28 Feb. 1967 is composed of 6 members of this party and 3 members of the Colorado party. The Council is presided over by the members of the majority group who hold the office for 1 year in rotation (1964–65, Luis Giannattasio).

The Cabinet of 9 Ministers is appointed by the Council.

Parliament consists of 2 Houses, the Senate composed of 31 members and the Chamber of Representatives composed of 99 members. Both Houses, whose members represent the political parties proportionally, are elected at the same time as the National Council of Government, and remain in office for 4 years. All people of 18 years or over at the election date are entitled to vote.

The electorate in 1963 numbered 1·5m.; women constituted 42%.

The Senate was in 1963 composed of 15 members of the Partido Nacional (of whom 7 belong to the *Unión Blanca Democrática*, 6 to the *Herrerista-Ruralista* group and 2 to the 'orthodox' *Herreristas*), 14 of the Partido Colorado, 1 Catholic and 1 Communist; the Chamber of Deputies has 47 Blancos, 45 Colorados and 7 others.

The Colorado party favours 'statism' and social-welfare legislation. Most banking and all forms of insurance are government monopolies, as are also the railways and all the public utilities except one company in Montevideo. The Government controls cement, fuel, petroleum and alcohol, including the manufacture of *caña*, a cheap rum-like drink which is the national beverage.

*National flag:* A white field with 4 horizontal azure blue stripes; a golden sun in splendour with 16 rays, alternately straight and wavy, in a white canton.

*National anthem:* Orientales, la patria ó la tumba (words and tune by Juan Coppetti).

**AREA AND POPULATION.** The area is 186,926 sq. km (72,172 sq. miles). The following table shows the area and the estimated population of the 19 departments (capitals in brackets) at the census of 16 Oct. 1963:

| Departments | Area, sq. km | Population | Pop. per sq. km |
|---|---|---|---|
| Artigas (Artigas) | 11,378 | 63,589 | 5·6 |
| Canelones (Canelones) | 4,752 | 201,359 | 42·4 |
| Cerro-Largo (Melo) | 14,929 | 110,339 | 7·3 |
| Colonia (Colonia) | 5,682 | 135,038 | 23·8 |
| Durazno (Durazno) | 14,315 | 99,063 | 6·9 |
| Flores (Trinidad) | 4,519 | 35,565 | 7·9 |
| Florida (Florida) | 12,107 | 106,284 | 8·8 |
| Lavalleja (Minas) | 12,485 | 115,852 | 9·3 |
| Maldonado (Maldonado) | 4,111 | 67,933 | 16·5 |
| Montevideo (Montevideo City) | 664 | 836,165 | 1,259·3 |
| Paysandú (Paysandú) | 13,252 | 92,417 | 7·0 |
| Río Negro (Fray Bentos) | 8,471 | 51,954 | 6·1 |
| Rivera (Rivera) | 9.829 | 91,740 | 9·3 |
| Rocha (Rocha) | 11.089 | 86,334 | 7·8 |
| Salto (Salto) | 12,603 | 108,030 | 8·6 |
| San José (San José) | 6,963 | 96,848 | 13·9 |
| Soriano (Mercedes) | 9,223 | 99,927 | 10·8 |
| Tacuarembó (Tacuarembó) | 21,015 | 119,658 | 5·7 |
| Treinta y Tres (Treinta y Tres) | 9.539 | 72,063 | 7·5 |
| Total | 186,926 | 2,590,158 | 13·9 |

The population of Montevideo City (the capital) on 31 Dec. 1963 was estimated at 1,173,114. Other cities had estimated populations as follows: Paysandú, 60,000; Salto, 60,000; Rivera, 40,000.

Crude birth rate, 1955, 18 per 1,000 population and crude death rate, 8 (both unofficial calculations). Crude marriage rate, 1955, 5·4; infant mortality rate, 65·7 per 1,000 live births (102 in 1935). Births in 1954, 52,000; deaths, 20,000; marriages, 20,000.

The 3,510 immigrants in 1958 were reported as: from Spain, 2,623; Italy, 608; Portugal, 53; Israel, 33; others, 193.

The language of the country is Spanish.

**RELIGION.** State and Church are separated, and there is complete religious liberty. The religion professed by the majority of the inhabitants is Roman Catholic. The archbishopric of Montevideo has 5 suffragan bishops in Salto, Melo, Florida, Minas, San José and Canelones.

Protestants numbered about 10,500 in 1957.

**EDUCATION.** Primary education is obligatory; both primary and superior education are free.

In 1959 there were 1,879 primary public schools with 257,481 pupils and 7,797 teachers; in 1957, 196 secondary schools had 4,540 teachers and 47,454 pupils. There are also evening courses for adults. Illiteracy is now confined largely to the older age groups in the rural areas.

The University of the Republic at Montevideo, inaugurated in 1849, has about 15,000 students; tuition is free to both native-born and foreign students; there are 10 faculties. There are 43 normal schools for males and females, and a college of arts and trades with about 11,600 students. There are also many religious seminaries throughout the Republic with a considerable number of pupils, a school for the blind, 2 for the deaf and dumb and a school of domestic science.

Hospital beds, 1960, numbered 14,157; physicians numbered 2,812.

*Cinemas* (1962). Cinemas numbered 212 with seating capacity of 117,700.

*Newspapers* (1963). There were 9 daily newspapers in Montevideo with aggregate daily circulation of 450,000; most of the 25–30 provincial newspapers appear bi-weekly.

**JUSTICE.** The Supreme Court consists of 5 judges elected by the 2 Chambers sitting as a National Assembly. The President is chosen annually by the members of the court from among themselves. This court has original jurisdiction in constitutional, international and admiralty cases, and hears appeals from the appellate courts, of which there are 3, each with 3 judges. In Montevideo there are also 3 courts for ordinary civil cases, 7 for commercial cases, 2 for government (*Juzgado de Hacienda*), as well as criminal and correctional courts. Each departmental capital has a departmental court; each of the 220 judicial divisions has a justice of peace court. In Sept. 1907 the death penalty was abolished, replaced by penal servitude for a period of 30–40 years.

**FINANCE.** The receipts and expenditure of the national accounts as approved by the National Council of Government on 30 Nov. (Ur$1m.):

| | *1960* | *1961* | *1962* | *1963*[1] |
|---|---|---|---|---|
| Revenue | 1,475·0 | 2,104·6 | 2,064·9 | 2,244 |
| Expenditure | 1,347·4 | 2,252·6 | 3,008·5 | 3,223 |

[1] Estimates.

The last budget was approved in Nov. 1962. A budget to cover a 4-year period is presented during the year following election of each new government; differences in actual annual income and expenditure and amendments to the budget (including new taxes) must be approved by Parliament each year-end; these usually come forward in June or July each year.

Expenditures in 1962 (in 1m. pesos) included 89·5 for education and welfare, 235·8 for defence, 220·6 for health, 144·6 for interior, 90·8 for finance and 30·8 for public works administration. Actual expenditure on works is separately financed from specific revenues (*e.g.*, fuel tax). A law inaugurating income tax came into operation on 1 July 1961.

Public debt outstanding on 31 July 1963 was 2,504·4m. pesos (compared with 2,381·4m. pesos on 31 July 1962), of which 2,435·8m. was internal and 68·6m. external. Government-external bonds since 1930 have received a common interest rate of 3·5%.

**DEFENCE.** *Army.* The Army is composed of the active army and its reserves. The active army is formed of volunteers, who contract for 1 year or 2 years service. There are 9 regiments of cavalry, 5 of artillery, 5 of infantry, 6 of pioneers, 1 of tank troops and the Air Force. The Army is equipped with modern material.

The reserve is formed by elements who, for some reason or other, retire from the active army, and by citizens who are trained every year in accordance with the law of compulsory military instruction. It is reckoned that about 120,000 men could be mobilized in case of war.

*Navy.* The Navy consists of 2 frigates, 3 patrol vessels, a surveying vessel, 1 training ship, 1 oiler and 1 air/sea rescue launch. Personnel in 1963: 350 officers and 1,500 ratings.

There is a small naval air service, with 3 bases on the river Plate estuary, equipped with piston-engined Hellcat fighter-bombers and Avenger torpedo-bombers of wartime US design.

*Air Force.* Organized with US assistance, the Air Force has one fighter-bomber squadron equipped with Lockheed F-80 Shooting Star jet aircraft, one squadron of B-25 Mitchell piston-engined bombers and C-46, C-47 and Beaver transports. Training units are equipped with wartime US types and some T-33 jet advanced trainers.

**PRODUCTION.** *Agriculture.* Uruguay is primarily a pastoral country. Of the total land area of 46m. acres some 41m. are devoted to farming, of which 90% to livestock and 10% to crops. Some large *estancias* have been divided up into family farms; rural landlordism is much less than elsewhere. Uruguay is said to be the only Latin-American country in which agricultural workers have the protection of a minimum-wage law. Animals and animal products constitute 71% of the exports. The 1961 census reported on 84,857 farms of all kinds, totalling 16·82m. hectares.

In July 1961 the Government finally approved a US$7m. loan from the IRBD for a Livestock Improvement Plan which is being carried out on some 600 farms in conjunction with their own Agricultural Development Plan costing some Ur$80m. In 1961 (census) there were 7·5m. cattle, 21·5m. sheep, 640,000 horses, 270,000 pigs and 19,000 goats. Slaughterings in the controlled market in 1962 totalled 687,792 cattle and 33,381 sheep.

Wool exports for the year 1 Oct. 1961 to 30 Sept. 1962 were 153,461 bales. Of these the UK took 28,725; USA, 26,402; West Germany, 19,215; Netherlands, 14,394; Italy, 11,627; Belgium, 8,958; Poland, 8,437. Exports, 1962, of sheepskins were 8,490 metric tons; cattle hides, 19,703 metric tons.

Agricultural products are raised chiefly in the departments of Paysandú, Río Negro, Colonia, San José, Soriano and Florida. The average farm is about 250 acres. The principal crops and their estimated yield (in metric tons) in 2 crop years were as follows:

| | Area (hectares) | | Yield (metric tons) | |
|---|---|---|---|---|
| | *1961–62* | *1962–63* | *1961–62* | *1962–63* |
| Wheat | 435,912 | 401,420 | 371,536 | 463,221 |
| Linseed | 144,175 | 159,400 | 95,759 | 86,791 |
| Oats | 86,260 | 79,700 | 64,407 | 62,020 |
| Maize | 265,270 | 248,500 | 155,175 | 205,635 |
| Sunflower | 144,175 | 137,770 | 79,708 | 87,189 |
| Groundnuts | 10,167 | 9,199 | 7,814 | 7,090 |
| Rice | 17,788 | 17,410 | 60,704 | 76,992 |
| Cotton | 1,052 | 2,071 | 858 | 1,830 |

Uruguay is self-sufficient in rice, with usually a small surplus for export. Three sugar refineries handle cane and (mainly) beet, their total production being approximately 70,000 metric tons, and approaching self-sufficiency.

Wine is produced chiefly in the departments of Montevideo, Canelones and Colonia, about enough for domestic consumption. The country has some 6m. fruit trees, principally peaches, oranges, tangerines and pears.

*Industry.* In 1960 there were 18,713 registered enterprises with 216,682 employees. These cover basic activities such as meat packing, oil refining, cement manufacture and also many branches of light industry, including one rolling mill for steel and one for aluminium, light engineering and electrical, chemical and textile production. There are 555 textile mills, but, with the exception of half a dozen large plants, these are on the whole small. Total capital invested in this industry is 340·2m. Uruguayan pesos: there are some 147,500 cotton, woollen and rayon spindles, 1,300 looms for woollen fabric and 1,000 looms for cotton rayon goods.

On 7 Aug. 1961 a 5-year programme of public works was authorized for a total of Ur$290m. It allocated 216·4m. to roads and bridges, 35·4m. to hospitals, schools and other buildings, and 21m. to docks, wharves and similar installations. In 1961 a further programme of public works to the value of Ur$294m. was authorized for works to be undertaken immediately, the bulk of which were to be devoted to road building. In 1963 a further public works programme of Ur$445·8m. was submitted to Parliament. All these projects are financed from internal resources.

*Power.* The supply of electricity for light, power and traction has been a State monopoly since 1897. In Jan. 1949 the first hydro-electric plant at the site of the dam of Rincón del Bonete was completed with an installed capacity of 128 megawatts. Another plant at Rincón de Baygorria on the Río Negro came into operation in 1960, with a capacity of 108 megawatts. Power output in 1960 was 1,244 kwh. An extension of the ANCAP refining plant, opened at Montevideo on 6 Dec. 1961, gives a capacity of 7,500 cu. metres daily of high-octane petrol and high-grade gas for domestic and industrial use.

*Labour.* Trade unions number about 150,000 members.

**COMMERCE.** The Latin American Free Trade Association came into being as a result of a conference in Montevideo in 1961 (*see* p. 49). The foreign trade (officially stated in US$, with the figure for imports based on the clearance permits granted and that for exports on export licences utilized) was as follows (in US$1,000):

| | *1956* | *1957* | *1958* | *1959* | *1960* | *1961* | *1962* |
|---|---|---|---|---|---|---|---|
| Imports | 205,793 | 266,442 | 134,649 | 213,959 | 244,441 | 209,073 | 230,484 |
| Exports | 211,054 | 128,248 | 138,622 | 97,798 | 129,400 | 174,716 | 153,431 |

Of the imports in 1961 (and 1962) (in US$1m.) USA furnished 47 (44); West Germany, 26 (32); UK, 23 (24); Brazil, 18 (21); Venezuela, 12 (11); Argentina, 12 (9), and France, 8 (12); of the exports, UK took 42 (25); USA, 24 (24); Netherlands, 20 (15); West Germany, 15 (15); France, 11 (8); Italy, 12 (8), and USSR, 1 (13). Tourism earns about $20m. yearly.

Principal imports and exports (in US$1,000):

| Imports | *1961* | *1962* |
|---|---|---|
| Raw materials | 70.616 | 65.961 |
| Fuel and lubricants | 26,823 | 30,310 |
| Foodstuffs | 7,669 | 7,979 |
| Construction materials | 11,020 | . . |
| Machinery and accessories | 21,781 | 34,065 |
| Motor vehicles | 33,345 | 41,076 |

| Exports | *1961* | *1962* |
|---|---|---|
| Meat and meat products | 27.385 | 31.424 |
| Wool | 85.754 | 58.329 |
| Leather and hides | 16,598 | 17,267 |
| Agricultural products | 13,197 | 14.732 |

Total trade between Uruguay and UK (British Board of Trade returns) in £ sterling:

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK | 5,996,600 | 12.336,826 | 15,850,440 | 10.914,529 | 17,458,236 |
| Exports from UK | 3,362.461 | 6,265.588 | 8.418.558 | 7,101,957 | 6,654.607 |
| Re-exports from UK | 93,814 | 142,614 | 83,875 | 136,923 | 87,462 |

**COMMUNICATIONS.** *Shipping.* On 31 Dec. 1962 the 9 merchant vessels and 3 tankers under the Uruguayan flag had a gross registered tonnage of 96,100. One tanker of 28,000 tons and 2 *ex*-Liberty ships were added to the merchant fleet during 1961. River transport (1,270 km) is extensive; its main importance being to link Montevideo with Paysandú and Salto.

*Roads.* The main highways, linking Montevideo with the interior, have a total length of 7,820 km, of which about 5,000 km are paved. Other roads, unpaved, are about 33,800 km. Considerable improvements, financed both internally and by international loans, have been carried out in the last few years.

Registered motor vehicles, 31 Dec. 1960, are estimated at 76,469 passenger cars and 50,545 trucks and buses; all figures are rapidly increasing.

*Railways.* The 4 principal railway systems, embracing 2,398 km, were all built by British capital amounting to £14,513,000. The Uruguayan Government in 1948 bought these railways for £7·15m., assuming control in that year. The East Coast Railway (125·5 km) and 3 minor lines were already controlled by the State under a separate administration. In Oct. 1952 the railways were brought under a single administration and a 'caretaker' Directorate is planning repairs and modernization. The total railway system open for traffic is 3,102 km of standard gauge. In 1960 it carried 10m. passengers and 1·53m. tons of freight (1959: 13·5m. and 1·46m.). The revenue in 1960 was 79·4m. pesos.

*Post.* The telegraph lines in operation have a total length of 12,083 km. The telephone system in Montevideo is controlled by the State; small companies operate in the interior. Telephone instruments, 1963, numbered 177,866 (115.524 in Montevideo), all state-owned; 65% were automatic. There are 1,277 post offices. Uruguay has 54 long-wave and 17 short-wave broadcasting stations. In 1961 there were 900,000 wireless sets and 100,000 television receivers. There are 3 television stations. The State itself operates one of the most powerful sound broadcasting stations in South America. Four cable companies connect Montevideo with the US and Europe.

*Aviation.* Carrasco, 22·5 km from Montevideo, is the most important airport. American, Argentinian, Brazilian, British, Dutch, French, German, Scandinavian, Chilean, Italian, Spanish and Paraguayan airlines ply to and from Uruguay. Pan American Airways links Montevideo with 19 other American capital cities. The state-operated civil airline PLUNA, runs services in the interior of the country and to Brazil, Paraguay and Argentina.

**MONEY.** There is no gold coin in circulation, but the monetary standard is gold, the theoretical gold coin being the *peso oro*, gold content of which was fixed, 17 Dec. 1959, at 0·136719 gramme. It is equal to 100 *centésimos*. The actual circulating medium consists of paper notes issued by the Bank of the Republic in denominations of 1,000, 500, 100, 50, 10, 5 and 1 *pesos*. Silver coins of 1 *peso* and 50, 20 and 1 *centésimo* have been withdrawn pending replacement. There are also copper–nickel coins of 1 *peso*, 50 and 25 *centésimos*, and aluminium–bronze coins of 10 and 5 *centésimos*.

All imports were freed from quantitative control in Sept. 1960 but prior deposits and surcharges may be exacted on certain goods for which there is a locally manufactured equivalent and on luxury goods. Authority to import, however, must be obtained from the Bank of the Republic.

In May 1962 the Bank of the Republic was authorized to increase the paper issue against the gold peso by 60%, but the gold content of the latter was not altered. The draft law of May 1963 would reduce the gold content to 0·059245 gramme, representing a new dollar parity of Ur$14·99; this has not yet been approved.

In May 1963 the *peso* was devalued by about one-third to approximately 46 to £1 sterling and at the same time a slightly lower fluctuating rate called the 'free absolute exchange rate' for a free market came into existence.

**BANKING.** The Bank of the Republic (founded 1896), whose president and directors are appointed by the Government, has a paid-up capital of 186,684,928 pesos. It has been authorized (9 Aug. 1963) to set up agencies in Argentina, Brazil and Paraguay. On 31 Dec. 1960 stock of gold was equivalent to 1,167m. pesos; note circulation (31 March 1963), 2,328m. pesos.

A state-owned National Insurance Bank (Banco de Seguros del Estado) has a monopoly of new insurance business of all kinds. The Bank re-insures much of its business in London.

Of the 58 banks in Uruguay the Bank of London and South America (British) has a main branch and 6 agencies.

**WEIGHTS AND MEASURES.** The metric system was adopted in 1862.

# VATICAN CITY STATE

## STATO DELLA CITTÀ DEL VATICANO

*History.* For many centuries the Popes bore temporal sway over a territory stretching across mid-Italy from sea to sea and comprising some 17,000 sq. miles, with a population finally of over 3m. In 1859–60 and 1870 the Papal States were incorporated with the Italian Kingdom. Although, by an Italian law dated 13 May 1871, there was guaranteed to His Holiness and his successors for ever, besides the use of the Vatican and Lateran palaces and the villa of Castel Gandolfo, a yearly income of 3,225,000 lire, this allowance remained unclaimed and unpaid until 11 Feb. 1929, when the

'Roman question' was settled by three treaties between the Italian Government and the Vatican: (1) A Political Treaty, which recognized the full and independent sovereignty of the Holy See in the city of the Vatican; (2) a Concordat, to regulate the condition of religion and of the Church in Italy; and (3) a Financial Convention, in accordance with which the Holy See received 750m. lire in cash and 1,000m. lire in Italian 5% state bonds. This sum was to be a definitive settlement of all the financial claims of the Holy See against Italy in consequence of the loss of its temporal power in 1870. The treaty and concordat were ratified on 7 June 1929. The treaty has been embodied in the Constitution of the Italian Republic of 1947.

*Area and Population.* The area of the Vatican City is 44 hectares (108·7 acres). It includes the Piazza di San Pietro (St Peter's Square), which is to remain normally open to the public and subject to the powers of the Italian police. It has its own railway station (opened Nov. 1932), postal facilities, coins and radio. Twelve buildings in and outside Rome enjoy extraterritorial rights, including the Basilicas of St John Lateran, St Mary Major, St Paul without the Walls and the Pope's summer villa at Castel Gandolfo. On 8 Oct. 1951 extra-territorial rights were also granted to a new Vatican radio station on Italian soil.

The Vatican City has about 900 inhabitants.

*Supreme Pontiff:* **Paul VI** (Giovanni Battista Montini), born at Concesio near Brescia, 26 Sept. 1897; Secretariat of State 1923–54; Archbishop of Milan 1954–63; elected Pope 21 June 1963; coronation 30 June 1963.

*Secretary of State:* Cardinal Amleto Cicognani (appointed 14 Aug. 1961).

The Pope exercises the sovereignty and has absolute legislative, executive and judicial powers. The judicial power is delegated to a tribunal in first instance, to the *Sacra Romana Rota* in appeal and to the Supreme Tribunal of the *Segnatura* in final appeal.

In its diplomatic relations with foreign countries the Holy See is represented by the Secretariat of State. The Pope is, however, pledged to a perpetual neutrality in respect of political disputes between governments and to abstention from international congresses called to cope with them, unless his mediation is specifically requested by both parties to a dispute.

The principal method by which the Pope endeavours from time to time to exert influence on the course of political developments is the issue of 'encyclicals' or circular letters addressed to Catholic bishops throughout the world, laying down the principles by which Catholics should be guided with reference to the particular problem under discussion.

The election of a Pope ordinarily is by *scrutiny.* Each Cardinal in conclave writes on a ticket his own name with that of the Cardinal whom he chooses. These tickets, folded and sealed, are laid in a chalice which stands on the conclave altar; and each elector approaching the altar repeats a prescribed form of oath. Thereupon the tickets are taken from the chalice by scrutators appointed *ad hoc* from the electing body; the tickets are compared with the number of Cardinals present, and when it is found that any Cardinal has two-thirds plus one of the votes in his favour he is declared elected. Immediately he gives his assent he becomes Pope.

From the accession of Clement VIII in 1523 all Popes have been Italians.

| Name and family | Election | Name and family | Election |
|---|---|---|---|
| Benedict XIV (*Lambertini*) | 1740 | Pius IX (*Mastai-Ferretti*) | 1846 |
| Clement XIII (*Rezzonico*) | 1758 | Leo XIII (*Pecci*) | 1878 |
| Clement XIV (*Ganganelli*) | 1769 | Pius X (*Sarto*) | 1903 |
| Pius VI (*Braschi*) | 1775 | Benedict XV (*della Chiesa*) | 1914 |
| Pius VII (*Chiaramonti*) | 1800 | Pius XI (*Ratti*) | 1922 |
| Leo XII (*della Genga*) | 1823 | Pius XII (*Pacelli*) | 1939 |
| Pius VIII (*Castiglioni*) | 1829 | John XXIII (*Roncalli*) | 1958 |
| Gregory XVI (*Cappellari*) | 1831 | Paul VI (*Montini*) | 1963 |

The Roman Pontiff (in orders a Bishop, but in jurisdiction held to be by divine right the centre of all Catholic unity, and consequently Pastor and Teacher of all Christians) has for advisers and coadjutors the Sacred College of Cardinals, consisting, in March 1962, of 6 Cardinal-Bishops, 68 Cardinal-Priests and 13 Cardinal-Deacons. (These terms have only historical significance, all present Cardinals having been consecrated Bishops.) In 1586 Sixtus V fixed their number at 70 but John XXIII raised it to 75 and subsequently to 87. The Cardinals compose the Pope's Council and the various Sacred Congregations, govern the Church while the Apostolic See is vacant and elect the new Pope. They received the distinction of the red hat under Innocent IV, during the first General Council of Lyons, in 1246; and the title of Eminence from Urban VIII, in 1630. The style of 'Excellency' as applied to Archbishops and Bishops in official correspondence is now universally adopted by the Holy See.

After the Consistory of 19 March 1962 the College of Cardinals comprised 30 Italians, 8 Frenchmen, 6 Spaniards, 5 Americans, 3 Brazilians, 3 Germans, 2 Argentines, 2 British, 2 Canadians, 2 Portuguese, 2 Syrians, 2 Irish and 1 African, Armenian, Australian, Austrian, Belgian, Chilean, Chinese, Colombian, Cuban, Dutchman, Ecuadorean, Filipino, Hungarian, Indian, Japanese, Mexican, Peruvian, Pole, Uruguayan, Venezuelan.

The central administration of the Roman Catholic Church is carried on by a number of permanent committees called Sacred Congregations, composed of Cardinals, with Consultors and Officials. There are now 12 Sacred Congregations, viz., Holy Office, Consistorial, Discipline of the Sacraments, Council, Religious, Propaganda Fide, Rites, Ceremonial, Extraordinary Ecclesiastical Affairs, Seminaries and Universities, the Basilica of St Peter's and for the Oriental Church. Besides these there are several permanent Commissions, for example, one for Biblical Studies, another for Historical Studies, another for Preservation of the Faith in Rome, another for Codification of Canon Law. Furthermore, the Roman Curia contains 3 tribunals, to wit, the Apostolic Penitentiary, the Supreme Tribunal of the Apostolic Signature and the Sacred Roman Rota; and, lastly, various offices, as the Apostolic Chancery, the Apostolic Datary, the Apostolic Chamber, the Secretariat of State, etc. The Pontificial Academy of Sciences was revived by Pius XI in 1936.

There are 31 cardinals at the Curia, of whom 21 are Italian.

More than 2,500 Roman Catholic prelates and 30 observer-delegates from other Christian Churches attended the first session of the Second Vatican Council which opened on 11 Oct. and closed on 8 Dec. 1962. The second session took place from 29 Sept. to 4 Dec. 1963.

The Holy See maintains diplomatic relations with Austria, Belgium, Burundi, China (Taiwan), Congo, Ethiopia, Finland, France, Germany, India, Indonesia, Iran, Irish Republic, Italy, Japan, Lebanon, Liberia, Luxembourg, Monaco, Netherlands, Pakistan, Philippines, Portugal, San Marino, Senegal, Spain, Switzerland, Syria, Turkey, UAR, UK and all Latin-American republics except Mexico.

In 1930 the issue of Papal coinage was resumed, after a lapse of 60 years. In virtue of a special convention between the Vatican City and the Italian Government (last renewed in 1962), each state allows the currency of the other to circulate in its territory. The Vatican City has, however, given an undertaking that the total value of its coins issued in ordinary years will not exceed 100m. lire, 200m. lire in years of 'Sede vacante' or holy years, or 300m. in the year of the opening of a Council.

In 1961 the Roman Catholic population within the British Commonwealth was estimated at over 32m. In the USA (including possessions) there were over 42m. Roman Catholics. Throughout the world the Roman Catholic population is claimed to be 527m.

*Envoy and Minister to the Holy See:* Sir Peter Scarlett, KCMG, KCVO.
*First Secretary:* Donald Stewart Cape.

*Apostolic Delegate*[1] *for Great Britain, Malta and Gibraltar:* Mgr Igino Cardinale, Titular Archbishop of Nepte.

---

[1] An apostolic delegate is an ecclesiastical official sent by the Holy See to a particular country. He has no claim to diplomatic status or privileges. Such delegates have been appointed to a number of countries including the USA, Canada, Australia, East, West and South Africa. The Papal representatives in India and Pakistan have diplomatic status.

# VENEZUELA

## República de Venezuela

**CONSTITUTION AND GOVERNMENT.** The constitution of 1958 provides for popular election for a term of 5 years of a President, a National Congress, and State and Municipal legislative assemblies, and guarantees the freedom of labour, industry and commerce. Aliens are assured of treatment equal to that extended to nationals.

Congress consists of a Senate and a Chamber of Deputies. At least 2 Senators are elected for each State and for the Federal District. Senators must be Venezuelans by birth and over 30 years of age. Deputies must be native Venzuelans over 21 years of age; there is 1 for every 50,000 inhabitants. The territories, on reaching the population fixed by law, also elect deputies. Voting (by proportional representation) is compulsory for men and women over 18. Owing to the high rate of illiteracy, voting is by coloured ballot cards.

The President must be a Venezuelan by birth and over 30 years of age; he has a qualified power of veto.

The following is a list of presidents since 1899:

| | Took Office |
|---|---|
| Gen. Cipriano Castro | 24 Oct. 1899[1] |
| Gen. Juan Vicente Gómez | 19 Dec. 1908[4] |
| Dr Victorino Márques Bustillos | 3 May 1915[3] |
| Gen. Juan Vicente Gómez | 3 May 1922 |
| Dr Juan Baustista Pérez | 3 May 1929 |
| Dr Pedro Itriago Chacin | 24 June 1931[2] |
| Gen. Juan Vicente Gómez | 13 July 1931[5] |

[1] Deposed. [2] Resigned. [3] Provisional.

[4] Re-elected for period 1915–22, but declined to take office, and as President-elect served as C.-in-C., while his successor acted as Provisional President: he was dictator to the time of his death in Dec. 1935, naming nominal presidents but retaining complete power.

[5] Died 17 Dec. 1935. [6] Assassinated 13 Nov. 1950.

*President:* Dr Raúl Leoni, elected 1 Dec. 1963 with 957,699 out of 2,918,896 votes; assumed office 11 March 1964.

Presidential and general elections, held on 1 Dec. 1963, resulted in the leader of the Democratic Action party being elected as President of the Republic and of a Congress in which his party was in a minority in both houses. The voting for Congress was: Democratic Action (AD), 936,052; Democratic Republican Union (URD), 497,425; Christian Socialist (COPEI), 596,255; Independent Group (IPFN), 381,507; Popular Democratic Federation (FDP), 274,108; Democratic Action (Opposition), 98,454; others, 77,703.

*Foreign Minister:* Dr Marcos Falcón Briceño.

The city of Caracas is the capital. The 20 states, autonomous and politically equal, have each a legislative assembly and an elected governor. The states are divided into 156 districts and 613 municipalities. There are also 2 federal territories with 7 departments, and a federal district with 2 departments and 2 parishes. Each district has a municipal council, and each municipio a communal junta. The federal district and the 2 territories are administered by the President of the Republic.

*National flag:* Yellow, blue with 7 yellow stars in a semi-circle, red (horizontal).

*National anthem:* Gloria al bravo pueblo (1811; words by Vicente Salias, tune by Juan Landaeta).

**AREA AND POPULATION.** The official estimate of the area is 912,050 sq. km (352,143 sq. miles): the frontiers with Colombia, Brazil and British Guiana extend for 2,972 miles. Over half the population live in the valleys of Caracas and Valencia (the latter was once the capital). There are 20 states, 2 territories, the federal district and the federal dependencies (*i.e.*, islands in the Antilles); further states may be created from the territories. Bolívar, the largest state, has an area of 91,868 sq. miles; the other states are far smaller. The federal district embraces 745 sq. miles.

The language of the country is Spanish.

Population according to the census (revised) of 26 Feb. 1961:

| State | Capital | Pop. |
|---|---|---|
| Anzoátegui | Barcelona | 382,002 |
| Apure | San Fernando | 117,577 |
| Aragua | Maracay | 313,274 |
| Barinas | Barinas | 139,271 |
| Bolívar | Ciudad Bolívar | 213,543 |
| Carabobo | Valencia | 381,636 |
| Cojedes | San Carlos | 72,652 |
| Falcón | Coro | 340,450 |
| Guárico | San Juan | 244,966 |
| Lara | Barquisimeto | 489,140 |
| Mérida | Mérida | 270,668 |
| Miranda | Los Teques | 492,349 |
| Monagas | Maturín | 246,217 |
| Nueva Esparta | La Asunción | 89,492 |
| Portuguesa | Guanare | 203,707 |
| Sucre | Cumaná | 401,992 |
| Táchira | San Cristóbal | 399,163 |
| Trujillo | Trujillo | 326,634 |
| Yaracuy | San Felipe | 175,291 |
| Zulia | Maracaibo | 919,863 |
| Ter. Amazonas | Puerto Ayacucho | 11,757 |
| Ter. Delta Amacuro | Tucupita | 33,979 |
| Federal District | Caracas | 1,257,515 |
| Federal Dependencies | — | 861 |
| | Total | 7,523,999 |

On 30 June 1963 the total population was estimated at 8,143,629, of whom 3,586,000 were above the voting age of 18 years.

The 1961 census population of Caracas was 786,710 (metropolitan area, 1,336,119); Maracaibo, 421,166; Barquisimeto (sugar district), 199,691; Maracay, 135,353; Valencia, 163,601; San Cristóbal, 98,777.

The 1961 census excluded tribal Indians estimated at 31,800, of whom 20,000 are in Ter. Amazonas and 4,000 in Zulia.

Crude birth rate, 1961, 49·4 per 1,000 population; crude death rate, 8·5; crude marriage rate, 5·4; infantile mortality rate, in Caracas metropolitan area, 18·04 per 1,000 live births. Death rate from malaria has fallen from 143 per 100,000 population in 1935 to 0·7 per 100,000 in 1955.

*Housing.* In 1961 the Government considered 75 out of every 100 families still had inadequate housing and estimated a deficit of 700,000 units throughout the country.

**RELIGION.** The Roman Catholic is the prevailing religion, but there is toleration of all others. There are 4 archbishops, 1 at Caracas, who is Primate of Venezuela, 2 at Mérida and 1 at Ciudad Bolívar. There are 19 bishops. In the state primary schools religious instruction is given only to those children whose parents expressly request it. Protestants number about 20,000.

**EDUCATION.** Elementary instruction is free and, from the age of 7 to the completion of the primary grade, compulsory. In 1962–63 Venezuela had 12,599 primary schools, of which 997 were private, with 37,187 teachers and a total enrolment of 1,346,751 pupils; there were 669 secondary and technical schools, of which 367 were private, with a total of 197,454 pupils. For superior education (1961–62) there are the University of Los Andes at Mérida (2,921 students), the Central University in Caracas (300 years old, rebuilt and modernized in 1944) with 16,740 students, the University of Zulia at Maracaibo (3,607 students), the University of Carabobo (1,610 students), the University of Oriente (607 students), and the Instituto Pedagógico (1,992 students). The first 3 universities were granted autonomy on 28 Sept. 1946, and from 1 to 2% of the yearly national revenue has been assigned to them. A Workers' University in Caracas was set up by law in 1947. Two private universities in Caracas (Universidad Católica 'Andrés Bello', 2,377 students and Universidad Santa María, 1,280 students) were authorized by the Government in 1953. The census of 1950 showed that 48·7% of those 10 years of age and older were unable to read and write; in 1950, 1,347 centres with 33,000 adult pupils were operating.

*Cinemas* (1961). There were 660 cinemas.

*Newspapers* (1961). There were 34 daily newspapers and 89 weeklies out of a total of 357 periodicals with an estimated aggregate daily circulation of 568,000 In 1961 Caracas had 9 daily and 14 weekly newspapers with a total circulation of about 445,000.

**JUSTICE.** The Supreme Court, which operates in Divisions, each with 5 members, is elected by Congress for 5 years. The country is divided into 17 legal districts. They select their own President and Vice-President. The Federal Procurator-General is appointed for 5 years. There are lower federal courts.

The states have each a Supreme Court with 3 members, called respectively President, Relator and Chancellor. Each state has also a superior court, or superior tribunal, courts of first instance, district courts and municipal courts. In the territories there are civil and military judges of first instance, and also judges in the municipios. Finally, there is an income-tax claims tribunal.

**FINANCE.** The revenue and expenditure for fiscal years (ending 30 June) until 1961 and for calendar years from 1962 were, in 1m. bolívars, as follows:

| | *1960* | *1961*[1] | *1962* | *1963* | *1964*[2] |
|---|---|---|---|---|---|
| Revenue . | . 6,147·39 | 2,842 | 6,426·6 | 6,225 | 6,349 |
| Expenditure | . 6,147·17 | 2,842 | 6,827·0 | 6,225 | 6,349 |

[1] July–Dec.

[2] Estimates.

In US$ revenue has ranged from $711m. in fiscal year 1953 to $2,360m. in 1961.

On 20 Dec. 1958 a new decree law increased the income-tax rates. The Government's participation in the oil companies' profits went up from about 50 to 70%.

Principal items of the budget proposed for the fiscal year ending 31 Dec. 1964 (in 1m. bolívars): *Revenue:* Direct taxes (including oil), 2,171·5; commercial, 1,130·5; local, 1,818·1; indirect taxes, 850·5; industrial, 5·5; rates, 154·8; various, 54·1. *Expenditure:* Public works, 1,095·2; interior department, 1,207·6; exterior department, 40·9; finance, 1,003·2; educaiton, 682·5; health and social welfare, 527; defence, 634·9; communications, 263·4; mines and hydrocarbons, 87·9; labour, 53·2; justice, 156·4, and agriculture, 391·7.

On 30 June 1930, as a token of homage to Simón Bolívar, the Liberator, the external debt of 23,757,634 bolívars was completely paid off. Nevertheless, Marcos Pérez Jiménez' dictatorship left a short-term debt of nearly 5,000m. bolívars, which had to be paid off before reconstruction could proceed. On 21 April 1960 the Government contracted a loan of $200m. with 16 US banks.

The oil industry provided 73·57% of the local income tax collected during 1959.

The budgets of the states and territories for fiscal year 1959–60 totalled 1,021·15m. bolívars, of which 72·45% came from the Treasury, the rest being collected by the states. US investments, at 31 Dec. 1960, stood at 14,724m. bolívars.

British investments (in 1,000 bolívars), 31 Dec. 1960, had a value of 6,417·6, of which 6,329·5 were in the oil industry. British capital represented 9·24% of total foreign investments in 1958, and 29·74% in 1961.

The public debt on 31 Dec. 1963 was Bs.2,232m., and Treasury Reserves Bs.559·5m.

**DEFENCE.** In 1958 a Joint Staff Organization was established under the Minister of Defence for the closer integration of defence policy and administration of the three Services and the National Guard.

*Army.* All Venezuelans on reaching 18 years of age are obliged to serve 2 years in the Armed Forces. They can opt for the Air Force or the Navy instead of the Army, but their allocation is finally dependent upon current requirements. The Army's established strength of approximately 15,000 all ranks furnishes a cavalry regiment, 12 infantry battalions, 2 tank battalions and supporting artillery, engineering, anti-aircraft and supply services. There is a military academy for cadets, a school for staff studies and other technical training schools.

*Navy.* Strength includes 3 large destroyers built in Great Britain in 1953–56, 6 light destroyers built in Italy in 1956–57, 1 submarine, 12 patrol vessels, 4 landing ships, a repair ship, a surveying vessel, 11 coastguard vessels, 4 light transports and 2 tugs. Eleven coastguard vessels are operated by the National Guard. There is a naval academy for the training of officer cadets and in addition a school of staff studies and various technical training schools. Personnel in 1963: 3,200 officers and men and 2,500 Marine Corps.

*Air Force.* Formed in 1920, the Air Force is today a small, but well-equipped service with some 75 first-line aircraft and an equal number of transport, training, liaison and air/sea rescue machines. There are 4 fighter squadrons of F-86F Sabre, Venom and Vampire jet-fighters and 2 squadrons of jet-powered Canberra and piston-engined B-25 Mitchell bombers. Transport units are equipped with modern C-123 Provider tactical transports, in addition to a number of C-54 and C-47 aircraft. T-6 Texans and Beechcraft T-34 Mentors are used for basic instruction, with twin-engined Beechcrafts for crew training and versions of the Vampire and Canberra for operational conversion. Fifteen armed Jet Provost trainers were bought from Britain in 1962–63.

*National Guard*, a volunteer force of some 10,000 under the Ministry of Defence, is broadly responsible for internal security. It includes customs and forestry duties among its tasks.

**PRODUCTION.** Venezuela is divided into 3 distinct zones—the agricultural, the pastoral and the forest zone. In the first are grown coffee, cocoa, sugar-cane, maize, rice (as much as 10,000 tons has to be imported annually), wheat (grown in the Andes), tobacco, cotton, beans, sisal, etc.; the second affords grazing for more than 6m. cattle and numerous horses; and in the third, which covers a very large portion of the country, tropical products, such as caoutchouc, balatá (a gum resembling rubber), tonka beans, dividivi, copaiba, vanilla, growing wild, are worked by the inhabitants. Forest resources have been barely tapped; 600 species of wood have been identified.

Venezuela's economy has been based mainly on what the German economists call *raubwirtschaft*, a 'plunder-economy' which lives on the sale of capital assets, such as oil and iron ore, and not on current production. Efforts are being made, however, to develop a national economy independent of oil, with the result that 167,000 people are (1962) employed in manufacturing industries. Total investment in industry on 31 Dec. 1961 was Bs.4,197m. and goods valued Bs.3,007m. were produced that year. In 1962 food and beverages accounted for only 12·1% of total imports, compared with 21% in 1950.

A striking feature of the economy is the high index of the cost of living in Caracas; taking 1945 = 100, the index in Dec. 1961 was 165·31. The index of wholesale products (1956–57 = 100) was: National products, 105·85; imported, 128·29.

*Agriculture.* The 1950 census showed 40% of the population engaged in agriculture; the 1955 livestock estimate showed 6,230,000 cattle; 1950 census, 1,467,178 hogs. Area under cultivation is 5,530,898 acres.

Production in metric tons:

| | Beans | Beef | Cocoa | Yuca | Coffee |
|---|---|---|---|---|---|
| 1961 . . . | 30,990 | 769,533 | 9,051 | 534,839 | 53,502 |
| 1962 . . . | 23,030 | 167,487 | 14,794 | 322,806 | 48,879 |

| | Bananas | Pork | Potatoes | Rice | Sesame | Sugar |

| 1961 . . | 225,400 (stems) | 619,856 | 73,971 | 80,638 | 24,868 | 215,386 |
| 1962 . . | 436,900 (stems) | .. | 121,203 | 72,000 | 28,840 | 245,221 |

The coffee plantations number 62,673, covering 543,400 acres with 135m. bushes. The Venezuelan cocoa, from 13,000 plantations, is considered to be of high quality; it is grown chiefly in the states of Sucre and Miranda. The sugar industry has 6 government and 20 privately owned mills.

Under the Agrarian Reform Law of 1960, the Instituto Agrario Nacional establishes agricultural colonies where farmers are settled on smallholdings. In 1959, 3,615 farmers received 552,000 acres of land; since the Agrarian Reform Act of early 1960 to the end of 1961 further grants raised the figures to 40,225 and 3,750,000 respectively. The ultimate envisaged is 300,000 farmers possessing 74m. acres. There were some 12,700 tractors in use in 1960.

*Oil.* Venezuela is the largest petroleum exporting country in the world and the second largest producer; production, which began in 1917 with 18,000 cu. metres, had risen by 1962 to 185,685,000 cu. metres. Exports of crude oil in 1962 amounted to 129,151,000 cu. metres, exports of derivatives, 46,325,000 cu. metres. The oil-producing region around Maracaibo covering some 30,000 sq. miles, produced 74·2% of Venezuelan petroleum in 1961, against 70·2% in 1957.

Powerful foreign oil groups own all the concessions; Venezuelan capital (the CVP) is beginning, starting in July 1961, to enter the industry. Major producers are 3: Creole (Standard Oil of New Jersey), with 40% of total production; Shell de Venezuela, 25%, and Mene Grande (Gulf Oil), 13%. Nineteen companies are active. The government-owned CVP has centred its activities on the utilization of natural gas resources, but has produced relatively small amounts of crude oil from the Maracaibo region. Natural gas is produced during normal operations, the proportion utilized rising from 30% (1957) to 55·4% (1961). In June 1956 the dredging of a channel in the Maracaibo basin was completed, enabling ocean-going vessels to use the port of Maracaibo. The number of new wells drilled in recent years has been: 1960, 444; 1961, 477. 36,897 workers are employed in this industry. Latest estimates of proved reserves put the total at 2,684 cu. metres. 4·12m. hectares are under concession, and 10,350 wells in production.

*Mining.* There are important goldmines in the region south-east of Bolívar State and new deposits have been discovered near El Callao (1959) and Sosa Méndez (1961) in the Guayana region. Output, 1962, amounted to 28,774 troy oz. Imports of 7,000 kg per annum are necessary for industrial purposes. Diamond output, from Amazonas territory, was 134,176 carats in 1961. Manganese deposits, estimated at several million tons, were discovered in 1954. Phosphate-rock deposits (yielding from 64 to 82% tricalcium phosphate) are found in the state of Falcón; reserves of 15m. tons of high-quality rock have been established. The state of Sucre has large sulphur deposits. Coal is worked in the states of Táchira, Aragua and Anzoátegui. Existence of an important nickel deposit (at Loma de Hierro near Tejerías) was confirmed at the end of 1961. Saltmines are now worked by the Government on the Araya peninsula; output, 1962, 144,799 metric tons. Asbestos, nickel and copper pyrite are being exploited.

Iron ore is exploited in Bolívar State by the Orinoco Mining Co. and Iron Mines of Venezuela, subsidiaries respectively of the US Steel Corp. and the Bethlehem Steel Co. Proven reserves are 1,041m. metric tons. National output of iron ore, 1963, 11·75m. metric tons; 1962, 13·3m. Exports began in March 1951 and reached 13·3m. metric tons in 1962, valued at Bs.401m. Details in 1m. metric tons were:

A government steel works is being developed in Puerto Ordaz, with an annual capacity of 300,000 tons; production began at the end of 1961.

*Industry.* Venezuela is not yet highly industrialized, although industries are promoted behind tariff barriers. Many foreign (principally US) manufacturers have associated companies which also benefit from this protection. Total US investments, 31 Dec. 1958, were $3,750m., 80% in oil. The Corporación Venezolano de Fomento is aiming to diversify the national economy, and in the period 1958–61 made loans of Bs.23·95m. in the food, beverage, textile, metallurgical and chemical fields. There are cotton-mills at Caracas, Maracay and Valencia, producing textiles in the cheaper qualities, 6 cement factories at Valencia, Barquisimeto, Caracas, Portugalete, Maracaibo and San Cristóbal (with aggregate output of 1,523,335 metric tons in 1961), and 4 tyre factories at Valencia and Caracas. The clothing and footwear industries are well developed. 1·9m. tons of cement were produced in 1959 and 1·5m. in 1961. Electric power is being expanded rapidly and will be fully adequate on the completion of the Caroní hydro-electric works, capacity 2,400m. kwh. National production: 1957, 1,908m. kwh.; 1962, 5,882m kwh.

**Labour.** The first trade unions were those of the workers in the oilfields (36,897 in all) formed in 1935. Members of trade unions and peasant leagues now number 1·8m. The important Venezuelan Workers' Confederation has 600,000 members in 14 industrial and 21 regional federations and a peasant membership of 700,000. By 1963 over 500,000 workers were covered by long-term collective agreements.

Ministry of Development figures reported 2,735,000 people 'economically active' in 1961. These were (in 1,000): Agriculture, 739; services, 572;

manufactures, 295; commerce and finance, 304; building, 128; transport, 106, extractive, including oil, 47; public utilities, 25; unemployed, 328.

**COMMERCE.** The International Monetary Fund carries the values of Venezuela's exports and imports in the following convenient form (in 1m. bolívars):

| | *1957* | *1958* | *1959* | *1960* | *1961* | *1962* |

In US$1m. (at $1 = 3·35 bolívars) exports (f.o.b.) and imports (c.i.f.) have been as follows: 1955, $1,912·1m. and $992·1m.; 1956, $2,123·6m. and $1,249·2m.; 1957, $2,366·5m. and $1,667·7m.; 1958, $2,319·4m. and $1,432·3m.

The US, 1961, furnished $507m. of imports and took $877m. of exports.

Total trade between UK and Venezuela (according to British Board of Trade returns) for 6 years (in £ sterling):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|

| Re-exports from UK | 302,552 | 134,458 | 167,897 | 132,752 | 165,353 |

**COMMUNICATIONS.** *Shipping.* Foreign vessels are not permitted te engage in the coasting trade, except by special concessions or by contract with the Government. La Guaira, Maracaibo, Puerto Cabello and Guanta are the chief ports. In Dec. 1961 the merchant fleet—with a total of 93 ships of 100 tons and over—had an aggregate gross tonnage of 342,262; thi included 9 tankers of 22,184 gross tons.

The principal navigable rivers are the Orinoco and its tributaries Apur and Arauca, from San Fernando to Tucupita through Ciudad Bolivar Puerto Ordaz and San Félix; San Juan from Carípito to the Gulf of Paria and Esculante in Lake Maracaibo.

*Roads.* There were, 1961, 34,224 km of road fit for traffic the year round of these 8,500 km are paved, 9,800 km are gravel. There are 150 km o high-speed 4-lane autopista type. At the end of 1961 the World Bank mad its first loan to Venezuela—US$45m. for the 2 express roads in the north central part, Caracas–Tejerías and Valencia–Puerto Cabello. Moto vehicles, 1961, totalled 274,000 passenger cars and taxis; 97,000 deliver vans and trucks; 6,456 buses and coaches.

*Railways.* There are (1962) 300 km of narrow-gauge railway and 173 k of standard gauge run by the Instituto Nacional de Ferrocarriles. The ol railway system with various gauges is being gradually replaced by a moder standard-gauge system. There are also 300 km used by the two chief iro mining companies. Railway passengers, 1962, 312,467; goods carrie 1962, 177,304 metric tons; omnibus, taxi and coach passengers, 196 209,022,590.

*Post.* The telegraph system had a network, 1955, of 22,349 km with 43 telegraph offices. It is supplemented by wireless telegraphy, with 7 stations, and by wireless telephony. There are telephone systems in th principal towns (nationalized in 1954). There were 229,304 instruments i 1962, of which 96% were in automatic systems; 152,886 were in Caracas.

There are 77 radio stations at Caracas, Maracaibo, Maracay and other towns. There are 3 television stations in Caracas, of which 2 cover, with relays, most of the country. In Oct. 1963 a new station with transmitter located in Valencia but relaying programmes to Caracas began operations.

*Aviation.* The chief Venezuelan airlines are LAV (Líneas Aéreas Venezolanas), a government-owned concern, and AVENSA (Aerovías Venezolanas). Both operate numerous internal services. VIASA operates their former international routes in conjunction with KLM. In addition, there are 3 specialist air freight companies. In all there are over 100 commercial aircraft in operation, including modern long-range jet-engined craft and Viscount turbo-props with Rolls-Royce engines. In addition to Venezuelan international services, a number of US and Latin-American and European lines operate services to Venezuela. BOAC operates twice-weekly flights between London and Caracas.

**CURRENCY.** The official monetary unit is the *bolívar*, with a value of 29·8507 cents US. What is known as the 'oil-dollar rate' is 3·09 bolívars = US$1, a higher rate for the bolívar than 3·35, which is mainly for imports. The 'mixing rate', for sales of coffee and cocoa, is 4·25 bolívars = US$1.

Gold may be privately imported in unlimited amounts and retained indefinitely, but subsequent dealings and exports are subject to licence. Although foreign-exchange rates are pegged by the Central Bank and disbursements are allocated to certain preferential types of expenditure, the commercial banks are free to buy or sell. The rate was steadied throughout the second half of 1962 at Bs.5·54 to the US$.

The bolívar is divided into 100 *céntimos.* Gold coins, 100 (*pachanos*), 20 and 10 bolívars have been minted but are no longer in circulation; silver coins are 5 (*fuerte*), 2, 1, $\frac{1}{2}$ (*real*) bolívars, and $\frac{1}{4}$ (*medio*) bolívars; copper–nickel, $12\frac{1}{2}$ céntimos (*locha*) and 5 céntimos (*puya*).

The bank-notes in circulation are 500, 100, 50, 20 and 10 bolívars. The circulation of foreign bank-notes is forbidden.

**BANKING.** In Oct. 1939 a Central Bank was established, with a capital of 10m. bolívars (one-half by the Government and one-half by the public) to regulate the currency and to act as fiscal agent for the Government. This was opened on 1 Jan. 1941 with a gold stock equal to $29m., which rose to $503m. in Oct. 1956. On 31 Aug. 1963 against a gold stock of 1,107m. bolívars (and foreign exchange of 294m. bolívars), the Central Bank had notes in circulation of 1,446m. bolívars; deposits were 779m. bolivars.

On 31 Dec. 1961 money in circulation was Bs.3,689m. (compared with Bs.3,579m. at the end of 1960).

Before 1939 the Bank of Venezuela, with (now) a capital of 105m. bolívars, was the sole depository of government funds and controlled the circulation of the currency. There are 37 commercial banks, of which 32 are Venezuelan (including the Banco Nacional de Descuento, with an authorized capital of 120m. bolívars), Banco Unión (100m.), Banco Mercantil y Agrícola (60m.), Banco Venezolano de Crédito (42m.), Banco de Maracaibo (40m.); and 5 are foreign (2 British, 1 American, 1 Dutch and 1 French–Italian). Banco Obrero, with capital and reserves of 1,038m. bolívars, and Banco Agrícola y Pecuario (176m.) are important instruments of official policy.

**WEIGHTS AND MEASURES.** Decrees of 1875 and 1917 introduced the metric system.

# VIETNAM

**HISTORY.** The recorded history of Vietnam can be traced to Tonkin (now known as the northern part of Vietnam) at the beginning of the Christian era. Conquered by the Chinese (Han dynasty) in A.D. 111, the kingdom of Nam-Viet, as it was then called, broke free of Chinese domination in 939, though at many subsequent periods it again became a nominal vassal of the Chinese emperors.

By the end of the 15th century the Vietnamese had conquered most of the kingdom of Champa (in Annam, now known as the central part of Vietnam) and by the end of the 18th had acquired Cochin-China (now known as the southern part of Vietnam), formerly Cambodian territory.

French interest in Vietnam started in the late 16th century with the arrival of French and Portuguese missionaries. The most notable of these was Alexander of Rhodes, who, in the following century, romanized Vietnamese writing. At the end of the 18th century a French bishop and several soldiers of fortune helped to establish the Emperor Gia-Long (with whom Louis XVI had signed a treaty in 1787) as ruler of a unified Vietnam, known then as the Empire of Annam.

An expedition sent by Napoleon III in 1858 to avenge the death of some French missionaries led in 1862 to the cession to France of part of Cochin-China, and thence, by a series of treaties between 1874 and 1884, to the establishment of French protectorates over Tonkin and Annam, and to the formation of the French colony of Cochin-China. By a Sino-French treaty of 1885 the Empire of Annam (including Tonkin) ceased to be tributary to China. Cambodia had become a French protectorate in 1863, and in 1899, after the extension of French protection to Laos in 1893, the Indo-Chinese Union was proclaimed.

In 1940 Vietnam was occupied by the Japanese and used as a military base for the invasion of Malaya. During the occupation there was considerable underground activity among nationalist, revolutionary and Communist organizations. In 1941 a nominally nationalist coalition of such organizations, known as the Vietminh League, was founded by the Communists.

On 9 March 1945 the Japanese interned the French authorities and proclaimed the 'independence' of Indo-China. In Aug. 1945 they allowed the Vietminh movement to seize power, dethrone Bao Dai, the Emperor of Annam, and establish a republic known as Vietnam, including Tonkin, Annam and Cochin-China, with Hanoi as capital. In Sept. 1945 the French re-established themselves in Cochin-China and on 6 March 1946, after a cease-fire in the sporadic fighting between the French forces and the Vietminh had been arranged, a preliminary convention was signed in Hanoi between the French High Commissioner and President Ho-Chi-Minh by which France recognized 'the Democratic Republic of Vietnam' as a 'Free State within the Indo-Chinese Federation'. Subsequent conferences convened in the same year at Dalat and Fontainebleau to draft a definitive agreement broke down chiefly over the question of whether or not Cochin-China should be included in the new republic. On 19 Dec. 1946 Vietminh forces made a surprise attack on Hanoi, the signal for hostilities which were to last for nearly 8 years.

An agreement signed by the Emperor Bao Dai on behalf of Vietnam on 8 March 1949 recognized the independence of Vietnam within the French Union, and certain sovereign powers were forthwith transferred to Vietnam. Others remained partly under French control until Sept. 1954. The remainder connected with services in which Cambodia, France, Laos and Vietnam had a common interest were regulated by the Pau conventions of Dec. 1950. These conventions were abrogated by the Paris agreements of 29 Dec. 1954, which completed the transfer of sovereignty to Vietnam. Supreme authority in the military field remained with the French until the departure of the last French C.-in-C. in April 1956. Treaties of independence and association were initialled by representatives of the French and Vietnamese governments on 4 June 1954.

An agreement on the cessation of hostilities in Vietnam was reached on 20 July 1954 at the Geneva conference. The agreement was signed on behalf of the C.-in-C. of the French Union Forces in Indo-China and on behalf of the C.-in-C. of the People's Army of Vietnam. The Government of Vietnam did not sign the agreement.

Important articles of the agreement were: (i) The withdrawal within 300 days, by stages, of the forces of both parties to regroupment zones on either side of a provisional military demarcation line (this line divides Vietnam at about 17° N.); (ii) pending general elections designed to bring about the unification of Vietnam, the conduct of civil administration in each zone to be in the hands of the party regrouped in that zone; (iii) until the expiry of the 300 days civilians to be permitted and helped to move to and live in the zone of their choice; (iv) a ban on the introduction of fresh troops, military personnel, arms and munitions, and on the establishment of new foreign military bases in either zone; (v) a ban on the adherence of either zone to any military alliance. An international commission composed of representtives of Canada, India and Poland is responsible for the control and supervision of the application of the provisions of the agreement.

The final declaration of the Geneva conference (21 July 1954) declared that the general elections should take place in July 1956. The elections did not take place and Vietnam remains in effect divided into two separate countries—the northern and southern zones.

## SOUTHERN ZONE

### VIET NAM CONG HOA—REPUBLIC OF VIETNAM

**AREA AND POPULATION.** The zone comprises most of the 15 southern provinces of the central part of Vietnam and the 23 provinces of the southern part of Vietnam. It has an area of 171,665 sq. km (66,263 sq miles). The population was estimated in 1962 at 14·2m., including some 677,000 highlanders and 454,000 Cambodians, Chinese and French. As a consequence of the Geneva agreement over 800,000 refugees from the northern zone have migrated to the south. The 2 chief towns are Saigon, the capital (1962 population of Saigon–Cholon, 1·4m.) and Hué (103,500). The population is concentrated in the fertile plain of the Mekong Delta in the southern part and in the lowland region of the central part. The highland region of the central part is sparsely populated by primitive people racially distinct from the Vietnamese. They consist of various tribes, Bahnar, Rhadé Jarai, etc.

**CONSTITUTION AND GOVERNMENT.** On 23 Oct. 1955 a referendum showed a majority of 98% in favour of the deposition of the Emperor Bao Dai and the elevation of Ngo-dinh-Diem to Chief of State. On 26 Oct., accordingly, M. Diem was proclaimed Chief of State, and his first act was to declare Vietnam a Republic of which he became the President.

On 26 Oct. 1956 a new Constitution was promulgated under which executive power is vested in the President and legislative power in a single chamber National Assembly. Both are elected by universal suffrage and secret ballot.

On 19 Oct. 1961 the President declared a state of emergency and the National Assembly conferred upon the President full powers 'to protect national security and to mobilize all manpower resources'. In 1963 these powers were used by the President and his Roman Catholic family and entourage to launch a ruthless persecution of Buddhists and other opponents of the Diem dictatorship. On 1 Nov. 1963 their régime was overthrown by the Army. President Diem and his brother were shot, and the Revolutionary Military Council took over the government. The junta, headed by Maj.-Gen. Duong Van Minh, was on 30 Jan. 1964 ousted by another group of generals, led by Gen. Nguyen Khanh and the commander of the Saigon army corps, Gen. Tran Thien Khiem.

*Chief of State:* Gen. Duong Van Minh.
*Prime Minister:* Gen. Nguyen Khanh.
*Foreign Affairs:* Dr Phan Huy Quat. *Defence:* Gen. Tran Thien Khiem.

The National Assembly, elected on 27 Sept. 1963, is comprised of 50 members of the 'Personalist' bloc, 2 members of the Socialist Union and 71 independents.

**RELIGION.** Taoism in all its manifestations—ancestor worship, the worship of spirits and the worship of Vietnamese national heroes—is the real religion of the country. Buddhism is widespread, and in 1956 there were just over a million Catholics in the southern zone. Cao-Daism, a religious synthesis based on Christianity, Buddhism and Confucianism, and founded in 1926, had about 1·5m. followers at the end of 1954. The Hoa Hao sect, with about a million believers, is associated with Buddhism. The policial and military power of the Caodaist and Hoa Hao sects and of the non-religious Binh Xuyen sect was broken by the Government in 1955 and 1956.

**EDUCATION.** On 30 Sept. 1963 there were the following schools in the southern zone: 4,178 public primary schools (1,216,597 pupils and 21,513 teachers), 2,111 private and semi-private primary schools (276,659 pupils), 495 public and private secondary schools (264,866 pupils). The Universities at Saigon, Hué and Dalat with 12 faculties, had 17,929 students.

**JUSTICE.** Mixed Franco-Vietnamese courts were abolished on 16 Sept. 1954, when complete sovereignty in the judicial field was transferred to the Vietnamese Government. The Constitution provides for an independent judiciary.

**FINANCE.** The budget for 1964 forecasts expenditure of VN$28,500m. and receipts of just over VN$19,000m. USA aid continues to finance the majority of commercial imports. In addition, Vietnam has received assistance in the form of grants or loans from France, West Germany, Japan and Australia; negotiations are in train for a British loan.

**DEFENCE.** *Army.* South Vietnam maintained in 1963 an Army of about 198,000 men, including infantry, armour, artillery, an airborne brigade, engineer, signals and administrative units. All formations and units are commanded entirely by Vietnamese officers who are trained at the officers' schools at Dalat and Thuduc. There is also a military staff college at Dalat. There are also 2 auxiliary forces, the Civil Guard (83,000) and the Self-Defence Corps (103,000). The Army and auxiliary forces are being trained under the supervision of a US military Aid Assistance Group.

*Navy.* The Navy includes 5 escort vessels, 4 patrol vessels, 4 coastal minesweepers, 10 motor gunboats, 11 landing craft, 500 motorized junks and other small craft. Personnel, including the Marine Brigade, in 1963: 15,350 officers and men.

*Air Force.* The Air Force was reorganized as an independent service in 1955 and has since received considerable US assistance. Its main combat units have been equipped with more than 30 A-1H Skyraider piston-engined strike aircraft, and 70 T-28 trainers armed and converted for ground attack duties. Transport units are equipped with C-47s. Cessna aircraft are used for training. A small helicopter force employs H-19 and H-34 aircraft.

**PRODUCTION.** *Agriculture.* Rice and rubber are the two most important products. In 1962, 2·41m. hectares yielded 5,026,000 metric tons of paddy. 83,865 tons of rice were exported. 135,600 hectares were estimated to have produced 77,900 metric tons of rubber. Tea (1961 production, 4,860 metric tons), coffee, quinine and tobacco (1961: 8,470 tons) are grown in the high plateaux, which also produce cinnamon, vegetable dyes, bamboo, excellent timber, raw silk and vegetables. Other products are maize, sugar-cane (11,400 tons of white sugar was refined in 1962), groundnuts and copra. Cattle rearing is of some importance, though dairy farming is little developed. Pigs and poultry abound.

*Fisheries.* Fishing is an important occupation. Fresh and dried fish and fish sauce form major ingredients of the local diet. The deep-sea catch in 1953 was 30,000 tons; 1956, 100,000 tons; 1957, 120,000 tons.

*Mining.* The known mineral resources are limited to a small coal-bearing region at Nong-Son (near Da Nang); 71,002 metric tons were produced in 1962; a goldmine at Bong-Mieu, peat beds, and scattered deposits of molybdenum which have not been exploited and whose richness is not known. There are also important phosphate deposits on the Paracel Islands.

*Industry.* There is little heavy industry in South Vietnam. The construction of a small steel smelting and rolling-mill is contemplated; and western oil companies are constructing an oil refinery at Nha Trang. The industries are concentrated in the Saigon–Cholon area and mainly comprise rice-milling, brewing, distilling, ice-making, cotton spinning and weaving, the manufacture of gunny bags, cement, paper and tyres, the assembly of radios, motor scooters, sewing-machines and bicycles, the manufacture of mineral water, tobacco products and matches, the production of oxygen, acetylene and carbonic acid gases, and the processing of duck feathers. There are also small factories making soap, paint, ball-point pens, pencils, articles in plastic, ceramic tiles, aluminium hollow-ware, dry-cell batteries, fruit and fish conserves, etc.

The following are some figures of production in 1962: Beer, 59·8m. litres; mineral waters, 38m. litres; rice alcohol, 7·6m. litres; ice, 117,000 tons; matches, 35m. boxes; acetylene gas, 98 cu. decametres; carbonic acid gas, 59 tons.

The textile industry is under intensive development with the active help of Nationalist Chinese technicians and some American investment. A total of 64,800 spindles and over 2,100 looms had been installed by the end of 1963; a further 20,000 spindles are to be installed within 2 years.

The productive capacity of the existing jute-bag mill (3m. bags a year) is being doubled, and a second mill is to be built with a contribution of Italian capital. Between them these two factories will cover Vietnam's total estimated needs of some 9m. rice and sugar bags a year.

A new paper mill, in which there is also Italian investment, is in production (1963); a second plant is contemplated for the production of newsprint, with the participation of private United States investment capital. A new glass plant, with a capacity of about 50 tons a day, came into operation in 1960 and covers local requirements of bottles, phials and simpler kinds of glassware. Two cement factories and a particle board factory have been built; a urea fertilizer plant is under construction (with Japanese war reparations aid).

The sugar industry, which consists mainly of two modernized factories at Hiep-Hoa and Khank-Hoi, produced 58,600 tons of brown and white sugar in 1959. Unrefined sugar is imported. During 1959, 30 rice-mills were operating in the Saigon–Cholon area.

*Power.* In 1961, 329m. kwh. of electricity were produced in South Vietnam by fuel-oil and coal-fired stations and diesel-electric generating sets with a total rating of some 102,000 kw. In Oct. 1960 work began on the construction of an important hydro-electric project at Da-Nhim which is to be completed by 1964, when it will provide an annual supply of about 850m. kwh. This project is being paid for out of Japanese war reparations.

Under economic agreements with France, 3 thermal stations totalling 54,000 kw. are to be built at Nha-be, near Saigon, at the Nong-Son coalmines, and at Da-Nang (Tourane).

**COMMERCE.** In 1962 imports amounted to 9,240,000m. piastres (1961: 8,940,000m.) and exports to 1,960,000m. piastres (1961: 2,480,000m.).

Total trade between South Vietnam and UK (British Board of Trade returns, in £ sterling):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK . . | 555.162 | 1,691,085 | 3,426,672 | 3,314,155 | 2,854,822 |
| Exports from UK . . | 1,822,857 | 2,592,196 | 1,642,417 | 1,196,314 | 1,426,781 |
| Re-exports from UK . | 3.545 | 3,793 | 4,093 | 5,537 | 3,512 |

**COMMUNICATIONS.** *Roads.* In 1961 there were 19,000 km of roads in the southern zone. Of these, 23·5% were asphalted and 29% roughly metalled. The remainder can be used by private cars only during the dry 6 months of the year. The best roads are in the south, the hill country of the centre being badly served.

*Railways.* The railways in working order in 1959 were Saigon–Locninh (141 km), Saigon–Dong Hoi (1,200 km), Ngaba–Bangoi (4 km), Muong Man–Phanthier (12 km) and Tourcham (near Phan Rang)–Dalat (84 km). In

1959 the line Saigon–Hué was re-established through its entire length. Since 1961 the Saigon–Locninh line has been closed for security reasons.

*Shipping.* The major ports are Saigon and Da Nang. On 1 Jan. 1955 the Port of Saigon, formerly administered quadripartitely by Cambodia, France, Laos and Vietnam, reverted to Vietnamese control. During 1961 779 ocean-going ships of 5m. tons took 1,756,100 metric tons of goods into Saigon and 717 ocean-going ships of 4,868,000 tons took 473,800 metric tons of goods out.

In 1961 there were 4,762 km of navigable waterways, of which just over 2,000 were more than 2·5 metres deep and 50 metres wide.

*Post.* Of the 18,054 telephones in use on 1 Jan. 1963, 15,121 were in Saigon–Cholon.

*Aviation.* There were 3,486 arrivals of aircraft at the airfield of Tan Son Nhut (5 km from Saigon) in 1961, carrying 48,122 passengers and 3,475 departures of aircraft carrying 70,821 passengers. Other airports of importance for internal communications are Da Nang, Hué, Nhatrang, Dalat and Banmethuot. The Vietnamese Government took over complete control of civil aviation from the French on 15 Sept. 1954.

**MONEY AND BANKING.** The official parity of the *piastre* was fixed at 35 to the US$ on 1 Jan. 1960. Apart from the National Bank and its commercial subsidiary, the Crédit Commercial, there are 12 banks or bank-agencies at Saigon, including the Franco-Chinese Bank, the Bank of Indo-china, the Hongkong and Shanghai Bank, and the Chartered Bank.

On 31 Dec. 1954 the quadripartite Institut d'Emission ceased operations and a new Vietnamese National Bank became responsible for the issue of currency. A limited free exchange market was established on 1 July 1956, in which holders of foreign exchange may sell at rates about double the official quotation. Free-market exchange rates in 1963 were £1 = 206 *piastres*; US$1 = 73·5 *piastres.*

## NORTHERN ZONE

### VIET-NAM DAN-CHU CONG-HOA

### DEMOCRATIC REPUBLIC OF VIETNAM

**AREA AND POPULATION.** The zone comprises the 29 provinces of North Vietnam and the 4 northern provinces of Central Vietnam and has an area of 164,103 sq. km (63,344 sq. miles). According to the census of 1 March 1960, the total population was 15,916,955 (7,687,814 males, 8,229,141 females); estimate, March 1964, 17m. About 90% of the population live in rural areas; the capital city of Hanoi had 643,576 inhabitants (with suburbs, 850,000), and Haiphong, the next town in size and the port of the region, 369,248. The population is crowded into the delta of the Red River and into a plain running down the coast of Northern Central Vietnam; here it reaches densities of up to 1,000 per sq. km; in Thai Binh province 865 and in Nam Dinh 809 per sq. km.

About 85% of the population are Vietnamese, the remaining 15% consisting of various ethnic minorities. Whereas the Vietnamese are highly concentrated in the delta and the plains, the minorities are thinly spread in the extensive mountainous regions (highest mountain Fan-Si-Pan, 3,142 metres) which constitute four-fifths of North Vietnam's territory. North-east of the Red River, the Tays (504,000) are said to be the largest minority, followed by the Nungs (314,000), while south of the Red River are the Muongs (415,000), the Thais (385,000) and the Mees (220,000). The Thais are spread widely in the western part of North Vietnam and straddle the frontier with Laos; the Mees dwell mainly in small pockets of territory at an elevation of 3,000 ft or higher. There are also about 60,000 Chinese, chiefly in Hanoi and Haiphong.

**CONSTITUTION AND GOVERNMENT.** The second 'Constitution of the Democratic Republic of Vietnam' entered into force on 1 Jan. 1960 and is comparable in many respects to that of the People's Republic of China. It is stated in the preamble that North Vietnam is a 'people's democratic state based on the alliance between the workers and peasants and led by the working class', and that 'our people are resolved to develop further solidarity and unity of mind with the brother countries in the socialist camp headed by the great Soviet Union, and to strengthen solidarity with the peoples of Asia and Africa and peace-loving people all over the world'.

According to the constitution the 'DRV is advancing step by step from people's democracy to socialism' and aims at 'the peaceful re-unification of all Vietnam'. The National Assembly is elected every 4 years and normally meets twice a year. It has a permanent executive body in its Standing Committee, which is empowered to interpret the laws and enact decrees. All men and women become electors at the age of 18 and can be elected at the age of 21. The President of the Republic is elected by the National Assembly, and the Council of Ministers consists of the Premier, Vice-Premiers and other Ministers.

Local government is organized on the basis of 'democratic centralism'. A special form of autonomous administration has been established in the regions inhabited by the ethnic minorities. The largest autonomous regions are Viet-Bac (50,180 sq. km, 330,000 inhabitants) and Thai-Meo (26,000 sq. km, 800,000 inhabitants).

Elections to the National Assembly of North Vietnam were held in May 1960. There are 362 deputies, 56 of whom represent national minorities.

*President:* Ho Chi Minh.
*Vice-President:* Ton Duc Thang.

*Standing Committee of the National Assembly. Chairman:* Truong Chinh; *Secretary-General:* Hoang Van Hoan.

*Government Council. Premier:* Pham Van Dong; *Vice-Premiers:* Pham Hung, Vo Nguyen Giap (*Defence*), Phan Ke Toai, Nguyen Duy Trinh (*Chairman, State Planning Commission*), Le Thanh Nghi. *Foreign Minister:* Xuan Thuy. *Home Affairs:* Ung Van Khiem.

All political power in North Vietnam stems from the Workers' Party of Vietnam (Dang Lao Dong), a Communist Party founded in 1930; it had 620,000 members in 1963. The Politburo consists of 11 full and 2 alternate members. *President of the Party's Central Committee:* Ho Chi Minh; *First Secretary:* Le Duan.

*National flag:* Red, with a 5-pointed golden star in the centre.

**EDUCATION.** Primary education consists of a 10-year course divided into 1st level (4 years), 2nd level (3 years) and 3rd level (3 years). The number of children receiving primary education in the school year 1962–63 was 2·27m. There were also 49,600 students in middle technical schools and 15,900 receiving higher education in the normal colleges, the polytechnic institute, the institute of agriculture and forestry, the art school and the institute of economics and finance. The medium of education is the Vietnamese language.

The University of Hanoi had 144 teachers and 1,075 students in 1963. 3,000 students are said to be studying in other Communist countries.

*Newspapers* (1963). The official organ of the Workers' Party, *Nhan Dan*, has a circulation of 100,000. There are 2 other daily papers.

*Cinemas* (1961). There are 41 cinemas.

**HEALTH.** In 1960 there were 1,979 doctors and 21,900 hospital beds.

**FINANCE.** The budget for 1962 balanced at 1,725,152,000 *dong*. The expenditure was earmarked as follows: 62·5% for economic construction, 20% for defence and administration, 11·2% for social and cultural affairs.

From 1955 to 1963 foreign aid and loans amounted to 4,230m. *dong*, including 1,709m. from USSR and 1,871m. from China.

**DEFENCE.** The total armed forces comprise about 250,000 regulars and 100,000 men in para-military organizations.

*Army.* The North Vietnamese Army consisted in 1963 of 15 divisions.

*Navy.* In 1963 the Navy comprised 3 patrol vessels, 16 motor torpedo-boats and 30 motor gunboats. Personnel numbered 200 officers and 2,000 men.

*Air Force.* The Air Force, built up with Soviet and Chinese assistance, is believed to have one squadron of MiG-17 jet-fighters, a light transport squadron and army co-operation units equipped with training types.

**PRODUCTION.** The chief products are rice and coal. In 1963, 97% of the peasants were grouped in agricultural co-operatives, and all industrial and commercial firms were state-owned.

*Planning.* The first 5-year plan is running from 1961 to 1965, following a 3-year plan 1958–60. The plan is being subsidized by China (US$157·5m. credits), USSR (US$5m. grants and 107·5m. credits) and East European communist countries (US$62·5m. credits).

Targets (end of 1965): Paddy rice, 7m. tons; coal, 4·2m. tons; steel plate, 160,000 tons; electricity, 711m. kwh.

*Agriculture and Forestry.* In a good year the rice crop is sufficient to feed the population. Production in 1961 was officially estimated as follows (in 1,000 metric tons): Rice 5,530; sugar-cane, 518·9; maize (1960), 198; cotton, 8; tea, 2; timber, 630. The cultivated area in 1962 was 3m. hectares.

Other products are vegetables, coffee, tobacco, castor oil and shellac. A considerable quantity of raw silk is produced and woven locally.

*Livestock* (1962): 2·26m. water buffaloes and cattle, 4·2m. pigs.

*Fisheries.* Fishing is carried out, especially in Along Bay, which is rich in prawns and crayfish.

*Mining.* The open-cast anthracite mines near the Baie d'Along were claimed to have produced 3·3m. tons in 1962. North Vietnam also has rich deposits of phosphates; the claimed production of apatite ore in 1962 was 657,400 tons. Salt production was about 130,000 tons. Some tin is smelted and chromite ore extracted, and there are also deposits of iron, zinc, tungsten, antimony and manganese, but no recent information is available.

*Industry.* The chief older industries are a cement factory at Haiphong (1961 production, 452,600 metric tons), cotton-mills (55·3m. metres of textiles in 1961), a silk-mill (2·2m. metres in 1961), a brewery at Hanoi, 2 ice-making plants, a bottle factory, a factory producing oxygen, acetylene and carbonic acid, 2 small soap factories (5,200 tons in 1961), a tannery and some tile factories.

During the past 5 years a number of new factories have arisen. The most important, the Hanoi Engineering Works, was built with machinery and technical assistance supplied by the Soviet Union. China played the same role in the construction of new factories at Hanoi and Haiphong to produce matches, cigarettes, rubber goods, knitwear, soap, enamelware and electric lamps. Czechoslovakia helped with a plywood factory at Haiphong, Poland with a sugar refinery and East Germany with glassworks. The plastics factory at Haiphong and a sawmill at Vinh are also new. Scheduled for completion are a pottery factory, a textile mill, a super-phosphate factory at Phu To, a nitrogenous-fertilizer factory at Ha Bac, a paper-mill and a chemical plant both at Viet Tri. In April 1962 functionaries and workers in state organizations numbered 652,000.

*Power.* In 1962, 350m. kwh. of electricity are said to have been produced. A power plant at Wong Bi (capacity, 24,000 kw.) is being constructed with Soviet aid.

**COMMERCE.** North Vietnam's foreign trade is mainly with China and other Communist countries. No trade statistics are published.

Trade between North Vietnam and UK (British Board of Trade returns, in £ sterling):

| | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|
| Imports to UK | — | 9,441 | 12,234 | 26,091 |
| Exports from UK | 16,599 | 109,737 | 41,444 | 36,410 |
| Re-exports from UK | 17 | 387 | 250 | 108 |

**COMMUNICATIONS.** *Roads.* In 1952 there were about 13,500 km of roads. Many roads and bridges were destroyed during hostilities, but by 1963, 6,560 km are said to have been restored with Chinese help.

*Railways.* The railways in working order at the end of 1960 were Hanoi–Haiphong (104 km), Hanoi–Muc Quan (on the Chinese frontier near Langson; 162 km), Hanoi–Thanh Hoa (167 km), Hanoi–Laokay (296 km), Dong Anh–Thai Nguyen (51 km, completed 1960 to serve the projected steel works at Thai Nguyen).

*Shipping.* The principal port is Haiphong. It is regularly visited by Polish vessels. In 1953 there were 830 km of navigable waterways open to ships of less than 2 metres draft at high water, and 530 km at low.

The total volume of traffic by rail, road, river and sea in 1962 was stated to have been 2,463m. ton-km of freight and 1,372m. passenger km.

*Post.* Postal and telegraphic communications between the northern zone and China were officially opened on 1 Jan. 1955; and international mail for the UK is now carried by this route. A postal convention for the exchange of mail between North Vietnam and the French Union was signed in Hanoi on 11 July 1955. Direct radio-telegraph links with France, Hong Kong, India and Moscow have been established.

*Aviation.* Scheduled flights are operated by the Chinese airline between Peking and Gia Lam (the airport of Hanoi) twice a week. The Vietnamese operate internal services to Vinh and Dong Hoi (near the demarcation line) and to Dien Bien Phu.

**MONEY.** The monetary unit is the *dong* = 10 *hào* = 100 *xu*. There are coins of 1, 2 and 5 *xu*, and notes of 1, 2 and 5 *dong*. The official Vietminh rate of exchange for the Vietminh *dong* is 10·08 *dongs* to the £ sterling and 100 *dong* = 30·60 Russian roubles.

**DIPLOMATIC REPRESENTATION.** The USSR, the People's Republic of China and the other Communist countries recognize the government of the DRV and maintain embassies at Hanoi. Diplomatic relations exist also with Cuba, Guinea, Laos, Mali and Yugoslavia. French interests are attended to by a Delegate-General *ad interim*. The United Kingdom, India and Indonesia are represented at Hanoi by Consulates-General.

# YEMEN

## AL JAMHURIYA AL ARABIYA AL YAMANIYA

ON the death of the Imam Ahmad on 18 Sept. 1962, army officers seized power on 26–27 Sept., declared his son, Saif Al-Islam Al-Badr (Imam Mansur Billah Muhammad), deposed and proclaimed a republic. The republican régime was supported by Egyptian troops, whereas the royalist tribes received aid from Saudi Arabia. A United Nations mission has been trying with little success to stop the fighting between the republican and royalist tribes.

*Constitution and Government.* On 31 Oct. 1962 the revolutionary council issued a temporary constitution, providing for a President, the Council of the Revolutionary Command and a Council of Ministers until a National Assembly can be elected. The 'first interim constitution' was proclaimed on 13 April 1963. It vests power in the President and Commander-in-Chief, and the Presidential Council, to whom an Executive Council is responsible.

*President and Prime Minister:* Marshal Abdulla al-Sallal. *Foreign Minister:* Mustafa Ya'qub.

*National flag:* Red, white, black (horizontal), with one green 5-pointed star in the white stripe.

*Area and Population.* The area is about 75,000 sq. miles (195,000 sq. km), with a population of 4·5m. (official estimate, 1953). The capital is San'a (population, 80,000); Ta'iz has a population of 30,000.

The most important towns are the port of Hodeida (population, 30,000), San'a (altitude 7,260 ft) and Ta'iz (altitude 4,600 ft); other towns are Ibb (6,275 ft), Yerim (8,600 ft), Dhamar (7,650 ft) and the ports of Mokha and Loheiya.

There are between 0·5m. and 1m. Yemenis abroad, principally on the Red Sea and Persian Gulf coasts.

In the north the boundary between the Yemen and Saudi Arabia has been defined by the Treaty of Taif concluded in June 1934. This frontier starts from the sea at a point some 5 or 10 miles north of Maidi and runs due east inland until it reaches the hills some 30 miles from the coast, whence it runs northwards for approximately 50 miles so as to leave the Sa'da Basin within the Yemen. Thence it runs in an easterly and south-easterly direction until it reaches the desert area near Nejran.

The British and Yemeni Governments in 1934 concluded a treaty of friendship whereby Britain recognized the Imam as King of the Yemen. In 1951 they agreed on the exchange of diplomatic representatives.

*Production.* Wherever water-supply allows, and in general throughout the south-western part of the country, millet (*dhurra*) is grown as a subsistence crop. The traditional cultivation of coffee (no longer exported through Mokha) continues, but is giving place to that of *qat* (*cathula edulis*), a narcotic shrub. Cotton is grown in the Tihama, the coastal belt, round Bait al

Faqih and Zabid (seat of a medieval university). Fruit is plentiful, especially fine grapes from the San'a district.

In Nov. 1955 an oil and mineral concession for 30 years was granted to an American group known as the Yemen Development Corporation. The concession extends over an area of 40,000 sq. miles. No oil has yet been found.

Russian, Chinese and USA economic aid has been provided. The Chinese have built a road from Hodeida to San'a; the Russians have built a new port near Hodeida. The Americans are building a metalled road from Mokha to Ta'iz and San'a, and installing a water-supply for Ta'iz.

*Trade.* Imports to UK, £104,624 in 1958; £30,403 in 1959; £47,230 in 1960; £97,714 in 1961; £105,434 in 1962; £154,631 in 1963. Exports from UK, £10,229 in 1958; £32,084 in 1959; £29,369 in 1960; £40,574 in 1961; £53,099 in 1962; £27,523 in 1963. Re-exports, £128 in 1958; £20,500 in 1959; nil in 1960; £174 in 1961; £38 in 1962; nil in 1963. These figures are misleading as most British goods enter Yemen as re-exports from Aden.

*Currency.* The currency is the silver *riyal* of 40 *bugshahs* (approximately 6*s.* 6*d.*).

## DIPLOMATIC REPRESENTATIVES

Before the revolution Yemen maintained legations in Czechoslovakia, Ethiopia, the German Federal Republic, Iraq, Italy, Jordan, Lebanon, Saudi Arabia, Somalia, USSR, UAR, UK, USA.

### OF GREAT BRITAIN IN THE YEMEN

The legation was withdrawn on 16 Feb. 1963 at the request of the republican government.

### OF YEMEN IN THE USA (Universal Building, 1165, 1825 Connecticut Ave., Washington, D.C., 20008)

*Ambassador:* Mohsin A. Alaini.
*Counsellor:* Abdelhadi Al-Hamdani.

### OF THE USA IN YEMEN

*Minister-Counsellor:* B. Cortada (*Consul-General*). *Army Attaché:* Maj. William D. Quarrie.

# YUGOSLAVIA

## FEDERATIVNA SOCIJALISTIČKA REPUBLIKA JUGOSLAVIJA—SOCIALIST FEDERAL REPUBLIC OF YUGOSLAVIA

On 29 Nov. 1945 Yugoslavia was proclaimed a republic. On 8 March 1947 King Peter II and the other members of the Karageorgevitch dynasty were deprived of their nationality and their property was confiscated.

The peace treaty with Italy, signed in Paris on 10 Feb. 1947, stipulated the cession to Yugoslavia of the greater part of the Italian province of Venezia Giulia, the commune of Zara and the island of Pelagosa and the adjacent islets (*see* p. 1163).

**CONSTITUTION AND GOVERNMENT.** The Constitution passed on 31 Jan. 1946 declared that the Federal Republic is composed of the 6 republics: Serbia, Croatia, Slovenia, Bosnia and Herzegovina, Macedonia and Montenegro.

On 13 Jan. 1953 a new Constitution (Fundamental Law) confirmed the management of all public affairs by the workers and their representatives (which was introduced in 1950) as the basis of the entire social, economic and political system of Yugoslavia.

The Constitution promulgated on 7 April 1963 changed the name of the country into the Socialist Federal Republic of Yugoslavia, composed of the socialist republics of Bosnia and Herzegovina, Crna Gora (Montenegro), Croatia, Macedonia, Serbia and Slovenia (*i.e.*, now ranking in alphabetical order).

According to the new Constitution the working people are the sole holder of power and the only factor taking decisions on social affairs. Social self-government is exercised by the representative bodies of communes, districts, autonomous provinces, republics and the Federation. The rights to self-government and distribution of income proclaimed in 1953 are now extended to the employed in public services as well. The former Council of Producers, in which only the workers and employees engaged in economic production were represented, has been replaced by councils of working communities representing the working people employed in every field of social activity. These representative bodies are the supreme organs of authority and social self-government in each territorial community. They consist of delegates of citizens (political councils) and of delegates of working people (councils of working communities).

Every citizen over the age of 18 has the suffrage. The maximum working week is 42 hours. Religion is free.

All the means of production as well as mineral and other natural resources are social property. The exceptions are peasants' holdings (up to the maximum of 10 hectares of arable land) and handicrafts. Citizens may be owners of houses and dwellings for their personal and family needs.

*National flag:* Blue, white, red (horizontal); with a red 5-pointed star in the middle.

The Federal Assembly is the supreme organ of government and social self-government of the Federation. It has 5 chambers (Federal, Economic, Education and Culture, Social Welfare and Health, Organizational-Political Chamber); every chamber has 120 deputies. The Federal Chamber comprises also 70 members delegated by the 6 republics and 2 autonomous provinces; they sit as a Chamber of Nationalities to safeguard the rights and equality of peoples and republics.

Elections were held from 24 May to 16 June 1963 for the Federal Assembly (670 members) and the assemblies of the 6 socialist republics (2,274 members), 2 autonomous provinces (540 members), 40 districts (4,000 members) and 577 communes (42,907 members).

The members of all assemblies are being elected for a 4-year term. Every second year, one-half of each assembly is renewed. No person can be elected twice successively as a member of the same chamber of the same assembly or of the Executive Council. The President of the Republic can be re-elected for a second 4-year term; this restriction does not apply to Josip Broz-Tito. Federal and republic officials cannot hold the same post longer than 4 years except when the assembly approves it.

The Federal Assembly at a joint meeting of all Chambers elects the President and the Vice-president of the Republic, and the president and vice-president of the Federal Assembly. The functions of the President of the Republic are separated from those of the President of the Federal Executive Council.

The President and the members of the Federal Executive Council are elected by the Federal Chamber from among its deputies. The Federal Executive Council is the political executive organ of the Federal Assembly. Besides the 12 elected members, the presidents of the executive councils of the republics, the federal state secretaries of foreign affairs and defence, the federal secretaries and the secretary of the Federal Executive Council are *ex-officio* members of the Federal Executive Council.

*President of the Republic:* Josip Broz-Tito (elected 14 Jan. 1953; re-elected 30 Jan. 1954, 19 April 1958 and 30 June 1963).

*Vice-president of the Republic:* Aleksandar Ranković (elected 30 June 1963).

*President of the Federal Assembly:* Edvard Kardelj (elected 30 June 1963).

*Deputy Chairmen:* Boris Krajger, Miloš Minić, Veljko Zeković. *Secretary:* Milivoj Rukavina.

*State Secretary for Foreign Affairs:* Koča Popović.

*State Secretary for National Defence:* Ivan Gošnjak.

*Secretary for Home Affairs:* Vojin Lukić.

*Secretary for Finance:* Kiro Gligorov.

*Secretary for Foreign Trade:* Nikola Djuverović.

*Chairman, Committee for National Development Plan:* Miloš Minić.

In addition to the State Secretariats, there are 15 Secretariats.

*Chairmen of the Republic Executive Councils:* Serbia: Dušan Petrović-Šane; Croatia: Ivan Krajačić; Slovenia: Ivan Maček; Bosnia and Hercegovina: Hasan Brkić; Macedonia: Vidoe Smilevski; Montenegro: Andrija Mugoša.

The Communist League of Yugoslavia had 1,018.331 members in Dec. 1962. The Executive Committee of its Central Committee had, in April 1959, 14 members; Tito (*Secretary-General*), Kardelj, Ranković, Gošnjak, Vukmanović (*Chairman of the Federation of Trade Unions*) (*Secretaries*); Gjuro Pucar-Stari, Lazar Koliševski, Franc Leskošek, Vladimir Bakarić, Blažo Jovanović, Miha Marinko, Petar Stambolić (*Chairman of the People's Assembly*), Jovan Veselinov and Veljko Vlahović.

**AREA AND POPULATION.** According to the census taken 31 March 1961 the area and population of Yugoslavia are shown as follows:

| Federal units | Area in sq. km | Population | Pop. per sq. km |
|---|---|---|---|
| Bosnia and Hercegovina | 51,129 | 3,277,948 | 64·1 |
| Montenegro | 13,812 | 471,894 | 34·2 |
| Croatia | 56,538 | 4,159,696 | 73·6 |
| Macedonia | 25,713 | 1,406,003 | 54·7 |
| Slovenia | 20,251 | 1,591,523 | 78·6 |
| Serbia with Vojvodina, Kosovo and Metohija | 88,361 | 7,642,227 [1] | 86·5 |

Three closely allied languages are recognized in the Yugoslav state: Serbo-Croat, Macedonian and Slovene. Serbo-Croat serves as the *lingua franca* of the state, Serb being printed in Cyrillic, and Croat in Latin characters. Macedonian is printed in the same Cyrillic characters as Serb (the Cyrillic alphabets used for Bulgarian, Russian, Ukrainian and Byelo-Russian are each slightly different from this), while Slovene is written exclusively in Latin characters.

**RELIGION.** All religions recognized by law enjoy the same rights. The Church is separated from the State. The percentage of the denominations was as follows in 1953: Orthodox, 41·2%; Roman Catholics, 31·7%; Moslems, 12·3%; Protestants, 0·9%; without religion, 12·6%.

The Serbian Orthodox (Pravoslav) Church is ruled by a Patriarch and a Holy Synod. On 12 Sept. 1920 the Patriarchate of the Serbs, originally established by King Stephen VII Dushan on 9 April 1346 and suppressed by Sultan Mustafa III on 13 Sept. 1776, was reconstituted. The present Patriarch is Mgr Gherman (elected in 1958). The Patriarchate exercises jurisdiction over all orthodox Christians in Yugoslavia as well as over orthodox Serbs in Rumania and Hungary. The highest legislative and administrative body is the Sveti Arhijerejski Sabor, an assembly constituted by all the bishops, who meet once or twice a year. The highest executive body is the Holy Synod, composed of the Patriarch and 4 bishops. The Serbian Orthodox Church is divided into bishoprics, 23 within the country and 2 abroad (the diocese of Budim in Budapest and the American–Canadian diocese in Libertyville, Ill., USA). There are about 2,000 priests of orthodox creed in Yugoslavia.

The Roman Catholic Church in Yugoslavia is divided into 3 provinces: Belgrade with 2 suffragan sees, Sarajevo with 2 suffragan sees and Zagreb with 4 suffragan sees. In addition, there is an archbishopric at Bar and 7 bishoprics which depend immediately upon the Holy See. Relations between Yugoslavia and the Vatican were broken off in Dec. 1952.

The Old Catholic Church has a bishop and a Synodal Council at Zagreb, who exercise jurisdiction over all adherents of their creed.

The Protestants include 4 Lutheran churches numbering over 99,000; the Reformed Church of Yugoslavia, which numbers 35,000; and smaller groups of Baptists, Adventists and Methodists, numbering about 10,000 in all.

The Moslem Religious Union has one Reis-ul-Ulema, whose seat is in Sarajevo. The administration and supervision over all Moslem religious, educational and cultural activities is exercised by the ulema-medjlissas: one at Sarajevo and one at Skopje.

The Jewish community has one Grand Rabbi, with his seat at Belgrade.

**EDUCATION** (1961–62). Elementary schools (4-year course and complementary schools (6- and 8-year courses), 14,568 with 89,611 teachers and 2,895,694 pupils; senior secondary schools, 275 with 5,512 teachers and 94,651 pupils; teachers' training colleges, 108 with 2,005 teachers and 30,335 students; technical schools, 1,272 with 17,947 teachers and 278,336 students; schools for adults, 1,007 with 6,119 teachers and 73,040 pupils.

For higher and specialized education there were 244 faculties, academies and high schools with 12,475 professors and instructors and 158,010 students.

The national minorities have been provided with elementary, secondary and teachers' training schools of their own, namely: Albanian (870, 8, 27), Magyar (262, 6, 31), Bulgarian (89, 1, 1), Czech (13, 1, 0), Slovak (33, 1, 1), Italian (28, 5, 1), Rumanian (35, 1, 2), Turkish (56, 1, 2), Ruthenian (5, 0, 0).

*Cinemas* (1962). There were 1,613 cinemas with a seating capacity of 547,682.

**JUSTICE.** There are county tribunals, district courts, the supreme court of the Autonomous Province of Vojvodina, supreme courts of the constituent republics and the supreme court of the Socialist Federal Republic of Yugoslavia. In county tribunals and district courts the judicial functions are exercised by professional judges and by lay assessors constituted into collegia. There are no assessors at the supreme courts.

All judges are elected by the social-political communities in their jurisdiction. The judges exercise their functions in accordance with the legal provisions enacted since the liberation of the country.

**FINANCE.** Revenue and expenditure for calendar years (in 1m. dinars):

| | *1958* | *1959* | *1960* | *1961* | *1962* | *1963*[1] |
|---|---|---|---|---|---|---|
| Revenue . . | 456,038 | 602,154 | 812,216 | 933,519 | 989,460 | 1,042,800 |
| Expenditure . . | 502,974 | 588,243 | 727,380 | 942,143 | 1,051,163 | 987,000 |

[1] Estimates.

The revenue, 1962 (and 1961), was composed of 556,333m. (547,254) dinars in the federal budget, 111,913m. (106,950) dinars in the states budgets and 321,214m. (279,315) dinars in the people's committees' budgets.

Of the expenditure, 1962 (and 1961), 587,308m. (538,809) dinars were allotted to the federal budget, 121,381m. (111,135) to the states budgets and 342,474m. (292,199) to the people's committees' budgets.

Main items of federal expenditure in 1962: Defence, 270,089m.; social services, 26,956m.; investments in national economy, 6,495m. dinars.

In 1949–50 the US Export-Import Bank granted loans amounting to $55m. at 3½% interest; the International Bank for Reconstruction and Development granted loans amounting to $60m. A British loan of £16·5m. granted in 1950 is to be repaid in 1962–67 at 3% interest. In 1955 the USSR advanced credits to the value of US$54m. and granted a loan of US$30m. at 2% interest.

Yugoslavia in 1960 resumed partial service on the sterling loans of 1909 and 1936; final settlement will be negotiated in 1964.

**DEFENCE.** *Army.* The Yugoslav Army comprises 8 army corps, of about 30 divisions.

*Navy.* The Navy comprises 3 destroyers, 3 escort destroyers (torpedo boats), 2 submarines, 70 motor torpedo-boats, 1 minelayer, 2 patrol vessels, 3 coastal minesweepers, 16 patrol boats, 28 inshore minesweepers, 3 mining tenders, 10 landing craft and 50 other vessels. Personnel in 1963: 27,000 officers and ratings.

*Air Force.* The Air Force has about 500 first-line aircraft and is organized in 2 Air Corps, with HQ at Zagreb and Zemun. There are 2 divisions of Russian-built MiG-19, Canadian-built Sabre Mk. 2 and 4 and F-86E Sabre jet interceptors, and 3 ground-attack divisions of F-84 Thunderjet fighter-bombers. Transport units fly Russian Il-14 and American-built C-47 twin-engined aircraft. Apart from T-33A jet advanced trainers, all training types are of national design. A number of Dragonfly and Whirlwind helicopters are in service.

**PRODUCTION.** *Planning.* A new 5-year plan of economic development was adopted on 27 Dec. 1960, for 1961–65. Industrial production is to increase annually (average) by 11%, and that of agriculture by 7·2%. Special care is to be taken of underdeveloped areas, for instance in Macedonia. A Danube–Tisa canal system is to be built.

*Agriculture.* Yugoslavia, with a total area of 25,580,400 hectares, had a cultivated area of 10·3m. hectares in 1962. A law of 22 May 1953 limits private land holdings to 10 hectares and provides for expropriation of larger estates. Compensation of 30,000–100,000 dinars a hectare of expropriated land will be paid over a period of 20 years.

Area (in hectares) and yield (in 1,000 metric tons) in 1962: Maize, 2·46m. (5,270); wheat, 2·13m. (3,510); barley, 0·35m. (475); rye, 0·18m. (169); tobacco, 37,400 (30); hemp, 48,700 (278); sunflower, 97,400 (161); potatoes, 301,000 (2,630).

Livestock, 15 Jan. 1963: 1·18m. horses, 5·4m. cattle, 10·1m. sheep, 5m. pigs.

The 1962 yield of fruit was as follows (in 1,000 metric tons): Apples, 177; pears, 101; grapes, 1,130; plums, 874; olives, 18; walnuts, 41·1; 5·2m. hectolitres of wine and 187,000 metric tons of sugar were produced.

There were, on 31 Dec. 1962, 2,882 peasant co-operatives with 1,397,465 members, using 19,764 tractors and 5,055 threshing machines.

*Forestry.* The forest areas of Yugoslavia consist largely of beech, oak and fir. The timber cut in 1961 was 8·7m. cu. metres; in 1962, 9·1m. cu. metres.

*Fisheries.* In 1962 the landings of fish were 30,385 metric tons (salt-water, 18,447; freshwater, 11,938). The number of fishing craft was 207 motor vessels (7,497 GRT) and 3,573 sailing and rowing vessels.

*Mining.* Yugoslavia has considerable mineral resources, including coal (chiefly brown coal), iron, copper ore, gold, lead, chrome, antimony and cement. The most important iron mines are at Vareš and Ljubija in Bosnia and there are also considerable siderite and limonite iron ores between Prijedor, Sanski Most and Topusko. Copper ore is exploited chiefly at Bor (Serbia). The principal lead mines are at Trepča and Mežice. Chrome mines are in southern Serbia (Kosovo, Metohija) and Macedonia (Skopje, Kumanovo). There are 2 antimony mines in western Serbia (Podrinje).

Mining output, in 1,000 metric tons, in 1961 (and 1962): Coal, 1,313 (1,187); lignite, 22,760 (23,507); coke, 1,099 (1,125); bauxite, 1,232 (1,332); mercury, 0·6 (0·6); salt, 161 (215); manganese ore, 14 (15); iron ore, 2,184 (2,190); copper ore, 3,236 (5,070); lead and zinc ore, 2,063 (2,239); chrome ore, 108 (97); antimony ore, 108 (117); barite, 104 (104); crude petroleum, 1,341 (1,525); pyrite concentrates, 364 (414); magnesite, 273 (373). In 1962, gold output was 76,755 troy oz.; silver, 4,083,345 troy oz.

*Industry.* The majority of industries are situated in the north-west part of the country.

Industrial output (in 1,000 metric tons) in 1961 (and 1962): Pig-iron, 997 (1,050); steel, 1,532 (1,595); cement, 2,336 (2,518); sulphuric acid, 254·8 (286·5); nitric acid, 8·4 (41·7); fertilizers, 436 (636); iron castings, 206 (203); steel castings, 26·6 (28·4). Fabrics (in 1m. sq. metres): Cotton, 269 (312); woollen, 43 (43); rayon, 22 (22); hemp, 8·8 (7·2).

*Electricity.* Generation of electricity in 1961 (and 1962) was 9,924m. kwh. (11,275m.), of which 5,658m. kwh. (6,851m.) was hydro-electric.

**Labour.** Employees in nationalized industries numbered 1,181,700 on 30 Sept. 1962.

**COMMERCE.** Foreign trade, in 1m. dinars, for calendar years:

The main imports (by value) in 1962 were (in 1m. dinars): Machinery and metal products, 81,366; textiles, 31,002; chemicals, 25,037; iron and steel, 24,527; foodstuffs, 13,188. The main exports: Timber, 22,995; agricultural produce, 5,139; non-ferrous metals, 18,961.

Total trade between Yugoslavia and UK, in £ sterling (British Board of Trade returns):

| | *1959* | *1960* | *1961* | *1962* | *1963* |
|---|---|---|---|---|---|
| Imports to UK . | 13,683,825 | 15,732,815 | 19,160,490 | 20,086,841 | 15,086,651 |
| Exports from UK . | 11,156,381 | 14,370,721 | 14,484,282 | 16,087,542 | 17,067,778 |
| Re-exports from UK | 266,705 | 380,311 | 786,094 | 516,370 | 417,351 |

**COMMUNICATIONS.** *Shipping.* In 1962 Yugoslavia possessed a total of 342 (1940: 210) vessels of 907,000 (1940: 374,391) gross tons.

In 1962, vessels of 24·3m. net tons entered the ports of Yugoslavia.

In 1962 Yugoslavia had 1,210 river craft. The length of the navigable rivers amounted to 1,844 km, that of canals to 191 km. There are 2 navigable lakes: Skadarsko (391 sq. km, of which 243 in Yugoslavia) and Ohridsko (348 sq. km, of which 230 in Yugoslavia).

*Railways.* In 1962 Yugoslavia had 11,792 km (1939: 9,647) of railway, carrying 9,586m. passenger-km, 15,033m. ton-km.

*Roads.* In 1961 there were 7,745 km of macadamized roads and 50,585 km of metalled roads. On 31 Dec. 1962 there were 97,942 passenger motor cars and 43,832 trucks and buses.

*Post.* There were in 1962, 3,176 post offices, 303,372 telephone subscribers; 8 large and 13 small broadcasting stations. Number of wireless licences at the end of 1962 was 2,078,175.

*Aviation.* The national airline, Jugoslovenski Aero Transport, in 1962 flew on its home services, 3,713,000 km and carried 226,681 passengers; international services, 3,523,000 km, 81,490 passengers and 1,229m. ton-km of goods. The chief airfields are Belgrade, Zagreb, Ljubljana, Sarajevo, Skopje, Dubrovnik and Titograd.

**MONEY AND BANKING.** On 1 Jan. 1952 the value of 1 *dinar*, divided into 100 *paras*, was fixed at 2·96223 milligrammes of fine gold instead of 17·7734 milligrammes as before. This raised the official exchange rate of the £ sterling from 140 to 840 dinars, and of the US$ from 50 to 300 dinars.

The National Bank issues coins of 50 paras and 1, 2, 5, 10, 20 and 50 dinars, and notes of 100, 500, 1,000 and 5,000 dinars.

Circulation of notes and coins, as of 31 Dec. 1962, was 283,797m. dinars. Short-term credits given by the National Bank amounted to 1,587,756m. dinars. Savings deposits totalled 148,400m. dinars at that date.

All banking was nationalized immediately after the War, with the banks passing completely into the hands of the State. The main bank of the country is the National Bank.

**WEIGHTS AND MEASURES.** The metric weights and measures have been in use since 1883. The *wagon* of 10 metric tons is used as a unit of measure for coal, roots and corn.
